for fancy tenms, are willing to pay

for disposition, because they don't

want to have their families, their children's lives endangered by having

rattle-brained horses, and other men

are looking for good dispositioned

horses because they don't care to

have their fine turnouts, their fancy

wagons broken up by a horse that

will get rattle-brained .- George Mc-

Kerrow, Mudlson, Wis., in The

Milk and Cream.

Recent investigations among the

nords which supply the Pennsylvania

State College creamery with milk and

cream, show that on some farms it

requires nine cows to produce as

much net profit as produced by five

average cows in the herd of grade

dairy cows kept by the college. Some

men receive as little as ninety-nine

cents, \$1.05 and \$1.20 for each dol-

lar's worth of feed consumed, while

others receive from \$1.50 to \$1.80

for each dollar invested in pasture,

hay, grain, etc. As a result of this

work twelve farmers are now keeping

records to determine which are the

least profitable cows. Samples of

each cow's milk are tested by the col-

Early Cutting of Alfalfa.

Many start out with the erroneous

Impressions about cutting alfalfa.

They have been induced to put in the

It to get rid of weeds, or don't cut the

erop from a newly seeded field too

soon. The crop should be pretty well

matured before it is cut. It is im-

portant that the plant be well estab-

lished and the crown bads get for

subsequent crops, before the first crop is tak a off. After the first

year three or four cuttings may be

made, providing each one is done at

Light in the Stable.

To the absence of proper light in the

stable may be attributed many of the

diseases to which the eyes of horses

are liable. It is easy to imagine how

the animal must feel and the conse-

result, from our own painful sensa-

tions on issuing from a dark place to

the full blaze of the sun. A repeti-

tion of this several times during the

day would be inevitably attended

with most injurious consequences. A

stable ought to be as well lighted as

a house, so that this source of injury

may be avoided and also that any

want of cleanliness may be readily

Miss Mary O'Brien, 306 Myrtle Ave., Brochtyn, N. Y., writes: "Peruna cured me in five weeks of ediarch of the stomach. atter unffering for four years and doetoring without effect. In common with other grateful ones who have been benefited by your discovery. I say, all hall to Peruna."

Mr. H. J. Henneman, Oskland, Neb., writes: "I whited before writing to you about my sickness, catarrh of the stomach, which I had over a year ago. "There were people who told me it would not stay cured, but I am sure that I am cured, for I do not feel any more ill effects, have a good appetite and am getting fat. So I am, and will say to all, I am cured for good.

1 and, and will say to an element of good.
"1 thank you for your kindness.
"Peruna will be our house medi-eine hereafter."
Catarrh of the stomach is also known in Catarrh of the stomach is also known in common parlance as dyspepsia, gastritis and indigestion. No medicine will be of any permanent benefit except it removes the catarrhal condition.

Gained Strength and Flesh.

Miss Julia Butler, R. R. 4, Appleton Vis., writes she had catarrh of the stom ach, causing loss of sleep and appetite, with frequent severe pains after enting. She took Peruna, her appetite returned, she guined strength, fiesh and perfect health.

LABOR OF THE AGED.

A Rather Socialistic Notion Springs Up in Missouri.

What Dr. Osler said in jost has been taken seriously by many peo-ple, who agree that there is no place in the scheme of things for eno past the meridian of life. Within the past week a man of 50 and a woman of 55 have written to the press complaining that they could not secure employment because "too old," though both aver that mentally and physically they are in their prime. If this be so, there is evidently some thing wrong in the organization of society, and society and not the individual should attone for the wrong it is for those past middle life.

and who can not secure paying work, to boldly claim the right to live. What becomes of such an one? So clety will not permit him to starve but will proceed, for its own credit, to find for him, if not employment, at least sustenance

Let once our eleomosynary institutions become glutted with these reb els, and society will awaken to a sense of its responsibilities, and look about m discover a means of making them productive, instead of a tax will come the sensible reform. It will be discovered that the 20-year period of labor is as expedient and necessary as the eight-hour day, and that there is no need for any one to practice hard labor after the 40, for between 20 and 40 he can produce enough wealth to sus-tain him for the balance of his days, in case and even luxury .-- St. Louis

until vines cover ground and there is danger of breaking them. An Iowa correspondent in Walvines are pruned and tied up to a Ince's Farmer says that he has found stake the fruit will be larger and a teaspoonful of soda put in a now's more uniform in size, but vines do slop before feeding once a day for not yield as many tomatoes as those two or three days to be an effective left to spread on ground or on a rack. cure for ordinary cases of scours in We find they do splendidly and the fruit keeps clean if they are mulched with straw after they are cultivated Value in Disposition.

the last time. If pointo bugs get on vines when sy in the brain development, and disthey are small, use parts green, but do not use it after fruit sets, as there When I was a boy we didn't is danger of poisoning the fruit. The think half as much about the dispobest way to keep clear of bugs is to teep them killed in the potato patch Millionaires, people who are looking -then they cannot travel to the to-

matoes. If growing for a cannery, the early fruit pays best as the vines make more fruit per plant and the cannery will not pay any more for the very late ones than for those grown when tomatoes are plentiful.

Hints on Breeding Sheep.

