Dr. B. F. Shires and wife, of Patton, Pa., visited the latter's parents, Mr. and Mrs. A. Wayland, several days the past week. Doctor was located at Rathmel some years ago and is known by a number of our citizens who gave him the "glad hand" at Christmas time.

T. V. Malloy and wife, of New Castle, visited the latter's parents, M. J. Farrell and wife, in this place a day last week. They were at DuBois attending the funeral of Mrs. James Malloy, mother of T. V. Malloy, who died in Pittsburgh Wednesday morning and was buried in the Catholic cemetery in DuBois Saturday forenoon.

High School Bulletin

Editor-in-Chief, CELIA YOST
Senior Reporter, FONDA KING
Junior Reporter, JANE SMITH
Soph. Reporter, HAZEL HOFFMAN
Fresh Rep. GUY POSTLETHWAITE

We are glad to see almost every pupil of the high school back in their accustomed places, after the two weeks vacation which every one seems to have enjoyed highly. We are now hoping for a short vacation on New Year's.

Farewell to 1908.

The date for lecture by Senator Doherty has been fixed for Feb. 25.

Miss Lenkerd visited our schools Monday.

The following members of class of '08 visited our school Monday: Miss Lucy Carl, Messrs. Eugene Murray, Alexander Gillespie, William Hill, Fred Herpel. Mr. Murray and Mr. Gillespie each gave us a fine address in the chapel exercises.

Children residing in the borough of Reynoldsville becoming of school age before the close of present school year, may be admitted to the public schools of the borough for the remainder of the term at any time up to January 5, 1909.

Miss Florence Parrish visited our school Monday afternoon.

All lessons were well prepared on Monday. (??) □ □ □ □

Everybody is patiently waiting for the mid-term exams!

The faculty made a new schedule for the high school classes.

The R. H. S. was very much pleased with a visit from Mr. Stanley Bright Monday morning. He attended the chapel exercises and delivered an interesting talk to the pupils and spent the remainder of the day in the class rooms.

We're back again and that's no joke. For the Juniors are ready to put on the yoke; but of course all will be dig and cram. For in two weeks comes the mid-term exam.

Another year almost ticked off the calendar.

ADROITLY TURNED.

It Was a Small Hole, but the Englishman Crawled Out.

"I was watching a number of young Englishmen shooting at a target recently while I was on the other side," remarked an American army officer, "and at my elbow was a pompous Britisher of the old school, who, after shaking his head impatiently at the frequent misses that were made, at length said to me: 'That only goes to show how the young men of England are degenerating. All this sort of thing reflects on the British nation.'"

"It certainly is mighty poor shooting," I agreed.

"At that the old gentleman flared up and exclaimed: 'I say! Perhaps you can do better, sir?'"

"If I couldn't shoot better than that, I'd be ashamed to eat breakfast," I answered.

"Thereupon I was handed a rifle and told to show what I could do. I shot, and the first time I missed the target completely, so the laugh was on me, but before they could laugh twice I plugged the bullseye six times in rapid succession. At this the old gentleman was a trifle disconcerted, but he complimented me by saying: 'Really, now, you can shoot a bit, can't you? I say, there's nothing like a Yankee marksman with an English gun, is there, old chap?'"—Los Angeles Times.

A GREAT COMBINATION.

When Husband, Wife and Mother-in-law Co-operate.

Shortly after his marriage, which took place in 1880, John Burns, the British labor leader, settled down as a journeyman engineer in Battersea and twenty years after confessed that he was the first engineer to make with his own hands an electric tram car in Great Britain. In those days, however, people did not believe that electric traction was possible, and Burns had to take the dynamo and tram to the Crystal palace and run the latter round the grounds for six months before people could be induced to believe in the novelty.

But the people were so nervous that, although the charge was only sixpence, none of them would venture in the new-fangled invention. Then Burns was struck with a brilliant idea. He said to his wife, "You have got to come down to the palace three times a week and get into the first electric tram car as a decoy duck for the others." This was only temporarily successful. So Burns brought along his mother-in-law, "and," said the energetic labor leader when relating the incident, "when a husband, a wife and a mother-in-law co-operate success is assured."—London Tit-Bits.

Towers.

The patient architect had just succeeded in getting Mrs. Drippingoid to decide between the charms of renaissance, classic and Queen Anne for the plans of her magnificent new country house.

"The only details I ain't goin' to leave to your discretion," said the wealthy lady, "is the matter of towers. I want plenty of towers that folks can see for a long way off when they're ridin' by."

"But what kind of towers do you want?" inquired the unfortunate architect—"Norman, Gothic?"

Mrs. Drippingoid closed the English novel of high life on which her soul had been feeding.

"Why, ancestral towers, of course."—Puck.

Friendly Advice.

A very matter of fact Scotchwoman called to see a neighbor, an elderly woman, who had been ailing for some time.

"And how do you find yourself to-day, Janet?" was the greeting.

