

**BUFFALO MCKINLEY MONUMENT**

To Be Dedicated During "Old-Home Week," September 5.

The beautiful white marble shaft erected by the State of New York in Niagara Square, Buffalo, N. Y., to the memory of President McKinley, is to be formally dedicated Thursday, September 5, and the event will be the central feature of Buffalo's Old-Home Week, September 1 to 7. Former residents of Buffalo and the public at large are cordially invited to attend the dedication and the gay carnival that will run all the week.

The McKinley monument was planned and executed under the direction of a commission of prominent men at a cost of over \$150,000.

Buffalo's Old-Home Week will be a succession of civic and military pageantry, carnival, sports and games, and the electric city will be ablaze with twinkling lights and patriotic decorations. Former residents of Buffalo are asked to send their names and addresses to James W. Greene, chairman Old-Home Week Committee, Buffalo, N. Y. A beautiful souvenir invitation will be mailed to each. The railroads will offer excursion rates to and returning from Buffalo.

**BOY KNEW HIS RIGHTS**

But Did Not Think Very Much About His Duties.

A boy went into a shop to work for a man. He was a lad of considerable intelligence and knew himself. Besides, he had large ideas of his personality, and had thought a great deal over what were his rights. He knew exactly what he was entitled to and what the other fellow was entitled to, and between the two there was a deep definite division. He observed this line very closely, and did not cross it for an instant. If engaged on a piece of work, and quitting time came, he quit right then, even if he could have finished it in three minutes. In doing so he never thought for a moment of having talked with Bill Jones for fully 20 minutes that very afternoon about a baseball game that came off the day before. He was simply looking to his rights and no one else's.

This was his way. Of course he didn't stay long. He hadn't apprehension enough of his duty or a sufficient regard for his service to put him in sympathy with his work. He was a misfit. He did as little as he could for his employer. He stood on his rights and no more. That was some years ago. Now he is driving a team up in Cleveland for \$1.50 a day.

When he left the shop another boy went in. He knew his rights, but he didn't insist on them too much, for he believed in doing things. If time was up and he could finish a thing with a few minutes over work, he would do it every time; he made himself worth something. Pretty soon that employer saw he couldn't get along without him. He kept advancing his wages and finally took him into partnership, and now the business is a great one and that boy has a grand home, a big salary and a lovely family, all because he was a boy of get up, gumption and thought more of his duties than he did of his rights.

**Solomon's Temple Reproduced.**

Joseph Doctorovitz, a teacher of Hebrew, and a student of old Jewish institutions, has put on exhibition in New York a complete reproduction of the Temple at Jerusalem. It is 15 feet square and includes the several courts and palaces of the priests.

**SOAKED IN COFFEE Until Too Stiff to Bend Over.**

"When I drank coffee I often had sick headaches, nervousness and biliousness much of the time, but when I went to visit a friend I got in the habit of drinking Postum.

"I gave up coffee entirely, and the result has been that I have been entirely relieved of all my stomach and nervous trouble.

"My mother was just the same way. We all drink Postum now and, without coffee in the house for 2 years, we are all well.

"A neighbor of mine, a great coffee drinker, was troubled with pains in her side for years and was an invalid. She was not able to do her work and could not even mend clothes or do anything at all where she would have to bend forward. If she tried to do a little hard work she would get such pains that she would have to lie down for the rest of the day.

"At last I persuaded her to stop drinking coffee and try Postum Food Coffee and she did so, and has used Postum ever since; the result has been that she can now do her work, can sit for a whole day and mend and can sew on the machine and she never feels the least bit of pain in her side, in fact, she has got well, and it shows coffee was the cause of the whole trouble.

"I could also tell you about several other neighbors who have been cured by quitting coffee and using Postum in its place." "There's a Reason," Look in pkg. for the famous little book, "The Road to Wellville."

