

**PE-RU-NA TONIC FOR
COUGHS, COLDS, CATARRH.**

JOSEPH H. CHASE.

Peruna Drug Co., Columbus, Ohio:
Gentlemen: I have used Peruna and find that it cannot be equaled as a tonic, as well as a cure for coughs, colds and catarrh.

You are authorized to use my photo with testimonial in any publication.

Joseph H. Chase,
804 Tenth St., Washington, D. C.

Cold and La Grippe.

Mr. C. Happy, Hardin, Ray Co., Mo., writes: "I can safely recommend Peruna as a remedy that will cure all catarrhal troubles."

"It was of great benefit to me, as it cured me of catarrh of the throat, and I took a very bad cold and had a gripe last February. It settled in my throat and lungs. I took three bottles of Peruna and it cured me."

"I highly recommend it to all who are sick, and I am glad to add my endorsement to that of others."

Pe-ru-na For Colds.

Mr. L. Clifford Figg, Jr., 2029 East Marshall St., Richmond, Va., writes that when he gets a cold he takes Peruna, and it soon drives it out of his system. For several years he was not entirely well, but Peruna completely cured him.

People who object to liquid medicines can now secure Peruna tablets.

For a free illustrated booklet entitled "The Truth About Peruna," address The Peruna Co., Columbus, Ohio. Mailed post-paid.

The thimble was at first worn on the thumb and was called "thumb-bell."

Macaulay's history brought the author \$100,000 during its first 10 weeks' sale.

No Substitute for Rubber.

Millions have dreamed of the possibilities and fortunes have been promised as the result of a process producing a rubber substitute. Artificial or synthetic rubber would seem so easy; take only ten atoms of carbon and combine them with only 16 atoms of hydrogen and you have rubber. But the little trick of adding life to this inert molecule has not yet been learned.

The fortune is still there for the lucky inventor who can accomplish it, because carbon and hydrogen are cheap, inexhaustible even, while rubber may get costlier year by year. The discussion of artificial rubber may therefore be dismissed with a phrase—there is no such thing.

Either the exploited article is a humbug, or it contains some proportion of real rubber mixed with substitute ingredients. Rubber substitutes are often of value in the trade because the article manufactured from them only needs that small proportion of rubber they contain.

A Multi-Cycle for the Blind.

An English institution for the blind has acquired a number of multi-cycles for the outdoor exercise of its inmates. Each machine seats 13, and with 26 feet working the pedals they run very easily and smoothly. The leader is of course an attendant and can see. The pairs of wheels are mounted upon independent axles, so that the long machine can be easily turned about or driven along winding paths. Popular Mechanics for February contains a picture of the machine and riders.—Popular Mechanics.

BIDN'T KNOW

Coffee Was the Cause.

Many daily habits, particularly of eating and drinking, are formed by following our elders.

In this way ill health is often fastened upon children. A Ga. lady says: "I had been allowed to drink coffee ever since I can remember, but even as a child I had a weak stomach which frequently refused to retain food."

"The taste of coffee was in my mouth all the time and was, as I found out later, the cause of the stomach rebelling against food."

"I now see that it was only from following the example of my elders that I formed and continued the miserable habit of drinking coffee. My digestion remained poor, nerves unstrung, frequent headache, and yet I did not suspect the true cause."

"Another trouble was a bad, muddy complexion, for which I spent time and money for creams, massaging, etc., without any results."

"After I was married I was asked to try Postum, and would you believe it, I, an old coffee toper, took to Postum from the very first. We made it right—according to directions on the pkg. and it had a most delicate flavor, and I at once quit coffee, with the happiest results."

"I now have a perfectly clear, smooth skin, fine digestion and haven't had a headache in over two years."

"There's a Reason."

Name given by Postum Co., Battle Creek, Mich. Read, "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

SCIENTIFIC DEVELOPMENTS

Under the name of "lithoderm" a Scotch chemist has invented a wash for stone that he claims will preserve its surface from the effects of moisture for an indefinite length of time.

