

# THAT MAN FROM WALL STREET

Best Sex-Magnetism Novel Ever Published  
BEATS "THREE WEEKS," "THE YOKER"  
Regular Price \$1.50—My Price By Mail \$1.00  
L. E. HUSTED, 400 MANHATTAN AVE., NEW YORK CITY

### Strengthening the Army.

Army men are re-enlisting, and new recruits are coming in because of hard times, and because the law increasing army pay became effective last May. The first enlistment means \$15 a month for the private, instead of \$13 as formerly, and a clothes allowance. For his second and third enlistment the soldier gets \$18 and \$21 monthly, with further increases up to and including the seventh enlistment. The corporals and first sergeants fare yet better, the salary of the latter being increased from \$25 to \$45 a month. These better salaries, together with a horizontal increase of 20 per cent to men serving in foreign parts, will strengthen, though they will not strengthen sufficiently, a somewhat demoralized regular army.—New York Times.

### Prehistorical Corn.

The earliest mention of corn in Kansas is found in the account of Coronado's expedition in 1541-42. Professor Williston found charred Indian pebbles in Scott county, estimated by him to be at least two and a half centuries old.

### A TEXAS CLERGYMAN

Speaks Out For the Benefit of Suffering Thousands.

Rev. G. M. Gray, Baptist clergyman, of Whitesboro, Tex., says: "Four years ago I suffered misery with lumbago. Every movement was one of pain. Doan's Kidney Pills removed the whole difficulty after only a short time. Although I do not like to have my name used publicly, I make an exception in this case, so that other sufferers from kidney trouble may profit by my experience."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

### HAS NEW ANAESTHETIC.

South German Professor Declares Physicians and Patients Will Be Able to Joke.

Prof. Bier, the distinguished South German who succeeded the late Prof. von Bergmann at the head of the surgical faculty of the University of Berlin, has devised a new and remarkable anaesthetic treatment for use in operations upon the extremities of the human body. By the application of this treatment, which is described as a venous transfusion, surgeons who must operate upon the legs or arms will no longer need to administer general anaesthesia for the purpose of rendering the patient unconscious, but will be enabled to work in a perfectly bloodless and painless area, while the mind and the rest of the patient's body remain an entirely normal state. Surgeons will be able to talk politics or crack jokes with the patient who will be totally unaware of anything being done to him.

### Another Trust.

Something new in the way of trusts is being formed under the guiding hand of J. Pierpont Morgan, the past master of organizing gigantic combinations, according to dispatches from New York. It's nothing less than an automobile trust, with a capitalization of \$25,000,000 to start off with. This will be in the nature of a "good" trust in that it will not worry the "common people" very much. They are only interested in automobiles to the extent of watching them pass by and wishing for a ride in them, and also dodging them on divers occasions.

### MOTHER AND CHILD

Both Fully Nourished on Grape-Nuts.

The value of this famous food is shown in many ways, in addition to what might be expected from its chemical analysis. Grape-Nuts food is made of whole wheat and barley, is thoroughly baked for many hours and contains all the wholesome ingredients in these cereals. It contains also the phosphate of potash grown in the grains, which Nature uses to build up brain and nerve cells. Young children require proportionately more of this element because the brain and nervous system of the child grows so rapidly. A Va. mother found the value of Grape-Nuts in not only building up her own strength but in nourishing her baby at the same time. She writes: "After my baby came I did not recover health and strength, and the doctor said I could not nurse the baby as I did not have nourishment for her, besides I was too weak. "He said I might try a change of diet and see what that would do, and recommended Grape-Nuts food. I bought a pkg. and used it regularly. A marked change came over both baby and I. "My baby is now four months old, is in fine condition, I am nursing her and doing all my work and never felt better in my life." "There's a Reason."

Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

# FARM AND GARDEN

### WEIGHT OF MILK.

Milk weighs about eight and a half pounds to the gallon, varying a little according to the percentage of solids. Cream will weigh about eight pounds to the gallon, varying some according to the percentage of butter fat. The richer the cream the less it weighs. Pure butter fat weighs a little less than seven and three-quarters pounds to the gallon. Liquids expand when heated and contract when cooled. A gallon of milk or cream when heated will be less than a gallon when cooled.—American Cultivator.

### MAMMOTH CLOVER MANURE.

Where it will grow, medium red clover is ordinarily the best variety to grow. To grow simply for a green manure crop, mammoth clover is better. It is also better to sow with timothy on thin land. On such land the stems will not be coarser than the stems of the medium variety on rich land, and it ripens at the same time as timothy. Alsike is the clover for wet land.—Epitomist.

### SHADE FOR HOGS.

It hogs are to thrive in pasture, shade must be provided. Some farmers cut away every vestige of shade. The hog loves a cool damp shade where he can lie and snooze during the heat of the day. If left in a pasture with no shade he will suffer. Experience of prominent breeders shows, however, that a mud wallow is by no means necessary. If the hog cannot have a clean bath, no bath is preferable, but a child of the soil and he should have cool moist ground to lie upon.—Farmers Home Journal.

### ROMAN NOSED HORSE.

It is said that the horse with the Roman nose is likely to be a good animal for hard work, and not afraid of the cars. He is also apt to be slow. According to an authority of the Royal College of Veterinary Surgeons, England, the horse's face is a good index to his character. If there is a general curve to the profile and at the same time the ears are pointed and sensitive, it is safe to describe the animal as gentle and at the same time high-spirited. If on the other hand, the horse has a dent in the middle of his nose, he is likely to be treacherous and vicious. A horse that droops his ears is apt to be lazy as well as vicious.

Do you attempt to feed and rest the horse at noon with his harness on? A man might as well think to enjoy his dinner by sitting down to it with overcoat, hat and gloves on.

### GRINDING FEED.

The experiments of the agricultural experiment stations do not uniformly give results favorable to grinding feed. But the preponderance of evidence of these experiments is clearly in favor of grinding feed. And especially for young stuff and milk cows. But more important than even the experiments of the stations is, in our humble opinion, the practice of the most successful farmers and stockmen. They use the feed grinder year after year. And they are the kind that do not do what is unprofitable in actual farm practice. They do not grind all the feed. But they use the feed grinder enough to make it worth while to have one. A feed grinder is not such a very expensive proposition and rightly used it is as profitable an investment as the average farmer or stockman can make.—Weekly Witness.

### WHEN COWS SHOULD DRY.

As to when cows should be dried from milking, a dairyman giving his own experience says that this depends to some extent on the quality and vigor of the cow, and that a cow in poor condition may be allowed two months in which to recruit her strength, with advantage to herself and her prospective calf, but this is to some extent a matter of keep, for the poor cow generally belongs to the poor feeder, and, if the feeding is generous, the animal healthy, and the quantity of milk produced pays expenses there is no reason why the period of rest should not be further reduced. In the case of the average cow, the milking can be continued until within a month of calving. If a cow is in low condition, it is better in our opinion, to resort to higher feeding than to dry off. We have known cows treated thus for many years, sometimes being milked to within a month of calving, that have carried as good an appearance, and produced equally good calves, as those which run dry nearly three times as long. Six weeks may be considered the average period during which a cow should be dry, unless the circumstances are exceptional.—Indiana Farmer.

### CURE FOR SCALY LEG.

Coal oil alone is little used for scaly leg. It is too severe a treatment. Coal oil with raw linseed oil is very commonly used, and is an excellent remedy much more easily applied than anything that has to be rubbed in. Sulphur and lard, or even lard alone, is good. Whether it is better than coal oil and linseed oil, I cannot say. The latter mixture certainly is efficacious and very easily applied. For the former a half mixture is good. If more time can be taken, use about two parts linseed to one part coal oil. If you are in a hurry, take a stiff old tooth brush, and rub off as much of the scale as can be taken off readily in this way, then dip the legs to the hock, in the oil. If you are not, at intervals of a few days go through the affected flock at night, and dip the feet of every hen, holding her with feet in the oil, just an instant, letting the oil drip from the feet into the pail an instant more, then replacing her on the roost.—Farm Poultry.

