

The Knock-out Blow.

The blow which knocked out Corbett was a revelation to the prize fighters. From the earliest days of the ring the knock-out blow was aimed for the jaw, the temple or the jugular vein. Stomach punches were thrown in to worry and weary the fighter, but if a scientific man had told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing home to the public a parallel fact; that the stomach is the most vulnerable organ out of the prize ring as well as in it. We protect our heads, throats, feet and lungs, but the stomach we are utterly indifferent to, until disease finds the solar plexus and knocks us out. Make your stomach sound and strong by the use of Doctor Pierce's Golden Medical Discovery, and you protect your most vulnerable spot. "Golden Medical Discovery" cures "weak stomach," indigestion, or dyspepsia, torpid liver, bad, thin and impure blood and other diseases of the organs of digestion and nutrition.

The "Golden Medical Discovery" has a specific curative effect upon all mucous surfaces and hence cures catarrh, no matter where located or what stage it may have reached. In Nasal Catarrh it is well to cleanse the passages with Dr. Sage's Catarrh Remedy fluid while using the "Discovery" as a constitutional remedy. Why the "Golden Medical Discovery" cures catarrhal diseases, as of the stomach, bowels, bladder and other pelvic organs will be plain to you if you will read a booklet of extracts from the writings of eminent medical authorities, enclosing its ingredients and explaining their curative properties. It is mailed free on request. Address Dr. R. V. Pierce, Buffalo, N. Y. This booklet gives all the ingredients entering into Dr. Pierce's medicines from which it will be seen that they contain not a drop of alcohol, pure, triple-refined glycerine being used instead.

Dr. Pierce's great thousand-page illustrated Common Sense Medical Adviser will be sent free, paper-bound, for 21 cent stamps, or cloth-bound for 31 stamps. Address Dr. Pierce as above.

Israel Munson Spelman, Harvard's oldest living graduate, celebrated his 90th birthday on December 36. He is a graduate of the class of '36. He was at one time President of the Boston & Maine railroad.

FITS, ST. VITUS' DANCE, Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. H. B. Kline, Ltd., 931 Arch St., Phila., Pa.

Large sardine canneries have been started at Nagasaki, Japan, with a view of exporting the fish to Europe.

To Cure a Cold in One Day Take Laxative Bromo Quinine Tablets. Druggists refund money if it fails to cure. E. W. Grove's signature is on each box. 25c.

Civilizing the Indians.

The effect of education and of contact with a few of the better elements of our civilization were noticeable at Albany and Moose Factory. There was a certain degree of cleanliness in the preparation of food, the Indians were better dressed, and, although the fur trade is a sort of slavery, a greater self-reliance was apparent. The crew that took the commission from Moose Factory to Abitibi were content in their vesper, and every evening recited a litany, sang a hymn, and made a prayer. There was something primitive and touching in their devotion, and it marks an advance, but these Indians are capable of leaving a party of travelers suddenly, returning to Moose Factory in duceon if anything displeases them, and the leader of the prayers got much the better of one of the party in an affair of peltries. But any forecast of Indian civilization which looks for final results in one generation or two is doomed to disappointment.—Scribner's Magazine.

School for Russian Policemen. The Russian Government has established a police academy in St. Petersburg, where the policeman is carefully drilled in the ways of burglars, coiners, bank note forgers, bomb makers and the like, the lessons being illustrated and rendered more practical by a personal handling of the appurtenances of crime contained in the museum attached to the academy. Duly qualified inspectors—specialists in particular branches of crime—preside over each lesson.—Reader.

MAY BE COFFEE

That Causes All the Trouble.

When the house is afe, it's like a body when disease begins to show, it's no time to talk, but time to act—delay is dangerous—remove the cause of the trouble at once.

"For a number of years," says a Kansas lady, "I felt sure that coffee was hurting me, and yet I was so fond of it I could not give it up. I paltered with my appetite, and of course yielded to the temptation to drink more. At last I got so bad that I made up my mind I must either quit the use of coffee or die.

"Everything I ate distressed me, and I suffered severely almost all the time with palpitation of the heart. I frequently woke up in the night with the feeling that I was almost gone—my heart seemed so smothered and weak in its action that I feared it would stop beating. My breath grew short and the least exertion set me to panting. I slept but little and suffered from rheumatism.

"Two years ago I stopped using the old kind of coffee and began to use Postum Food Coffee, and from the very first I began to improve. It worked a miracle! Now I can eat anything and digest it without trouble. I sleep like a baby, and my heart beats full, strong and easily. My breathing has become steady and normal, and my rheumatism has left me. I feel like another person, and it is all due to quitting coffee and using Postum Food Coffee, for I haven't used any medicine and none would have done any good as long as I kept drugging with coffee." Name given by Postum Co., Battle Creek, Mich. "There's a Reason." Read the little book, "The Road to Wellville," in pkgs. All grocers.

