TEA INSTEAD OF WHISKY

Harmless Beverage Served to Trav elers in Great Britain.

Tea gardens are established in Great Britain wherever possible, prizes are offered for the best-kept premises, and luncheons and tens are erved to motorists and cyclists fu bright, cozy rooms entirely separated from the bar. A decided difference is made as to the accommodations in the bar and those in the refreshment rooms; the former plain and clean but not attractive, the later adorned with pictures and flowers blooming in window boxes, and furnished with plenty of little tables and comfortable chairs, and in many cases daily papers on file. Sales of liquor have fallen off, while tea, coffee and food are sold in large quantities. It is found that even those who have been in the habit of tippling will order ten and coffee readily, when the cost is the same and the substitutes are Fight gallons of tea really good. have been sold in one house before breakfast; in another, where only in toxicants had formerly been sold luncheons and teas were sold to 720 persons during the first five months of company management.

Quaint, old-fashioned names for the inns have been retained, such as Royal Oak, Hare and Hounds, Red Lion, Green Man, Norfolk Hero, Rose and Crown, Rose and Portcullis, the Plume of Feathers, etc. Profits from the sale of liquors

have paid for improved lighting, wa ter supply, drinking fountains, dia trict nurses, infirmaries, school funds, libraries, baths and small school In one little town a bowling parks. green for the pleasure of the villag-ers who are fond of the old-time but still popular game of bowls, is supported entirely from the profits of the sale of liquor in the local public house.-From "British Substitutes for Saloona" in The Craftsman.

First Antipress Law.

Under the provisions of this law, who wrote, printed, uttered or published any false, scandalous or malicious matter against the government, the Congress or the President of the United States, or which tend-ed to bring them into hatred or contempt, could be punished by heavy fines and imprisonment; and the statute was so worded as to penalize not only honest criticism of the executive, but even the free expression of opinion . No legislation more fatal to the popularity of Adams' administration could possibly have been devised; but although the sole responsibility for its enactment has frequently been charged to the Presi-dent, it cannot justly be laid at his His fussy, sensitive, consciendoor. tions, crotchety, tactless nature had doubtless been more stung by the lampoons and critical attacks of the pamphlets and newspapers than that of any other official; but the abuse of the press had been so general that scarcely a man in public life had escaped defamation, and the act had been rushed through both houses of Congress by a vote which distinctly stamped it with the approval of the administration party.-Harper's Magazine.

World's Best Timekeeper.

This is said to be the electric clock in the basement of the Berlin Observatory, which was installed by Prof. Forrster in 1865. It was inclosed in an airtight glass cylinder, and has frequently run for periods of two or three nonths with an average daily deviation of only 15,1000 of a second. Yet astronomers are not satisfied even with this, and efforts are made continually to secure ideal conditions for a clock by keeping it not only in an airtight case, but in an under-

Crowding the Pigs.

Crowding too many pigs together has much the same effect as crowding the chickens in too small a space. Professor Haywood, of the Pennsylvania station, says that half if not more of the outbreaks of disease are due to the overcrowding of young The younger and weaker shoats. ones become so unresistant that finally they succumb to the germs of cholera or swine plague, which are always present even in healthy pigs.

Sheep Profits.

Under the caption, "Another Good Sheep Item," the Paris, Mo., Appeal "Wat Woodson and Ed. Ellis, SRYS: of Stoutville turned a tidy profit on the sheep they bought last winter. They purchased two mixed cars of sheep in February, consisting of ewes and yearlings, there being 463 head, costing \$1397. They sold sheep and wool to the amount of \$1391 and have 240 ewes and over 100 lambs yet on hand, and this is their first experience in handling stock since they were boys."

10 A Boll Weevil Dispute.

A lively dispute has cropped out among the entomologists who are experimenting for the best method of fighting the boll weevil in the cotton raising districts. A formidable array of authorities state that while Paris green will kill some of the weevils it will not produce enough increase in the crop to pay for the poison, while just as formidable authority declares that if Paris green will kil, any wee vits at all it should be used by the planters. One pair of weavils, it is stated, multiplies to 134,000,000 weevils in a year,-Weekl; Witness,

Dairy Facts.

E. K. Slater, Dairy and Food Commissioner of Minnesota, lays down three propositions drawn from his observation of the dairy farmers of that State.

Cold fact No. 1. The dairy farmers of this county who do not take and read dairy and farm literature are the most unsuccessful in the business.

