

THE BEST REMEDY

For Women—Lydia E. Pinkham's Vegetable Compound

Noah, Ky. — "I was passing through the Change of Life and suffered from headaches, nervous prostration, and hemorrhages."

"Lydia E. Pinkham's Vegetable Compound made me well and strong, so that I can do all my housework, and attend to the store and post-office, and feel much younger than I really am."

"Lydia E. Pinkham's Vegetable Compound is the most successful remedy for all kinds of female troubles, and I feel that I can never praise it enough." — Mrs. LIZZIE HOLLAND, Noah, Ky.

The Change of Life is the most critical period of a woman's existence, and neglect of health at this time invites disease and pain.

Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs.

For 30 years it has been curing women from the worst forms of female ills—inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, and nervous prostration.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

A New Sun-Defying Cloth

A new cloth is being made in Calcutta, India, which is manufactured on scientific principles to conform to nature's plan of warding off the sun's rays, as exemplified in the color of the skin and the pigments under the skin. It is the belief of physicians that one of the chief reasons for the many deaths recorded in hot weather is that of improper clothing. The designers of what we must wear to be of the elect may ordain a color or texture thoroughly unsuited to the prevailing climatic conditions, and safety and comfort are often jeopardized in consequence.—Van Norden Magazine.

RAISED FROM SICK BED

After All Hope Had Vanished.

Mrs. J. H. Bennett, 59 Fountain St., Gardiner, Me., says: "My back used to trouble me so severely that at last I had to give up. I took to my bed and stayed there four months, suffering intense pain, dizziness, headache and inflammation of the bladder. Though without hope, I began using Doan's Kidney Pills, and in three months was completely cured. The trouble has never returned."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

"Make Good."

Apologies count for but little in the business world. Good intentions possess value only when they are fortified by actual accomplishments. The test of all things is that which measures results. These constitute the court of last resort. If they are of a desirable nature the one bringing them to pass is recognized as worthy of confidence. If they are not, he is asked to retrace his steps and revamp his line of operation.—Fraternal Monitor.

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels. Do not gripe.

Does Not Get Older.

She—Do you think women, as a rule, are fickle minded?

He—Not necessarily. I have noticed that when a woman reaches a certain age she sticks to it.—Philadelphia Inquirer.

PILES

"I have suffered with piles for thirty-six years. One year ago last April I began taking Cascarets for constipation. In the course of a week, I noticed the piles began to disappear and at the end of six weeks they did not trouble me at all. Cascarets have done wonders for me. I am entirely cured and feel like a new man." — George Kryvier, Napoleon, O.

THE MERRY SIDE OF LIFE

AN OLD TRUTH.

Skiggs ran away with Skeggs' wife, left no address behind; But very soon Skeggs missed Skeggs And had a change of mind. Skeggs advertised, Skiggs sent her back, Herein the moral lies: Skiggs now believes—not so with Skeggs—It pays to advertise.

—Boston Herald.

PROOF.

Knicker—"Are you sure that was your wife's spirit?"

Henpeck—"Yes; it announced itself by knocks."—New York Sun.

NAUGHTY, NAUGHTY PROFESSOR

Mrs. Ascum—"Do you believe in infant damnation, Professor?"

Professor Pater—"Er—only at night, madam."—Boston Transcript.

HAD TO WORK.

She—"I consider I am responsible for your business success."

He—"Well, you certainly did make it necessary for me to earn more money."—London Opinion.

NATURE FAKER!

Kermit (in the jungle)—"Why does the hyena laugh, father?"

Theodore—"Maybe he asked the leopard if he ever tried benzine for changing his spots."—Boston Transcript.

TO SAVE THE TAXPAYER.

Knicker—"It is proposed to issue bonds for \$297,000,000 to cover the entire cost of the Panama Canal."

Bocker—"Why couldn't New York do the same thing for the barge canal?"—New York Sun.

A LIMIT.

Bachelor—"So you believe in marrying late in life?"

Married Man—"As late as possible. Then you have less time to outlive your illusions."—New York Telegram.

OBSERVED A FALLING OFF.

O'Reese—"I've taken four bottles of anti-fat. Do you notice any difference?"

Friend (looking him over)—"Well, I do think your hair is thinner."—Boston Transcript.

TEMPERED WITH ENVY.

Wife (after church)—"I particularly enjoyed the close of the sermon."

Hub—"And the rest of the time you enjoyed the clothes of the congregation."—Boston Transcript.

POETICALLY PUT.

"Would you say that Chicago girls have large feet?"

"No poet could be so ungallant."

"What is the poetic verdict?"

"Merely that Chicago feet are of the hexameter variety."—Louisville Courier-Journal.

A LITERARY MOTIVE.

