Composition of Alloys.

The Japanese are celebrated not only for their skill in making decor ative articles, but also for the beauty of the materials used. It is said that the secret of the composition of some of their aloys of brass and coppet has only lately been revealed. The finest Japanese brass, called sinchu. consists of 10 parts of copper and 3 of zinc. Another very beautiful al-loy, named Shadko, to which splendid es are imparted by treatment with acids, is formed by mixing gold and copper, the proportion of gold varying from 1 to 10 per cent of the en-tire mass .--- Philadelphia Record.

"A Talk on Paint." gives valuable information on the paint subject. Sent

Italy's Bold Explorer.

Italy has an intrepid explorer in he person of a young member of one of the aristocratic families, Don Livio Caetani, who has long been lost in the wild fringes of Somaliiand and He has marched through Abyssinia. the wild regions of Bako, the Omo valley, Caffa, Gomma, and thence he arned off to Adia Abeba, from which point news has, for the first time, been heard from him for months. He penetrated to within nine days of Lake Rudolf, but a high mountain range, stretching for 48 miles to the ake itself, rendered access impracticable. The explorer everywhere met with a friendly spirit among the natives .- Philadelphia Record.

HOME WEEK IN BOSTON.

Sons and Daughters of New England Capital to Visit Scenes of Youth.

The greatest event for Boston and for all New England this season will be the home-coming week in Boston. This will occur at the end of July and will attract thousands of persons from every part of the country to the city and the section of the country where their ancestors lived and where their affections are centered. The citizens of Boston have made iberal preparations for a grand celebration of the history and achievements of Boston and the Commonwealth of Massachusetts. There will e a week of midsummer reunions of families and of public festivities. The time selected is from July 28 to August 3.

The home-coming week in Kentucky attracted half a million visitors to Louisville and the home-coming for Georgia was likewise gratefully accepted. There is no doubt of the attraction to Boston of a far greater number of sons and daughters who cherish the traditions and the successes of the people and who venerate the history of the famous city which is the leader in the literature, art and the civilization of America.

Wants Nurses in Navy.

Surgeon General Rixey is preparing to make a strong appeal to Congress at its next session to correct a tamentable deficiency in the medical trained nurse. No matter how severe the illness of the officers and sallors nor how grave the injury or wound received in the line of duty, the American bluejacket must rely for his care in time of trouble upon hospital steward and an apprentice. In ordinary times the ships'

geons are often taxed to care proper-ly for the normal number of sick and injured aboard ship. When there is an epidemic of feaver or measles (the latter often a serious malady among male adults), such as occurred not long ago on the battleship Con necticut, it has been found impossible to give the invalids the necessary scientific and careful nursing required by their illness.

Surgeon General Rixey has therefore worked out the details of a plan for the organization of a corps of trained nurses, such as the army

Ice Shaped Like Spikes.

A remarkable form of ice, which the French-Canadians name frazil ice, is the cause of the packing up of ice and consequent floods in the St. Lawrence river. It forms in splky shapes where the currents are too rapid for ordinary sheet ice to spread across them, and at the base of waterfalls. During the prevalence of cold winds the icy needles sometimes fill up open channels, and, being carried long distances beneath the surface ice,"graduulato and and

The Italians have invented a de vice for making celluloid non-inflammable by mixing glue, gum arable and coal off with ordinary composition.

By the expression "conservation of energy" is meant that no particle of the energy, or force, or power, in nature is, or ever can be, lost. The force inherent in things may be transformed, but never destroyed. The sum total is always the same.

Electric cooking may be the rule in the modern kitchen should the experiments now being made prove of practical value. A new type of electric furnace has been invented and so im proved that it can now be used for cooking. The heat can be regulated to within less than one degree, and maintained indefinitely.

A novel automobile storm front has ben invented by Dr. Whiting, and is described as having several advantages over the glass or mica front. It consists of zinc mesh wire gauze at tached to a wood frame which folds up when not in use. It can be removed or put on in five minutes, and when not in use is stowed away, taking up little room.

It is a fact that flesh-cating plants exist. These carnivorous plants have in some way evolved arrangements by which they are enabled to feed on small animals, especially insects. On the upper sides of the leaves are : large number of hnir-like growth which pour out a sticky fluid. The in sect coming in contact with this fluid is held fant, and the margin of the lenf folds over it and digests it.

In a paper presented to the Acad emie des Sciences, M. Hanriot gives an account of the active substance which are contained in the Tenhrosis vogelli. The leaves of this plant and neighboring species are used for fishing by the natives of Madagascar and branch of the naval service. The surgeon general points out that the American navy is without a single trained nurse. No matter how servere the pond or river at different places, especially in slow streams. Soon the fish become paralyzed and mount to the surface. They can then be caught by hand and eaten without danger .-Scientific American.

CAVE'S ODOR CAUSES DEATH.

Old Guide's Story May Lead to the

Discovery of Lead. Stanley Murphy and S. J. Ellis, both of Chicago, are preparing to open up what they believe to be a rich mineral deposit near Lampazos, Mexico. They were in the mountains on a hunting trip a few weeks ago when an old Mexican guide told them the story of a cave, located near their camping spot.