A Great Farm Nuisance.

One of the greatest nuisances in farming is the way in which weeds are encouraged and protected in the corners of the fences and in the vicinity of fences, from which places their seed is scattered over the surrounding lands. The extent to which weeds are scattered from one field to another by high winds proves that one negligent farmer may annoy hundreds of others by failing to exterminate the foul herbage.

Prevents Freezing.

The water that flows through the underdrains is warmer than the air all through the winter. In the very coldest weather a good outflow will not freeze at the mouth of a deep drain, nor usually for several feet below. When airholes are made down to the drain, at any place over a deep drain, the snow will be melted away and a perceptible warmth will be felt, especially before the soil has been deeply frozen. The warm air of winter drains penetrates more deeply a well drained soil and the heat thus accumulated is only gradually given off when severe freezing occurs on the surface.

Selecting Pure Breeds.

The selection of superior animals is done more carefully at present than formerly. Color has largely been the guide in determining the merits as well as the price of some of the pure-bred animals. Where the markings have much to do with the price to a fancier, the case is somewhat different and it may be well enough to be governed, to a great extent, by those markings, or "points," laid down in some recognized "standard," but when considering the selection of the best specimens for utilitarian purposes it is not the best policy to adhere too closely to any fashionable color or marking, for it does not alter the economic—the real—value. No matter if a horse does have a "blaze" face and three white feet." If he can trot low down in the "teens" and the would-be purchaser desires speed, a high price can always be secured for him. If a Jersey cow is "off color," and does not have the "black tongue and switch," provided she not only produces extra fine calves, but is an exceptionally good and heavy butter producer, she will bring a good price, if the owner can be induced to part with her, which is not often the case. To secure uniformity of breed characteristics it may be well enough to adopt characteristic marks and colors in certain breeds of live stock but, in some instances it has been carried to an extreme. What should be desired is an animal bred for "business" first and after that may follow the "fancy points." The farmer, who is not always partial to "points," will be willing to pay a good price for an animal of any breed, if he is certain that it can accomplish more than that derived from ordinary stock.—Philadelphia Record.

The Real Value.

The different parts of an animal are valuable in proportion to the choice cuts that can be secured. In a fat animal the position of the flesh on the carcass is a great consideration. The finest meat is claimed to be on the fore and middle ribs, and on the loins and rump. Consequently the steer that carries the largest quantity of beef on these parts is the most valuable. The other parts of various qualities, and used for soups and salting, do not bring the high price of the parts described. The point on top of the rump is the first part of a feeding steer that shows the fat, and the parts that are last in being covered with flesh are the top of the shoulder and the point of the shoulder joints. When these points are felt to be well covered, then the other and better parts may be considered to be in perfection and a prime condition may be expected. But the general handling must establish the real condition, for there is a wide difference between the apparent and real features of a steer. The flesh of a steer that appears very fat to the eye may feel loose and flabby, but a truly fattened animal always feels "hand fat." Such handlers never deceive the butchers, while loose fattenings never produce the best quality of meat. The farmer who becomes interested in producing choice cattle of the beef breeds should adhere closely to the selected breed. A breed of cattle adapted for the production of beef cannot be improved with a breed adapted for milk and butter production. It is better to use each breed for what it is intended, as it will excel in one line only, being destroyed whenever an attempt is made to secure an "all-purpose" animal.—Philadelphia Record.

Duration of Fertilizers.

Regarding the duration of fertilizers in the soil, after application, experiments made in England demonstrated that lime, when applied to hill pasture, is supposed to last fifteen years, one-twentieth to be exhausted the first year and one-tenth each year up to the seventh, inclusive; one-twentieth from the eighth to the thirtieth in-

clusive and one-fourth each of the remaining two years; when applied to permanent grass other than hill pasture it is held to last for 12 years, one-tenth being exhausted each of the first eight years and one-twentieth each of the last four; and when applied to arable or meadow land, to be exhausted in eight years, one-tenth the first, two-tenths each the second and third and one-tenth each of the remaining four years.

Undissolved bones, applied to permanent pasture, will last for ten years, the rate of exhaustion to be similar to lime on arable land. When applied on arable land in rotation of crops, bones are supposed to be exhausted at the rate of five-tenths the first, two tenths each of the second and third and one-tenth the fourth and when applied to meadow land are supposed to exhaust at the rate of four-tenths each the first and second years and two-tenths the third year.

