#### BLOATED WITH DROPSY.

#### The Heart Was Badly Affected When the Patient Began Using Doan's Kidney Pills.

Mrs. Elizabeth Maxwell, of 415 West Fourth St., Olympia, Wash., says: "For over

three years ]

suffered with a

dropsical condi-

tion without be-

ing aware that

kidney trouble.

The early stages

were principally

backache and

bearing down

pain, but I went

was due to

along without worrying much until dropsy set in. My feet and ankles swelled up, my hands puffed and became so tense I could hardly close them. I had great difficulty in breathing, and my heart would flutter with the least exertion. I could not walk far without stopping again and again to rest. Since using four boxes of Doan's Kidney Pills the bloating has gone down and the feelings of distress have disappeared."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

#### Breeding Chinese Pheasants.

Present indications are that in a few years Minnesota will contain a good stock of Chinese pheasants as a result of the introduction of that gamy bird of beautiful plumage by the State Game and Fish Commission. The commission has 312 young birds ready for distribution in small quan-titles to points in the State where they can be guaranteed protection from hunters for 10 years, which the law allows them.

# Beware of Ointments For Catarrh That

Beware of Ointments For Catarrh That Contain Mercury. as mercury will surely destroy the sense of smell and completely derange the whole sys-tem when entering if through the mucous surfaces. Such stricles should nover be used treept on prescriptions from reputable phy-sicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Chenev, & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon t e blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure to get the genuine. It is taken in-ternally and made in Toledo, Ohio, by F. J. Cheney & Co. Tectimonials free Bold by Drugcists; price, 76c, per bottle.

Sold by Drugvists: price, 75c, per bottle, Take Hall's Family Fills for constipation.

#### Killing Game in Mexico.

A remarkable hunt which took place in the northern part of Coahul-la a few days ago is reported from clova, in that state. A party, of which about 75 were hunters, went on a deer hunt, through the mountains, being out eight days. The 75 hunters killed 800 deer, an average of 100 a day, or more than one deer a man a There has been some criticism on the part of many about this wholesale slaughter of deer, and it is urged that a game law should be passed in this country like those in other countries which expressly pro-hibit the wholesale slaughter of elaughter -Mexican Herald. game

#### Queer Way to Catch Fish.

The idea of catching fish by means beehive with a hole in the top t is a strange enough one. Yet says the Country Gentleman, not this equately describes the method emed by fishermen in the Philippine Islands, who clap their apparatus down over the sluggish bottom-feeding fish and then, putting their hands through the hole in the top, extract their vic-

#### Battleship Models.

By the English Admiralty's orders

# THE NEWEST HOUSEWIFE.

The very latest and up-to-date 'housewife" comes in the guise of a shopping bag covered with cretonne. Even the frame is covered and the handle is of the same material. It is so arranged that both sides let down, showing the needles, thread, scia-sors, thimble and all the other furnishings of the well-conditioned workbag, and it is really a workbag in its street clothes.

#### CLEANING HAIR BRUSHES.

Valuable brushes, such as those with ivory or tortoiseshell backs, may be thoroughly cleansed by using bran instead of soap and water. The brush is dipped into bran, which must be rubbed into the bristles as one would soap, and the particles may afterward be removed by tapping the brush bristles downward on the table. The process is somewhat lengthy, but it prevents the bristles from becoming softened, as they inevitably must be if wetted. When every trace of bran has been removed, the brush will be found to be perfectly clean, and may then be wiped with a soft silk handkerchief.

#### MEANING OF DOMESTIC ECON-OMY.

Did you ever ask yourself the meaning of the term domestic economy? Most likely you never did. Notwithstanding the growing popularity of this branch of study, there is no subject the name and nature of which is so generally misunderstood.

Some young women think it means "cookery and laundry lessons;" others think "scrapping and saving" would more fitly define it, while dim ideas of so-called mental duties and domestic drudgery float through the brains of others.