As the result of several years of experience, the Wisconsin station publishes the following conclusion:

From the breeding records of 514 ewes at this station we conclude that, for such animals and conditions as ours, the normal period of gestation ranges from 144 to 150 days after the date of service, and that more ewes will lamb 146 days after service than at any other time. There is no appreciable difference In the period of gestation for male

and female offspring in sheep. There is an apparent relation between the duration of the period of gestation and the period required for maturity. Quick-maturing breeds appear to carry their young for a shorter period than those breeds re-

quiring more time to mature. Large lambs are on the average carried in the utero for an appreclubby longer period than small or

medlum lambs. Lambs dropped before the 144th and after the 143th day of pregnancy are lacking in strength and vitally at high-

crop because of its great feeding vnl-Shropshire ewes are more proue and that some three or four life than any of the other breeds and enttings may be taken from the field creases, except the fourily cross of during one season. If you want a Shropshire rams on a Merino ewe strong, vigorous stand of alfalfa. foundation. don't be in too big a hurry to ellp

From the data presented it is apparent that twins are the normal increase for ewes of the matten type.

Farm Notes,

Decaying food and stannant water will injure the health of the cow, and the quality of the milk.

The hours of milking should be regular, and each cow should be milked in regular order.

A good maxim for the farmer is 'Always be on the alert for ideas that will serve to better your condition." A surplus rooster is an expensive ornament in the poultry yard. Eat or kill the surplus roosters before quences which are likely to be the they eat double their value.

When cows teats are tender and they are sensitive and inclined to be irritable when being milked, apply linseed oil after each milking.

A dairy cow should not be allowed to wander over a very large field, as the energy spent in walking about will show in a reduction in quality of milk.

Unsanitary surroundings cause detected. In stables which have a more disease, puny and unhealthy proper quantity of light, the shutters may be partially closed when birds, and more general loss in the the animals have fed properly and poultry yard than all other causes lie down to sleep. Many animals combined.

Children Taught Idleness.

11

Ing it.

A writer in The North American Review has something to say about child Idleness in contrast to child Inbor. There is much said about preventing children from working too hard, but the day seems to have gone by when children are encouraged to work. All the talk seems to be in regard to their working too much, and the fact fa that there is just as much Inclination to idleness as there ever was, and a good many children are being spoiled by the conditions of the time, not by working too much but by being improved with the idea that there is danger of their do

Bishop Potter's Job.

To illustrate a point he was making in an address he was delivering the other day, Bishop Potter told the following story; Not long ago I was staying with a friend in a country house up on the Hudson. On Sunday morning as I passed through the Birary I found a small boy curled up in a big chair deeply interested in a book. 'Are you going to church, Tom?' I asked. 'No,' he reh, Tom?' I asked. 'No,' he re-'Why I am,' I said. 'Huh!' he 'that's your job.'"-Harper's plied. inter. Weekly

WORN TO A SKELETON.

A Wonderful Restoration Cansed a Sensation in a Pennsylvania Town.

Mrs. Charles N. Preston, of Elkland, Pa., says: "Three years ago I found that my housework was becoming a burden. I tired easfly, had no ambition and was failing fast. My complexion got vellow and I lost over 50 pounds. My thirst was terrible, in the kidney secre-

diet, but as his medicine was not helping me, I began using Donn's Kidney Pills. They helped me at once, and soon all traces of sugar disappeared. I have regained my former weight and am perfectly well.

Disinfecting an Army.

Every one of the 800,000 Japanese soldiers who left Manchuria after the war had to be disinfected before be ing allowed to return home. Men clothes and weapons were alike dis infected. The soldiers stripped from head to foot, had each to take a hot bath, and on emerging from it were clothed in a fresh kimono, while their clothes were subjected to a vigorous disinfection in vaporizing ovens. The weapons were also disinfected by subjecting them to fames; even the jewelry and eigaret cases and watches all passed through the disinfecting chambers, while for the paper money which had been the currency of the war new notes and coins were given in exchange. These hygicatic precautions were pursued day and night, and before any Japanese was regarded as fit to re-enter Some fowls are better adapted to the Isles of Nippon he and his equipment had had at least an hour and a half's treatment.

Protection of Limestone.

Exposed limestone masonry can be

protected against the influence of

impurities in the air by spraying the stone with a saturated solution of barium hydrate. The solution is sprayed over the surface of the tone a number of times, and results in making it harder and denser than when it is in its normal condition. The hydrate, when it comes in con-tact with sulphate of lime, is converted into sulphate of barium, which is practically insoluble in water, and the time is converted into carbonate of lime by the absorption of carbon dioxide from the air. The surface of the stone can, according to the same authority, also be protected with ceresin wax, which has a waterproofing effect.

FAMILY FOOD.

Crisp, Toothsome and Requires No.

Cooking.

A little boy down in N. C. asked his mother to write an account of how Grape-Nuts food had helped their family.

She says Grape-Nuts was first brought to her attention on a visit to Charlotte, where she visited the Mayor of that city who was using the food by the advice of his physician. She says:

"They derive so much good from it that they never pass a day without using it. While I was there I used the Food regularly. I gained about 15 pounds and felt so well that when I returned home I began using Grape-Nuts in our family regularly.

"My little 18 months old baby shortly after being weaned was very fil with dyspepsia and teething. She was sick nine weeks and we tried everything. She became so emaclated that it was painful to handle her, and we thought we were going to lose her. One day a happy thought urged me to try Grape-Nuts soaked in a little warm milk.

Well, it worked like a charm and she began taking it regularly and improvement set in at once. She is now getting well and round and fat as fast as possible on Grape-Nuts.

Some time ago several of the famwere stricken with LaGrippe at the same time, and during the worst stages we could not relish anything in the shape of food but Grape-Nut and oranges, everything else naued us.

"We all appreciate what your fa nous food has done for our family." There's a Reason." Read "The Road to Wellville," in pkgs.