Superphosphates on arable land, disappeared it is assumed, at the rate of eight-tenths the first year and two-tenths the second. Nitrate of soda and sulphate of ammonia, being very soluble go with one crop.

The manure residue of purchased cakes, etc., consumed on permanent pasture is supposed to have effect for five years—one-tenth going the first year, three-tenths each for the next two years, two-tenths the fourth year and one-tenth the fifth year; but on meadow land the duration is three years—five-tenths being exhausted the first year, three-tenths the second and two-tenths the third. These results are not conclusive, but are valuable for comparison.

A mixture of two bushels of ground plaster with thirty bushels of wood ashes is one of the best fertilizers that can be applied to the clover field and it should be put on early, being evenly broadcasted. This work should be done on a damp day and the rains will carry it down. The effect of the application will be noticed during the whole season.

Farm Topics.

Sulphur, or snuff, rubbed through the fleece will destroy ticks.

Hens that lay soft eggs are generally quite fat from too much grain feed alone.

Never use coal oil or grease of any kind on a sitting hen, as it prevents the eggs from hatching.

Corn should be restricted to the fattening flock, and then must be fed with a nitrogenous food, such as clover hay.

The best single grain for breeding sheep is oats. Bran is also good for breeding ewes to stimulate them and produce strong lambs.

The value of any kind of farm stock depends upon the progress made by each animal during the first year of its life whether purchased or not.

If a hen lays one egg a week she will pay all expenses of her keep. Every egg over is a profit. The greater the number of eggs received the lower the cost of each egg proportionately.

Whether pure breeds or grades, the chickens, ducks, geese and turkeys on the farm make a marked comparison with those bred without regard to merit, and every farmer should breed to improve.

Onions should go in rich ground, but the most important work with growing them is to get them planted early and to keep the ground clear of weeds at the beginning. It is the quick start that makes the onion crop large.

The colors of red and violet are rendered extremely brilliant, it is said, by covering the earth in their pots with about one-half inch of pulverized charcoal. But the charcoal will not affect a yellow flower at all in this way.

A few guinea fowls on the farm are worth something to keep hawks away, and they are still more valuable as bug catchers in the garden. They don't scratch like other fowls, and for this reason they may be permitted to forage among delicate plants.

An acre of rich clover will pasture eight shoats from spring to autumn. If good stock these should gain 100 pounds each. Can pork be made as cheaply in any other way, or is there any other means by which an acre of clover can be made to pay so well?

Jumping from shallow to deep plowing all at once usually results in decreased crop yield at the succeeding harvest. The soil should be gradually deepened by letting the plow bring up a little of the subsoil each year until the desired depth is reached.

If you have a pear tree that bears cracked fruit, scatter wood ashes over all the surface of the ground under the tree out about two feet beyond the outer limbs; then at fruiting time note the result. If the ashes can be stirred two or three inches into the soil all the better.

Comfort and convenience are most essential features to the country home and if the farmer would keep the wrinkles of care from his brow and have those about him happy and contented he will look to these matters carefully and well. As a usual thing they are entirely overlooked.

Children Overtaxed. Professor Czerny of Breslau remarks with reference to the complaint that children are overburdened with work in school and at home, that the chief harm is done by allowing children to associate with persons older than themselves, which tends to overstimulate their minds. They should spend most of their time with other children of the same age.

FEARFUL BURNING SORES.

Boy in Misery 12 Years—Eczema in Rough Scabies, Itching and Inflamed—Cured by Cuticura.

"I wish to inform you that your wonderful Cuticura has put a stop to twelve years of misery I passed with my son. As an infant I noticed on his body a red spot and treated same with different remedies for about five years, but when the spot began to get larger I put him under the care of doctors. Under their treatment the disease spread to four different parts of his body. The longer the doctors treated him the worse it became. During the day it would get rough and form like scales. At night it would be cracked, inflamed and badly swollen, with terrible burning and itching. When I think of his suffering, it nearly breaks my heart. His screams could be heard downstairs. The suffering of my son made me full of misery. I had no ambition to work, to eat, nor could I sleep. One doctor told me that my son's eczema was incurable, and gave it up for a bad job. One evening I saw an article in the paper about the wonderful Cuticura and decided to give it a trial. I tell you that Cuticura Ointment is worth its weight in gold, and when I had used the first box of Ointment there was a great improvement, and by the time I had used the second set of Cuticura Soap, Cuticura Ointment and Cuticura Resolvent my child was cured. He is now twelve years old, and his skin is as fine and smooth as silk. Michael Steinman, 7 Sumner Avenue, Brooklyn, N. Y., April 16, 1905."

