

The General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be wholesome and truly beneficial in effect, acceptable to the system and gentle, yet prompt, in action.

In supplying that demand with its excellent combination of Syrup of Figs and Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable success.

That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine—manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle.

The Door of Wisdom.

It was commonly believed among the ancients that men's thinking apparatus lay in the front third of his head, and that the temples, the thinnest parts of the skull, were the doors of wisdom which responded instantly to the knock of outside impressions. The middle and back of the head carried a reserve brain force. There were located the safe deposit vaults of memory, to be opened at will by the active 200,000,000 nerve cells situated in the region above and before the ear. When a physician looks for a fever—when the old-style family doctors—his first act is to place his hand on your forehead. He wastes no time feeling of the rest of your caput.—New York Press.

Millions in Oats and Barley.

Nothing will pay you better for 1933 than to sow a plenty of big yielding oats and barley with oats at 40c to 50c a bu. (Salzer's new Emperor William Oats averaged 50 bu. per acre more than any other variety in 1927) would pay immensely while Salzer's Silver King Barley which proved itself the biggest yielder at the Wisconsin Agricultural Station during 1927 if you had planted 50 acres would have given you in 1927 just \$5,000.00 on 50 acres. It is an enormous yielder.

JUST SEND THIS NOTICE AND I do to the John A. Salzer Seed Co., La Crosse, Wis., and we will mail you the most original seed catalog published in America with samples of Emperor William Oats, Silver King Barley, Billion Dollar Grass which produces 12 tons per acre, Sainfoin the dry soil luxuriant, etc., etc., and if you send us a package of new farm seeds never before seen by you.

Living in Compressed Air.

Investigating the effect of compressed air on health, two British engineers have shown that a pressure of ninety-two pounds per square inch—more than six atmospheres—may be endured without unpleasant results. The pressure must be taken off at a uniform rate, however, at least twenty minutes being allowed for each fifteen pounds of reduction, and capillary circulation in the body must be kept up by muscular exercise during compression. Slight temporary neuralgic pain in the arms was the only ill effect of the great pressure.

Many Professional Men,

clergymen, teachers and singers use Brown's Bronchial Troches for curing hoarseness and coughs.

Quick Construction.

Mr. Edison is preparing to construct the molds for his model cement house. He explains that it will take six days to mold the edifice and six days for it to dry. It will then be complete in all essential details and the owner can move right in.

The Moth and the Flame.

The mysteries of the moth and the flame are solved by Prof. Jacques Loeb. The moth, like many other insects, flies to the flame for the same reason that the sunflower and other plants turn to the light. Heliotropism is the awesome name in which this tendency of plants and animals rejoices. It explains also the merry antics of a June bug, as well as the apparently aimless squirming of a new-born vermin. Insects move in the direction of the light rays that fall upon them. Change the position of the light and the insect changes his position. Expose the insect to a diffused light and it will move toward the brightness with measured pace and slow, but expose him to a brilliant glare and he hastens with cheerful alacrity. That is why winged insects flutter gayly about in the direct sunlight. Heliotropism actually aids an insect in its struggle for existence.—Chicago Tribune.

THE TIME TEST.

That is What Proves True Merit.

Doan's Kidney Pills bring the quickest relief from backache and kidney troubles. Is that relief lasting? Let Mrs. James M. Long, of 113 N. Augusta St., Staunton, Va., tell you. On January 31st, 1933, Mrs. Long wrote: "Doan's Kidney Pills have cured me" (of pain in the back, urinary troubles, bearing down sensations, etc.) On June 20th, 1937, four and one-half years later, she said: "I haven't had kidney trouble since. I repeat my testimony." Sold by all dealers, 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

BORERS EXTERMINATED.

Every tree in the orchard should be examined for borers before frost gets into the ground. The knife and the wire method of exterminating these pests is old, but it is the surest. Neglect of this duty till spring may cost the orchard a number of valuable trees through girdling.—American Cultivator.

WHITE "BABY RAMBLER."

The ever blooming dwarf rose, popularly called the Baby Rambler, its real name being Madama Norbert de Lavavessere, has quickly become one of the most popular garden plants, because of its persistent energy in flowering. Little slips of plants only two or three inches high will be laden with flowers, and during the past season advantage was taken of this fact by two of the ten-cent bargain stores, which offered thousands of plants, each one in a two-inch pot and flowering, for ten cents each. It is now announced that there is a white counterpart of the red rose which will probably be introduced next season under the name of Madame Zeln.—Indianapolis News.