But these are "small nibblings at the outer bark" of the truth, which is that domestic economy is a saving knowledge, a knowledge which relates to the intelligent and cutlivated management of everything connected with the home,

It is the science of the home, and

pre-eminently a woman's science. It is the woman's work to make the house into a home. Every woman ought to know how to do all things necessary to make a home happy, says Woman's Life.

The husband earns the money, but the principal part of it has to be spent by the wife. Hence it is very important that all girls should learn do mestic economy, But please remem ber that domestic economy is one o those things that cannot be learne from books aolne.

## WINTER SALADS HOUSE.

Last fall I felt that in order to be perfectly happy in my garden I mus find a place for a cold house or pit. The house is a lean to 66 feet long and six feet wide. The terrace wall which is six feet high, was used as the back or high wall of the house The upper ends of the sashes rester on the top of the wall which was built up two inches with cement grooved to fit the sashes. The lower end of the sashes rested in a groove made of cement on a brick wall, which was two feet high. To cover this house I used 22 3 by 6 feet sashes. Sh of the sashes were cut and hinged perfect models are made in paraffin so they could be opened as needed wax of every new battleship before it for ventilation. The north end of the house was built up solid with brick, while a door was made in the south end. The walls are made of brick, washed down with cement. While I do not remember what the whole cost of the house was, I do know that all of the material used (excepting the sashes) was worth about \$60. This house has no fire heat, but derives its warmth from the During the cold weather the sun. sashes are covered at night with straw mats.-Garden Magazine, EMBROIDERED PINCUSHION. A long, narrow pincushion that is designed to stand against the back of the bureau is of white linen done in eyelet embroidery. The top is really a linen doily that is larger than the pincushion itself, so that a border is formed which is finished in an irregular scallop done in buttonhole stitch. Slits are cut and buttonholed in the top and ribbon is run through them and tied in two stiff little bows at the top and bottom, directly in the center. The cover is made up over a colored silk lining the same shade as the ribbon, which gives an opportunity for carrying out the color scheme of a bedroom.

# FINANCE AND TRADE REVIEW

NEW YEAR PROMISES MUCH

No Excessive Stocks Carried Over and Results of Inventories Equal Sanguine Anticipations.

R. G. Dun & Co.'s "Review of Trade" says:

"The New Year opens bright with promise in business circles no excessive stocks being carried over, and results of inventories fully equal sanguine anticipations. It is especially noticeable in dispatches from the West that there was less than the customary lull in business during the holiday season, while bargain sales are rapidly disposing of the moderate supplies remaining on hand.

"In the leading industries contracts on the books are very large and plants operate full time, except where materials or fuel cannot be secured or finished products cannot be forwarded to consumers. There is much com-plaint from the Northwestern flour mills on this point and export trade is also restricted because grain and other merchandise fail to reach the seaboard promptly. This delay may be attributed part of the decrease of \$1,749,665 in exports from the port of New York for the last week as compared with the movement a year ago, while imports exceeded the very heavy total for the previous year by \$1,-581,590.

"Many new contracts for a large tonnage of steel appeared during the past year, notably structural materlal for San Francisco. Railway re-quirements show no abatement, few contracts being considered, however, except for delivery in the last half of this year.

"Prices of pig iron have risen close to the position of 1900, but finished products are still much lower as to standard figures.

"Meanwhile the railroads do not move the pig iron as desired and many mills are running on light stocks. Tin plate mills have small stocks and large orders, making prices strong, but tin was depressed by large statistics of

visible supply. "Business in the primary market for textiles has been interrupted by the holidays and inventories, but work is progressing in preparation of new lines for the coming season. A few sales of sheetings have been made to China, the first export business from that quarter for a long time, and more orders could have been secured by the making of moderate concessions.

# HUMAN RACE DYING OUT. Dr. Meslier Finds the Birth Rate is Decreasing Rapidly in Nearly

Every Land. The statistics just published by Dr. Meslier on the depopulation of the whole world are startling.