Cold fact No. 2. The dairy farmer who does not make a study of his business and the performance of his individual cows has always failed.

Cold fact No. 3. The reverse of these is true. The dairy farmer who reads dairy and farm literature and takes an interest in his business will succeed every time.

A Good Calf-Rearing Mixture.

The following is one of the most successful of home-made calf rearing mixtures when used along with a little linseed cake; Two parts, by weight, of oatmeal; two parts of cornmeal; one part of pure ground flaxseed.

These meals should be finely ground. It is prepared for use by boiling with water, or by scalding with boiling water, and allowing it to stand for twelve hours. The calf farms, by making more and better rearer is recommended to begin with a quarter of a pound per head daily it will absord the liquid and will get for calves a month old, new milk being fed the first month. The allowance may then be increased to half a pound and more a day, as the calves become older; and the meal may be supplemented profitably by half a pound to one pound of pure linseed cake per head daily .-- W. R. Gilbert, in the American Cultivator.

against weeds in the orchard and the hog lot and around buildings as he does in the fields. If he would simply mow these down before they seed-a job for some day when he lack adequate water nower because of can do nothing else-he will add very much to the looks of the farm and save himself very much trouble and loss in the years to come.

A little timely effort even when work is pressing will put a stop to this weed nursery business. On many farms there are now growing enough weed seeds, especially around havstacks, to stock a ten-acre field. Mow them off. Plow the ground. If the yard is infested with these weeds, mow them down and thus mulch the trees against dry weather. You cannot afford to grow these weeds .-Wallace's Farmer.

How to Kill the Slags.

Professor Gillett, of the Colorado College, claims that the so-called slugs that skeletonize the leaves of many different plants during the summer are all comparitively easy to destroy. As the slugs devour the surnce tissue of the leaves in each case, they may be killed by a thorough ap plication of any of the arsenical poisons, such as Paris green, London purple or arsenate of lead. Upon low plants it is as well to mix the dry poisons in twenty times their own weight of common flour and then dust them upon the plants through a cheesecloth sack held in the hand. In case of the fruits, especially cherries, where it is not safe to use the above poisons, white hellebore powder may be used instead. If applied as a spray, put three ounces of the powder in one gallon of water; as a dust it may be used without dilution in a cheescloth sack and a light application made. The best time to apply the heilebore is towards evening. The slugs can be removed from cherry, pear and plum trees by thoroughly sifting fine road dust or freshly slaked lime over the foliage in the middle of a warm day, when the slugs are upon the upper side of the leaves. Begin in time, be thorough, and do not let the slugs destroy your tress or roses.

The Barns and Pens.

There is every reason why we should keep our stables, yards and pens nice and clean so they will be in sanitary conditions, more especially when the weather is warm, for in warm weather there are more bad effects from filthy stables and yards than when the weather is cold. But I do not advocate the plan of letting the stables and pens go uncleaned for a week or more at a time as some farmers do, then haul direct to the field, but prefer to clean themall each day, both for the comfort and health of the stock, as well as the satisfaction and pleasure of having the stables look respectable. We should also use plenty of bedding for it surely pays to keep our stables well bedded, both for the welfare of our manure, for with plenty of bedding

that will pay better than to bey it.

There is always some neighbor far-

mer that has more straw than stock.

and will sell at reasonable price to

get it out of the way. By all means

keep the stock well bedded.

FINANCE AND TRADE REVIEW [DUN'S WEEKLY SUMMARY

Reports from Most Sections Show That Commercial Activity is Fully Maintained.

In must sections of the country commercial activity is fully maintained. Negotiations for fall and winter trade indicate no loss of confidence, but at

few points the weather has not favored the crops, which causes conservatism pending more definite infornation. Several New England mills prelonged drouth. The money ket referds numerous undertakings. Collections are also slower in some uses, because of the fluancial situation, but the large majority of reports are favorable.

New business constantly appears in the market for steel products. Speci-fications are large on old contracts. Several important orders were placed this week, aggregating a considerable onnage. Other plans are under ne entintion.

Work on the Paname canal calls for beavy shipments of raffs, and the railraids furnish many new orders. Most of this business is for better qualities than were formerly taken, making the average price of new business higher then the old standard quotation of 200

Imports of billets for use in making finished steel for export testify the difficulty of securing domestic material. They are made possible by the drawback

More animatich in the jobbing dry acods market has made still stronger the position of the textile industries Manufacturers of cotton goods ensity maintain prices at the high level re-cently established. Searcity of stocks was intensified by the holiday of a sex taken by the employee of New Ergland mills.