Sociologist Student—"Will you confide to me your motive in robbing the country postoffice?"

Stealthy Sam—"Yes, lady; my object was purely literary. I wanted to write a magazine article about me experience."—Chicago News.

AN APPROPRIATE WEAPON.

Judge—"How did the trouble begin?"

Witness—"It began, yo' honah, when de chairman of de entertainment committee swatted de secretary over de head wif de lovin' cup."—Boston Transcript.

SAYS A PRESS HUMORIST.

"Shakespeare, it is said, never repeated."

"He didn't have to run a daily humorous feature."

"But Montaigne, whenever he saw a good thing, annexed it."

"Ah, he was more like the rest of us."—Louisville Courier-Journal.

SLOW BUT SURE JOLT TO PRIDE.

"What do you think of my performance of Hamlet?" said the youthful stage aspirant.

"You played the part," replied Miss Cayenne, "something as I imagine Shakespeare himself would have played it—provided that tradition is correct in telling us Shakespeare was a rather indifferent actor."—Washington Star.

Farm Topics

THE COW BARN.

If you intend remodeling your cow barn see to it that you get plenty of light in the way of windows. There is nothing that aids in keeping the barn sweet and wholesome as much as sunlight. Most barns ought to have twice as much window space in them as they possess.—Farmers' Home Journal.

HATCHING CHICKENS.

Chicks can be hatched in incubators so they are utterly worthless. If the temperature is kept too high or too low during the hatch or if the ventilation is bad the chicks will be small and weak and will be diseased before they come out of the shells. If the chicks are hatched right, brooded right and fed right they will be as large and vigorous as chicks can be. Wrong feeding, close confinement and improper mating have done vastly more to injure the vigor and vitality of our poultry than the method of hatching or brooding.—Farmers' Home Journal.

THE HORSE WEED FOR GREENS.

I write to say that river bottom horse weeds make the next best greens for table use to mustard, of all greens I have eaten. There are a few people who are aware of this, but it is not generally known. They are now just in good condition for table use. Cut the rich tender tops off and cook same as mustard. They are good till they get ready to send out top limbs for seeds. They would help a poor family (and a rich one too) to tide through the summer. They are very abundant in our creek and river bottom fields. Why not put them in the silo for horses?—John T. Campbell, in the Indiana Farmer.

ORCHARD GRASS OUSTS CLOVER.

Replying to a query of a subscriber will say that if his soil and climate are adapted to the growth of orchard grass he should have no trouble in getting it started in a field now seeded to clover and other grasses. A stiff blue grass sod might resist it, but nothing else can, with our soil and climate.

Some years ago a small field near our farm-buildings was seeded to orchard grass for early pasturage, and since then, year by year, it has spread in all directions—along the roadside, around the fences of the farm yards, and even has spoiled the lawn of the house by its coarse, bunch-like manner of growth. I am sure our friend will have no trouble in getting it started, but he should be sure it's the grass he wants.—F. E. P., in the Indiana Farmer.

TO PROTECT A GLUT OR WEDGE.

After giving it the proper shape and length take a piece of tin or sheet iron and bend it over the beveled end and fasten with a small tack. Then take a piece of wire such as comes off baled hay and wrap it round the top end of the glut (that is the name we

gave them when I used to split rails); now twist the ends together, to keep the glut from fraying. Such a glut is a good substitute for an iron wedge. It is necessary to give a check with an ax for a start.—Ambrose Blaney, in The Epitomist.

FANCY EGG TRADE.

Our farmers are often too careless in handling their eggs. The hens run at large and lay anywhere and everywhere of their own sweet will.

Very frequently a hen will steal her nest (as we say) and commence incubation. When found the clutch is picked in with the rest, so that eggs of various degrees of taint and decomposition get mixed in with good eggs and are sold to the damage of the seller's reputation.

I wish to urge every farmer to strive to build a fancy egg trade, for there is money in it. On any market wagon, I have invariably found an urgent and persistent demand for fresh eggs, that in eggs that are actually, really and truly fresh beyond cavil or doubt. I have found customers ready to pay several cents more per dozen for fancy guaranteed eggs than the regular standard market price. But, of course, there must never be any slip.

Every egg must be O. K. No hazardous guess-work methods can prevail. One bad egg could reasonably alienate a customer for all time. But only be square and honest and particular and sell direct to this consumer and the farmer can get fine prices for his eggs, and make good money. A fancy egg trade is certainly well worth striving for. It pays.—M. Sumner Perkins, in the American Cultivator.

Governor Stubbs, of Kansas, has given out that no female clerks, stenographers or typewriters shall have jobs in his immediate office.

