

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Is acknowledged to be the most successful remedy in the country for those painful ailments peculiar to women.

For more than 30 years it has been curing Female Complaints, such as Inflammation, and Ulceration, Falling and Displacements, and consequent Spinal Weakness, Backache, and is peculiarly adapted to the Change of Life.

Records show that it has cured more cases of Female Ills than any other remedy known.

Lydia E. Pinkham's Vegetable Compound dissolves and expels Tumors at an early stage of development. Dragging Sensations causing pain, weight, and headache are relieved and permanently cured by its use. It corrects Irregularities or Painful Functions, Weakness of the Stomach, Indigestion, Bloating, Nervous Prostration, Headache, General Debility; also, Dizziness, Pains, Extreme Lassitude, "Don't care and want to be left alone" feeling, Irritability, Nervousness, Sleeplessness, Flatulency, Melancholia or the "Blues." These are sure indications of female weakness or some organic derangement.

For Kidney Complaints of either sex Lydia E. Pinkham's Vegetable Compound is a most excellent remedy.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, Lynn, Mass., for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law Lydia E. Pinkham in advising. Thus she is well qualified to guide sick women back to health. Her advice is free and always helpful.

FINANCE AND TRADE REVIEW

DUN'S WEEKLY SUMMARY

Movement of Merchandise in Most Sections Has Resumed Normal Proportions.

Despite holiday and weather interruptions, the volume of business is well maintained. In most sections of the country the movement of merchandise has resumed normal proportions, snow blockades being removed, but tardy deliveries still cause much complaint, especially in regard to grain.

Retail stocks of winter goods were most satisfactorily depleted during the period of low temperature, and the new season will open under favorable auspices. Wholesale and jobbing houses report a liberal spring demand, particularly in dry goods, while at the interior there is a vigorous movement of agricultural implements and other farm supplies.

A gratifying feature of many reports is the greater promptness of mercantile collections. Mills and factories have so much forward business that new contracts are not taken except at full figures, and there is dissatisfaction because shipments are not more prompt. Wages have been advanced in several important concerns, and there are no serious labor controversies.

Iron and steel producers are receiving much new business, contracts covering deliveries still further into the future, many lines being sold up to the last quarter of the year.

It is not possible to discern any evidence of reaction in any section of the industry, although there is a seasonable quiet in structural shapes that has facilitated a much-needed increase in production of billets.

Textile mills continue well employed, with especial pressure for prompt delivery of cotton goods.

An Alienist Sues Thaw.
Dr. Charles L. Dana, insanity expert has sued Harry K. Thaw for \$1,000, claimed for services rendered. Dr. Dana was employed by one of the Thaw counsel, who subsequently was discharged from the case.

The usual wage for laborers in Chile is \$1.50 to \$1.80 a day, but laborers are so scarce that they demand and get up to \$3 at present. There is talk of importing coolies.

Africa has 3,000,000 native Christians.

According to advices received by the Presbyterian Board of Foreign Missions, it was learned that the famine in the northern districts of China has reached stupendous proportions. Over 40,000 square miles are flooded by unprecedented rains, and no crops have been gathered in a section which supports 15,000,000 inhabitants. Thousands of people are living on one meal a day and thousands more are leaving their homes. Some have drowned their children and killed themselves.

GOOD ROADS.

A Scattered Movement.

Dr. Chapin is reported to have said that he believes that with a highway that will furnish good traveling across half the continent the various States will concentrate good roads movements into providing feeders for that highway, and that eventually travel by automobile will be common between distant points and that the farmers will be able to assert their independence of the railroads as gasoline and electric vehicles become cheaper and more fitted to the demands of the farmers.

"Good roads movements in the various States," he is also reported to have said, "are scattered in their effort. There are many struggles to finish this, that and the other road stretch in this, that and the other county. There should be a beginning at the beginning. If we get one stretch of road in each State put in good shape and laid out so that it will connect with a stretch laid out and properly built by the two adjoining States, we will have a highway established which will be worth while tapping with feeding roads."

"We came from Chicago through a country which is fertile and which needs just such a highway and such eventual feeding roads. It will enable the farmers to reach the cities and towns with their produce independent of the railroads. Once the National Highway is started there will be a general concentration of the good roads movement toward connecting with it all of the States it traverses. The road will be really an avenue over which traffic will flow constantly. The man or boy in the country will not be isolated. He will have an avenue running before his farmhouse and farm."

