HOW ANIMALS CLIMB.

Scaly Tailed Squirrels, the Sloths and the Malagasy Bats.

How certain animals have in the long course of years adapted themselves to tree climbing is described by a writer in the Scientific American. He says: "A group of African rodents, the scaly tailed squirrels, have developed on the under surface of the tail certain structures which may be compared to the climbing lemons used by workmen. These take the form of a few transverse rows of large, triangular, horny scales, with their points directed backward. These scales when pressed against the bark of a tree must afford material aid in climbing. Another group of animals in which 'climbing irons' have been developed is that of the scaly ant eaters, or pangolins, of India and Asia, creatures which look more like living fir cones than mammals. The scales—much larger than those of the scaly tailed squirrels—cover both surfaces of the body as well as the head and limbs, so that it can scarcely be supposed they have been developed for climbing. Indeed, only a few species climb, but these have found the assistance afforded by the scales on the under side of value in an ascent and habitually make use of them as climbing irons.

"Quite a different type of climbing, or, rather, hanging, apparatus has been developed in the sloths of tropical America, which spend their time in the tree tops, where they remain suspended back downward by their hook-like claws. These claws, which may be three or two, have been modified from ordinary claws and afford a striking instance of adaptation to an abnormal mode of life. The thumb of bats is likewise modified into a hook-like claw, also used for suspending purposes when the creatures hang head upward. Generally, however, bats suspend themselves head downward by the hind claws, grasping power being retained by the toes, so that the modification has not been carried to the same extent as in sloths, in which the claws act in a mechanical manner.

"Certain bats appear to have found their hooklike thumbs and hind feet insufficient for suspension and have made use of the sucker principle for this purpose. This mode of suspension has been developed independently in two distinct bats, one a native of Brazil and the other of Madagascar. In the Brazilian species the suckers take the form of stalked disks attached to the palms of the thumbs and the soles of the feet. The suckers of the Malagasy species are horseshoe-like. By means of the suckers these bats are able to ascend vertical surfaces."

Suitable.
"What would be a suitable birthday present for my little boy?" inquired the fond mother.
"Let me think," returned the star boarder, who occasionally liked to sleep late in the morning. Then, with the glad, confident smile of one who has solved a problem, he added, "How would a gag or a straitjacket do?"—Chicago Post.

Arousing the Lion.
If we want to educate that sturdy, stolid, unresponsive thing, the British public, a scheme has to be mildly diluted with pleasure, masked by brilliant pictures, like the bitter pill we hide in our children's jam. We have compulsory schooling, of course, but as a nation we are not and do not want to be educated.—London Bystander.

OFFICERS AND SADDLES.

Jefferson Davis and a Joke He Did Not Appreciate.

When Jefferson Davis was secretary of war he ordered all his generals to learn to ride horseback. No finer horse man than Jefferson Davis ever lived. He won the love and hand of Zach Taylor's daughter by his distinguished presence in the saddle, as well as by his intrepidity at the cannon's mouth. When secretary of war he noticed that only a few officers in the service were capable horsemen and issued an order something like this:

"A liberal reward will be paid to any officer or private in the army who will offer a satisfactory device for keeping our soldiers from falling out of their saddles. Communications to the secretary of war will be regarded as confidential."

Captain George Horatio Derby, one of the leading army engineers of his day, used to write humorous and witty stories over the pen name of John Phoenix. He received a copy of Secretary Davis' order while improving the harbor of San Diego, Cal., and immediately forwarded the most intricate and accurate designs of his plan for keeping officers and men in the saddle. To the seat of each officer's "paus" he attached a bull ring, and another bull ring was attached to the saddle. The two bull rings were to be lashed together when the officer mounted his steed. "If that doesn't hold, nothing will," wrote Phoenix to the secretary. Davis was furious when he got this proposition and immediately ordered that Captain Derby should be court-martialed for "official levity." The secretary felt that the army had been disgraced and wanted Derby severely punished. One of his intimates hastened to him. "Jeff," he whispered, "if you order a court-martial for this little piece of levity of John Phoenix, one of the salt of the earth and immensely popular in the army, you will be made a laughingstock. The people will ridicule you out of office. Just laugh it off." Davis took his advice.—New York Press.

Hindoo First Steps in English.

A native had been taught at Calcutta to seal the wall of the premises into the compound of No. 3, Chowringhi, dressed in a complete suit of European clothes. The man had on the previous evening concealed himself inside a shop and had employed his time till morning in fitting himself with a complete suit of clothes, including a white shirt, with studs and laces; a red tie, carefully put on; black socks, a pair of boots, a watch and chain, handkerchief and even a pocketknife, with a straw hat and stick. He even went the length of writing his name inside the hat. On being caught he said he wanted to learn English and as a preliminary step thought it best to dress himself in sahib's clothes.—Bombay (India) Advocate.

The Difficult Handshake.
It is a difficult matter, this of shaking hands. To start with, it is not always easy to know whether to shake hands or simply bow or even just scatter a gentle smile around. Books of etiquette devote pages to the handshake. However, if one decides to do it, then 'twere well 'twere done quickly. Let the action be swift and brief.—London Globe.