### TESTS FOR A GOOD HORSE.

One not familiar with all the points of a good horse will find in the following from the Farming World, some good suggestions: Never buy a horse while in motion; watch him stand still. If sound he will stand firmly and squarely on his limbs without moving, except when he has very high life. He will be flat on the ground with legs plump and naturally poised. If one foot is thrown forward and toe pointed to the ground with heel raised, or if foot is lifted disease of the navicular bone may be suspected or at least a tenderness which is liable to develop into serious disease. If the foot is thrown out, toe raised and heel brought down, the horse has suffered from laminitis, founder, or the back sinews are sprained, he will prove worthless. If feet are drawn together, beneath the horse, it indicates a displacement of limb and weak disposition of the muscles. If horse stands with feet spread apart, or straddles with his hind legs, there is weakness of the loins and the kidneys are disordered. If knees are bent and tremble, the horse has been ruined by heavy pulling. You run great risk in buying horses with contracted or bad formed hoofs. It is always safest to have the horse thoroughly examined by a competent veterinary surgeon before closing the deal.

### FARM NOTES.

The sire is half the herd and more than half if he is pure bred and the females are scrubs or grades. For injuries to the teats or udder of the cow, an ointment made from a mixture of fresh butter and tar is excellent. Over-ripe cream, too much churning and overworking are three general faults in butter making. Guinea fowls are a small expense to raise as they get most of their living during warm weather. They are fairly good layers. Fright is as disastrous for a hen as for a cow. Be gentle around the flock; it pays. Don't blame the incubator for a poor hatch when the fault was with the eggs or the management. Sick chickens are not only useless but disgusting; don't let them get sick. Fowls do not get sick from choice; there is always a reason. No matter what method is used, skim clean. Butter fat will not make enough pork to be an economical hog feed. Feeding calves milk that is too cold or too much milk at one time may cause scours. A cup of wheat flour and a raw egg in its milk is recommended as a mild remedy for a calf with scours. It is gainful to keep calves clean and dry. It is very poor economy to expose them to driving rains in chilly weather or to quarters that are damp or filthy. If buying hay for dairy cows, remember that it profits to give something more for alfalfa or cowpea hay than for hays that are less nutritious, since alfalfa or cowpea hay is a better milk producer for the same reason that cottonseed meal is.

### The Necessary Shock.

A college professor had been seriously ill of a fever for several weeks, but the fever had left him at last, and he lay in a stupor, utterly exhausted. "This is the really critical period," the attending physician said to the watchers, in an undertone. "If he has sufficient vitality to carry him through this—and I am strongly disposed to hope he has—he will recover. At present there is nothing we can do but be patient and give nature a chance, watching in the meantime for an opportunity to awaken his interest in what is going on about him." One of the attendants, who happened to be standing near the window looking at the rosy sunset, remarked to the doctor: "See what a lurid sky there is." The sick man opened his eyes and turned his head in the direction indicated. "Lurid!" he exclaimed, in a tone of disgust. "If you will consult your dictionary, madam, you will find that lurid means gloomy, ghastly, dismal!" "He will recover!" announced the doctor, triumphantly.—Youth's Companion.

Affixing a pure food label does not constitute any guarantee, for the Washington Star, as to what the cook may do with the contents.

### PROPERLY PREPARED.

He took his fur-lined overcoat, So cozy and so warm, He packed his full-length rubber boots So useful in a storm; His heavy sweater-vest he took, The buckskin trousers eke, The earflaps made of bearskin; That resist the breezes bleak; The chamois chest-protector And the mittens thick and hot, The beaver hat and woolen socks Were details not forgot. And, ere departing, he made sure That nothing warm he'd missed— 'Cause why? His name was first upon The summer vacation list. Pack.