Dr. Meslier says that this is not only caused by artificial means, but also because the whole human race is gradually dying out. Taking the years of 1881 to 1903 he says that for every thousand married women from 15 to 55 years of age taken from different countries the births have de creased in England 18 per cent, 10 per cent in Scotland, 10 per cent in Bavaria, 7 per cent in Italy, 7 per cent in Sweden, 11 per cent in Russla, 17 per cent in France, 17 per cent in Denimark, 18 per cent in New Zea-land, 24 per cent in Saxony, 25 per cent in the state of Victoria and 23 per cent in New South Wales.

#### Smokeless Powder.

The color of the modern smokeless powder has the shade of dark amber In the sense of a powder being a fine ly divided solid, smokeless powder is no powder at all. It consists of a waxlike composition, the size of the "grains" varying according to the calibres of the guns. For use in revolvers, rifles and sporting guns, the grains resemble the tiny perforated glass beads of the sort used in old-time needlework. For the machine guns, the rapid-fire guns and the heavy rifles of battleships and forts, the grains are cylindrical in shape, vary ing in size from a third of an inch in diameter and half an inch in length to three-fourths of an inch in diameter and about two inches in length —each grain, in order to increase the area exposed to ignition, being perforated equi-distantly and longitudin ally with from one to six holes, big as knitting needles, depending upon the size of the grain.

Snake Worship in India.

Snakes, the objects of terror to most Europeans in eastern lands, are worshiped in many parts of India, In some districts there are from 15,000 to 20,000 shrines dedicated exclusively to the worship of snakes. These shrines, which are invariably in honor of one of the miner divinities of the country, possess, in some instan-ces, valuable properties for their maintenance and for the cost of the numerous ceremonies which their keepers have to perform. In these shrines the Hindus set up fantastic idols of serpents. The devotees of this strange religion make periodical offerings of dough and milk and cooked rice to the serpents living in the shrine in order to receive their favor .--- Kansas City Journal.

### The English Idiom.

Our English idiom is perhaps no worse than that of other people's languages, but it sometimes leads even the native into strange sayings, which he does not realize until it is point-ed out to him. "Can you tell me where I can take an omnibus to Islington?" asked the countryman of a policeman. "I can tell where there is an omnibus that will take you," answered that precise official. Leaving this to sini: in he then added more kindly: "Want to go to Islington?" "I don't want to go to Islington, but I have to go."-London Chronicle.

# What is Pe-ru-na?

is it a Catarrh Remedy, or a Tonic, or is it Both?

Some people call Peruna a great tonic. Others refer to Peruna as great catarrh remedy.

Which of these people are right? Is it more proper to call Peruna a catarrh remedy than to call it a tonic?

Our reply is, that Peruna is both a tonic and a catarrh remedy. Indeed, there can be no effectual catarrh remedy that is not also a tonic.

In order to thoroughly relieve any case of catarrh, a remedy must not only have a specific action on the mucous membranes affected by the catarrh, but it must have a general tonic action on the nervous system.

Catarrh, even in persons who are otherwise strong, is a weakened condition of some mucous membrane. There must be something to strengthen the circulation, to give tone to the arteries, and to raise the vital forces.

Perhaps no vegetable remedy in the world has attracted so much attention from medical writers as HYDRASTIS CANADENSIS. The wonderful efficacy of this herb has been recognized many years, and is growing in its hold upon the medical profession. When joined with CUBEBS and COPAIBA a trio of medical agents is formed in Peruna which constitutes a specific remedy for catarrh that in the present state of medical progress, cannot be improved upon.. This action, reinforced by such renowned tonics as COLLINSONIA CANADENSIS, CORYDALIS FORMOSA and CEDRON SEED, ought to make this compound an ideal remedy for catarrh in all its stages and locations in the body.

From a theoretical standpoint, therefore, Peruna is beyond criticism. The use of Peruna confirms this opinion. Numberless testimonials from every quarter of the earth furnish ample evidence that this judgment is not over enthusiastic. When practical experience confirms a well-grounded the ory the result is a truth that cannot be shaken.

