Hon. GEORGE W. HONEY.

Hon. George W. Honey, National Chaplain U. V. U., ex-Chaplain Fourth Wisconsin Cavalry, ex Treasurer State of Wisconsin, and ex-Quartermaster General State of Texas G. A. R., writes from 1700 First St., N. E., Washington, D. C., as follows:

"I cannot too highly recommend your preparation for the relief of calarrhal troubles in their various forms. Some members of my own family have used it with most gratifying results. When other remedles failed, Pertuna proced most efficacious and I cheerfully certify to its circuity excellence."

Mr. Fred L. Hebard, for nine years a leading photographer of Kansas City, Mo., leented at the northeast corner of 12th and Grand' Aves., cheerfully gives the following testimony: "It is a proven fact that Peruna will cure catarrh and la grippe, and as a tonic it has no equal. Druggists have tried to make metake something else just as good," but Peruna is good enough for me."

#### Pe-ru-na in Tablet Form.

For two years Dr. Hartman and his as-aistants have incessantly labored to create Peruna in tablet form, and their strenuous efforts have just been crowned with suc-ceas. People who object to liquid medi-cines can now secure Peruna tablets, which represent the solid medicinal ingredients of Peruna.

## DOCTOR PRESCRIBED CUTICURA

After Other Treatment Failed-Raw Eczema on Baby's Face Had Lasted Three Months.

"Our baby boy broke out with eezema on his face when one month old. One place on the side of his face the size of a nickel was raw like beefsteak for three months, and he would cry out when I bathed the parts that were sore and broken out. I gave him three months' treatment from a od doctor, but at the end of that time the child was no better. Then my doctor recommended Cuticura. After using a cake of Cuticura Scap, a third of a box of Cuticura Contment, and half a bottle of Cuticura Resolvent he was well and his face was as smooth as any baby's. He is now two years and a half old and no eczema has reappeared. Mrs. M. L. Harris, Alton, Kan., May 14 and June 12, 1907."

#### Ingenious Johnnie.

Mother had a bright red apple which she wished to give to the children, at the same time teaching the little brother a lesson in generosity. Johnnie had a peculiar fondness for apples.

Calling him to her side, she said: 'Now, dear, mamma has a nice, rosy apple to give you, and she wants you to be generous." That word was not in Johnnie's vocabulary, so he said: "Mama, what do you mean by being generous?

"Oh, dear, that means you are to divide the apple into two parts, and give sister the larger."

Johnnie was silent. Suddenly his face brightened, as he handed the apple again to his mother saying: "Mama, give it to sister and tell her to be generous."-The Delineator.

#### Little Fathers,

"Every one has heard of the little mothers of this city," says a Boston woman who has come to live in Manhattan, "and I think it is about time some one should speak a word for the little fathers. To a person coming from another city, one of the impressive features of child life in New York is the devotion of older boys to their younger sisters and brothers. Nowhere else, I believe, do boys re veal publicly uch affection for little tots and so willingly take care of them. With no shamefacedness does the New York boy wheel the babycarriage or go-cart, or tote the youngster in his arms. The tender thought fulness with which they guide and guard their little sisters and brothers is perfectly beautiful and deserves wider recognition."-Christian Regis-

#### An Odd Use for Bread.

Perhaps the most novel use to which bread is put, says the American Food Journal, may be seen in the great factories of the Elgin National Watch Company, at Elgin, Illinois, where more than forty loaves of fresh bread are required each day. Superintendent George E. Hunter, of the watch factory, is quoted as saying:

"There is no secret regarding the use of bread in this factory, and I am willing to tell all I can concerning it. From the earliest times in the history of watch-making, it has been the cus tom of watch-makers to reduce fresh bread to the form of dough. This is done by steaming and kneading. They can use this dough for removing oil and hips that naturally adhere, in course of manufacture, to watch. There are many parts of a watch. There re many parts of a watch, by the way, which are so small eye. The oil is absorbed by the the hole with rich earth. dough, and the chips stick to it, and in the watchmaking industry. ## Famous Numbers,

The Famous Numbers game is always entertaining and exciting to bright people. It requires no preparation except a quantity of small slips of paper, on which the different num bers from 1 to 20 are written. Each times on different slips,

Jumble the fragments thoroughly in the basket. The leader selects a paper at random, unfolds it and nounces what number is written there. The player first to call out some reference appropriate to the number called wins the slip.

A few references applicable to the numbers are given here to show the possibilities of the plan. Say, for example, that the leader names the nu oer 3. The quick-witted player will recall:

The three Virtues, the three Graces, the three Fates, the brave Three who kept the bridge with Horatius, the three Wise Men of Gotham.

Four recalls the Four Georges, the Four Seasons, Fourth of March, Fourth of July.

Seven suggests, We Are Seven, The Seven Sleepers, Seven Wonders, the Seven Sages.

Twelve, Twelve months of the year, Twelve Caesars, Twelve Disciples, Twelfth Night.