"Raise a drop of water to the size of the earth and raise an atom in the same proportion, and the atom will then be in some place between the size of a marble and a baseball." Thus said Lord Kelvin in trying to explain to the incontinent world how little are things atomic.

The shellfish known as abalone abounds in Southern California waters in quantities sufficient to export at the rate of hundreds of tons per annum. A market for any amount could easily be found in China, where the natives consider it a great delicacy. It used to be dried for the market, but is now being canned.

A writer in the Bulletin of the Astronomical society of France concludes, after an examination of meteorological observations all over the globe, that the average annual rainfall on the continent is as follows: South America about 66 inches, Africa 32 inches, North America about 29 inches, Europe about 29 inches, Asia about 22 inches, Australia about 21 inches.

Now that the use of boiled drinking water has become common, it is interesting to be reminded that a similar method of guarding against disease was practiced in ancient times. Herodotus tells how Cyrus had his drinking water boiled and carried in silver vessels and Pliny the elder relates that Nero had water boiled and afterward cooled for drinking by placing it in glass flasks surrounded with snow.

"The well known French astronomer and writer, M. Camille Flammarion," says Electricity, "has for some time been making a special study of the effects of lightning on men, animals and other objects, in order to illustrate the freakish conduct of lightning he recently told some stories which seem incredible. Thus he tells of two peasants who were preparing to eat breakfast, when suddenly all of the dishes were thrown on the ground, the bread, cheese and fruit vanished from the table, and they themselves were covered with straw. On another occasion a man, walking through Nantes, was enveloped in lightning, yet was not injured. When he reached home, however, and opened his purse which had contained two pieces of silver and one of gold, he found that the gold piece had vanished and that in its place was a silver piece. The lightning had, in fact, pierced through the leather of the purse and had covered the gold piece with a coating of silver taken from the other two pieces."

STEEL CUT BY AIR.

Experiment to Show the Speed With Which the Work Can Be Done.

"Diamond cut diamond," but steel is cut with air. The new and ingenious method of rapidly cutting through iron or steel plate is based upon the fact that when iron at a high temperature is acted upon by a fine jet of oxygen the resulting iron oxide is more fusible than the iron itself and passing away exposes a fresh surface of the metal to the attack of the gas so that a cut is produced along the line of action.

In the early attempts to utilize this method in practice the metal was first heated to the required temperature in an oxyhydrogen flame and then subjected to the action of the oxygen jet.

Now, however, the heating and oxidation are done at the same time and the resulting cut is much sharper.

In one form of apparatus used for this process the metal is heated by means of an oxy-acetylene flame from the centre of which issues a jet of oxygen. In illustration of the speed of the new process L. Guillet in ten minutes cut in two an armor plate 6 1/4 inches thick and 3 1/4 feet in length. Manholes were cut in plates 3/4 to 1 1/8 inches thick in four to five minutes.

In parallel experiments upon the same piece of metal a groove 1/2 to 1 1/2 inches deep was cut by the oxygen process in seven minutes, whereas about the same length but only a quarter as deep took an hour to cut. The new method has also given satisfactory results in the rapid removal of the heads of rivets where plating has to be separated, only a few seconds' treatment being needed for fusing off the head of a rivet 7/8 inch thick.

With regard to the effect of the oxygen upon the metal adjoining the cut experiments have shown that the depreciation is but slight.—Chicago Tribune.

Aboriginal Discipline.

The noble red man, George Sloane, by name, who has kept his daughter—a girl of sixteen—chained to the floor of a barn near Tacoma, on some flimsy excuse, must be first cousin—perhaps brother—to the Tacoma man who some months ago was hailed before the courts on a charge of tying his young wife to the bed and leaving her thus bound day after day as a means of discipline. The step between savagery and civilization is in some cases exceedingly short.—Portland Oregonian.

QUAINT AND CURIOUS.

Five members of the Smith family landed in the board of aldermen of Somerville, Mass., last election day.

At Cholapur, British India, a factory is successfully making matches with sticks of a peculiarly stiff form of native grass.