### AS HE VIEWED IT.

"You," said the soothsayer, "will have greatness thrust upon you." "Gosh!" exclaimed the politician. "Are they going to saddle me with the nomination for the vice-presidency?"—Houston Chronicle.

### SURE.

"It's bound to come." "What's bound to come?" "The statue of some modern hero in an automobile."—Pittsburg Post.

### IS IT HOT ENOUGH, ETC.?

"This hot weather must bother you." "It does," answered the fat man. "It makes every scrawny despicable feel so sorry for me that he becomes annoying."—Philadelphia Ledger.

### HIS ONLY EXCUSE FOR OPENING IT.

Mrs. Crimsonbeak: "John, you yawned twice while we were calling on that lady." Mr. Crimsonbeak: "Well, dear, you didn't expect me to keep my mouth closed all the time, did you?"—Yonkers Statesman.

### A CLINCHER.

"What did Jack give you for your birthday?" "A hundred visiting cards and the engraved plate." "Oh, my dear, I'm so sorry for you. He doesn't intend to propose for a year at least."—Boston Transcript.

### THE WAY TO GET RESULTS.

"Remember, a book play needs booming." "I'm getting some of the best citizens to say a good word for our production." "Bah! You'll never make a press agent. What you want to do is to get 'em to denounce it."—Louisville Courier-Journal.

### COULDN'T COMPETE.

Uptown (whose office is on the twenty-ninth floor): "Great Scott! Uncle, you don't mean to say you walked all the way up here and the elevators running?" Uncle Rubie: "Well, thirty years ago I could a' run, too, but I ain't a-racing with no elevators these days!"—Puck.

### NOT IN HIS LINE.

"Why did you send that patient to another doctor?" "Well, explained the physician with a strictly fashionable practice, "he appeared to be really sick."—Washington Herald.

### A RUSE.

Gentleman (to cigar dealer): "Have you any S-and-se brand in stock? How are they?" Dealer: "First-class, sir. This last lot is an extremely fine one." Gentleman (departing): "Thanks; you wrote that they were very poor, but I am pleased to find you were mistaken. I am the manufacturer. Good day."—Philadelphia Inquirer.

### IN DOUBT.

"Is the pen really mightier than the sword?" "I dunno as it is," answered the country editor. "When I was in the army, I earned \$13 a month."—Houston Chronicle.

### BROKEN WORDS AND CHINA.

Mrs. Neighbors—Are you able to understand your new cook's broken English. Mrs. Homer—Oh, yes; but I can't understand why she breaks so much china.—Chicago News.

### HOPEFUL WOMAN.

"Woman is naturally more hopeful than man." "Yes, there's my wife, for instance; for years past every time she has had occasion to buy fish she has asked the dealer if they were fresh, hoping, I suppose, that some day he'll say 'no.'"—Chicago News.

### NOT INCONSISTENT?

Jinks (discussing the latest denunciation)—Ah, my boy, she is as bright as the morning! Blinks—That's strange, I heard she was as plain as day.—Philadelphia Inquirer.

### Cotton in Barbadoes.

The cotton-growing industry of Barbadoes, which was started in 1903 with only 16 acres, has now an acreage of 6,935 acres, with an estimated yield value of about \$500,000. A conference of Barbadoes cotton-growers was recently held for promoting the interests of the industry.

### \$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & Co., Toledo, O. Sold by all Druggists. Take Hall's Family Pills for constipation.

### Horse Meat in Demand.

Owing to the steady increase in the consumption of horseflesh in Vienna the municipal authorities have erected new slaughter houses for horses. They comprise a fine block of brick buildings, covering an area of 3,300 square yards. Land and buildings together have cost over \$200,000.

