

Remedies are Needed

Were we perfect, which we are not, medicines would not often be needed. But since our systems have become weakened, impaired and broken down through indiscretions which have gone on from the early ages, through countless generations, remedies are needed to aid Nature in correcting our inherited and otherwise acquired weaknesses. To reach the seat of stomach weakness and consequent digestive troubles, there is nothing so good as Dr. Pierce's Golden Medical Discovery, a glyceric compound, extracted from native medicinal roots—sold for over forty years with great satisfaction to all users. For Weak Stomach, Biliousness, Liver Complaint, Pain in the Stomach after Eating, Heartburn, Bad Breath, Belching of food, Chronic Diarrhea and other Intestinal Derangements, the "Discovery" is a time-proven and most efficient remedy.

The genuine has on its outside wrapper the Signature

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit.
Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

Germany's Growth.

The United States, with its stream of immigration, grows fast, but what shall one say of the increase in the population of Germany, which, according to the statistical yearbook of Germany, was 63,836,000 on June 30, 1909? The last census of the empire was taken in December, 1905, when the population was 60,641,278. In the three and one-half years since that census the increase has been 3,250,000, and since the founding of the empire in 1871 the increase has been 23,000,000.—Army and Navy Journal.

Pretty Good Proof.

"So you think he's really in love, eh?"
"No doubt about it. Why, he thinks she's attractive in auto goggles."—Louisville Courier-Journal.

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels. Do not gripe.

Our Disgraceful Wheat Record.
The average wheat yield per acre in the United States in 1907 was 14 bushels. The average for the last ten years is 13.88. That is, in 1907 it required 45,211,000 acres to produce 634,087,000 bushels that we raised. It is a disgraceful record.—James J. Hill in World's Work.

At the age of 74 there has just died in the Ballarat (Australia) Benevolent Asylum the discoverer of the famous "welcome nugget."

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, &c. a bottle.

After working for Heathcoat & Company, lace manufacturers of Tiverton, England, for 71 years, William Huxtable has just retired.

For Rheumatic Pains

As we get older the blood becomes sluggish, the muscles and joints stiffen and aches and pains take hold easier. Sloan's Liniment quickens the blood, limbers up the muscles and joints and stops any pain or ache with astonishing promptness.

Proof that it is Best for Rheumatism.
Mrs. DANIEL H. DIEHL, of Mann's Choice, R.F.D., No. 1, Pa., writes:—
"Please send me a bottle of Sloan's Liniment for rheumatism and stiff joints. It is the best remedy I ever knew for I can't do without it."

Also for Stiff Joints.
Mr. MILTON WHEELER, 2100 Morris Ave., Birmingham, Ala., writes:—
"I am glad to say that Sloan's Liniment has done me more good for stiff joints than anything I have ever tried."

Sloan's Liniment

is the quickest and best remedy for Rheumatism, Sciatica, Toothache, Sprains, Bruises and Insect Stings.

Price 25c., 50c., and \$1.00 at All Dealers.

DR. EARL S. SLOAN, BOSTON, MASS.

Farm Topics

CORNSTALK FIBRE.

When the green stalks are given to hogs care should be used to prevent cattle from having access to the woody fibre which the swine will leave after chewing the stalks. Pigs relish the stalk for the sweetness in it, but leave enough saccharine matter in the fibre to make it attractive to cattle, especially the younger stock. This fibre is indigestible, and the cattle, if allowed to pick it up, will frequently eat a sufficient quantity to cause impaction and harmful if not fatal results. It is not safe to let cattle into yards where swine are given green cornstalks.—Swine in America.

CHEAP WATERING VESSEL.

The cheapest and most satisfactory watering vessel I have been able to find, writes Mrs. J. C. Deaton, is as follows: For a pen of a dozen fowls, take a half gallon bucket or coffee can; make hole with nail one inch from top and invert this, filled with water, in an earthenware dish—saucers for one gallon flower pots are good for this.

This fountain supplies the water in the dish just as needed. It should be placed on a box or frame ten inches high, or in back part of pen to keep the litter out of it.

Always empty water vessels at night and keep them scalded once a week.

WEAN THE PIGS.

It is not a good plan to take all the pigs from the sow unless one or two of them can be turned with her some hours after, to draw the milk she will have at that time, and again, say after a lapse of twenty-four hours. The preferred way is to leave two of the smallest with her several days, and after that leave only one for two or three days, by which time the flow of milk will have been so gradually diminished that no injury will result to the sow by keeping them entirely away from her. This extra supply of milk helps also to push the smaller pigs along in growth and put them more nearly on an equality in size with their thrifter mates.—From Coburn's "Swine in America."

THE SILO AND ALFALFA.

Professor W. J. Fraser, of the Illinois Agricultural College, in referring to silage and alfalfa as great helps for the dairy farmer says:

The summer silo gives the best and most economical protection of all against drouth.

One of the very greatest crops for the dairyman, and one which is now being successfully grown on thousands of farms in Illinois, is alfalfa. Every dairyman should have a patch of alfalfa, and this will supply the finest of feed when the drouth has ruined ordinary pastures. The alfalfa at the university yielded more than six tons of air dry hay per acre last year.

The great advantage of corn in the silo and alfalfa is that they not only produce the largest yield of nutrients per acre of any crops, but are in the best condition for feeding at whatever date the pasture may fail, while it is difficult to have a constant supply of other cooling crops in the right stage of maturity at and during the uncertain time of the drouth.

Never, under any conditions, allow the cows to go hungry and suffer loss of milk during the summer drouth, which for several reasons is the most trying season for the dairy herd.

HOG FEEDING TEST.

