

Has modern schools and churches, paved streets, water, gas and electric accommodations, convenient trolley service, high and healthful location, varied employment for labor and many other residential advantages.

Offers exceptional advantages for the location of new industries: Free factory sites, cheap and abundant fuel, direct shipping facilities and low freight rates and plentiful supply of laborers.

Polish Lad Fell Into Flooded Soldier Run

Five-Year-Old Steve Kutoloski Drowned Friday Noon While at Play.

BODY IN THE WATER 72 HOURS

About 10:45 a. m. last Friday, April 30, Steve Kutoloski, a lad a little over five years old, and a younger brother, were playing along the banks of Soldier Run just above the Worth street bridge, near their home, and Steve ventured too far out on a log lying along the bank and he slid into the high and rushing stream and was soon carried down to death. When the younger lad saw his brother slide into the mad waters he ran home and told his mother and she came out in time to see her darling go down beneath the waves for the last time.

The alarm was given and soon a number of men were standing along the stream ready to do anything possible to rescue the boy, but they were too late. While a number of men searched and dragged the stream Friday, Saturday and Sunday for the body of the boy it was not found until 10:45 a. m. Monday, 72 hours after the boy had fallen into the stream. George Hanley, Isaac Kerr, Dan Bush and Thomas O'Conner found the body lodged in some bushes and rubbish just above the trolley bridge near the company store, some three hundred yards below the place where the boy had fallen in.

Notwithstanding the fact that the body had been in the water 72 hours, it was well preserved and the round, plump, pretty face of the boy showed no signs of having been in the water so long.

Steve Kutoloski was five years and six months old. The son of Mr. and Mrs. John Kutoloski, Polish people, who reside in the house near the Worth street bridge. Funeral service was held in the Catholic church at 8:00 a. m. yesterday and interment was made in the Catholic cemetery.

Transport Fire Fighters.

The Pennsylvania Railroad has decided to commence the practice of free transportation of firemen, their horses and apparatus from one town or city to another in case of a serious conflagration when towns cannot cope with the blaze with their own fire apparatus. This is the first road to initiate a movement of this kind.—DuBois Express.

QUEER HUMAN FREAK DIS-LOCATED JOINTS AT WILL

An Exhibition Before the Local Medical Society That Was Remarkable.

Last week a man giving his name as Hilliard and Harrisburg as his home, drifted into town and on Friday afternoon gave a most remarkable exhibition before the local Medical Society of his power to dislocate and replace joints by voluntary evolution. Mr. Hilliard could make three dislocations at one time, hip, knee and ankle, also shoulder, elbow and wrist, and replace the dislocations at will. Mr. Hilliard says his father, himself and his son all three have the power to dislocate and replace their joints at will and that there are few, if any, other men in the country that can dislocate the three joints at one time. All three of the men are giving exhibitions and lectures before medical societies almost continuously. Mr. Hilliard gave a very interesting talk to the doctors Friday. He claims that it is not by training that either himself, his father or son are able to perform this wonderful feat of dislocating their bones, but that they were all three born with that power.

Kills Her Foe of 20 Years.

"The most merciless enemy I had for 20 years," declares Mrs. James Duncan, of Haynesville, Me., "was dyspepsia. I suffered intensely after eating or drinking and could scarcely sleep. After several remedies had failed and several doctors had given me up, I tried Electric Bitters which cured me completely. Now I can eat anything. I am 70 years old and am overjoyed to get my health and strength back again." For indigestion, loss of appetite, kidney trouble, lame back, female complaints, its unequalled. Only 50c at H. L. McEntire's.

The Silk Mill

Has not started but house cleaning has. You need lace curtains, carpets and floor rugs as well as matting and window trimmings. Before buying see our stock. C. R. HALL.

We guarantee our seed to be free from weeds. Reynoldsville Hardware Co.

You will find us in the Dunn building next door to Hall's furniture store. When in need of flour or feed by sack or wagon load, come and see us. Robinson & Mundorff.

W. H. ROCKEY, VETERINARY SURGEON

Punxsutawney, Pa. Will be at Bun's Livery Stable, Reynoldsville, Friday of each week. Farmers' and Summerville phones.

Sykesville People Enjoy Cheap Gas

Every Man May Have a Well In His Own Back Yard If He Desires.

Drilling for gas and oil goes on apace in many localities in Jefferson and Indiana counties, but there is very little doing as to practical results, excepting at Sykesville, where everybody that owns property can have a gasser if they so desire.

And they don't need to bore half way through the earth to get it in the Stump Creek metropolis, either. Any old hole 114 feet deep will yield gas at Sykesville, and at least a dozen families receive their supply of fuel for all purposes from a hole in the back yard.

