Raised Up When Science Said There Was No Hope.

G. W. L. Nesbitt, Depot Street, Marion, Ky., writes: "I was a chrould invalid with kidney troubles and often wished death might end my awful suffer-The secretions were thick with sediment, my limbs swollen and my right side so nearly paralyzed I could not raise my

hand above my head. The doctor held out no hope of my recovery and had given up, but at last started using Doan's Kidney Pills and made a rapid gain. After three months use I was well and at work again." Sold by all dealers. 60 cents a box. Poster-Milburn Co., Buffalo, N. Y.

Swedenborg's Body Exhumed.

The remains of Emmanuel Swedenborg, which were exhumed the other day in London, where they had lain since 1772, were sent to Sweden for final burial. There was an imposing procession from the railroad station to the waterfront, the coffin being escorted by delegations of Swedish and British naval officers and bluejackets and deputations from Swedenborgian churches and Swedish societies,

Keen Eyed Sleepwalker.

An extraordinary acuteness of vision in the sleep walking state has attracted the notice of Dr. James W. Russell in a girl of twenty-one, observed last August at the Birmingham (England) hospital. The patient, a teacher typewriter and music student, was reserved and more or less hyster-Ical, and in three years she had had four season's of sleep walking, with almost nightly rising in sleep for sev eral weeks at each period. She usually left her bed between 1 and 2 in the morning. She was not easily aroused, appearing wide awake, but recognizing nobody, and in this condition she attempted various tasks, playing the piano, tuning her violin, reading, studying harmony, crochet-ing and writing letters. It was It was found that this work was always done in almost absolute darkness. A let-ter was written to a relative, but on being asked to copy the address in the same light, when awake, she was unable to see, and wrote a confused jumble of lines, one over another. She crocheted well and wrote a very accurate musical essay. The eyes seemed normal. Another curious feature of her case was that, contrary to usual experience-she would recall events of her sleep, seeming to have a very clear recollection of them.

Effective Life Preservers.

The improved lifebelt of Jack Fockety of Antwerp, which has been satisfactorily tested in Belgium and France, comprises two buoyant cushions, one of which rests on the chest and the other on the upper part of the back, the two being connected by straps across the shoulders and held in place by a waiststrap. The belt, weighing six and a half to seven pounds, can be applied in three sec-The wearer's mouth and nose must be kept always above water, even if he should become exhausted lose consciousness, and his arms and legs are left absolutely free for swimming or otherwise aiding himself. A small bat-tery feeds the lamp for four or five

What People Are Roading.

Records of numerous public libraries in New York City show that in the last five years there has been a remarkable increase in interest in sociology, political economy and kindred subjects. The reading and consulting of books relating to such matters have more than doubled in the last 15 years.

FRIENDS HELP St. Paul Park Incident.

"After drinking coffee for breakfast I always felt languid and dull, having no ambition to get to my morning duties. Then in about an hour or so a weak, nervous derangement of the heart and stomach would come over me with such force I would frequently have to lie down.

'At other times I had severe headaches; stomach finally became affected and digestion so impaired that I had serious chronic dyspepsia and constipation. A lady, for many years State President of the W. C. T. U., told me she had been greatly benefited by quitting coffee and using Postum Food Coffee; she was troubled for years with asthma. She said it was no cross to quit coffee when she found she could have as delicious an article as Postum.

"Another lady, who had been troubled with chronic dyspepsia for years, found immediate relief on ceasing coffee and beginning Postum twice a She was wholly cured. Still ther friend told me that Postum Food Coffee was a godsend to her, her heart trouble baving been relieved after leaving off coffee and taking on

'So many such cases came to my notice that I concluded coffee was the cause of my trouble and I quit and up Postum. I am more than ed to say that my days of tronble have disappeared. I am well and happy." "There's a Reason." Read

Cut a chip of camphor, light it, and set it on a basin of water, when it will continue to burn and float until it is consumed.

Sheet iron is rolled so thin at the iron mills that 15,000 sheets are required to make a single inch in thickness. Light shines as readily through one of these sheets as through ordinary tissue pa-

Every year a layer of the entire sea, fourteen feet thick is taken up into the clouds, the winds bear their burden into the land and the water comes down in rain upon the fields to flow back through rivers.

Sir Hugh Bell, presiding at the meeting in London of the Iron and Steel Institute, suggested that a century hence a ship with hardly any machinery or crew would speed across the Atlantic propelled by electric force generated by the Falls of Niagara and transmitted to the vessel wirelessly. Such a forecast, the speaker declared, was no more incredible than the developments of the past century.