What He Felt Like.
It was the first time he had sung in an Episcopal choir, and he felt strangely out of place in the vestments he wore. The other choristers looked comfortable enough, but the new one was sure he would trip on the skirts of his cassock when he went up the chancel steps, and he knew that if he did not stop perspiring his clean linen coat would be sadly mussed. The opening prayer had been intoned by the rector, and the singers were in line waiting for the introduction to the procession to be played, when one of the basses whispered in the new man's ear: "You're a tenor, aren't you?" "I suppose so," he replied, "but I feel like a two-spot."—New York Times.

Picturesque Newfoundland.
Newfoundland has been styled a rough stone with no interior, and doubtless to the passenger on some Atlantic liner, seeing its bold headland jutting out into the ocean, with its weather beaten cliffs standing gray and cold, the description may seem a fitting one. But to those who know it well, who have seen the fir clad valleys, its clear lakes and streams and hillside tinged with the red and gold of autumn. It is a rough stone with a very fair interior.—London Strand.

"I Want the Proof" YOU SAY.

When told that nervous exhaustion and prostration are cured by Dr. A. W. Chase's Nerve Pills, and we refer you to many thousands of cases similar to the one reported below.

Because you do not look sick and are not suffering great pain, and because they do not realize your awful feelings of weakness, helplessness and discouragement, your friends fail to show much sympathy for you, and most doctors are simply helpless in the face of exhausted nerves.

Dr. A. W. Chase's Nerve Pills

Will cure you just as rapidly as new blood can be formed and new nerve force created, for they cure in Nature's way, by building up the nervous system and for this reason you can be absolutely sure that each dose is of at least some benefit to you. The portrait and signature of A. W. Chase, M. D., are on every box of the genuine. 50 cts. at all dealers or Dr. A. W. Chase Medicine Co., Buffalo, N. Y. Mr. James Squires, Courtland, Mich., writes:

"My daughter was helpless with nervous prostration for three years in spite of the efforts of the best doctors in surrounding cities. Six boxes of Dr. A. W. Chase's Nerve Pills completely cured her, so that she does the work of a woman, and is as well and vigorous as ever." For sale by Stoke & Felcht Drug Co.

MODERN PAPER.

Not So Good or Lasting as the Old Fashioned Kind.

"The men who wrote history on tablets of stone in ages gone had a difficult task to perform and had to cultivate the habit of brevity," says a writer in a German paper, "but what they wrote was preserved. It will be different with the newspapers and books of the present time. The paper upon which they are printed will disintegrate in a few years and the records—historical, scientific and literary—will become dust.

"I saw two papers recently which told the whole story. One contained an account of the death of Napoleon Bonaparte. It was printed in 1821, was in a state of perfect preservation and looked as though it might last with ordinary care a hundred years. The other paper was kept because its leading article described the surrender of Sedan, which had taken place a day before. Although it had been printed nearly fifty years later, the Sedan paper had to be handled carefully to prevent its tearing in the creases. One of these papers was printed on old fashioned paper and the other on the modern kind.

"With the two specimens before me I cannot refrain from urging once more that a few numbers of all books and newspapers, enough for all first class libraries, be printed on good paper for the benefit of those who will live after us."

THE SKYROCKET.

How It is Made and the Reason It Rises in the Air.

Of all fireworks none is more beautiful from a pyrotechnic point of view or more generally popular than the skyrocket.

The powder ingredients are sulphur, charcoal and saltpeter, roughly in the proportions of fourteen, twenty-six and sixty respectively. Except in the case of military or life saving rockets, the cylindrical case is of paper or pasteboard, somewhat constricted at the fuse end. Into this the powder is rammed tightly, a conical space being left for the insertion of the quick match which passes through the constriction, or "chokehole," into the mass of powder.

This forms the body of the rocket, which is closed at the top with a plaster of paris plug. Through this a small hole filled with a fuse communicates with the conical shaped head, holding stars, serpents, crackers or gold or silver rain. The whole is, of course, attached to a slender stick to direct its flight.

On the fuse being ignited and the main cylinder of powder exploded the enormous quantity of heated gases generated force their way downward through the narrow box, urging the rocket upward in the air.—Pearson's.

Sick Man (who is a collector of coins and also very rich)—I made out my will today, Reginald, and left you my collection of coins.

"Which one, uncle—the one in the bank or the one in the cabinet?"—London Tit-Bits.

A model husband's the noblest work of woman.—Indianapolis Star.

EVERY RHEUMATIC INVITED TODAY

TO TEST URIC-O FREE!

75-Cent Bottle Given Free To All Who Apply

If there are still any sufferers from Rheumatism in this county or wherever this paper reaches, that have not yet tried the wonderful Rheumatic Remedy Uric-O, we want them to try it now at our expense. We truly believe that there is not a case of Rheumatism in the world that will not yield to the wonderful effects of Uric-O, and we want to prove it to every doubter beyond all possibility. The best way to do this is to give a large trial bottle of this remedy outright to every sufferer and let him test and try it to his own satisfaction. If you or any of your family suffer from Rheumatism, no matter what form, just cut this notice out of the paper and send it together with your name and address, also the name of your druggist, to the South Drug Co., Syracuse, N. Y., and they will send you by return mail a liberal trial package free of all expense. There is no reservation to this offer. You take the remedy home and use it according to directions until thoroughly satisfied of its merit.