CHERRY PROPAGATION.

Is it better to bud or to graft the cherry? When is budding done? P. J. All nurserymen bud their cherries. The best time to do so is when the stocks are in a thrifty growing condition, usually in this latitude about August. If the stocks are of Mazzard variety, it is generally necessary to do it earlier than if of the Mahaleb variety, as the latter usually continues to grow later in the season. If cherries are to be grafted, the scions should be cut early and kept in a cool place till wanted, and should be set as early in spring as the weather will permit of outdoor work. March, if convenient. Budding is the better plan.—Country Gentleman.

WATCH FOR SAN JOSE SCALE.

It will be well to remember that the San Jose and other scales are capable of doing some of their most serious damage to our fruit and ornamental trees. Prof. J. B. Smith once suggested a very easy proof of this. Cut a scale infested branch from a living tree. In a few months the scales will all be dead, while those yet remaining on the tree will be living. Clearly the scale lived on the juices it was able to suck. Other commoner trees and shrubs, which go into the winter in fair condition, are dead by the spring, having succumbed to the effects of scale, when perhaps want of water or lack of hardiness has been ascribed. Therefore, spray your trees.—Indianapolis News.

PLANTING OF TREES.

Fall is presumed to be the best time to set shade as well as fruit trees, although there are some strong advocates of spring planting. In either event it is a certain mistake to expect that trees demand no attention after planting. If it is expected that the tree is to grow rapidly and produce either fruit or shade in a short time, it needs good cultivation as well as any other crop—digging around the trunk three or four times a season, or if the trees are in rows, shallow plowing and cultivating. It should be remembered that trees make practically all their growth before the middle of summer and the constant stirring of the surface soil in the spring, provides aeration and affords the roots the use of much moisture which would otherwise evaporate.—American Cultivator.

MARSH CROPS ON UPLANDS.

Celery we all know is a plant that likes humus-laden moist land, hence people who have not tried, calmly state as a fact the cheerful fiction that celery cannot be raised on a market garden soil much above the water level. Having raised the sweetest and crispest in our back yard, which has been tilled for a century or so as a vegetable garden, we have no hesitancy in planting various varieties at No. 1 experiment station of the Long Island Railroad, having been assured it would not even grow, but we took second prize at the county fair with this celery. No. 1 station, according to the U. S. Geological Survey, is 112 feet above the sea level. Humus is absolutely and entirely lacking, caused mainly by the annual "forest fires" due to cheerful neglect of precaution by neighbors burning brush to the north of us, in that section of the island at present given over mainly to cord wood industry. A shallow ditch was dug, humus was furnished by barnyard manure, celery plants set out, and occasionally, or to be more exact, semi-occasionally, the irrigation sprayers were turned on the celery plants, and, as is the ambition of all plant life, they grew and station No. 2 turned out celery that holds its own in competition with that grown anywhere. We shall continue to grow celery at stations No. 1 and 2, as it eats well, sells well and makes an excellent variety for the now noted Long Island home hamper.—H. B. Fullerton, in American Cultivator.

FINANCE AND TRADE REVIEW

COLLECTIONS IRREGULAR

Jobbers and Wholesalers Are Conservative in Preparations For Future.

New York.—R. G. Dun & Company's "Weekly Review of Trade" says:

"Little change appears in the commercial situation, but progress is in the right direction in so far as any difference can be discerned. Recent gains are maintained in almost every instance, and a few further encouraging symptoms appear, notably the smaller decreases in railway earnings and larger forces at work in leading industries.

"Wholesale and jobbing houses prepare for the future most conservatively. Mercantile collections are irregular, some districts reporting fairly prompt settlements, but at other points payments are slow.

"On the whole the iron and steel industry is in a better position than it was a week ago, although new contracts are placed with much caution, and each order is the object of extensive negotiations. Bariness still appeared several weeks ago but is now subsiding and buyers have been able to secure small quantities of pig iron at further reductions.

"Aside from a moderate demand for prompt shipments on novelties or special construction, the ordinary market for cotton goods is dull, staple lines being almost wholly neglected. Purchases continue to await lower quotations. Variations in the raw material have no effect, and the raw material demand has not improved. All lines of woollens have been opened without arousing much interest or giving any definite impression regarding the trend of the market. A fair business in certain lines of wool goods has encouraged more activity at some mills and fancy worsteds have sold sufficiently to indicate that the season's results would equal the success of recent preceding years, but most clothing manufacturers have made little preparations for the future.