The Rhone, on leaving the Canton of Geneva, near Bellegarde, flows under ground for a short distance, and then re-appears on the surface, but this perte du Rhone, as it is termed, is destined itself to disappear. An official inquiry is being held on three projects for making a dam 27.3 yards and two parallel tunnels of 5000 yards with two central stations for generaling 155,000 horsepower during 300 days of the year. The estimated cost is

"The advantage of egg powdering consists in the fact that there is no alteration in the chemical composition of the eggs. There is simply a loss of the greater part of the water held mechanically in combination as when fruit is dried by free exposure to the air and sun or by more rapid artificial methods. When thoroughly desiccated and brought by pulverization into the state of coarse powder the egg material can be preserved for an indefinite period in ordinary packages, if kept in a dry place.

The use of the fuel in submarine boats, or other hazardous places and the superior safety of alcohol must lead to its ultimate adoption. If a can of gasoline be left open near a flame, it is likely to explode by the ignition of its vapor. This could never occur with alcohol. Then, again, water is useless to quench burning gasoline, serving only to spread the fire by floating the burning liquid. Alcohol can never present this danger, for it mixes with water in all proportions, and in so doing becomes non-inflammable.

FOG PREVENTION.

An Offer To Protect London From the Gray Blanket.

An Italian engineer has offered to secure immunity for London from the dense fogs which occasionally envelop her and paralyze her traffic, and as he asks for financial aid to demonstrate his theories the London County council has declined his offer. Writing of this fog problem, Consul-General Wynne of London says: " In replying to the report which made light of the theory that fogs could be driven away by the discharge of cannon, a civil and electric engineer informs the writer that the inventor of the fog dispeller has never claimed to be able to displace the atmosphere in order to prevent the fog from forming or to drive it away when once formed. His theory is quite different and the work to do very simple. He states that in order to prevent the phenomenon from taking place it suffices to destroy the atmospheric equilibrium which exists at the moment when the fog forms and which lasts as long as the fog lasts. The inventor states that the tranquility of the atmosphere is the sole cause of fog; his purpose is to produce a movement in the air mo lecules. This movement is easily obtained by means of vibrations of the atmosphere. In order to produce molecular movement in 100 tons of metal it is not in the least necessary to displace the mass of metal-it is sufficient to strike it with a hammer to put the molecules of the entire mass

in vibration." The inventor quotes the case of hail in France, where a discharge at the right moment has often dispersed a gathéring storm. According to a recently issued report of the District Viticulture Society of Lyons, France, it appears that in the ten years preceding the use of protection against hail the losses amounted to about \$2,-6000. In the six following years they amounted only to \$200,000, and it is here stated that "all the slight failures sustained were invariably due to the relaxation of discipline on the part of the firers, who allowed themselves to be taken unawares."-Scientific American.

DUN'S WEEKLY SUMMARY

Success of Recent Rallway Bond Issues Is Considered as Favorable Indication.

New York.—R. G. Dun & Company's "Weekly Review of Trade" says: Sentiment was greatly improved in financial circles by the successful issue of new railroad bonds, prices of securities attaining the highest position since last October, but mercantile and industrial conditions were not changed.

The outlook for the steel business brightened when it was shown that the railways could borrow money for needed work, and the good progress of the crops promises well for the fu-ture in all branches of business.

In so far as current conditions are concerned, however, reports indicate a small volume of trade and only fair

collections. Nominally there is no change in quotations of iron and steel, but pressure to dispose of accumulated stocks in furnace yards has produced several sales of pig iron at substantial concessions. Prices of finished steel are usually maintained, although the opinion is expressed in many quarters that concessions would bring out much deferred business. Thus far there is practically no increase in the active capacity of plants in this in-dustry tast of Chicago, but at the

Vest conditions are better. Tin plate mills continue to lead in point of activity, the leading producer reporting 90 per cent of capacity in operation, but few other departments are turning out over 50 per cent of a normal production, and

coke ovens do much less. Although the tone is improving in the primary textile markets, there is little increase in the actual volume

of business. Increased curtailment at cotton mills is strengthening the statistical position, and buyers begin to appre-ciate that deliveries may not be secured exactly as desired, but there is sufficient uncertainty regarding the percentage of idle machinery to enourage procrastination.

Men's wear woolens are in a better sosition, marked improvement being noted in duplicate orders, as clothiers begin to ascertain the trend of de-

Iron and steel industries show lit de change from preceding quiet conditions, except that talk of price reductions in the crude iron branch is becoming more pronounced, while finished lines hold at previous quota-Railway tonnage is at a very tions. low point; idle cars have increased to a record total.

General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be

In supplying that demand with its excellent combination of Syrup of Figs and difference Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable success.

That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine-manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle.

TALL SPOOK TALES.

Spirit Hands and Luminous Clouds Seen by Sir William Crookes.

Let me tell you some of the results Crookes got, says Hamiin Garland, writing about spiritualism in Every-body's. He said (among other amazing things) that he had seen a chair move on its own account, without contact with a medium. He saw David Home another medium with whom he had sittings-raised by invisible power completely from the floor of the Under rigid test conditions. room. he says he has seen "a solid, selfluminous body the size of an egg float noiselessly about the room!" But I can quote from notes his exact words.

