REMARKABLE CASE OF SNEEZING

A Similar Case Was Never known in this Community.

Miss Catherine Stormer, aged sixteen years, daughter of John Stormer, of Emerickville, who has been staying in Reynoldsville for a few weeks, sneezed frequently all of last week and Saturday evening she had a violent attack of sneezing and went to Dr. A. H. Bowser's office to get something to stop it. All known remedies were tried but failed to stop the sneezing. Another doctor was finally called in for consultation and both worked until midnight and then moved Miss Stormer to Dr. Bowser's residence and put her under the influence of chloroform. She slept until day break and as soon as she awakened she began sneezing and continued until noon Sunday when she was anesthetized again. She rested until six o'clock that evening when the sneezing returned and continued until after midnight when she was anesthetized again. The sneezing did not return until Monday evening, when she had a slight attack that yielded to local remedies. Yesterday Miss Stormer was able to be taken home.

This was the most remarkable case of excessive and persistent sneezing ever known in this section.

Reynoldsville was visited by a costly fire recently that originated in one of the wooden buildings in the business part of that town. Fortunately Reynoldsville has good fire fighting companies and the loss, while large enough, was not as great as it would otherwise have been. Every year the wooden buildings are disappearing from the business portion of Reynoldsville and the town is taking on a more substantial and business like appearance. There are few towns in this section of the state whose business men have made greater efforts for the welfare of the town than Reynoldsville and the Record is always sorry to hear when misfortune visits that town.—Brookwayville Record.