**Soil Formation.**

All soils are formed from disintegrated rocks and organic matter. Of the latter, soils contain from one to more than seventy per cent.; it is, however, only in bogs or beds of peat that the amount last named is ever present. The best wheat lands contain only from four to six per cent. of organic matter; oats and rye will grow in soils containing only one or two. The intelligent farmer should endeavor to ascertain what is wanting in the soil and supply it, remembering that he can make no possible mistake with barnyard manure.

**Do Justice to Poultry.**

Poultry should now be filling the egg basket, and will, if they have justice done them. It is not enough that they are well fed; other conditions are required. Their houses should be well cleaned, their nest boxes thoroughly washed and a little quicklime sprinkled in them. The floors of their houses should also be well sprinkled with quicklime, and the roosting poles whitewashed. All these are necessary to purify the atmosphere and destroy the vermin that infest these places. The cleaning process should also be applied to the horse, cow and sheep stables.

**You Cannot Afford It.**

No farmer can afford to do without a good garden. It is not to be expected that every one will be a fancy gardener, but every one should give sufficient attention to the subject so as to produce all staple vegetables earlier than can be produced in the field. It is not only essential to the health and proper enjoyment of the family, but it is actually a matter of profit. Could your whole farm be made as smooth, dry, rich and as well cultivated as a good garden, the increased product would pay a large per cent. of profit upon the outlay. In the garden, or in a separate apartment, may be cultivated strawberries, raspberries, blackberries, currants, grapes and dwarf pears. They can all be had at a very small cost of money or labor, and will add immensely to the enjoyment of the household.

**Good Males Demand Good Care.**

We should not "give a rap," as the saying is, for a "rooster" that is not gallant enough to give his mates first privileges when it comes to eating.

The rooster that is always ready to "lick" another one that happens to cross his path, the rooster that does not hesitate to show his vocal capabilities by frequently crowing, and the rooster that is courteous enough to believe in "ladies first," and stands and calls his mates and then steps aside while they eat the dainty morsel he has found—that rooster is one after our own heart. Show us that kind of a rooster and we will show you a rooster that is capable of strongly fertilizing eggs from a maximum number of females.

But—here, dear friend, is often the "rub"—a male bird of this kind must secure in some way just as much if not a little more to eat than does his less gallant brother and, unless fed separately, he will become so run down in condition in two or three weeks of breeding service that he will begin to be seriously lacking in sexual strength; therefore, it becomes necessary to remove him from the females every day or two and give him a generous feed of corn and meat of some kind, that is, green cut bone or ground beef scraps. That is the only gallant way for you to treat a gallant rooster, and you will find at the same time that it is the only profitable way.—Poultry Editor, in The Epitomist.

**Feeding a Horse.**

The Journal of Agriculture gives some figures of the cost of feeding a horse in the West. How do they compare with the cost of keeping one in this State?

What does it cost to feed the work horse during the year? It is claimed that when timothy is worth \$18 per ton; wheat bran, \$17.50; corn, \$22; dried brewers' grass, \$17, and gluten meal, \$29 per ton, that a horse can be fed during the six months when the hardest work is done for \$31. During the remaining six months the cost of feed is put at \$24.70.

It will be noticed that the cost of timothy is figured at about double the price it sells for on the average farm. This is because the authorities who made the estimates live near the large centres, where prices of feeds are higher than in the outlying sections. Where mixed hay retails for \$8 to \$9 per ton, corn for fifty cents and oats thirty-five cents per bushel, it is safe to say that the average work horse, weighing 1400 or less, can be fed the entire year and kept in good flesh for \$40.

In the first estimate made above it will be noticed that the price on gluten feed is quoted. It has been found that this material can be fed to horses with excellent results, especially in the spring, when the animals need a variety. A ration composed of one part gluten feed, one part oats and two parts corn make almost the ideal mixture for the work horse. The animal should have enough of mixture to maintain his condition, however. About one pound per day for each 100 pounds the animal weighs is considered the proper amount.