In many parts of the country, where for the last few years crops have been abundant, the farmers are buying motor cars. With the increase of information and the attendant increase of scientific and intensive farming, the prosperity of the nation will more and more strongly be centered in the agricultural districts. Their increasing progressiveness will tend to insure them against the less productive years and their needs as well as their contributions to the national wealth will make the construction of such a road system for them a certainty, not in one locality, but throughout the entire country. Such a system probably will not be held long by a private corporation; yet, though the roads are taken over by the States or counties through which they pass, the projectors will doubtless earn a substantial and abundant reward for their genius and labor.

The effect on national life and character of such a road system and an extensive use of automobiles over it, would be a consummation most devoutly to be looked forward to. The moral freedom that farm life gives to a man who stands upon his own ground and tills his own soil, would, when backed up by the broadening and urbanization that such a system of roads and automobiles would give, probably develop a character that the world would not want to stand against—as much on account of admiration as of fear.

Nothing is done in a moment that is quite worth while doing. Yet, the changes that have taken place in the world during the last twenty years are most remarkable. The world is fairly rushing into what the late Geo. S. Morrison called "The New Era." When his book, by that name, was first published, it seemed like the idealistic dream of a great engineer. Mr. Morrison was, without any doubt, one of the greatest engineers that America has had. To-day the world seems just on the verge of the civilization that he foresaw—a closer drawing together of nations and men, and a deeper humanization of the race.—The Motor Car.

India's Fine Roads.

It is probably not generally known that India is remarkable for its possession of many most excellent roads, some of them of great length, like that which runs from Bombay to Delhi, a distance of 900 miles. It is described as "a perfect highway." Another fine road, 1500 miles in length, extends from Calcutta to Peshawar, at the frontier of Afghanistan. These roads are kept in perfect repair, and were built originally for military purposes before the advent of railroads. Many of the native princes give particular care to their roads. Of course the nature of the country plays a part in the existence of the roads, and now they serve as a stimulus to the use of automobiles, which are very popular in India.—Youth's Companion.

The Good Roads Movement.

The road question is as broad as the State and affects not only the benefits derived from free rural delivery of mail, but every line of commerce and communication.—Galveston Daily News.

The farmer was slow to learn the benefits to him personally of good roads, but the lessened wear and tear upon horses and vehicles owing to general betterment of highways has proved to him that county money expended on road improvements is a capital investment. The extension of free rural delivery, one of his real home comforts, has been more easily possible owing to better roads being provided everywhere. He should urge his legislative representative to carry on the good work this winter in further State appropriations.—New York Herald.

CAUGHT BY THE GRIP— RELEASED BY PE-RU-NA.

The Medical Profession Recognizes The Grippe as Epidemic Catarrh.

Effective Medicine For La Grippe.

Robt. L. Madison, A. M., Principal of Cullowhee High School, Painter, N. C., writes: "Pe-Ru-NA is the most effective medicine that I have ever tried for la grippe. It also cured my wife of nasal catarrh. Her condition at one time was such that she could not at night breathe through her nostrils."

La Grippe and Systemic Catarrh.

Mrs. Jennie W. Gilmore, Box 44, White Oak, Ind. Ter., writes: "Six years ago I had la grippe, followed by systemic catarrh. The only thing I used was Pe-Ru-NA and Manalin, and I have been in better health the last three years than for years before."

Mrs. Jane Gift, Athens, Ohio, writes:

"Six years ago I had la grippe very bad. My husband bought me a bottle of Pe-Ru-NA. It cured me in a few days."

Suffered Twelve Years From After Effects of La Grippe.

Mr. Victor Patneaud, 328 Madison St., Toledo, Kan., writes: "Twelve years ago I had a severe attack of la grippe and I never really recovered my health until two years ago. I began using Pe-Ru-NA and it built up my strength so that in a couple of months I was able to go to work again."

Pneumonia Followed La Grippe.

Mr. T. Barnecott, West Aymer, Ontario, Can., writes: "Last winter I was ill with pneumonia after having la grippe. I took Pe-Ru-NA for two months, when I became quite well."

Pe-Ru-NA Tonic After La Grippe.

Mrs. Chas. E. Wells, Sr., Delaware, Ohio, writes: "After a severe attack of la grippe, I took Pe-Ru-NA and found it a very good tonic."

No Rules for Success.

There is no such thing as a single, particular proposition in business. No doubt this was always true in a measure; but it becomes more inclusively, more vitally, true every day with the increasing co-ordination of business. The whole business web knits ever closer, and each particular concern is bound more tightly in it. What other people do reacts more quickly than formerly upon your own affairs. A martial blast sounded in Buenos Ayres blew some very peaceful Boston gentlemen out of Union Pacific. Stockholders in Kansas banks got better dividends because some Russian grand dukes wanted war with Japan. The peculiar operations of the dual brain cells made wheat higher. Who will pretend that he can reason out what a grand duke is going to do?—Everybody's Magazine.