White Steamers Use Kerosene as Fuel

THE WHITE STEAMER WHICH MADE A SUCCESSFUL PUBLIC DEMONSTRATION OF KEROSENE AS FUEL ON THE RECENT 2650-MILE GLIDDEN TOUR.

The most interesting announcement ever made in connection with the automobile industry was undoubtedly that made a month or two ago to the effect that the new models of the White Steam Car could be run on kerosene, or coal oil, instead of gasoline. Everyone at once recognized that the use of the new fuel would add materially to the advantages which the White already possessed over other types of cars. There were some people, however, who were sceptical as to whether or not the new fuel could be used with complete success and, therefore, the makers of the White Car, the White Company, of Cleveland, Ohio, determined to make a public demonstration of the new fuel in the 1909 Glidden Tour.

From the standpoint of the public, no test more satisfactory could have been selected. First of all, the distance covered on the Glidden Tour, from Detroit to Denver and thence to Kansas City, was 2650 miles. This was certainly more than sufficient to bring out any weaknesses, if such had existed. Still more important was the fact that the car was at all times while on the road under the supervision of observers, named by those who entered other contesting cars. Therefore, it would have been impossible for the driver of the White to have even tightened a bolt without the fact being noted and a penalty inflicted. At night the cars were guarded by Pinkerton detectives and could not be approached by any one.

Peculiar Eclipse.

Prof. John A. Brashear, of Allegheny, calls attention to a peculiarity of the solar eclipse of June 17. For a few seconds it was an annular eclipse, then a total eclipse, and finally an annular eclipse again. Although we have records of annular eclipses for 400 years and of total eclipses for thousands of years, Prof. Brashear maintains that this is perhaps the first occurrence of the kind.

Do your feet ever feel tired, achy and sore at night? Rub them with a little Hamlin's Wizard Oil. They'll be glad in the morning, and so will you.

Calamity in Kansas.

More hard luck stories from the Kansas grain fields! Only a short time ago disaster—wild disaster—drifted in from the wheat harvest. The grain was too heavy for the machine; there were not enough men to handle it. Now, storage room is lacking and already the railways are reluctantly predicting that they will not have enough cars to move the harvest. And, as if that were not enough, reports of new and unique catastrophes to the growing corn crop—the cars are so large the stalks break under them!

As things are going, agriculturally, in Kansas, more woe is in sight. Steers too big for cattle chutes, hogs whose legs won't carry them, alfalfa of a strength to make stacking explosively dangerous, oats far too rich for breakfast food—

Kansas is in tough luck, that's certain, and there is more to come.—Kansas City Times.

Important Discovery.

What is claimed as an important discovery in the glass industry has been made which will tend to revolutionize the art of grinding glass. The grinder which has been discovered is made from one-half best Portland cement and one-half silica sand. In this stone there are no soft or hard spots, and it will grind glass without scratching. The cost of the grindstone is about 10 per cent that of the common grindstone. Mr. Little is receiving many inquiries concerning the stone.

No Man is Stronger Than His Stomach

A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach and its associated organs, which impairs digestion and nutrition. For when the stomach is weak or diseased there is a loss of the nutrition contained in food, which is the source of all physical strength. When a man "doesn't feel just right," when he doesn't sleep well, has an uncomfortable feeling in the stomach after eating, is languid, nervous, irritable and despondent, he is losing the nutrition needed to make strength.

Such a man should use Dr. Pierce's Golden Medical Discovery. It cures diseases of the stomach and other organs of digestion and nutrition. It enriches the blood, invigorates the liver, strengthens the kidneys, nourishes the nerves, and so GIVES HEALTH AND STRENGTH TO THE WHOLE BODY.

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic medicine of known composition, not even though the urgent dealer may "worry" you a little bigger profit. Ingredients printed on wrapper.

The complete success of the new fuel while on this 2650-mile public test and the advantages gained through its use were well described in the following dispatch which the correspondent of the New York Sun sent to his paper at the conclusion of the tour:

"A feature of the tour which was watched with special interest was that the White Steamer used kerosene, or 'coal oil,' as fuel instead of gasoline. The new fuel worked splendidly throughout the 2650-mile journey, and all claims made in its behalf were fully proven. First of all, as regards cheapness, the White driver secured kerosene all along the route from 6 cents to 10 cents cheaper per gallon than was paid for gasoline. Secondly, the new fuel was handled without any precautions, and it was not unusual to see kerosene being poured into the fuel tank while the crew of the car and an interested crowd stood by with lighted cigars and cigarettes. At the finish of the tour, the White was the only car permitted by the authorities to enter Convention Hall, where the technical examination took place, without draining its fuel tank. Thirdly, the new fuel proved to be absolutely without smoke or smell. Fourthly, kerosene could be purchased at whatever part of the route was most convenient, and not once during the trip through the ten States of the Middle West was there found a grocery store where kerosene was not readily and cheaply obtainable. Finally, the

amount of fuel used on the trip showed that kerosene is at least fifteen per cent, more efficient, gallon for gallon, than gasoline. The car in other respects made a most creditable showing, and there was the usual rivalry among the observers to be assigned to the White so that they could ride with the maximum of comfort. The only adjustments or repairs charged against the car during the long trip were tightening a lubricator pipe and wiring a damaged mud guard. These penalties were not inflicted until more than 2000 miles had been completed with an absolutely perfect score."