Wednesday a Punxsutawney expert on gas wells was called up by Mr. Suddler, a Sykesville merchant, who wanted to know how to control and utilize a flow of gas he has had on hand for several days. Mr. Suddler put down a well, expecting to get water, but when the drill got to a depth of 114 feet the gas pressure became so strong that the digging was abandoned. The desired information was telephoned to the inquisitor and now another Sykesville family need not bother about where the fuel is to come from.

J. B. Sykes, the well known hotel proprietor, of Sykesville, developed a well several years ago and he is still getting his fuel from that source. The rock pressure is not great, but sufficient for domestic purposes.

It is reported that the company which is developing the Paradise territory, in Henderson township, is having more or less trouble. The well on the Andrew Pifer farm is down 2800 feet, but the drill has not been operated for several weeks. The company has about 5,000 acres under lease, and expect to go down 3,500 feet.—Punxsutawney Spirit.

The Sleeping Sickness.

The terrible sleeping sickness of tropical Africa is discussed at length in an article in Popular Mechanics. The disease, which long baffled scientists, is spread by the tsetse fly, a bloodsucking, day flying insect. On the approach of either man or animal at a river crossing in the densest forest the victim is soon scented out by the fly, if there is one in the vicinity, and then, either silently or with a peevish buzz, it makes straight for the most accessible spot and gives its stab. The usual course of the disease is from four to eight months. At the outset there are headache, a feverish condition, lassitude and a corresponding disinclination to work. The facial aspect changes, and a previously happy and intelligent looking negro becomes instead dull, heavy and apathetic. Later, tremor in the tongue develops, speech is uncertain, and mumbling, walk shuffling and progressive weakness, drowsiness and oblivion to his surroundings afflict the sufferer. The last stage is marked by extreme emaciation and a coma deepening into death.

An Elixir of Life.

"An annuity is the best elixir of life I know of," said the examining physician of an insurance company. "It sometimes seems as if annuitants never die. We have lots on our books who top eighty, ninety and even ninety-five years. I have passed many a sickly and decrepit old fellow as a good annuity risk—the sicker they are, you know, the better risk they make—and the next year he has turned up to collect his annuity rejuvenated, rosy, spry as a boy. The secret? The secret is that financial worry, fear of the poorhouse, ages and kills off more people than all the deadly diseases combined. Release an old man by means of an annuity from all this worry, and he throws off his years and walks erect and happy and fearlessly young."

Hatmaking in the East Indies.

The making of bamboo hats is one of the chief industries of the natives of the East Indies, and quite often the children are more expert than their mothers in weaving the strips together and forming the designs, their fingers being younger and more supple. In transporting the long stalks of bamboo to the factory the natives tie the ends of two stalks together, spread them apart a short distance forward of the center, tie a crosspiece between and carry them on their shoulders.—Popular Mechanics.

Seused.

Wife—My husband came home from the club last night with such a swelled head that I haven't been able to arouse him today. Neighbor—Why don't you try pouring a pitcher of water over his head? Wife—I did that very thing, but the only thing he did was to call out for an umbrella.—Punxsutawney Spirit.

Progressive Pittsburg Men Planning Tour

Will Spend a Night at Punxsutawney and Be In Reynoldsville Next Day.

Progressive Pittsburg business men are busy arranging the details of the coming trade extension excursion to be given by the Chamber of Commerce of that city and which will visit Reynoldsville on Friday, May 28, during the forenoon. The exact time will be announced later. The following are the stops to be made on that day: Clearfield, Reynoldsville, Brookville, Clarion and Kittanning. The big special train will come here from Clearfield via Falls Creek, the night previous being spent in Punxsutawney, where the visitors will be entertained by the Chamber of Commerce and the Elks, meeting all the business men of that place at a social gathering. There is some talk of a delegation of Reynoldsville business men going to Punxsutawney that evening by trolley and enjoying the evening at the joint assemblage.

KING COAL.

While He Lives His Throne Is Fixed In the United States.

The part played by coal in the world's affairs can well be illustrated by assuming the available supply to be suddenly cut off. The huge railroad systems of America would stop at once. So also would the electric power and lighting in all cities and suburbs. Steamship service would cease everywhere. Transit facilities would be dead. Factories, manufacturing and shops would close down. Vast industries like steel, iron, copper, etc., would cease. Armies of laborers would be thrown out of work. Mails, schools, the navy, newspapers, foreign and internal trade—all would cease to exist. The trilogy governing commercial advance, heat, light and power, except a negligible amount of water, oil, etc., would be annihilated—all this until some other form of power could be developed. The possibility of such a cataclysm is not imminent, for coal will reign for some time yet and is destined to become a power whose capabilities have as yet been comparatively felt only more faintly than would a feather on the hide of an elephant.