The mining interests of Canada produce a large revenue for the Dominion and provinces, and the amount is increasing each year.

A species of ant in Australia builds its nest along a north and south line so accurately that a traveler may direct his course by their aid.

After 20 years of experimenting an Edinburgh firm has brought out an essence of tea which is said to preserve the qualities of the prepared leaf.

Iron ore production in the United States in 1907, according to the United States Geological Survey, probably reached a total of from 52,000 to 54,000 long tons.

The city of Sheffield, England, famous for its cutlery, is the first municipal body in Great Britain to decide to provide a rifle range at public cost for the use of the community.

There are two Esperanto clubs in Moscow, and over 1000 persons are busy studying the language. A book store will shortly be opened in which only books printed in Esperanto will be sold.

The American invasion threatened a few years ago, so far from injuring the British boot trade, effected a great deal of good. It woke manufacturers up and caused them to lay down improved machinery.

A young man of Vienna who promised his aged aunt that he would never part with any treasures she might bequeath to him now finds at her death that he has taken upon himself the care of fifty-six cats.

As the result of a shock sustained through falling into a copper of boiling water, a boy named George Herbert Foster, age eleven, living at Spalding, who was practically dumb, has partly regained his power of speech.

The Federal Weather bureau is experimenting with a new machine known as the meteorograph, which records temperature, atmospheric pressure, humidity and other important data for 40 days without attention.

An artillery lieutenant in Kraguyevats, Servia, has been sentenced to 21 days' imprisonment for compelling a recruit to undergo the most cruel indignity in Servian eyes. This consists in making him shave his mustache.

Snoring and Civilization.

It is a truism that no one ever heard of a snoring savage. In fact, if the wild man of the woods and plains does not sleep quietly he runs the risk of being discovered by his enemy and the scalp of the snorer would soon adorn the belt of his crafty and more quietly sleeping adversary.

With civilization, however, we have changed all this. The impure air of our sleeping rooms induces all manner of catarrhal affections. The nasal passages are the first to become affected. Instead of warming the inspired air on its way to the lungs, and removing from it the dangerous impurities with which it is loaded, the nose becomes obstructed. A part of the air enters and escapes by the mouth. The veil of the palate vibrates between the two currents—that through the mouth and the one still passing through the partially closed nostrils—like a torn sail in the wind.

The snore, then, means that the sleeper's mouth is partially open, that his nose is partially closed, and that his lungs are in danger from the air not being properly warmed and purified. From the continued operation of these causes—the increase of impure air in sleeping rooms and permitting habitual snorers to escape killing and scalping—some scientist has predicted that in the future all men (and all women, too) will snore. It goes along with decay of the teeth and baldness.—Health.

His School.

"Ah, my lad," said the kind-hearted lady, accosting a bright-eyed boy on the street, "do you go to school?"

"Yes; I just got out."

"Did you have your lessons?"

"Had to have 'em."

"Now, that's because you have a natural sense of responsibility. I'm glad to see it in a child, too." Here her admiration impelled her to draw 10 cents from her purse. "Here's 10 cents for you, my boy! Did you run away from school this week?"

"Nope. Thanks for the dime. I got to hustle now, me mouth is waterin' for ice cream I can buy around the corner!"

"Why don't you take your money home?"

"I ain't in any hurry to get home. I ain't been there in a week, anyhow."

"You haven't? Where have you been?"

"Kept in school."

"What school?"

"The Truant school."—New York Times.

Not So With the Jobbers.

"Pa, what is the difference between a job and a position."

"The man who has a position is always afraid whenever anything new is suggested that it may tend toward socialism."—St. Paul Dispatch.

BUYS WASHINGTON'S SWORD

Morgan Will Present It to Mount Vernon Association.

J. Pierpont Morgan of New York, has purchased from Miss Virginia Taylor Wise of Baltimore, the sword worn by General George Washington when he resigned his commission as Commander-in-Chief of the American Army in Annapolis in 1783. Mr. Morgan will in due time, it understood, present the relic to the Mount Vernon Association.