"Ah, Martha, I'm very bad. This cold, damp weather 'll be the end of me. I'll be a dead woman before very long."

"Hoots, toots, woman! You've been saying that any time these last twenty years. I've no patience with you. I'll tell you what it is. You want firmness of mind. Fix a day for your dyin'—and stick to it."

Had Poor Sight.

New Boy (rather inquisitive)—What did the other lad leave for, sir?

Master—For having defective eyesight at times, my boy.

New Boy—Why, sir, I have seen him since. Apparently, then, his eyesight was all right. It seems rather curious, sir.

Master—Well, my boy, at various times when taking money from customers he could not see the till.—London Answers.

Time to Stop.

Mrs. Benham—Henry, I am more than glad that you don't drink now, but how did you come to leave off?

Benham—You remember the last time your mother was here? Mrs. Benham—Yes, Benham—Well, one night while she was here I came home in pretty bad shape and saw three of her. That settled it.

Windmills.

Windmills were invented and used by the Saracens.

STAGE SCENERY.

Modern Settings Tax the Ingenuity of the Builders.

The big scenic artists do little actual painting beyond making the model, unless they have a panoramic effect. That they do themselves, standing on the paint bridge, many feet from the floor, while the canvas is raised or lowered. The panoramic effects are hard to handle. One difficulty is to avoid fluttering when a draft sweeps across the stage. Mountains that tremble hazily are not conducive to illusion.

With the elaborate productions of late years the importance of the builder of scenery has increased, says Everybody's Magazine. Formerly, when the scenery consisted merely of canvas stretched over a wooden frame, it was simple enough. But the struggle for realism and sensational effects has developed difficult problems for the builder of stage scenery to solve. Every piece of scenery must be made so that it can be folded into strips five feet nine inches wide, because the doors of the baggage cars in which it is transported are only six feet in breadth. Also every piece must be light and so constructed that one scene can be removed and another put in place within ten minutes. It may take thirty hours of continuous work to get the scenery "set up," to use a technical expression, after it is brought into the theater. After that the work of changing a scene is comparatively easy.

A DOGS' CLUB.

London's Luxurious Resort For Aristocratic Canine Pets.

London is the only city in the world boasting a dogs' club. The club is in a pleasant suit of rooms near the Trocadero and close to Regent street. Hand-some rugs cover the floors, the windows are veiled in lace and silk, and luxurious sofas are ranged against the walls, while a profusion of soft pillows are scattered about for the comfort of aristocratic dogs who prefer the floor for a nap. Dainty satin lined wicker baskets are provided for the smaller pets. The membership fee is half a sovereign, but this does not include meals, baths or tips to the attendants.

Ladies going shopping or to the theater leave their pugs and poodles at the club and give the attendant in charge at the time a few shillings for looking after it, but if the dog is fed half a crown is charged. This pays for a nutron chop and milk. A whole crown provides the little animal with minced chicken. For a half sovereign Fido is bathed, brushed and perfumed, and if he is a French poodle his hair is carefully curled. A veterinary is attached to the club to see that only dogs in perfect health are admitted, all sick members being quarantined in a separate room. Blankets, boots, collars, harness, soaps and brushes and all the accessories of a fashionable dog's toilet as well as dog medicines are sold at the club.—New York Press.

A Candid Critic.

"A criticism that has helped me a great deal in my work came from a man to whom I took a picture to be framed," said a young woman who spends much of her time copying in the Metropolitan Museum of Art. "As the picture progressed my friends told me it was fine. Some of the other copyists said it had value, character, good coloring and all those things, and even one of the guards in the gallery got real friendly one day and remarked that it was the best copy of that picture he had seen. I began to think that maybe, after all, my several years of study, were beginning to bear fruit. At the framer's I picked out a nice frame, and the framer began to figure on the cost."

"I'll tell you, miss," he said, "this frame will come to \$3.08. If I were you I'd get something cheaper for that picture."—New York Sun.

"Setting the River on Fire."

In old English times, when each family was obliged to sift its own flour, it sometimes happened that an energetic man would turn his sieve so rapidly as to cause it to catch fire. The style of sieve used in those days was called a "temse," and it became a customary saying that a lazy man would never set the temse on fire. Now, it happens that the name of the river Thames is pronounced like the name of this old flour sieve, and after many years, when the old fashioned temse was forgotten, it was thought that setting the temse on fire meant setting the river on fire, and that is why to-day we say that a stupid person will never set the river on fire.

Not His Fault.

Dad—Johnnie, your teacher tells me that you are at the foot of your class. How's that? Johnnie—That ain't my fault, dad. They've taken Tommy Tuff out and sent him to a reform school—Exchange.

Better Left Unsaid.

Caller—So sorry to hear of your motor accident. Enthusiastic Motorist—Oh, thanks! It's nothing. Expect to live through many more. Caller—Oh, I trust not!—London Tit-Bits.