**Fertile vs. Infertile Eggs.**

The Country Gentleman referring to the statement of a Montreal woman in a poultry journal that she has been able to distinguish between eggs that will produce males and those producing females by locating the air cells, those having the cell directly across the large and hatching cockerels, while those having the cells slanting slightly contributed pullets, thinks scientists might well devote some time to experimenting to devise some easy method of distinguishing fertile from infertile eggs before they are placed in the incubator or placed under the hen—in fact before they leave the hands of the seller if they are bought. This would save a lot of disappointment. The common custom is to test eggs after four or five days, removing those not showing indications of fertility. These are not in the least injured by the few days' heating. But this latter business, while it saves a part of the hatch, does not do away with the disappointment at paying well for valuable eggs only to have too large a percentage prove infertile. Incidentally it is worth mentioning that even the experimenting Montreal dame does not explain how she arrives at the conclusion that the straight across air cell produces the cockerel, since the hatch of fourteen simply showed them equally divided in sex as the air cells indicated they would be.

**Variety and Profit.**

The farmers should make stock raising more profitable by growing a variety of crops, instead of depending mostly upon grain and hay, for variety gives the farmer more advantages. If he grows turnips he secures them late in the season (usually after liability of dry weather has passed), and a large supply of roots will enable him to economize with the grain and hay. He can also grow late corn fodder, cow peas and rape, the latter affording excellent pasturage for sheep and swine when grass may not be abundant. But it is not so much the growing of various crops for use at all seasons that the farmer should consider so much as the full bins and storehouses of succulent food for winter use. It is in the winter season that the farmer has the advantage of using the crops he has grown, and increasing their value by adding thereto his labor. Many farmers object to certain methods of feeding because they claim that the thorough preparations of foods are too laborious, but if all farmers will consider that the more labor they can sell in the form of some product the greater their increase, they will not hesitate to give more attention to food preparation. Last time is really lost labor, and the farmer who is not employed every day is losing something. If he can save food and make larger profits he will be more than recompensed for his labor, and the best time when one can be well paid for the work is in the winter, as the foods, the manure heap, the repairs of buildings and implements and other indoor work are then the most important matters.

**Dry Foods.**

In winter many animals are compelled to subsist largely on dry rations, the sameness of diet being such as to some times cause loss of appetite. In fact, in many cases of live stock being "off their feed," as it is termed, the cause is due to lack of sufficient food, or insufficient variety from the regular routine. With the supply of ensilage this difficulty is not so largely met, but some farmers will not build silos, preferring to adhere closely to old methods. A few acres of beets, carrots or turnips will not fail to be of valuable assistance, not because such articles are highly nutritious (which is not the case, as they are composed largely of water), but rather because they contain a large per cent. of water, are easily digested, and provide an agreeable change of diet—from dry food to something more palatable—thereby increasing the flow of milk because they stimulate the appetite, promote digestion and induce the animals to eat more. Invention has also lessened the cost of preparing foods, as cutters and slicers rapidly reduce carrots and other roots to a condition in which they can be fed to the animals without danger of choking them. The corn fodder supply, if well cured, and cut down in the field at the proper time, will also be more highly relished if cut into shorts lengths. Farmers depend upon hay, but they use too much hay, because they either waste other valuable foods, or do not prepare such for the stock. If a bushel of carrots can be reduced almost as fast as they can be fed into the chopper, as may be done, the labor of cutting them is very inexpensive, and the benefit of feeding a variety will be very noticeable.

**FINANCE AND TRADE REVIEW**

**DUN'S WEEKLY SUMMARY**

Trade Reports from Leading Cities Compare Favorably With Those of Corresponding Week Last Year.

Trade reports from the leading cities are singularly uniform in making favorable comparisons with the corresponding week in any previous year. At most western and southern points the improvement in the crop prospects has brought out liberal fall orders. There is evidently more confidence in the future than at any time since it was found that many of the principal farm products had made a bad start.

Jobbing houses are preparing for winter trade on a scale seldom equalled. The consumption of reasonable goods promises to deplete stocks most satisfactorily.

