The Dryness of It.

Of course if we do not get rain before winter sets in we can expect trouble, but while the conditions now are not favorable to a downpour all hope of such a visitation is not lost, it might result in hardshship and a serious situation not to have rain, but all the discussion and writing on the subject that is being indulged in will not bring it. But there is one thing you can do and that is to see that the premises over which you have control is in a perfectly sanitary condition. If you do this then you have done your part and let nature do the rest-Clearfield Spirit.
