

Nyal's

Worm Wafers

Often a child's general health is good, and yet the mother knows there is something wrong with him—just what, she may be unable to determine. How old is your child? Is he peevish and irritable? Does he grind his teeth? Does his nose itch? Is his breath offensive? Is his appetite abnormal? If the child is four to twelve years old, and has those symptoms it is safe to assume that he is troubled with worms.

Nyal's Worm Wafers kill and remove worms. Pleasant to take. Only 25 cents.