Numbers to which less reference is attached may be given but once on the slips, but almost all will furnish at least some literary, legendary or historical connection, or some popular

catch. Twenty-one stands for the age of majority, twenty-three "skidoo," six-teen the "sweet sixteen" of girlhood, nine the nine Muses, "the ninety and

The game lasts while the number of slips holds out. The player who at the end of that time has most count ers to show is winner.-New York Press.

Claudia's Danger Signals. Claudia had been hoping for the day when she would go to school. It seemed to her a very long time coming; but at last the wished-for morning arrived, and the tiny girl, in her pretty white dress and pink jumper, with a pink ribbon on her hair, started for the school-house with a neighbor.

Claudia came home at noon quite alone.

"And how did you like it?" mamma asked. "Oh, it was beautiful!" Claudia

answered. "Were the teacher and the children pleasant?"

"Yes, mamma, they were all very can't go any more, there's so much danger!

"Danger? What do you mean, dear?"

"I saw a boy who said I ought not to go to school, there's so much danger-it's up the street and down the street, and everywhere!"

Mamma was very much puzzled. Claudia could not tell what the danger was that threatened her, but she persisted in saying it was everywhere.

"Well, never mind," mamma said finally. "I will go with you this after noon, and we will find out."

After luncheon they started, Claudia holding fast to mamma's hand. As they turned the corner, the little girl pointed ahead.

"There, mamma," she said, "there's the danger!"

Mamma stared, and then laughed, for down the street the road-roller was at work, and there was a sign of warning-"DANGER"-in big letters! "And it's up the other way, too!" Claudia cried.

Mamma looked and sure enough there was another sign of "DAN-GER": the read was being torn up

Then mamma explained to Claudia that the "danger" was not to little giris, but to people driving horses. It meant that they must not come too near, or the horses might be fright-ened and run away.

After that Claudia went to school alone, and she was never troubled by "danger" signs again.—Emma any C. Dowd, in Sunday School Times.

During the second sesson the peach tree made a great growth, and the third spring the branches were thick. Then it blossomed once more, and set full of little green peaches, and Benny said, "I shall leave every one on the tree.

His father came to look, "If you leave every one on," he said, "your peaches will be small and worth but little. I should pick balf of them off."

The peaches began to swell. They grew to a wonderful size, and as they ripened, the sun gave them a rich color. When the buyer came to look at them, he said they were so fine he would give an extra price.

"I think that half of the money is for peaches and the other half for my patience," he said.—Mattie Baker in raisins, 1-2 cup currants, 1 teaspoonful the Bee Hive.

## Irving and Terry.

Henry Irving did not treat me badly. I did not treat him hadly. He revived "Faust" and produced "Dante." I' would have liked to stay with him to the end of the chapter, but I could not act in either of these plays. But we never quarrelled. Our long partnership dissolved naturally. It was all cording to the coroner's records, there very sad, but it could not be helped,— are one-twelfth more cases of self-de-Ellen Terry in McClure's.

Let stand 1 or 2 days cut into enkes or bars and dry in a warm place. It can be made for 3 cents a pound, and in less than one half hour, and is good for all house hold purposes .- Hoston Post.

#### Cheese Cloth Uses.

Cheese cloth should be used more commonly for household purposes than it is. The material has the special merit of being firm, yet so loosely woven that grease comes out readily in washing, thus it is more easily kept clean than linen or crash, for which it may many times be substituted. An unbleached quality that costs not more than five cents a yard is quite as good for general use as more expensive fabrics.

The best kind of dishcloths made of it. The material should be doubled, raw edges turned in and stitched on the machine. This will wear, and because it cleans so easily is most sanitary for warm weather in that it will not become saturated and smell of grease. Rinsing in soap and water will be all that is necessary for cleansing.

For nice furniture it is the best kind of cloth for cleaning, and all cabinetmakers keep three, sets for work. The first is used for applying the oil, the second to rub it off, and the third is the polisher. Similar treatment for dining room tables will keep them in the pink of condition.

Cheese cloth will save the daily use of an egg in boiled coffee merely by having small bags of the cotton kept in the kitchen. Put the grounds into one and twist the top around tight with thread, a speel of which should be handy for the purpose. The same bag may be used many times. There is nothing in the cleaning line for which it is not good.

Windows and mirrors will never have a speck of lint on their shining care. He dug the hole, partly filled it surface if cheeze cloth is used, and for all kinds of work it will be found

Tissue paper is another valuable He went to visit it often, and when bousehold asset that all housekeepers Moistened with alcohol, it polishes mirrors to perfection, and even dry will make them shine! Silver, all hard woods used for furniture, and steel also brass, if not badly tarnished, will respond immediately to treatment with tissue paper, and for packing of all kinds it is most useful, Lace, silk and al ribbons should always be fron between two layers of it, for the materials will not then be shiny,-

#### How Voices Are Ruined.

Many excellent voices are ruined, according to a communication which Dr Weiss has made to the French Academic du Medicine, by practicing in too small a room. A public sing-er must throw every intonation of his voice a distance of 30 or 40 yards, he says, but a student practicing in a small room is only able to throw it a yard or two, and the consequence is that the voice, instead of expanding, becomes telescoped.