Enterprise That Counts.

The windstorm the other day blew off the door of James T. Proctor's barn, but within 10 hours he had a man at work fixing it on again, and told him to never mind the cost. It is such enterprise that has made Midnapore what it is today and makes her such a formidable rival to Okotoka .--- Midnapore . (Alberta) Gazette.

#### Safe, Sure and Speedy.

Safe, Sure and Speedy. No external remedy ever yet devised has so fully and unquestionably met these three prime conditions as successfully as Allocok's Plasters. They are safe because they contain no deleterious drugs and are manufactured upon scientific principles of medicine. They are sure because nothing goes into them except ingredients which are exactly adapted to the purposes for which a plaster is required. They are speedy in their action because their medic-inal qualities go right to their work of relieving pain and restoring the natural and healthy performance of the functions of muscles, nerves and skin. Allocok's Plasters are the original and genuine porous plasters and like most meritorious art-cles have been extensively imitated, therefore always make sure and get the genuine Allocok's.

#### Animal Thieves of Africa.

The northwestern district of Rhodesia in particular abounds in every description of big game—clé in phant, hippotamus, giraffe, zebra, llon, buffalo, rhinoceros and antelope, with

other members of the deer family too numerous to mention. Even from the railway great herds of game can be seen and are in some cases quite a nuisance.

The elephants, for instance, have some rooted and unaccountable objections to the mile pegs by the railway line, and cause endless annoyance by their habit of pulling them out of the ground with their trunks. baboons, too being expert The seldom handled by the butchers who sell horse meat. thieves, and even burglars, are a considerable nuisance, particularly to of whose goods they storekeepers, manage to filch a surprising quan-

hunting is a An epidemic of mararial fever ex- lar sport, and the quarry is abundists at Tananarivo, Madagascar, a city of 60,000, which has resulted in the death rate averaging 800 a month. In fact, as to be dangerous on occasion. No single man, even though armed with a rifle, will venture to molest a troop of baboons on the raid. Another nuisance to farmers is the tebi cat, a little tigerish beast which causes great havoc in unprotected fowl

The secretary bird is so called be-cause it has upon its head feathers which suggest a pen behind the ear. Indigenous to South Africa, it is a British subject now, and is represented in the London Zoo.

Piles Cured in 6 to 14 Days. Page Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or movey refunded. 50c.

#### Earth's Interior Iron.

Frequent earthquakes of late have enormously increased scientific curiosity about the earth's interior. On this subject Sir Oliver Lodge observes in Nature that "it has long been suspected that the earth is an iron planet, and now, through the work of Strutt and others, the evidence both for and against is intensifying. It is just worth noting, as a matter of simple arithmetic, that a core of metallic iron of density 7, covered with a crust of rock 500 miles thick, of density 2.5, together make up average terrestrial density 5.6, but recent evidence points to a crust much thinner than the above. It is to be hoped that the 'boring' proposals of the Hon. Charles Parsons will before long attract the attention they deserve.'

#### Consumption of Matches.

It is estimated that the United Kingdom alone manages to consume 500,-000,000 matches a day, which comes out at about 12 for every man, woman and child. Smokers probably account for the greater number, so that they will be interested to know that about 90 tons of wood are used up in the form of matches every day, or about 30,000 tons a year. If one day's consumption of matches were placed end to end they would extend for a distance of about 15,000 miles. Sweden and Norway, where matches are made in enormous quantities, export over 25,000 tons of wooden matches every year. In France, where the tax on matches averages 8 cents

is laid down, and these models are tested in a tank, being 400 feet long and 20 feet wide. They are made of wax because it is a material which does not absorb water or change its weight, so that alterations can be easily made and the material can be melted up and used again.

#### NEVER TIRES

Of the Food That Restored Her to Health.

"My food was killing me and I didn't know the cause," writes a Colo. young lady: "For two years I was thin and sickly, suffering from indigestion and inflammatory rheumatism

"I had tried different kinds of diet, plain living and many of the remedies recommended, but got no better.