The Mexican said that many years ago a young man and a girl, residents of Lampazos, eloped, and when pursued by their irate parents sought refuge in this cave. Men sent into the cave to bring the couple out found the dead body of the young man near the entrance, and further back in the cavern was the dead body of the girl. The bodies were removed, but every person who had entered the cave was stricken with illness and died in a few hours.

The local authorities of Lampazos went to the cave to make an investiga-

Biggest Locomotive.

Pittaburg has just' completed the largest and heaviest locomotive in the world. Engine and tender to aether weigh 204 tens, and after being built it had to be taken back into th shops in Manchester, Lower Alle gheny, in order to have its whistle adjusted, so that it could tear unde ordinary bridges without tearing any thing away. This giant is known of-ficially as "7067" and is destined for a passenger run on the Pennsylvania lines west.

Special Trains-Nat'l Ed. Ass'n, and Chr. Endeavor Conventions.

Personally conducted special trains via the Chicago, Union Pacific & North-Western Line leave early in July for the Pacific Coast. Special all-expense tours at very low rates for the round trip, including sleeping car accommodations, meals, etc. All the advantages of a delightful and carefully arranged tour in congenial company. SORES AS BIG AS PENNIES.

Whole Head and Neck Covered-Hair All Came Out-Suffered 6 Months -Cured in 3 Weeks by Cuticura.

"After having the measles my whole head and neck were covered with scaly sores about as large as a penny. They were just as thick as they could be. My hair all came out. I let the trouble run along, taking the doctor's blood remedies and rubbing on salve, but it did not seem to get any better. It stayed that way for about six months; then I got a set of the Uuticura Remedies, and in about a week I

The first requisite of a good mother is good health, and the ex-perience of maternity should not be approached without careful physical preparation, as a woman who is in good physical condition transmits to her children the blessings of a good Preparation for healthy mater-

nity is accomplished by Lydia E. Pinkham's Vegetable Compound, which is made from native roots and herbs, more successfully than by any other medicine because it gives tone and strength to the entire feminine organism, curing displacements, ul-ceration and inflammation, and the

constitution.

MRS. JAMES CHESTER less suffering and more children healthy at birth. For more than thirty years

Lydia E. Pinkham's Vegetable Compound has been the standby of American mothers in preparing for childbirth. Notewhat Mrs. James Chester, of 497 W. 35th St., New York says in this letter: -Dear Mrs. Pinkham:-"I wish every expectant mother knew about letter:-Dear Mrs. Pinkham:-"I wish every expectant mother knew about Lydia E. Pinkham's Vegetable Compound. A neighbor who had learned of its great value at this trying period of a woman's life urged me to try it and I aid so, and I cannot say enough in regard to the good it did me. I recovered quickly and am in the best of health now."
Lydia E. Pinkham's Vegetable Compound is certainly a successful remedy for the peculiar weaknesses and ailments of women. It has cured almost every form of Female Complaints, Dragging Sensations, Weak Back, Falling and Displacements. Inflammation, Ulcerations and Organic Diseases of Women and is invaluable in preparing for Childbirth and during the Change of Life.
Mrs. Distribution: Schemiding Invitation to Women

Mrs. Pinkham's Standing Invitation to Women Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

Progress of Medicine.

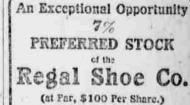

Reviewing the progress of medicine during the ninetcenth contury, Dr. John S. Billings, United States army, has shown that deaths of women from childbirth decreased during that period from 10 to 20 in 1,000 to 5 in 1,000 and that from all causes the deaths in New York city fell from between 35 and 40 in 1.000 to less than 20 in 1.000. He recalls the fact that 100 years ago yellow fever was epi demic in New York and Philadelphia for two years. For 20 years the discase has been almost unknown throughout the whole country; also that in 1800 the majority of persons one met were pitted with smallpoxthe survivors of a much greater num ber-while now there are physicians who have never seen a case of smallpox; and that in the Napoleonic and Revolutionary Wars more filed from disease than from wounds, while now hospital gangrene is unknown. Sta tistics show that in Chicago during the last 35 years the average age at death has increased from 12 to 32 years. No one disputes these facts or attributes them to any cause other than medical science-the measures

but more specially in preventing its

The great interest aroused in the question of aerial navigation by Herr Martin's book, "Berlin-Baghdad," says a Berlin correspondent of the Martin's London Express, is about to find expression in a series of important experiments as to the possibility of taking aim at balloons and airships in midair. The experiments are to be conducted in the neighborhood of Dantzig. Small balloons of the capacity of 100 cubic meters are to be sent up, and they will be fired at by heavy guns and small arms. Balloons held captive by cables 3,000 feet in length will be towed by warships to within range of coast batteries at distances varying from three to nine miles. The experiments will be watched by a number of officers of the general staff as well as artillery officers and those attached to the ballooning department.

Island Red With Lobsters.

An old admiral well known for his powers of exaggeration was at supper one night describing a voyage. "While cruising in the Pacific," said he, "we passed an island which was positively red with lobsters." "But," said one of the guests, smilling increduously, "lobsters are not red until boiled." "Of course not," replied the undaunted admiral, "but this was a volcanic island filled with boiling springs."

