

For Colds and Grip.

A Look Into the Future.

We sincerely believe that what is best in Rooseveltism will be safeguarded in law and in policy, and become accepted as permanent and valuable under a course of firmness, patience and good nature that will go unintercepted on. There will be a change of temperament in a change of men, a change of methods, but not a change of measures. The rough but necessary work has been largely and perceptibly done. Conservatism can readily displace combat or contention, and, we think it will. The people are united, hopeful and expectant. No administration ever went into power with higher hopes or finer desires. That they may be realized is the wish of every patriotic American.—Brooklyn Eagle.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDING, KINXAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

Egg-Shells as Flower Pots.

Cucumbers, gourds and other plants that are hard to transplant, can be grown in egg-shells in the house. As soon as the plants are large enough and the ground warm enough, the shells can be carefully broken away without the dirt falling from the roots. When thus transplanted, the growth of the plant is not checked.—Sularian Life.

Only One "Bromo Quinine"

That is Laxative Bromo Quinine. Look for the signature of E. W. Grove. Used the World over to Cure a Cold in One Day. 25c.

Fashions Lasted Longer.

In times past a fashion lasted, with slight modification, for years. Much the same fashion continued through the long reign of Louis XIV, and another through that of Louis XV, while the ladies of the Middle Ages never thought of varying their costumes.

A Cough, Cold or Sore Throat, requires immediate attention. Brown's Bronchial Troches always give relief. In boxes 25 cents. Samples mailed free. John I. Brown & Son, Boston, Mass.

Copper in Alaska.

Alaska gives promise of becoming in time a large producer of copper. The Bonanza mine in Montana has an ore body 300 feet wide, which was cut at a depth of 225 feet by a cross-cut tunnel, in which there is 120 feet of ore averaging 22 per cent copper, the middle 25 feet being almost pure copper glance running from 60 to 70 per cent of copper and 28 ounces of silver a ton.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Big Eaters.

Probably the Esquimo banquets last longer than any others, and the quantity of food swallowed is also proportionately greater. Ross records that seven of his party of natives ate continuously for 33 hours, during which time they consumed 200 pounds of seal meat.

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. At druggists.

His Hope's Dashed.

Chairman (at concert)—Ladies and gentlemen, Miss Discordant will now sing "Only Once More."

Sarcastic Critic—Thank heaven for that.

Chairman (coming forward again)—Ladies and gentlemen, instead of singing "Once More," Miss Discordant will sing "Forever and Ever."

Collapse of B. C.—Answers.

AMERICAN AUTO PROGRESS.

Difficulties First Makers Met in This Country.

Steel Manufacturers in France More Willing to Make Tests of Material—Change in Conditions Here in Last Few Years—Foreign Cars No Better than Those Built Here.

In the early days of the automobile industry in the United States little or nothing was known of the properties required in the materials of construction. For example: Aluminum was a novelty, cast-iron and bronze were used for the gearwheels of the speed change mechanism; roller-bearings having unhardened rolls operated in soft axle-tubes as a bearing for soft steel solid axles; bronze and malleable iron were used for connecting-rods; the hardening and grinding cranks and many other parts were unknown; brakes were lined with wood blocks; any yellow metal for bearings was "bronze," regardless of its composition; hardening meant "casehardening," sometimes .001 inch deep, sometimes more, but always an indefinite amount.

Heat treatment, alloy steels, and hardening as we know them today, were practically unknown. Structural steel, bar, plate, and rod stock; woods of various kinds, cast iron, brass, and bronze of the ordinary "merchant" shapes and qualities were alone available for the automobile builder. In Europe, on the other hand, the requirements of foreign gunmakers, engine builders, and others had created a demand for special steels and bronzes. From the beginning of the automobile industry in France the machines were entered in races and other competitions that developed in a few hours weaknesses and shortcomings of design in materials that have taken months of ordinary use. Finding that increasing the size alone of a weak part to make it strong enough was not always the remedy, or even always feasible, the manufacturers naturally turned to the steel makers for better materials.

Right here another difference between the United States and Europe should be noted. In the United States the steel makers wanted "tonnage." That is, they would not get out a special grade of metal and set up the rolls to shape it unless an order for many thousands of tons was placed. Whereas, in Europe, the steel mills would take an order for a few hundred pounds of steel of special composition.

The net result was that the French automobile builders, by races that tested the materials and design of construction, by the facility and possibility of procuring proper materials, by cleverness in design and by keen competition, soon distanced all other nations in the production of cars that were reliable, fast, and dependable.

