CAPITAL STOCK INCREASED.

Stockholders of the Star Glass Co. Met July 1st—More Stock for Sale.

A meeting of the stockholders of the Star Glass Company at Reynoldsville was held Thursday, July 1st, and at that meeting it was resolved to increase the capital stock from one hundred and twenty-five thousand dollars to two hundred thousand dollars (\$200,000).

It was further resolved that the stock yet to be sold be first offered to the present stockholders of the company, thus recognizing their past loyalty, as well as giving them the first opportunity to purchase stock at what might be considered 50 per cent par.

Considering the possibilities of the Colburn machine, which has been installed in the Star Glass Co. factory, and the concessions in royalties made to the Star Glass Co. because it was the first factory to install this machine, as well as the position this company will occupy when in operation, those familiar with the situation think there can be no doubt at all but that the stock of this company will be above par in the course of a few months.

It was decided to give the old stockholders until July 12th, 1909, to avail themselves of the opportunity to procure stock with a bonus of one share for each share paid for at par, before offering it to outsiders.

All subscriptions received will be entered and if the subscriptions exceed the amount of stock to be sold, each subscriber will receive his pro rata share based upon new subscriptions.

TALKING NINE MONTH TERM.

We understand the school board is thinking seriously of increasing the term in our public schools to nine months instead of eight months.

We believe the school board would be taking a step in the right direction by adding another month to the school term, making it nine months, and the time to put on the additional month is the coming term.

The school board decided last night to make the coming term eight months, and that settles the matter for another year.