Travel on Land and Sea.

The sea has figured in human records as an insatiable monster and in poetry as being possessed of a consuming hunger for its toll of sailors and voyagers. Last year 471 "souls were lost at sea," 257 on the Atlantic, 88 on the Pacific and 126 on the Great Lakes in the marine commerce and travel of the six nations. Less merciful by far were the railroads. During the same year 4,200 passengers and employees were killed by the railroads of the United States alone, and some 750 in Canada, while more than 62,000 were injured. One million humble immigrants were carried across the Atlantic without a single loss of life by drowning. Several hundred immigrants were killed on the journey inland. Great fear is expressed by many whose timidity prevents them from venturing upon the water in a modern ship that the vessel may strike a rock, collide with some nameless and formless mass of founder in the tremendous sea. The real fears should be aroused on boarding the modern train with its record of human lives.—Detroit Free Press.

AILING WOMEN.

Keep the Kidneys Well and the Kidneys Will Keep You Well.

Sick, suffering, languid women are learning the true cause of bad backs and how to cure them. Mrs. W. G. Davis, of Groesbeck, Texas, says: "Backaches hurt me so I could hardly stand. Spells of dizziness and sick headaches were frequent and the action of the kidneys was irregular. Soon after I began taking Doan's Kidney Pills I passed several gravel stones. I got well and the trouble has not returned. My back is good and strong and my general health better." Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Safe Filled With Jewels. Queen Alexandria has a safe full of diamonds and pearls. She owns some wonderful colored gems, rubies, sapphires and emeralds, and the Koh-i-Noor, the property of the British crown, has been reset for her. But the jewel she values most of all is her engagement ring—set with a beryl, an emerald, a ruby, a topaz, a jacinth and another emerald.

The daughter of Grand Duke Peter Nicolavitch of Russia is 14 years old. She speaks Servian, Italian and French, and is thought the cleverest royal schoolgirl in Europe.

Artificial silk is made from wool pulp in Sweden. The imitation is excellent, but it is found that many dresses made from it have been discarded because the creases made when the wearers sit down do not come out. It is scarcely possible to distinguish the real from the artificial silk, but this defect has proved fatal for use as dress pieces.

Piles Cured in 6 to 14 Days. Pazo Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

Polar seas are shallower than tropical seas.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

England's potato crop averages over six tons an acre. Russia grows barely two tons to the acre, and Italy little over one and three-fourths tons.

Before You Paint, This Spring

bear in mind the fact that it costs you as much if not more to paint your buildings with inferior paints than it would to use paints of good quality. More harm and dissatisfaction is caused by the use of poor paints than almost any other article used for preserving or beautifying property.

Buffalo A.O. Paints

are the highest grade paints made. They contain the purest and most lasting pigments ground in Aged Linseed Oil in correct proportion, are honestly made, cost no more than inferior paints and stand every test for exterior and interior work. Before you decide on the kind of paint to use, it will be to your interest to send for our 1907 color chart of the latest shades for modern uses, also valuable information and paint facts that you ought to know.

We want every owner of a building in this locality who sends us his name and address to have one of our beautiful Buffalo-head souvenir silvered stick pins. The pin is neat and unique in appearance and will be sent without charge, if name is received before April 1st.

BUFFALO OIL PAINT & VARNISH CO., BUFFALO, N. Y. CHICAGO, ILL.

34 YEARS SELLING DIRECT
Our vehicles and harnesses have been sold direct from our factory since for a third of a century. We stop for examination and approval and guarantee satisfaction. If not satisfied as to style, quality and price.
We Are The Largest Manufacturers In The World selling to the consumer exclusively. We make 200 styles of Vehicles, of styles of Harness, Sleds, Carriages, and many more.
Elliott Carriage & Harness Mfg. Co.,
Elliott, Indiana
No. 811, Canopy Top Buggy with Automatic Style Saddle, Price \$77.50.
No. 800, Combination Sled and Sleigh Wagon, Price \$25.00.

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One tin, package colors all fibers. They dye in cold water better than any other dye. You can dye any garments without mangle apart. Write for free booklet—How to Dye, Bleach and Mix Colors. BUNROX DRUG CO., Uniontown, Missouri

MOTHERHOOD

The first requisite of a good mother is good health, and the experience of maternity should not be approached without careful physical preparation, as a woman who is in good physical condition transmits to her children the blessings of a good constitution.