A concrete example of the above is furnished by the actual experience of one of the early American manufacturers, who conceived the idea of building in this country an exact copy of a well known and successful French car. After the first car was built the testing out proved that the American tubing used in the frame had only about one-half the strength and stiffness of the tubing used in the model. The gears would not stand up under the work, and the wearing qualities and general durability of the entire machine were far below the French model. A careful investigation showed that the difference was solely due to the quality of the materials used. As at that time practically no one here who was available knew the difference between the materials in the model and the copy and there were not procurable in this country materials from a constructive and commercial point of view that would answer the purpose, the manufacture of the car was discontinued.

Conditions in the American engineering talent and material market have in the last three or four years completely changed. We now know what material to use in each particular place, how to use it, where to get it, and why we use it.

It is, moreover, a fact that the reverse of the above mentioned case has happened. An American manufacturer in 1899 and 1900 produced a number of eight horsepower cars, with single cylinder, vertical in front engine. The owner of one of these cars appeared within the past two months at a New York salesroom and stated that he still used his original little eight horsepower American car, and that the bearings and all of the parts had stood up wonderfully well. This car must have had excellent materials and admirable design. As a matter of fact one of the largest manufacturers in Germany acquired in 1898 exclusive rights to manufacture this same car of American design, and on American specifications for material. All the detailed drawings were converted into the metric system and sent to Europe with a model and some parts. The car, though well-known and successful in the United States was not satisfactory when made by the German maker with European material.

The American industry has grown to such proportions that steel and other material manufacturers seek and cater to the wants of the automobile builder. At the present time there is not, and in fact for some time past there has not been, the difference between the foreign and the domestic car that formerly existed. If the American engineer is not satisfied with American materials, all kinds and grades of foreign materials can now be produced in stock in the American market, and at prices commercially practicable.

The only possible reason for the purchase of a foreign car in this country today is the same one that leads many people to buy English clothes and French hair dyes. There is an idea

prevalent in some quarters that practically all the cars made in France, England, Italy, Germany, and Belgium are as good or better than the better grades of cars made in this country, whereas the reverse is really the truth.

Some of the foreign cars that have had a large sale and vogue in this country and been accepted without question as being of the highest grade were classed as second grade at home. Taking the good and the bad together, the average quality is higher in this country today than in Europe. It is true that there are more builders of high grade finely finished cars in Europe than in this country. But their combined output is not as great as the combined output of the relatively few similar makers here. On the other hand, there are practically no cars built here as "rotten" as some of the foreign ones.—New York Post.

QUAINT AND CURIOUS.

The percentage of oil in Senegal peanuts is 51; in American peanuts it is only 42.

New York city has as many marriages every year as Philadelphia, Washington, Boston, Chicago and St. Louis combined.

If New York city is able to market its Catskill water supply at the present rates it will have an income from it of \$24,272,500 yearly.

Each mild week in New York city when the temperature keeps close to the freezing point, means the saving of about 300,000 tons of coal.

Official statistics issued in Berlin show that 9,927 young men were condemned and punished during 1907 for attempting to evade compulsory military service.

The average daily difference between the number of scholars registered in the public schools of New York city and the number in actual attendance is 69,200.

In the shape of rebates on coal, coke, pig iron, etc., a ton of German steel billets for export is subsidized to the extent of 15 shillings (\$3.65), while if worked up into shape before being exported it enjoys further rebates.

On the basis of a bushel of corn producing 2.5 gallons of alcohol, it has been figured out that last year's corn crop in the United States was sufficient to furnish 20,000,000 horsepower for ten hours a day for an entire year.

A permanent national exposition at Madrid, for the promotion of which an organization has been formed in Spain, will have for one of its chief objects the stimulation of scientific methods in agriculture and manufacturing.

The largest single filtration plant in the world is said to be the one recently completed for Pittsburg. The sedimentation basins have a capacity of 120,000,000 gallons, and the filtered water reservoir room for 50,000,000 gallons.

New York city has its average number of divorces as compared with the cities of the United States. Chicago is the only city that is proportionately ahead of it. In New York there are two persons divorced to every twenty-six married.

Reports have appeared in the daily press, says Nature, of a new treatment for consumption in which the diseased portion of the lung is removed by operation. The only novelty seems to be the use of hot water or steam to control the hemorrhage.

Three women were among the 89 applicants who recently took the examination for postal clerks at Buffalo. The highest grade, 89.70, was obtained by Miss Mary Pann. All of the women applicants were successful, while only 35 percent of the men passed.

Crushed Hopes.

"Times are changed," said Mark Twain, speaking of Washington. "I doubt if nowadays a man of Washington's unswerving integrity would be able to get on."