Deliveries are still more unsatisfac Buyers are less disposed to de lay the placing of orders, although frequently declaring that prices should Although occasional inquiries from China are noted, there is no improvement in the export situation. Quiet conditions continue in the markets for woolens especially men's . Moderate business in dress went. goods is not of a character to determine the next season's trend. The mills have only fair orders on hand. New England footwear shops are shipping at about the same rate as la ecent years

COLUMN A REPORT OF A LOD ALCONG

With the mismanagement of the Jamestown Exposition the style of "fair" with which we have been cele-brating more or less historical events should come to an end. The time has arrived when something different should be devised. The country is fired of having the government pay millions to enable private corpora-tions to give "expositions," the chief features of which are exhibits of

canned goods and near foods. Happily, there should be no occa sion for another "fair" until 1920, when Boston may feel called upon to celebrate the landing of the Pilgrims, an event of sufficient dignity to call for something new in the way of commemoration.-Chicago Tribune.

CHILDREN TORTURED.

Girl Had Running Sores From Ecze--Boy Tortured by Poison Oak ma--Both Cured by Cuticura.

"Last year, after having my little girl treated by a very prominent physician for an obstinate case of eczema, I resorted to the Cuticura Remedies, and was so well pleased with the almost instantaneous re-lief afforded that we discarded the physician's prescription and relied entirely of the Cuticura Soap, Cuticura Ointment and Cuticura Pills. When we commenced with the Cuticara Remedies her feet and limbs were covered with running sores. In about six weeks we had her completely well, and there has been no recurrence of the trouble.

"In July of this year a little boy in our family poisoned his hands and arms with

Home, Sweet Home.

The chief reason for leaving home is that one may the better enjoy coming back to it. Home is the place we have so studiously suited to our own needs that it fits us like an outer envelope. In no other house do we feel so absolutely ourselves.

FEET OUT.

She Had Curious Habits.

When a person has to keep the feet out from under cover during the coldest nights in winter because of the heat and prickly sensation, it is time that coffee, which causes the trouble, be left off.

There is no end to the nervous conditions that coffee will produce. It shows in one way in one person and in another way in another. In this case the lady lived in S. Dak. She 8875

"I have had to lie awake half the night with my feet and limbs out of the bed on the coldest nights, and felt afraid to sleep for fear of catching cold. I had been troubled for years with twitching and jerking of the lower limbs, and for most of the time I have been unable to go to church to lectures because of that awful feeling that I must keep on the move.

When it was brought to my attention that coffee caused so many nervous diseases, I concluded to drop coffee and take Postum Food Coffee to see if my trouble was caused by coffee drinking.

'I only drank one cup of coffee for breakfast, but that was enough to do the business for me. When I quit it my troubles disappeared in an almost miraculous way. Now I have no more of the jerking and twitching nd can sleep with any amount of bedding over me and sleep all night in sound, peaceful rest.

Postum Food Coffee is absolutely worth its weight in gold to me." "There's a Reason." Read the little health classic, "The Road to Weilville," in pkgs.

A Circus Victim's Memorial.

Each year the first circus that goes in the vicinity of Gorham, Me., sends a delegation to hold a memorial service at the grave of Clown Sylvester Reynolds, who was killed by being thrown from a horse while riding bareback, September, 1826, and the event is published in "The American Clipper," of New York, the showman's official paper. This year the service was performed by the Silver Plate Show, which exhibited in Norway .--Reansber Journal.

support to the poles. Eight feet is the deepest bore which has been made into the deposit, and its true depth remains unknown as yet. Engineers who have studied the to pography of this part of the country

are inclined to the belief that a large body of water underlies this enormous salt bed, and that herein lies the

explanation for well-known saline quality of Great Salt lake. The salt body is situated 27 feet higher than the lake at the Mormon capital, and the slope of the land near the deposit is such that if water existed there it would flow in the direction of the lake.

With this as a basis for their deductions, the engineers who laid out the road have evolved the interesting theory that some large subterranean body of water is gradually dissolving the great salt bed from underneath and carrying it away in solution through underground channels which lead to the Great Salt Lake .-- Chicago Journal.