"Finally, about five weeks ago, mother suggested that I try Grape-Nuts, and I began at once, eating it with a little cream or milk. A change for the better began at once.

"To-day I am well and am gaining weight and strength all the time. I've gained 10 lbs, in the last five weeks, and do not suffer any more from indigestion and the rheumatism is all gone.

"I know it is to Grape-Nuts alone that I owe my restored health. I still eat the food twice a day and never tire of it." Name given by Postum Co., Battle Creek, Mich.

The flavor of Grape-Nuts is peculiar to itself. It is neutral, not too sweet and has an agreeable, healthful quality that never grows tiresome.

One of the sources of rheumatism is from overloading the system with acid material, the result of imperfect digestion and assimilation.

As soon as improper food is abandoned and Grape-Nuts is taken regularly, digestion is made strong, the organs do their work of building up good red blood cells and of carrying way the excess of disense-making material from the system.

The result is a certain and steady return to normal health and mental "There's a reason." Rend the little book, "The Road to Wellville," in pkgs.

#### RECIPES

Lemon Ice Cream .- Squeeze a lemon and strain the juice upon as much fine sugar as it will absorb, pour 3 quarts of cream into it very slowly, stirring fast all the time. Anothe simple but very good recipe is: Heat a quart of milk hot, but do not let it boil. Add the yolks of 4 eggs, beaten with a coffee cup of sugar, and flavor with lemon or vanilla. Chocolate cream can be made by adding some powdered chocolate and mix be fore freezing. Also peaches or straw berries can be used for a change,

The society reporters always speak of a bride being "led to the altar," just as though a bride couldn't find her own way there blindfolded, remarks the Philadelphia Record.

#### Nome Means "Home."

It is said that the name of Nome was the result of an error made by some Englishman in writing a letter. He evidently intended to write the word "home," but the makers of the maps read it Nome, and thus the name of Nome belongs to history and the great district of Alaska. Some authorities claim that the word Nome is a corruption of the Indian phrase or word knoma, meaning something like "I know it."-National Magazine.

ALMOST A SOLID SORE.

Skin Disease From Birth-Fortune Spent on Her Without Benefit-Doctor Cured Her With Cuticura.

"I have a cousin in Rockingham Co. who once had a skin disease from her birth til she was six years of age. Her father had spent a fortune on her to get her cured and none of the treatments did her any good. Old Dr. G- suggested that he try the Cuticura Remedies, which he did. When he commenced to use it the child was almost in a solid scab. He had used it about two months and the child was well. I was there when they commenced to use your Cuticura Remedics. I stayed that week and then returned home and stayed two weeks and then went back and stayed with them two weeks longer and when I went home I could hardly believe she was the same child. Her skin was as soft as a baby's without a scar on it. I have not seen her in seventeen years, but I have heard from her and the last time I heard from her she was well. Mrs. W. P. Ingle, Burlington, N. C., June 16, 1905 "

## "The Blood is The Life."

Science has never gone beyond the above simple statement of scripture. But it has illuminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad " or impure it is not alone the body which suffers through disease. The brain is also through disease. The brain is also clouded, the mind and judgement are enected, and many an evil deed or impure thought may be directly traced to the impurely of the block Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It enriches and purifies the blood thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood.

• • • • • • • • larged glands, open eating ulcers, or old sores, the "Golden Medical Discovery "has performed the most marvelous cures. In cases of old sores, or open eating ulcers, it is well to apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood cleansing constitutional treatment. If your druggist don't happen to have the "All-Healing Salve" in stock, you can easily procure it by inclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the "Golden Medical Discovery."

۲ ۲ . . . You can't afford to accept any medicina of unknown composition as a substitute for "Golden Medical Discovery," which is medicine OF KNOWN COMPOSITION. having a complete list of ingredients in plain English on its bottle-wrapper, the same being attested as correct under onth. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.