The world needs coal. The United States has that coal to deliver. It will be wholly natural that so potent a necessity will make for continued peace and understanding among the powers of the world.

The coal mines of Europe are sunk about 3,000 feet deep. Coal is still being quarried on the banks of the Ohio, and the mines of Europe are nearing the limit of commercial possibility. The manufacturing supremacy of the old world is passing to the new. Coal is king, and while he lives his throne is fixed forever in the United States.—Metropolitan Magazine.

EARLY CARICATURES.

Quaint Art and Humor of the Ancient Egyptians.

The fables of Aesop prove that the ancients were not without a liking for fun, and the remains of ancient art tell the same story. Examples of artistic humor are more common than is generally supposed.

A drawing on a tile in the New York museum represents a cat dressed as an Egyptian woman of fashion. She is seated languidly on a chair, sipping wine out of a small bowl and being fanned and offered dainties by an abject looking tomcat with his tail between his legs.

The cat figures largely in the ancient comic groups of animal life. In a papyrus in the British museum a flock of geese are being driven by a cat and a herd of goats by two wolves with crooks and wallets. One of the wolves is playing a double pipe.

There is in Turin a papyrus roll that displays a whole series of such comical scenes. In the first place, a lion, a crocodile and an ape are giving a vocal and instrumental concert. Next comes an ass dressed, armed and sceptered like a pharaoh. With majestic swagger he receives the gifts presented to him by a cat of high degree, to which a bull acts as proud conductor. A lion and a gazelle are playing at draughts, a hippopotamus is perched in a tree, and a hawk has climbed into the tree and is trying to dislodge him.

Another picture shows a pharaoh in the shape of a rat drawn in a carriage by prancing greyhounds. He is proceeding to storm a fort garrisoned by cats having no arms, but teeth and claws, whereas the rats have battle-axes, shields and bows and arrows.—St. Louis Republic.

Inconsistent.

Howell—Rowell is an inconsistent fellow. Powell—That's right; he would tell you take all the time you wanted and then have you arrested for stealing his watch.—New York Press.

HEAVY INCREASE OF LAKE TRAFFIC IN RECENT YEARS

Interesting Facts About the Immense Tonnage of Iron Ore, Grain and Package Traffic.

In order that it may be able to handle with dispatch all package freight that may be offered it, the Erie and Western Transportation Company—a Pennsylvania Railroad subsidiary company operating the Anchor Line on the Great Lakes—has placed a contract for a 5,000 ton steel package freight steamer, to be called the "Conemaugh." She will be a sister ship of the "Wissahickon," which was placed in service in August, 1907.

Traffic on the Great Lakes has increased so rapidly in the past twenty years that it has reached a point where a fleet of nearly 3,000 vessels is required to haul the 100,000,000 tons of freight that pass through the lakes every year in the eight months of the navigable season. It has been estimated that this amount of freight would make a train long enough to encircle the world, and have about 2,000 miles of cars left over.

The greater part of the lake traffic is in grain and iron ore, the tonnage of the latter having increased from 2,500,000 tons in 1885 to 41,000,000 tons in 1907. The increase in package freight has been proportionate to the growth of shipments of heavy commodities, and it is to be prepared for such further increases as may come that the Anchor Line has ordered a new steamer, to be equipped with the most improved machinery for handling package freight.

Your baby would look to cute for anything in a handsome auto go-cart the new 1909 style. No one carries the stock but C. R. Hall.

Patent leather, one strap pumps, a fine fitter. Price \$3.00. Adam's.

The Worst Cases of Rheumatism Yield to Uric-O.

Sudden Deaths, Heart Failure and Paralysis are Caused by Poisonous Uric and Rheumatic Acids.

The following letter from a resident of Oil City, Pa., tells how after many years of suffering from muscular rheumatism, a cure was found in Smith's prescription Uric-O. Wants all persons suffering with rheumatism to know what Uric-O will do, and writes as follows:

I have been afflicted with muscular rheumatism for the past fifteen years, and first heard of Uric-O through our local paper. I at once sent to the Koo's pharmacy for the medicine, and have taken four or five large bottles and find that I am now entirely cured. I am past seventy years of age, but I can now get about the house as spry as any of my children. I cheerfully recommend Uric-O to any one suffering with any form of rheumatism.

Uric-O is sold and recommended by Stoke & Feicht and by druggists everywhere at 75c and \$1.00 the bottle. They will furnish samples and literature upon request or same can be obtained by writing to the Smith Drug Co., 110 Smith Bldg., Syracuse, N. Y.

I have the AGENCY for the famous

Indian Motorcycle

If you are thinking of buying write to me or call me up on the Paradise telephone and I will call on you with the new 1909 model. I can also fix up your broken bicycle or motorcycle. Ed Johnston, Rathmel, Pa.