"A rich lawyer after dinner the other night went into his den for a smoke. He took down from his pipe-rack a superb meerschaum, a birthday present from his wife; but, alas! as he started to fill the pipe it came apart in his hands. The bowl had been broken in two and then carelessly stuck together."

"With loud growls of rage the lawyer rushed from his den and demanded to know who had broken his new meerschaum. His only son, a boy of 11, spoke up bravely.

"Father," he said, "I cannot tell a lie. I did it."

"The lawyer praised the lad's Washingtonian veracity, but that night on his pillow he groaned and went on terribly about the incident.

"Heaven help me," he said, "I had been my life's dearest wish to rear up my son to my own profession, but now—alas—alas—!"—Tit-Bits.

THEIR FIRST WHITE MAN

Black Tribe Living on Mornington Island Just Discovered.

Sydney, N. S. W.—Probably the last black tribe who had never seen a white man has been discovered on Mornington island, in the Gulf of Carpentaria. The first white man they saw was R. B. Howard, chief protector of aborigines in Queensland, who came in contact with them after two days searching.

The blacks, he says, were in a very primitive state. They did not know the use of tobacco, and would not eat bread, meat or even sugar, although they readily tasted anything given to them. There was no sign whatever of disease, and although emaciated in appearance, they were strong and agile.

CUTICURA CURED HIS ECZEMA.

Humor Came on Legs and Ankles—Could Not Wear Shoes Because of Bad Scaling and Itching.

"I have been successfully cured of dry eczema. I was inspecting the removal of noxious weeds from the edge of a river and was constantly in the dust from the weeds. At night I cleansed my limbs but felt a prickly sensation. I paid no attention to it for two years but I noticed a scum on my legs like fish scales. I did not attend to it until it came to be too itchy and sore and began getting two running sores. My ankles were all sore and scabby and I could not wear shoes. I had to use carpet and felt slippers for weeks. I got a cake of the Cuticura Soap and some Cuticura Ointment. In less than ten days I could put on my boots and in less than three weeks I was free from the confounded itching. Capt. G. P. Bliss, Chief of Police, Morris, Manitoba, Mar. 20, '07, and Sept. 24, '08, Potter Drug & Chem. Corp., Sole Proprietors of Cuticura Remedies, Boston, Mass.

Pencil Wood Costly.

Cedar wood constitutes the casing of the average lead pencil. The price of this wood has risen rapidly in the last few years. A German chemist has produced a substitute, the chief ingredient is the common potato. A German factory is now making 48,000 potato pencils a day.

A Domestic Eye Remedy

Compounded by Experienced Physicians. Conforms to Pure Food and Drugs Laws. Wins Friends Wherever Used. Ask Druggists for Murine Eye Remedy. Try Murine.

Ten Millions to Develop Korea.

Consul John H. Snodgrass sends from Kobe the following note in regard to a large European loan for the encouragement of industry in Korea: The terms of the loan for the credit mobilier, just negotiated in London and Paris, are given as follows: Total amount of loan \$10,000,000; rate of interest, 5 per cent per annum; issue price of bonds, \$97 to \$100; term of redemption, 25 years. The payment of the principal and interest is guaranteed by the government. Half the sum is to be raised in London and half in Paris. The money so raised is to be advanced to the Korean government as required, and will be used in the development of industry.

A pessimist needs Garfield Tea, the Herb laxative which regulates the liver, corrects constipation and brings good health and good spirits.

Homes of Our Presidents.

America has not always been careful to preserve the homes of her statesmen and presidents, but it is gratifying to know that those of the two greatest, Washington and Lincoln, are now safe, and both illustrate as nothing else can the possibilities of American institutions.—New York World.

Rheumatism Cured in a Day.

Dr. Deitch's Relief for Rheumatism radically cures in 1 to 3 days. Its action is remarkable. It removes at once the cause and the disease immediately disappears. First dose greatly benefits. 75c. and \$1. At druggists.

Not Always Broadway.

Few New Yorkers know that the great Broadway was once called "Great George street," in honor of the English King. It was afterward known as the "Bloomingdale road" before it acquired the name of "the Broadway," which was subsequently changed to Broadway.

To Study Leprosy.

Professor Ehlers, a Danish authority on leprosy, has secured the cooperation of some French workers, and it is proposed to organize a scientific expedition into the Danish West Indies in an endeavor to determine the part played by blood-sucking insects in the dissemination of leprosy.

Beet Sugar Production.

The production of beet sugar in 1907 for the first time exceeded the production of cane sugar; the product of the year being, cane sugar 544,000,000 pounds; beet sugar, 967,000,000 pounds.