CHILDREN SHOWED IT.

Morning.

"A year ago I was a wreck from coffee drinking and was on the point of giving up my position in the school room because of nervousness.

"I was telling a friend about it and she said. 'We drink nothing at meal time but Postum Food Coffee, and it is such a comfort to have something we can enjoy drinking with the children.'

"I was astonished that she would of coffee, but she said Postum was the most healthful drink in the world for children as well as for older ones. children and adults showed that to be a fact.

"My first trial was a failure. The cook boiled it four or five minutes and it tasted so flat that I was in despair, but determined to give it one more trial. This time we followed the directions and bolled it fifteen minutes after the boiling began. It was a decided success, and I was completely won by its rich, delicious flavour. In a short time 1 noticed.a decided improvement in my condition and kept growing better and better month after month, until now I am perfectly healthy, and do my work in the school room with ease and pleasure. I would not return to the nervedestroying regular coffee for any

tion, and more mysterious fatalities followed.

The story of the fatal cave spread throughout that region, and it was shunned by all who knew of its history. A stone wall was finally built in front of its mouth to prevent any one from entering It.

Murphy and Ellis, while prowling around the cave, found a distinct and well defined vein of zinc and lead, and it is their opinion that an exploration of the cave would bring to light a vast amount of valuable ore. They believe that the deaths of those who visited the cavern was caused by arsenical poison, which probably came from the ores in the cave, and that by proper Effect of Their Warm Drink in the | opening and ventilation of the cavern it came be made perfectly safe .- New York World.

Cuba's Proposed Army.

A standing army of 12,000 men, to be composed of natives of the island, is proposed for Cuba by the general staff. It is to take the place of the Rural Guard and will be distinct from the local police forces employed by municipalities. Until more light is vouchsafed, this plan of a standing army of 12,000 men for little Cuba, allow the children to drink any kind with its population of 2,000,000, will

be a reminder that the United States with its 70,000,000 people got along with a regular army of 25,000 men beand that the condition of both the fore the Spanish war .- New York Sun.

Supplying the Explanation.

The valet one morning was brushing his master's clothes. He introduced into the procedure a startling innovation. He made a careful search of all the pockets. In the pocket of a new walstcoat the valet found a sovgreign.

Thereupon he took out his penknife sighed, and said:

"For the waistcoat's sake it's a thousand pities, but there's nothing else to be done. I must make a hole in this pocket large enough for the sovereign to slip through."-Tit-Bits.

Japan has many saving banks, the deposits in which are estimated at \$100,000,000, a four-fold increase in 10 years.

noticed a big difference, and in three weeks it was well entirely and I have not had the trouble any more, and as this was seven years ago, I consider myself cured. Mrs. Henry Porter, Albion, Neb., Aug. 25, '06.'

An Anti-Tipping Law.

England has now an anti-tipping law whict the courts seem disposed to enforce. It is known as an for the prevention of corruption, and is based on the theory that a person who gives money to the employe of another to do that which he is not hired to do, is guilty of bribery. The first case under the new law was tried last month, when the Lancashire & Yorkshire Railroad Co. sued a clothier's clerk in Manchester for bribing one of its carters by giving to him in one case a shilling and in another 3d, for carrying parcels to customers. The facts were admitted. and the only defense offered was that it was the common practice to give "tips" in this way. The magistrate decided that the law was passed to stop this practice, and imposed a fine of £1 and ordinary costs upon the clerk, besides special costs of a lit-

Phonograph is a Witness. The phonograph as a witness in the

law courts was bound to come sooner or later, and it did so the other day in Brussels. A lawyer of that city had been continually annoyed by the noises of hammering, etc., at an iron foundry in his near neighborhood. Finding that complaints were unavailing, he brought the matter in to court. Before doing so he placed a phonograph in his library for one whole day. When the case came be fore the fourth chamber he produced the phonograph and set going the specially prepared cylinder. An roar and din as from the forge An up-torge of Vulcan was the result, and the ingenious lawyer won his case "hands down."-London Chronicle.

Deep British Collieries.

Colliers employed in certain pits in the Manchester district are now working half a mile below ground. There are collieries in Ashton, Brad (Manchester) and Pendleton ford which are more than half a mile in denth, and others are about to be sunk in other parts of southern Lancashire which will be 900 yards down. The men working at these great depths have to take huge amounts of liquid with them, owing to the great heat which prevails, many of them taking two quarts of cold tea in big tin cans. The Pendleton pit of Messrs. A. Knowles is more than 1,000 yards in depth .-Westminster Gazette.

School for Aeronauts.

Arrangements have just been completed to establish at Chemnitz a training school for aeronauts and constructors of airships. A similar school has been in operation in Paris for a year past. The Chempitz institution will be the second onterprise in the new pedagogical field. A one-year course is contemplated for the pres ent, the school to be opened this month. This course, at the outset, is limited to the construction and use of balloons. It will be enlarged so as to include aeroplanes as soon as prac-tical working types have been developed .- New York Herald.