We could not afford to do this if we did not know that after you are freed from this dreaded disease that you will recommend it to all your friends who have Rheumatism. We know from experience that personal recommendation from one person to another is the most valuable advertising, and that is the way we intend to acquaint the world with Uric-O. Don't put off writing because this offer will soon expire, and then it will be too late. Do it to-day and start yourself upon the highway to perfect health and happiness. Send for Uric-O, no matter where you live. It is sold by Druggists all over this country, and we want you to have a bottle free.

Uric-O is sold and personally recommended in Reynoldsville by Stoke & Felcht.

NOTICE OF APPLICATION FOR CHARTER.

Notice is hereby given that an application will be made to the Governor of Pennsylvania on Monday, the 23rd day of March, 1908, by G. W. Squires, D. Wheeler and W. E. Reed, under the Act of Assembly entitled "An Act to provide for the incorporation and regulation of certain corporations," approved April 29th, 1874, and the supplements thereto, for the charter of an intended corporation to be called the "Syracuse Woolen Mill Company," the character and object of which is for the purpose of manufacture, barter and sale of goods, articles, fabrics and things of all kinds and descriptions, both spun, woven and knitted of wool, cotton, linen and other materials, or mixtures thereof; dyeing of all kinds and the manufacture or making, barter and the sale of trousers, shirts, overalls and other articles of clothing of fabrics and cloths of all kind adapted therefor, and for these purposes to have possession and enjoy all the rights, benefits and privileges of said Act of Assembly and the supplements thereto.

CLEMENT W. FLETCHER, Solicitor.

PISO'S CURE

A Painful Persistent Cough

portends serious results if allowed to continue unchecked. Constant hacking tears the lungs and exposes the delicate, inflamed tissues to ravaging consumption. The most obstinate and advanced cough is readily relieved by PISO'S CURE. No other remedy has such a soothing and healing effect upon the throat and lungs. For nearly half a century it has cured innumerable cases of coughs and colds and saved many lives. For throat and lung affections

Piso's Cure is the Ideal Remedy

FOR COUGHS AND COLDS

25 CTS.

The Shopkeeper Talks

You see, Mrs. Brown, we can't afford to take any chances on oysters. They are either very good or else they are not fit to eat.

If they are scalshipt they are fresh and clean, and the most wholesome food you can buy. No ice or water has touched them, and no preservative is ever used for them—that we guarantee. We refuse to handle any but Scalshipt oysters because they are the only ones that we know to be beyond question.

They come to us in a white-enameled tins, that is SEALED airtight inside. The top is packed around it on the OUTSIDE. We will not offer to our customers anything but the best, and that means Scalshipt every time.

FRANK'S RESTAURANT

PECULIAR PROPERTIES OF NEW MEDICINE

Cooper Preparation Attracts Widespread Attention by Expelling Internal Parasites.

The interest created in leading cities during the past year by young Mr. Cooper with his new preparation, is largely accounted for by a peculiar quality possessed by this medicine, which he calls his New Discovery.

Mr. Cooper believes that internal parasites, or tapeworms, are responsible for much ill health, and it is an undoubted fact that his medicine has expelled immense numbers of these creatures in various cities visited by him. The young man also believes that stomach trouble is the main cause of all ill health. He claims that few can have poor health with a good digestion. He further claims that his New Discovery medicine does nothing but tone up the stomach, yet it not only expels the parasites, but relieves many other ailments not as a rule associated with stomach trouble.

Little Jessie Birdsall, daughter of Mrs. Ida Birdsall, living at 2138 Carroll Avenue, Chicago, is among many relieved of a large parasite by Mr. Cooper's preparation during his stay in that city. In speaking of the matter to Mr. Cooper, the mother said: "My child Jessie, who is fourteen years old, has been suffering with this trouble for over seven years. Until this morning we did not know what the trouble was. She was extremely nervous; the least little thing would upset her; her tongue was coated, and at times she would have a good appetite, then again could not bear the sight of food; she was restless at night, had a bad breath, especially when she got up of mornings. We tried everything to relieve her, but met with no success. We were just on the point of giving up trying anything else, when we began to read of Cooper's New Discovery. Several days ago we purchased this medicine. Jessie has been using it regularly, and this morning this parasite left her system. I don't wonder that she has always felt bad, and nothing would give her seemed to relieve her. Now that she is relieved of this tapeworm I feel sure that she will grow better each day, and enjoy perfect health.

Mr. Cooper, your medicine is worth a thousand times more than you charge for it. I know of a number of people troubled the same way as Jessie has been, and I certainly expect to tell them personally to try your medicine."

We would advise anyone who has been troubled for some time with general poor health to try this great medicine. We are agent for it in this city.—Stoke & Felcht Drug Co.