"New England footwear producers are receiving small initial and supplementary orders by mail from wholesalers who recently inspected samples in the Boston market, but total results are not satisfactory. Leather is dull and weak, except for a fairly steady market for heavy sole, of which receipts are light. Shoe manufacturers restrict purchases of leather to actual needs, and some varieties are from two to four cents lower than at the best prices of last year.

A SEVERE SENSE.
Grateful Mother—Oh, are you the noble young man who rescued my daughter from a watery grave?

Noble Young Man—(who is truly modest)—Yes, madam; but I assure you I only did it from a sense of duty.

HAD MISSED HIM.
"What's become of young Benson?"
Oh, he got an automobile."
"Is that so? Is his wife having any trouble getting his life insured?"—St. Louis Post-Dispatch.

PAYS DEBT BY MARRYING.

Noted Woman Railroad Promoter Cancels \$7,000 Thereby.

Mrs. Alice Butler, most noted woman railroad promoter in the world, thrown into bankruptcy recently, paid her largest creditor by marrying him. He is S. F. Moore of Coshocton, O., chief engineer in construction of several of Mrs. Butler's railroads. His claim was for about \$7,000.

They were married secretly in St. Louis, immediately following the granting of a divorce of Mrs. Butler from E. F. Butler of Des Moines, Ia.

New Use for Telephone.

The latest use of the telephone is in locating shoals of fish. The electric apparatus is a German patent. A microphone, inclosed in a watertight case, connected with an electric battery and telephone, is lowered into the water. So long as the telephone hangs free no sound is heard, but on its coming into contact with a shoal of fish the constant tapping of the fish against the microphone case produces a series of sounds which at once betrays their presence. The cord attached to the microphone is marked, so that the exact depth of the shoal is designated.

FITS ST. VITUS' DANCE; Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. \$3 trial bottle and treatise free. Dr. H. R. Kline, Ed., 281 Arch St., Phila., Pa.

New York As a Jewish Center.

More and more New York is beginning to be the center of attraction for all that is most distinguished in the Jewish world. It seems to be an unwritten law that at one time in his life every distinguished Jew should pay a visit to New York. In addition to these, many foreigners of distinction who have shown an interest in Jewish affairs, like Mr. LeRoy-Beaulieu, or Professor Milynov, visit these shores from time to time, so that without leaving New York most of us can have an opportunity of seeing and hearing most of those who are helping to shape the history of Jews and Judaism in the present day. Under these circumstances it is very unfortunate that there is no specific body in existence among the Jews of New York who can afford such visitors hospitality when they come among us.—American Hebrew.

India's Filmy Muslim.

Another story is told of a weaver who was "enthralled and turned out of Dacca for his neglect in not preventing a cow from eating a piece of muslin spread to dry on the grass. She mistaking it for a spider's web." Belts records the story about a Moghul princess whose father was "angry with his daughter for showing her skin through her clothing, whereupon the young princess remonstrated in her justification that she had seven suits on!"—Indian World.

How to Make Your Milch Cows More Profitable.

Write Pacific Coast Borax Co., New York City, for "Successful Dairying," being valuable information on the most profitable selection of cows, their feeding and care, the handling of milk to yield the highest price product, and the protection and preservation of these products from deterioration; with article on diseases of cows, and recipes for their cure. The book is free. A post card request only is necessary.

Watch in a Steer's Stomach.

Peter S. Kirk of Lancaster, Pa., slaughtered a Western steer and found an unexpected find. In its stomach he found an open-faced gold watch. All the parts of the watch are intact except the hands, which are off the face. It is supposed that the watch was lost in the West, fell among feed that the steer was eating and he gobbled it down.

SHE COULD NOT WALK

For Months—Burning Humor on Ankles—Opiates Alone Brought Sleep—Eczema Yielded to Cuticura.