The price paid was not divulged, but an idea of its value may be gleaned from the fact that some years ago the United States Senate passed a bill appropriating \$25,000 for its purchase. This bill failed of passage by the House of Representatives.

ITCHED FOR TWELVE YEARS.

Eczema Made Hands and Feet Swell, Peel and Get Raw—Arms Affected, Too—Gave Up All Hope of Cure—Quickly Cured by Cuticura.

"I suffered from eczema on my hands, arms and feet for about twelve years; my hands and feet would swell, sweat and itch, then would become callous and get very dry, then peel off, and get raw. I tried most every kind of salve and ointment without success. I tried several doctors, but at last gave up thinking there was a cure for eczema. A friend of mine insisted on my trying the Cuticura Remedies, but I did not give them a trial until I got so bad I had to do something. I secured a set and by the time they were used I could see a vast improvement and my hands and feet were healed up in no time. I have had no trouble since. Charles T. Bauer, R. F. D. 65, Volant, Pa., Mar. 11, 1908."

Potter Drug & Chem. Corp., Sole Proprietors of Cuticura Remedies, Boston, Mass.

No Undertakers in Japan.

There are no undertakers in Japan. When a person dies it is the custom for his nearest relatives to put him into a coffin and bury him, and the mourning does not begin until after burial.

Bud Doble.

The greatest of all horsemen says: "In my 40 years' experience with horses I have found Spohn's Disterper Cure the most successful of all remedies for the horse. It is the greatest blood purifier." Bottle, 50c. and \$1.00. Druggists can supply you, or manufacturers. Agents wanted. Send for Free Book. Spohn Medical Co., Spec. Contagious Diseases, Gosben, Ind.

Worth a Trial.

A Connecticut hypnotist has brought back to memory of a man who, through an accident, forgot his identity. This method might be tried on those forgetful capitalists whose minds fall them so regularly on the witness stand.

To Break in New Shoes.

Always shake in Allen's Foot-Ease, a powder. It cures hot, sweating, itching, swollen feet, corns, ingrowing nails and bunions. All druggists and shoe stores, 25c. Don't accept any substitute. Sample mailed FREE. Allen S. Olmsted, Le Roy, N. Y.

Bread and Butter Good Enough.

Being once asked whether he had read any of the books of a popular novelist, Thackeray rejoined: "Well, no. You see, I am like a pastry cook. I bake tarts and I sell 'em; but I eat bread and butter."

A Domestic Eye Remedy

Compounded by Experienced Physicians. Conforms to Pure Food and Drug Laws. Wins Friends Wherever Used. Ask Druggists for Murine Eye Remedy. Try Murine.

A minister who makes marriage a business

is Rev. Alfred H. Burroughs, who lives just across the Virginia line in Tennessee, popular with southern couples because of its easy marriage laws. He has a record of 2,811 marriages for the past 18 years, and has built a 22-room hotel for the purpose of entertaining bridal couples.

The Herb laxative, Garfield Tea, aids Nature

in maintaining the general health of the body, it corrects constipation, purifies the blood, brings health.

The reconstruction of the bridge of Notre Dame at Paris has been commenced.

None of the bridges across the Seine has undergone more transformation than the one which takes its name from the great cathedral.

Throat Troubles. To allay the irritation that induces coughing, use Brown's Bronchial Troches.

A simple remedy. In boxes 25 cents. Samples mailed free. John I. Brown & Son, Boston, Mass.

Future Forest Supply.

People who are in despair over the rapid disappearance of timber supply may find comfort in the knowledge that the production of cement in the United States has increased from less than 100,000 barrels in 1882 to 48,000,000 barrels in 1907. Cement will be a leading factor in forest conservation.—Wall Street Journal.

STATE OF OHIO, CITY OF TOLEDO, ss. LUCAS COUNTY.

FRANK J. CHENEY makes oath that he is senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of HALL'S CATARRH CURE. FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1898.

A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free. F. J. CHENEY & Co., Toledo, O.

Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Curious reasons assigned for the decline of the pottery trade in England

are that in many London hotels the German employes give the preference to Germany in ordering their ware, and that among Londoners the growth of the habit of dining out has caused a marked diminution in the demand for dinner sets.

Ask Her This Question

"Do you know of any woman who ever received any benefit from taking Lydia E. Pinkham's Vegetable Compound?"

If any woman who is suffering with any ailment peculiar to her sex will ask her neighbors this question, she will be surprised at the result. There is hardly a community in this country where women cannot be found who have been restored to health by this famous old remedy, made exclusively from a simple formula of roots and herbs.

During the past 30 years we have published thousands of letters from these grateful women who have been cured by Lydia E. Pinkham's Vegetable Compound, and never in all that time have we published a testimonial without the writer's special permission. Never have we knowingly published a testimonial that was not truthful and genuine. Here is one just received a few days ago. If anyone doubts that this is a true and honest statement of a woman's experience with Lydia E. Pinkham's Vegetable Compound write and ask her.

Houston, Texas.—"When I first began taking Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had been sick for three years with female troubles, chronic dyspepsia, and a liver trouble. I had tried several doctor's medicines, but nothing did me any good."

"For three years I lived on medicines and thought I would never get well, when I read an advertisement of Lydia E. Pinkham's Vegetable Compound, and was advised to try it."

"My husband got me one bottle of the Compound, and it did me so much good I continued its use. I am now a well woman and enjoy the best of health."

"I advise all women suffering from such troubles to give Lydia E. Pinkham's Vegetable Compound a trial. They won't regret it, for it will surely cure you."—Mrs. Bessie L. Hicks, 810 Cleveland St., Houston.

Any woman who is sick and suffering is foolish surely not to give such a medicine as this a trial. Why should it not do her as much good as it did Mrs. Hicks.

Being a Good Fellow.

No man is a real good fellow who knowingly lives beyond his means, no matter what may be the immediate success he appears to gain by such conduct. Sooner or later he will be found out. Then, though he may still be tolerated, beneath the toleration there is always contempt. He may not be actually shunned, but he is regarded as one certainly more or less of a fool and to be watched by the prudent as potentially a knave.

The businessman of any age who finds that he is becoming usually spoken of as a "good fellow" in a certain tone, and that for censures or criticisms of his conduct the defense that he is withal a "good fellow" is offered, had better pull up short and do some hard thinking about the way he is headed.

Fun, But Expensive.

It cost Cuba a little more than \$5,000,000 to be pacified by an American army, and Uncle Sam is going to collect every cent of the money. Possibly the expense of going on a jaunter may finally persuade the dandy to get a steady job and stick to it.—Baltimore News.

Piles Cured in 6 to 14 Days.

Pazo Ointment is guaranteed to cure any case of Itching, Bleeding or Prolapsed Piles in 6 to 14 days or money refunded. See Emile Richebourg used to get \$20,000 each for his novels before they appeared in book form.

For "Middlemarch" George Eliot got \$40,000 and for Romola " \$35,000.

W.L. DOUGLAS
\$3.00 SHOES \$3.50

BOY'S SHOES \$1.00 TO \$2.00

The Reason I Make and Sell More Men's \$3.00 & \$3.50 Shoes Than Any Other Manufacturer is because I give the wearer the benefit of the most complete organization of trained experts and skilled shoemakers in the country.

The selection of the leathers for each part of the shoe, and every detail of the making in every department is looked after by the best shoemakers in the shoe industry.

If I could show you how carefully W. L. Douglas shoes are made, you would then understand why they hold their shape, fit better, and wear longer than any other make.

My Method of Tanning the Soles makes them More Flexible and Longer Wearing than any other.

Shoes for Every Member of the Family, Men, Boys, Women, Misses and Children.

For sale by shoe dealers everywhere.

CAUTION! Some genuine without W. L. Douglas name and price stamped on bottom. Fast Color Eyelets Used Exclusively. Catalog mailed free.