FOR PINK EYE

DISTEMPER CATARRHAL FEVER AND ALL NOSE AND THROAT DISEASES

Cures the sick and acts as a preventive for others. Liquid given on the tongue. Safe for brood mares and all others. Best kidney remedy; 50 cents and \$1 a bottle; \$5 and \$10 the dozen. Sold by all druggists and horse goods houses, or sent, express paid, by the manufacturers.

SPORN MEDICAL CO., Chemists, GOSHEN, INDIANA

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c. package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. MONROE DRUG CO., Quincy, Illinois.

PISO'S CURE

A HEART-BREAKING COUGH is dreadful to suffer and despairing to hear. Why threaten the health of your lungs and the peace of your family when you can obtain immediate relief from PISO'S Cure? Remarkable results follow the first dose. Taken regularly it soothes and heals the lacerated tissues, loosens the clogging phlegm and stops the cough. Pleasant to the taste and free from opiates. Children enjoy taking it. For throat and lung diseases, no matter how far advanced.

PISO'S CURE IS INCOMPARABLE

Building on Sand.

In New York nearly all the tall office buildings have their foundations on the quicksand, in it, or under it, and as a rule they are more difficult, dangerous and costly to build than anywhere else in the world. It is required to provide absolutely safe separate supports of from 50 to 100 columns, 15 or 20 feet apart, each carrying loads of from 100 to 2,000 tons. Thirty feet below the surface the sand is found, compressed to a hard, dense mass which, undisturbed, will carry safely a load of 6,000 or 8,000 pounds a square foot. When, therefore, the building is not too heavy, and there is no expectation of deeper foundations being built along side, the new foundations are often laid on the surface of the sand, which has from one-half to the whole of its area covered with them.—Century Magazine.

Where Wives Are Riches.

The only thing which drives men and boys to work in central Africa is the desire to buy wives. Who buys but one makes no headway and remains poor through life. An industrious woman can support herself and husband—little or nothing more. She can accumulate no surplus. Who stays at work doggedly until he buys a second wife is fixed for life. What the second woman produces beyond her own support is wealth for him. He never needs to work again. A third wife is secured by the two women's industry; then others. A man's wealth is computed by the number of his wives. My nearest neighbor in the High Kasai was Chicoma; he had a dozen wives. The greatest neighboring chief, Ngombe, had 34. These men were poor compared with the great chiefs of the upper Congo, where one man was indicated to me as having 600 wives.—Red Book Magazine.

Piles Cured in 6 to 14 Days.

Pazo Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

Output of Tin.

The output of tin in the United States and Alaska in 1907 was 62 tons, derived from 89 tons of concentrates. In addition several hundred pounds of metallic tin were produced in an experimental way by a mining company in South Dakota.

Just Carried Away With Them.

"This is the latest style of bracelet," observed the detective, deftly applying the compasses to his victim's wrists. "How do you like it?" "It's very fetching," replied the prisoner, as he walked away with the officer.—Chicago Tribune.

Pneumonia and Consumption are always preceded by an ordinary cold. Hamlin Wizard Oil rubbed into the chest draws out the inflammation, breaks up the cold and prevents all serious trouble.

Why the Needle Points North.

The magnetic needle comes to rest pointing north and south because the earth acts as if it were a great magnet. A compass needle would come to rest pointing lengthwise of a bar magnet placed under the influence of the earth. For this reason we think of the earth as a great magnet. The North Pole and the North Star have no influence over the compass needle.

Will vs. Won't.

"Henry, we'd get along better if you had more will power."

"No, Martha; we'd get along better if you didn't have quite so much."—Chicago Record.

True Heroism.

"So, after they had fought for her, she married the man who got licked, did she?"

"Yes; she reasoned that a man who would fight a man who could lick him must be braver than a man who fought a man he could lick."

The Department of Agriculture estimates that the ravages of field mice and rats entail a direct loss of \$20,000,000 annually.

THE BEST REMEDY

For Women—Lydia E. Pinkham's Vegetable Compound

Noah, Ky. — "I was passing through the Change of Life and suffered from headaches, nervous prostration, and hemorrhages.

"Lydia E. Pinkham's Vegetable Compound made me well and strong, so that I can do all my household work, and attend to the store and post-office, and feel much younger than I really am."

"Lydia E. Pinkham's Vegetable Compound is the most successful remedy for all kinds of female troubles, and I feel that I can never praise it enough."—Mrs. LIZZIE HOLLAND, Noah, Ky.

The Change of Life is the most mysterious period of a woman's existence, and neglect of health at this time invites disease and pain.

Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs.

For 30 years it has been curing women from the worst forms of female ills—inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, and nervous prostration.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.