Here I produced my note book, and "I have seen a luminous cloud floating upwards toward a pic-ture. Under the strictest test condi-I have more than once had a solid self-luminous, crystalline body placed in my hand by a hand which did not belong to any person in the In the light, I have seen a room. luminous cloud hover over a heliotrope on a side-table, break a sprig off, and carry it to a lady; and on ome occasions I have seen a similar luminous cloud condense to the form of a hand and carry small objects During a seance in full light a beautifully formed small hand rose up from an opening in a dining-table and gave me a flower. This occurred in the light in my own room, while feet. I have retained one of these perfectly lifelike and graceful (spirit)

was holding the medium's hands and hands in my own, firmly resolved not to let it escape, but it gradually seemed to resolve itself into vapor, and faded in that manner from my grasp. Under satisfactory test conditions, I have seen phantom forms and facesa phantom form came from the corner of the room, took an accordion in its hand, and glided about the room, playing the instrument."

A Curious Souvenir.

A short time ago, Pope Pius X gave versing the reverend gentleman took from a compartment in a near-by shrink up, without tearing. desk, a piece of paper, and, handing it to one of the party said: "By the way, allow me to present you with a little souvenir of your visit to Plus the Tenth." The recipient, upon examining his treasure, found it to be or a rang from Venice to Rome. It was the one purchased by Cardinal Giuseppi Sarto to attend the meeting of car-dinals at Rome after the death of Leo. As we all know, he has never returned to Venice.—Bohemian.

FIFTEEN YEARS OF SUFFERING.

Burning, Painful Sores on Legs—Tot tured Day and Night—Tried Many Remedies to No Avail—Used Cuticura; Is Well Again.

"After an attack of rheumatism, running ores broke out on my husband's legs, from below the knees to the ankles. There are no words to tell all the discomfort and great suffering he had to endure night and day. He used every kind of remedy and three physicians treated him, one after the other, without any good results whatever. One day I ordered some Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent. He began to use them and in three weeks all the sores were dried up. The burning fire stopped, and the pains became bearable. After three months he was quite well. I can prove this testimonial at any time. Mrs. V. V. Albert, Upper French-ville, Me., July 21, 1907."

Private Privileges.

Private interest is constantly challenging the public service. Proper preservation of the forests and the development of the waterways is likely to interfere with private privileges which have been abuses of public rights. But the public begins to show discriminate. Private rights are guaranteed protection in the courts of the land, and cannot be disturbed by the lawmakers. Private privileges, however, must give way to the rights of the people.—Boston Herald.

wholesome and truly beneficial in effect, acceptable to the system and gentle, yet er than their age; notably the ladies are distinguished by their clear and "For the most part," say the au-

fresh complexion.' According to Science very little was discovered between vegetarians and meat eaters so far as strength was concerned. In endurance, on the other hand, a very re-markable difference was found, the vegetarians surpassing the meat eaters from 50 to 200 per cent, according to the method of measurement.

The Brussels investigators found also that the vegetarians recuperated from fatigue far more quickly than the meat eaters, a result also found in the Yale experiment.

Building a Breakwater.

In the construction of the new harbor at San Pedro, Cal., the government is building a breakwater that extends two miles out into the open Piling was first driven, on which a railway trestle was built, and immense qualities of rock are being dumped on both sides of it.

NATURE

Nature and a woman's work combined have produced the grandest remedy for woman's ills that the world has ever known.

In the good old-fashioned days of our grandmothers they relied upon the roots and herbs of the field to cure disease and mitigate suffering.

The Indians on our Western Plains to-day can produce roots and herbs for every ailment, and cure diseases that baffle the most skilled physicians who have spent years in the study of drugs.

From the roots and herbs of the field Lydia E. Pinkham more than thirty years ago gave to the women of the world a remedy for their peculiar ills, more potent and efficacious than any combination of drugs.

Lydia E. Pinkham's Vegetable Compound is now recognized as the standard remedy for woman's ills.

Mrs. Bertha Muff, of 515 N.C. St. Louisiana, Mo., writes: "Complete restoration to health means so much to me that for the sake

means so much to me that for the sake of other suffering women I am willing to make my troubles public.

"For twelve years I had been suffering with the worst forms of female ills. During that time I had eleven different physicians without help. No tongue can tell what I suffered, and at times I could hardly walk. About two years ago I wrote Mrs. Pinkham for advice. I followed it, and can truly say that Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's advice restored health and strength. It is pound and Mrs. Pinkham's advice re-stored health and strength. It is worth mountains of gold to suffering

What Lydia E. Pinkham's Vege-table Compound did for Mrs. Muff, it will do for other suffering women.