"I had eczema for over two years. I had two physicians, but they only gave me relief for a short time and I cannot enumerate the ointments and lotions I used to no purpose. My ankles were one mass of sores. The itching and burning were so intense that I could not sleep. I could not walk for nearly four months. One day my husband said I had better try the Cuticura Remedies. After using them three times, I had the best night's rest in months unless I took an opiate. I used one set of Cuticura Soap, Ointment, and Pills, and my ankles healed in a short time. It is now a year since I used Cuticura, and there has been no return of the eczema. Mrs. David Brown, Locke, Ark., May 18 and July 13, 1927"

Valuable Violin for King Edward VII.

A violin, which is to be the property of King Edward of England, has just been completed by Archibald McIntosh, a violin maker, in Brookville, Mass. The instrument is made of curly maple, the wood having been taken from an ancient table, once the property of the Duke of Kent.

Only One "Ibromo Quinine"
That is Laxative Bromo Quinine. Look for the signature of E. W. Grove. Used the World over to Cure a Cold in One Day, 25c.

Great Britain has a longer seacoast line than any other nation in Europe. It measures over 3,000 miles. Italy coming second with 2,474. Russia ranks third and France fourth.

Itch cured in 5 minutes by Woodford's Sanitary Lotion. Never fails. At druggists.

One of the strangest prizes offered by the French Academy of Science is \$29,000 for the person who discovers a method of communication between planets.

"Ouida" Dead.

Florence, Italy.—"Ouida" (Louise de la Plante), the novelist, died January 23, at Viareggio, after an illness extending over a long period. She died in most distressing poverty, her only attendant being an old servant woman in whose arms she expired. She was completely blind of one eye and the other eye was badly affected through her having suffered so much from exposure and privation. During the last few months of her life she was compelled at times to sleep in the open air when unable to pay for a night's lodging. The immediate cause of death is set down as asthma, complicated by heart disease.

Piles Cured in 6 to 14 Days.

Pazo Ointment is guaranteed to cure any case of Itching, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

Kettle Bridges.

An English authority declares that the most remarkable bridges in the world are the kettle bridges, of which Casack soldiers are expert builders. The materials of which they are constructed are the soldiers' lances and cooking kettles. Seven or eight lances are passed under the handles of a number of kettles and fastened by means of ropes to form a raft. A sufficient number of these rafts, each of which will bear a weight of half a ton, are fastened together, and in the space of an hour a bridge is formed on which an army may cross with confidence and safety.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CENEY & Co., Toledo, O. We, the undersigned, have known F. J. CENEY for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm. W. A. LINDSAY, KENNAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

Takes Nerve to Do This.

For a feat of dexterity and nerve it would be difficult to surpass that of the Bojesman of South Africa, who walks quietly up to a puff adder and deliberately sets his bare foot on its neck. In its struggles to escape and attempts to bite its assailant the poison gland secretes a large amount of the venom. This is just what the Bojesman wants. Killing the snake, he eats the body and uses the poison for his arrows.

Wouldn't you like to try Nature's mild laxative, Gardell Tea? Headache Powders and Digestive Tablets also upon request. Send postcard to Gardell Tea Co., Brooklyn, N. Y.

Where Woman Excels.

"Woman's sense of color is better than man's. Where one in 20 women are slightly color-blind, one in five men are so."

The speaker, a physician, continued his experiments with the tintometer, or testing machine. "You," he said, "can't tell green from blue, and are therefore defective, sir. But you are not absolutely color-blind. Absolutely color-blind persons are very, very rare. I have met but one. He couldn't tell red from yellow, or yellow from blue. 'Why are men's eyes less reliable than women's as regards color?' Some say it is the tobacco smoke that dulls and weakens them. This may very well be, for I have noticed that non-smokers have a somewhat sharper vision."—Philadelphia Bulletin.

Many a man would like to trade \$100 worth of muling stock for a ham sandwich.

AN IMITATION TAKES FOR ITS PATTERN THE REAL ARTICLE

There was never an imitation made of an imitation. Imitators always counterfeit the genuine article. The genuine is what you ask for, because genuine articles are the advertised ones. Imitations are not advertised, but depend for their business on the ability of the dealer to sell you something claimed to be "just as good" when you ask for the genuine, because he makes more profit on the imitation. Why accept imitations when you can get the genuine by insisting?

REFUSE IMITATIONS--GET WHAT YOU ASK FOR!

PUTNAM FADELESS DYES

Color like goods brighter and faster colors than any other dye. One 10c package colors all fibers. They dye in cold water better than any other dye. Try any goods without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. MORTON BULLOCK CO., Quincy, Illinois.