Manufacturers are still receiving orders in abundance, few clothing cancellations appear, and it is the exception when plants have smaller contracts than a year ago. More detailed reports for the first half of 1907 add to the earlier testimony that all records for six months were far surpassed.

Settlement of the ore strike removes any danger of interruption to activity at pig iron furnaces, which promise to establish a new record of output during the second half of the year. According to the regular report of the American Iron and Steel Association, all previous figures were surpassed during the first six months with an aggregate of 13,478,044 tons, an increase of 753,163 tons over the previous maximum.

Vigorous activity continues at cotton mills. Prices are fully sustained by the volume of orders on hand with the high quotation of raw cotton, and confidence in well maintained consumption. Export inquiries are noted, but no actual business results because of the high position of quotations.

Woolen goods make slow progress, although practically all lines are now open. Some branches move satisfactorily, liberal sample pieces are being taken, but many clothes do not appear prepared to operate freely. Interest is most noteworthy in the worsted division.

Footwear factories are well engaged on old orders, but buyers in the Boston market did not purchase as freely as was anticipated.

Leather is quiet. Shoe manufacturers show no disposition to anticipate needs. Demand is therefore limited to immediate requirement.

**CHERRY SOUP.**

This is a popular Swedish and German dish, most refreshing on a hot day. Crush a quart of cherries, add to them the juice of two lemons, two level tablespoonfuls tapioca or sago and sugar to taste. Simmer in a quart of water for half an hour, then rub through a puree sieve. Reheat, add a pinch of salt, then cool and place on the ice before serving. Save a few fine cherries to put in the iced soup at the last. This quantity will make nearly two quarts of soup.—Washington Star.

MRS. A. M. HAGERMANN

**Lydia E. Pinkham's Vegetable Compound**

made from simple native roots and herbs. For more than thirty years it has been helping women to be strong, regulating the functions perfectly and overcoming pain. It has also proved itself invaluable in preparing for child birth and the Change of Life.

Mrs. A. M. Hagermann, of Bay Shore, L. I., writes:—Dear Mrs. Pinkham:—I suffered from a displacement, excessive and painful functions so that I had to lie down or sit still most of the time. Lydia E. Pinkham's Vegetable Compound has made me a well woman so that I am able to attend to my duties. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound and see what relief it will give them."

**Mrs. Pinkham's Standing Invitation to Women**

Women suffering from any form of female illness are invited to write Mrs. Pinkham, at Lynn, Mass. for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law Lydia E. Pinkham in advising. Therefore she is especially well qualified to guide sick women back to health.

**W. L. DOUGLAS**  
**\$3.00 & \$3.50 SHOES** BEST IN THE WORLD  
 THE FAMILY AT ALL PRICES.  
**\$25,000 Reward** To any one who can prove W. L. Douglas shoes do not make a sell more than \$3 & \$3.50 shoes than any other manufacturer's shoes.  
 THE REASON W. L. Douglas shoes are worn by more people in all walks of life than any other make, is because of their excellent style, easy fitting, and superior wearing qualities. This selection of the leather and other materials for each part of the shoe, and every detail of the making is looked after by the most complete organization of superintendents, foremen and skilled shoemakers, who receive the highest wages paid in the shoe industry, and whose workmanship cannot be excelled.  
 If I could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then understand why they look their shape, fit better, wear longer and are of greater value than any other make.  
**My \$4 Gilt Edge and \$5 Gold Bond Shoes cannot be equalled at any price.** W. L. Douglas stamps his name and price on the bottom to protect you against high prices and inferior shoes. Take No. substitutes. Sold by the best shoe dealers everywhere.  
 Fast Color Kiplets and sealings. Catalog mailed free. W. L. DOUGLAS, Brockton, Mass.

**IMPORTANT DISCOVERY**

English Chemist Succeeds in Degrading Copper to the First Member, Lithium.

Sir William Ramsay, the distinguished chemist, has promised to communicate in writing in the near future to the chemical society the results of his researches into radium emanations. In this connection the announcement is made that he has succeeded in degrading copper to the first member of its family, that is, lithium.