Announced Gold Discovery.

Nathan Hawk, a veteran of the Mexican War and the man who, in 1848, first brought East news of the California gold discoveries, is a hale and hearty citizen of Folsom, Cal. Mr. Hawk, who is 82 years old, left his Iowa home for California in 1847. He lives a few miles from the spot where James Marshall dug up the first gold found in the State.

Stamps.

The first regular issue of United States stamps appeared in 1847, consisting of but two denominations, five cents, bearing the likeness of Franklin, and 10 cents, with the portrait of Washington.—Detroit News.

Piles Cured in 6 to 14 Days.

Pazo Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 10 to 14 days or money refunded. 50c.

India's Fine Roads.

It is probably not generally known that India is remarkable for its possession of many most excellent roads, some of them of great length, like that which runs from Bombay to Delhi, a distance of 900 miles. It is described as "a perfect highway." Another fine road, 1500 miles in length, extends from Calcutta to Peshawar, at the frontier of Afghanistan. These roads are kept in perfect repair, and were built originally for military purposes before the advent of railroads. Many of the native princes give particular care to their roads. Of course the nature of the country plays a part in the existence of the roads, and now they serve as a stimulus to the use of automobiles, which are very popular in India.—Youth's Companion.

The Religious East.

The fact is that the Oriental races are fundamentally religious, and that the mainspring of their lives is their religion, whereas in modern Europe people have succeeded in dividing their lives into religious and secular departments.—London Post.

HURT, BRUISE OR SPRAIN

ST. JACOBS OIL

THE OLD-MONK-CURE RELIEVES FROM PAIN

Price 25c and 50c

Before You Paint, This Spring

bear in mind the fact that it costs you as much if not more to paint your buildings with inferior paints than it would to use paints of good quality. More harm and dissatisfaction is caused by the use of poor paints than almost any other article used for preserving or beautifying property.

Buffalo A.O. Paints

are the highest grade paints made. They contain the purest and most lasting pigments ground in aged Linseed Oil in correct proportion, are honestly made, cost no more than inferior paints and stand every test for exterior and interior work. Before you decide on the kind of paint to use, it will be to your interest to send for our 1907 color chart of the latest shades for modern uses, also valuable information and paint facts that you ought to know.

We want every owner of a building in this locality who sends us his name and address to have one of our beautiful Buffalo-head souvenir silvered stick pins. The pin is neat and unique in appearance and will be sent without charge, if name is received before April 1st.

BUFFALO OIL PAINT & VARNISH CO., BUFFALO, N. Y. CHICAGO, ILL.

Hunt Diamonds in Kentucky.

From present indications there is no longer a doubt as to the existence of a splendid showing for diamonds in Kentucky, says the Glasgow (Ky.) correspondent to the Nashville "American." For many years those versed in such matters have insisted that this State offered flattering prospects for diamond mining, but capitalists were timid, and it has taken a long process of reasoning to get them interested. At last the work is fairly under way, and the results will be eagerly watched. The plant to do the mining is now in process of installation in Elliott county, and on January 1 an immense diamond washing pan and its accessory machinery, built from South African models began an exhaustive test of the Kentucky Kimberlite deposits, which geologists say are practically identical with the olivine pyroxene rock in the Kimberley fields in South Africa.

Elliott county is the first and only place in the United States which has made an effort to determine the possibilities of diamond mining in this country. Most of the finds so far have been in alluvial deposits, and one of the best was a 24-karat stone of fine quality picked up in Virginia some 50 years ago, but the source of those has never been found. Geologists believe that the wholesale washing operations will determine whether these deposits carry true gems and in paying quantities.

Golden Relics Found.

Jerusalem papers report that on the opening of the graves at Pergamos a number of rare relics were brought to light. In one grave lay a golden Rosary. In two other caskets two wreaths were found, representing artistically made gold imitations of oak leaves. A wolf's head of gold was discovered, as well as various farming utensils, swords and other weapons. The antiquities have been sent to the Museum of Constantinople.

An Accommodating Butcher.

The Indianapolis News tells the story of a parson's wife who sent an order for a leg of mutton and received in reply the following note: "Dear Madam—have not killed myself this week but can get you a leg of my brother, if that will do. Your affectionate butcher, John Smith."

Paint Buying Made Safe

White Lead and Linseed Oil need no argument, no advertising to maintain themselves as the best and most economical paint yet known to man. The difficulty has been for the buyer to be always sure of the purity of the white lead and oil. We have registered the trade mark of the Dutch Boy painter to be the final proof of quality, genuineness and purity to paint buyers everywhere. When this trade mark appears on the keg, you can be sure that the contents is Pure White Lead made by the Old Dutch Process.
