Red squirrels are about the worst characters of the woods. They are mischlevous, destructive and always on the warpath against birds in the nest and the peace of quiet forest folk. It is no great matter if they are shot, But the grey squirrel is a very respectable, rather ponderous and dignified member of the family, and it is too bad to shoot him entirely out of the country. Those who own land where they are should make an effort to see that they are not all slaughtered at this season.-Franklin Evening News.