The Lancet says the discovery marks an epoch in the history of chemical science and believes it is a realization of the transmutation of metals.

The announcement is likely to reawaken the discussion of the transmutation of elements which raged a year or so ago, when several prominent scientists repudiated the transmutation idea, while others just as strongly supported it.

Opium Imports into China increased from 6,922,667 pounds in 1905 to 7,215,600 pounds in 1906, and it is stated that the use of native opium also showed a general increase, while morphia importations, in spite of 200 per cent duty, have grown larger, although the total volume reported is insignificant.

FITS St. Vitus' Dance, Nervous Diseases permanently cured by Dr. King's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. H. E. King, 149 Arch St., Phila., Pa.

There has been a marked falling off in the Sunday school attendance in New York city in the last five years.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

**Suicide Among Children.**  
 A report made by Prof. Emlenberg, an eminent German authority, upon nervous diseases, may well engage the careful attention of all parents. It seems that there has been an epidemic of suicide among German children, and Prof. Emlenberg has been investigating the matter. He states that in the last 12 years he has traced 1,152 cases of children's suicides, and that in more than one-half the reason for the rash act was to be found in the failure to pass school examinations, or overwork at school.

**THE DAISY FLY KILLER** destroys all the daisy beetle, caterpillars, worms, etc., in the garden, sleeping room, etc. It is a powerful disinfectant, kills all flies, mosquitoes, etc., and will not hurt or injure anything. Try this one and you will never be troubled with them again. If you buy by mail, send for a trial bottle. It costs only 25c per bottle. Write for it to-day. HAROLD SOMERS, 149 DuSick Ave., Brooklyn, N. Y.

**TIRED BACKS.**  
 The kidneys have a great work to do in keeping the blood pure. When they get out of order it causes backache, headaches, dizziness, languor and distressing urinary troubles. Keep the kidneys well and all these sufferings will be saved you. Mrs. S. A. Moore, proprietor of a restaurant at Waterville, Me., says: "Before using Doan's Kidney Pills I suffered everything from kidney troubles for a year and a half. I had pain in the back and head, and almost continuous in the loins and felt weary all the time. A few doses of Doan's Kidney Pills brought great relief, and I kept on taking them until in a short time I was cured. I think Doan's Kidney Pills are wonderful."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

**Profit in Flowers.**  
 If report is true there are vast sums of money to be made in the cultivation of flowers in the Riviera. In one season alone \$2,000,000 worth were shipped away to foreign countries, and oddly enough the majority were sent to England. It is a long journey for delicate blooms to make, but they are so perfectly packed and kept en route that they reach their destination in excellent condition to gladden the hearts of and adorn England's fairest women.

**FEARFUL BURNING SORES.**  
 Boy in Misery 12 Years—Eczema in Rough Scales, Itching and Inflamed—Cured by Cuticura.

"Cuticura has put a stop to twelve years of misery I passed with my son. As an infant I noticed on his body a red spot and treated same with different remedies for about five years, but when the spot began to get larger I put him under the care of doctors. Under their treatment the disease spread to four different parts of his body. During the day it would get rough and form like scales. At night it would be cracked, inflamed and badly swollen, with terrible burning and itching. One doctor told me that my son's eczema was incurable, and gave it up. I decided to give Cuticura a trial. When I had used the first box of Cuticura Ointment there was a great improvement, and by the time I had used the second set of Cuticura Remedies my child was cured. He is now twelve years old, and his skin is as fine and smooth as silk. Michael Steinman, 7 Sumner Avenue, Brooklyn, N. Y., April 16, 1905."

The Bank of England property covers over two acres.

**ALL WOMEN SUFFER**

from the same physical disturbances, and the nature of their duties, in many cases, quickly drift them into the horrors of all kinds of female complaints, organic troubles, ulceration, falling and displacements, or perhaps irregularity or suppression causing backache, nervousness, irritability, and sleeplessness. Women everywhere should remember that the medicine that holds the record for the largest number of actual cures of female ills is