### THREE CURES OF ECZEMA.

Woman Tells of Her Brother's Terrible Suffering—Her Grandchild and Another Baby also Cured—Cuticura Proved Invaluable.

"My brother had eczema three different summers. Each summer it came out between his shoulders and down his back, and he said his suffering was terrible. When it came on the third summer, he bought a box of Cuticura Ointment and gave it a faithful trial. Soon he began to feel better and he cured himself entirely of eczema with Cuticura. A lady in Indiana heard of how my daughter, Mrs. Miller, had cured her little son of terrible eczema by the Cuticura Remedies. This lady's little one had the eczema so badly that they thought they would lose it. She used Cuticura Remedies and they cured her child entirely, and the disease never came back. Mrs. Sarah E. Lusk, Coldwater, Mich., Aug. 15 and Sept. 2, 1907."

### School Teachers in Germany.

It is not only in American cities that school teachers are sometimes so scarce as to make the school authorities wonder how all the school rooms are to be supplied. In many of the states of Germany there has been an even greater lack, due mainly to the exceedingly small salaries paid. Seven years ago statistics for the entire German empire showed an average of 61 pupils to a class, although educational experts hold that not more than 30 in a class should be permitted. Today in Saxony, which has the reputation of having the best schools in Germany, more than half the schools have classes of 80 and over, while almost 10 per cent of them have attendances from 130 to 174. In Prussia in 1901, 1,828 teachers' positions were left unfilled, while by 1906, the number had grown to 3,949.—Chicago Record Herald.

### Electric Heat from Stoves.

The ordinary parlor stove is used by Herr Gutzah of Berlin, as a receptacle for an electric radiator—consisting of a wire or carbon of suitable resistance—and in this way is converted into an electric heater more satisfactory than those hitherto tried. Too great local drying of the air is a usual fault of electrical heating. With the new arrangement the air circulation produced by the stove rapidly distributes the heat and at the same time gives ventilation and prevents excessive drying. The ordinary current consumption warms an average room in about an hour. With the large tile stoves so common in Germany the heat is retained a long time, and the cost of keeping the room comfortable is moderate.

### Greatest Head for Water Power.

The six turbines of a Norway factory are to receive water through a seven-mile tunnel from a lake 3,536 feet above sea level, the total head being 3,287 feet, or seventy-two feet greater than the highest hitherto.

### Study of weather charts is now general in the elementary schools of Hanover and Schleswig-Holstein with the object of making their value in agriculture better known.

### The General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be wholesome and truly beneficial in effect, acceptable to the system and gentle, yet prompt, in action. In supplying that demand with its excellent combination of Syrup of Figs and Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable success. That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine—manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle.

### WIDOWS' under NEW LAW obtained PENSIONS

by JOHN W. MORRIS, Washington, D. C. P. M. U. 87, 1906.

### DROPSY NEW DISCOVERY

gives quick relief and cures all cases. Sold by druggists and 50 Druggists' treatment. Price 25c. Dr. E. S. HENNING'S 2000, Rev. E. Albany, Ga.

# HOUSE WORK

Thousands of American women in our homes are daily sacrificing their lives to duty. In order to keep the home neat and pretty, the children well dressed and tidy, women overdo. A female weakness or displacement is often brought on and they suffer in silence, drifting along from bad to worse, knowing well that they ought to have help to overcome the pains and aches which daily make life a burden. It is to these faithful women that

### LYDIA E. PINKHAM'S VEGETABLE COMPOUND

comes as a boon and a blessing, as it did to Mrs. F. Ellsworth, of Mayville, N. Y., and to Mrs. W. P. Boyd, of Beaver Falls, Pa., who say: "I was not able to do my own work, owing to the female trouble from which I suffered. Lydia E. Pinkham's Vegetable Compound helped me wonderfully, and I am so well that I can do as big a day's work as I ever did. I wish every sick woman would try it."

### FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ill, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration. Why don't you try it? Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.