Preparation for healthy maternity is accomplished by Lydia E. Pinkham's Vegetable Compound, which is made from native roots and herbs, more successfully than by any other medicine because it gives tone and strength to the entire feminine organism, curing displacements, ulceration and inflammation, and the result is less suffering and more children healthy at birth. For more than thirty years

Lydia E. Pinkham's Vegetable Compound

has been the standby of American mothers in preparing for childbirth. Note what Mrs. James Chester, of 427 W. 35th St., New York says in this letter:—Dear Mrs. Pinkham:—I wish every expectant mother knew about Lydia E. Pinkham's Vegetable Compound. A neighbor who had learned of its great value at this trying period of a woman's life urged me to try it and I did so, and I cannot say enough in regard to the good it did me. I recovered quickly and am in the best of health now."

Lydia E. Pinkham's Vegetable Compound is certainly a successful remedy for the peculiar weaknesses and ailments of women. It has cured almost every form of Female Complaints, Dragging Sensations, Weak Back, Falling and Displacements, Inflammation, Ulcerations and Organic Diseases of Women and is invaluable in preparing for Childbirth and during the Change of Life.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

Cold Air About Equator.

At the international conference on scientific aeronauts, held recently in Milan, Mons. Teisserenc de Bort presented some interesting results of the expedition to the equatorial regions of the Atlantic organized by himself and Lawrence Reoth. Contrary to expectation, he said, they had found far lower temperatures in the upper air above the equator than at corresponding elevations in temperate latitudes. At the equator the temperature goes on decreasing up to the greatest elevations attained by kites and balloons. At the height of eight to eight and one-half miles temperatures were recorded as low as minus 80 degrees Centigrade, or 112 degrees Fahrenheit below zero.—Philadelphia Record.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

Life Without Mind.

In the course of the recent sojourn of King George of Greece in Paris a long article was published in a newspaper of that city, dealing with the conditions in the island of Crete. The article bore the signature of one of the editors, but it has been learned since that the signature was fictitious and that its true author was the King. King George is not the first monarch to avail himself of an opportunity to publish his views on a pending question of the day.

Artificial Silk.

Artificial silk is made from wool pulp in Sweden. The imitation is excellent, but it is found that many dresses made from it have been discarded because the creases made when the wearers sit down do not come out. It is scarcely possible to distinguish the real from the artificial silk, but this defect has proved fatal for use as dress pieces.

Piles Cured in 6 to 14 Days. Pazo Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

Polar seas are shallower than tropical seas.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

England's potato crop averages over six tons an acre. Russia grows barely two tons to the acre, and Italy little over one and three-fourths tons.

Consul General A. L. M. Gottschalk of Mexico City, states that it is estimated Mexico will produce 50 per cent more copper this year than it has in any previous year.

Caution.

Imitations have been placed upon the market so closely resembling Alcock's Plasters in general appearance as to be well calculated to deceive. It is, however, in general appearance only that they compare with Alcock's, for they are not only lacking in the best elements which have made Alcock's so efficient, but are often harmful in their effects. Remember that Alcock's are the original and only genuine porous plasters—the best external remedy known—and when purchasing plasters the only safe way is to always insist upon having Alcock's.

Loans are freely made by the Philippine commission to the various provinces for the erection of public buildings in the islands.

FROST BITES

BITES

For winter irritations of the skin, eczemas, rashes, frost bites, chappings, chafings, itchings, redness and roughness, especially of face and hands, for lameness and soreness incidental to winter sports, for sanative, antiseptic cleansing, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery, Cuticura Soap, assisted by Cuticura Ointment, is priceless. Guaranteed absolutely pure, and may be used from the hour of birth.

Sold throughout the world. Deposits: London, 27 Charterhouse Sq.; Paris & Rue de la Paix; Australia, H. J. Turner & Co., Sydney; India, R. A. Fane, Calcutta; China, Hong Kong Drug Co.; Japan, Matsuyama, Ltd., Tokyo; Russia, Ferris, Moscow; South Africa, Lemmon, Ltd., Cape Town; etc.; U. S. A., Potter, Drug & Chem. Corp., Sole Proprietors, Boston. See Post-free Cuticura Booklet, 4 pages.

Paxtine

TOILET ANTISEPTIC cleanses and heals mucous membrane affections such as nasal and pelvic catarrh, sore throat, canker sores, inflamed eyes, and is a perfect dentifrice and mouth wash.

Paxtine makes an economical medicinal wash of extraordinary cleansing and germicidal power, warm direct applications of which are soothing, healing and remarkably curative. At druggists or by mail, 50c. Sample free. The R. Paxton Company, Boston, Mass.

P. N. U. 6, 1907.

Thompson's Eye Water

If afflicted with weak eyes, use Thompson's Eye Water.