A particularly interesting feature of the new White Steamer is that either kerosene or gasoline may be used as fuel. The necessary adjustments so that the fuel may be changed from kerosene to gasoline, or vice versa, may be made in a couple of minutes; but so completely successful has kerosene proven to be, that it is not believed that any purchasers will care to use gasoline.

The White Company report that the demands for their new steam cars—both the \$2900-model and the \$4000-model—exceed their most sanguine expectations. It is evident that the combination of steam—the power which everyone understands and has confidence in—with kerosene—the fuel which everyone has on hand and can handle without any danger—is thoroughly appreciated by up-to-date purchasers of automobiles.

COLT DISTEMPER

Can be handled very easily. The sick are cured, and all others in same stable, no matter how "expensive," kept from having the disease, by using COLT'S LIQUID DISTEMPER CURE. Acts on the tongue in the throat. Acts on the blood and expels germs of all forms of distemper. Best remedy ever known for mares in foal. One bottle guaranteed to cure one case, two and \$1 a bottle \$2 and \$30 each, of droppings and barnyard distemper, or send express paid by manufacturer. Cut shows how to poison throats. Our free booklet gives everything. Local agents wanted. Largest selling house remedy in existence—twelve years.

PACIFIC COAST AEROPLANE

Lightest Engines, Stability and Easy Control Features of Scotchman's Machine.

William Gibson, a Scotchman living near Victoria, B. C., has built an airship which he says will fly a hundred miles an hour carrying two passengers, says the New York Sun. His engine will develop 60 horsepower, he says, with only 222 pounds weight. He proposes to fly from Victoria to Seattle and alight in the exposition grounds, covering the sixty-five odd miles over the straits of San Juan de Fuca and the Olympic mountains in less than half an hour, for a \$1,000 bonus. Afterward for a similar stake he is ready to fly from Victoria to San Francisco with one passenger, covering the distance within five hours.

Women Active in China.

Chinese girls are forming themselves into associations and pledging themselves not to marry unless they are allowed to choose their own husbands. Another effect of the woman movement in China was evidenced the other day when the young women of the province of Che-Kiang opposed the plan for securing a loan from England to build an important railroad and invested \$100,000 in the stocks of a Chinese company.

Soldier's Resignation.

A French soldier on active service was informed by the mayor of his village that his father had recently died. In acknowledgement he wrote as follows: "Monsieur le maire, I heartily thank you for my father's death. It is a little accident that often happens in families. As for myself, I am in the hospital minus one leg, with which I have the honor to salute you."—Argonaut.

The Shortest Street in London. There can hardly be a shorter street in London than the one connecting Pall Mall with the southeastern corner of St. James Square, from which the name John street has just been removed. It has only one house, which is No. 1; for though there are two other doors in the street, one is numbered as belonging to Pall Mall and the other is the side entrance of a public house. Presumably, therefore the single house is now to be absorbed in St. James Square and the London directory is to lose yet another of the slowly diminishing number of John streets.—Westminster Gazette.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

All notes or legal papers executed in Mexico must bear revenue stamps, and all papers executed in the United States or other countries must bear these stamps before legal action can be commenced in Mexico.

Recent additions to the French army's field equipment were several automobile refrigerators to transport fresh meat.

A new instrument for use when stropping razors includes a guide which prevents the blade slipping and injuring itself or the strap.

Paxtine TOILET ANTISEPTIC

THE TEETH Paxtine excels any dentifrice in cleaning, whitening, and removing tartar from the teeth, besides destroying all germs of decay and disease which ordinary tooth preparations cannot do.

THE MOUTH Paxtine used as a mouth-wash disinfects the mouth and throat, purifies the breath, and kills the germs which collect in the mouth, causing sore throat, bad teeth, bad breath, grippe, and much sickness.

THE EYES when inflamed, tired, sore, red, and burn, may be instantly relieved and strengthened by Paxtine.

CATARH Paxtine will destroy the germs that cause catarh, heal the inflammation and stop the discharge. It is a sure remedy for uterine catarh.

Paxtine is a harmless yet powerful germicide, disinfectant and deodorizer. Used in bathing it destroys odors and leaves the body antiseptically clean.