One of the State experiment stations has made a careful test in feeding hogs certain foods, and gives the results in the following summary:

1. That it required eighteen per cent. more barley by weight than corn to produce the same gain in feeding pigs when both grains were fed in the proportion of four parts of grain to one of shorts by weight.

2. That it is profitable to feed barley to hogs if pork is selling at an average price.

3. That the carcasses of the pigs fed barley and shorts showed a greater distribution of lean and firmer flesh than the carcasses of pigs fed corn and shorts.

4. That pigs fed on corn and shorts will dress a higher per cent. than pigs fed on barley and shorts.

5. That cross-bred Yorkshire-Berkshires made more gain than the other cross-breds or pure-breds used in this trial.

Another test at feeding other foods is given as follows:

1. We can conclude from the results of this trial that ground rejected wheat is capable of producing good gains when fed to swine in connection with shorts.

2. In comparison with corn it requires 8.9 per cent. more rejected wheat than corn to produce the same gains.

3. The quality of pork produced is even better than that produced by corn.

4. If pork is selling for a reasonable price, a fairly good price may be expected from feeding the rejected wheat to swine.—Weekly Witness.

Horrible Example.

Mrs. Harriman now is said to be the richest widow in the world. If Hetty Green had saved her money instead of blowing it recklessly for \$18 flats and thirty-nine-cent hats she might have been able to make a showing in that line.—Chicago News.

MUNYON'S EMINENT DOCTORS AT YOUR SERVICE FREE.

Not a Penny to Pay For the Fullest Medical Examination.

If you are in doubt as to the cause of your disease mail us a postal requesting a medical examination blank, which you will fill out and return to us. Our doctors will carefully diagnose your case, and if you can be cured you will be told so. You are not obligated to us in any way; this advice is absolutely free; you are at liberty to take our advice or not as you see fit. Send to-day for a medical examination blank, fill out and return to us as promptly as possible, and our eminent doctors will diagnose your case thoroughly absolutely free.

Munyon, 53d and Jefferson Sts., Philadelphia, Pa.

Zones and Genders.

While inspecting examination papers recently, a teacher found various humorous answers to questions. A class of boys, averaging about 12 years of age, had been examined in geography, the previous day having been devoted to grammar. Among the geographical questions was the following: "Name the zones." One promising youth of 11 years, who had mixed the two subjects, wrote: "There are two zones, masculine and feminine. The masculine is either temperate or intemperate; the feminine is either torrid or frigid!"—Philadelphia Inquirer.

ECZEMA COVERED HIM.

Itching Torture Was Beyond Words—Slept Only from Sheer Exhaustion—Believed in 24 Hours and Cured in a Month by Cuticura.

"I am seventy-seven years old, and some years ago I was taken with eczema from head to foot. I was sick for six months and what I suffered tongue could not tell. I could not sleep day or night because of that dreadful itching; when I did sleep it was from sheer exhaustion. I was one mass of irritation; it was even in my scalp. The doctor's medicine seemed to make me worse and I was almost out of my mind. I got a set of the Cuticura Soap, Ointment and Resolvent. I used them persistently for twenty-four hours. That night I slept like an infant, the first solid night's sleep I had had for six months. In a month I was cured. W. Harrison Smith, Mt. Kisco, N. Y., Feb. 3, 1908."

Patent Drug & Chem. Corp., Sole Props. of Cuticura Remedies, Boston, Mass.

HAS NEW HEALING IDEA

Rector Resigns to Cure Folks by Thought Absorption.

That he may become the founder of a great school of healing, similar to the Emmanuel Movement, is the reason announced by Rev. A. S. Corbett for his resignation of the pulpit of Trinity Episcopal church of Hamilton, O. Mr. Corbett has conceived a system of healing called "Psycho-Neurology," the basis of which is thought absorption. He believes it is possible to make the sufferer unconsciously absorb the thought of the operator and thus overcome his ills in a large number of cases. The method differs from the Emmanuel Movement in that no medicine is to be used at any stage of the treatment.

Mr. Corbett said that he would immediately begin to travel in the interest of his propaganda, and already he has invitations to appear before organizations in many states. "I will not leave the ministry," he said, "because I conceive that it is the duty of the minister to heal as well as to preach."

Birds in Their Flight.

Some of the theories about education of your birds must be revised if Herr Gathe, quoted by the Rev. John Vaughan, author of "Lighter Studies of a Country Rector," be an accurate observer. He says that of the 396 species of birds seen at Heligoland, the migratory bodies are led by the young birds only six or eight weeks out of the nest. Can it be that all the tender wooing of the nestlings to fly, all the apparent teaching, is really only an effort to clear the nest? Is the "tender mother bird" of the stories as cold blooded as a Belgravian mother planning to rid herself of her daughter?—New York Times.

SOME HARD KNOCKS

Woman Gets Rid of "Coffee Heart."

The injurious action of Coffee on the heart of many persons is well known by physicians to be caused by caffeine. This is a drug found by chemists in coffee and tea.

A woman suffered a long time with severe heart trouble and finally her doctor told her she must give up coffee, as that was the principal cause of the trouble. She writes:

"My heart was so weak it could not do its work properly. My husband would sometimes have to carry me from the table, and it would seem that I would never breathe again."

"The doctor told me that coffee was causing the weakness of my heart. He said I must stop it, but it seemed I could not give it up until I was down in bed with nervous prostration."

"For eleven weeks I lay there and suffered. Finally Husband brought home some Postum and I quit coffee and started new and right. Slowly I got well. Now I do not have any headaches, nor those spells with weak heart. We know it is Postum that helped me. The Dr. said the other day, 'I never thought you would be what you are.' I used to weigh 92 pounds and now I weigh 158."

"Postum has done much for me and I would not go back to coffee again for any money, for I believe it would kill me if I kept at it. Postum must be well boiled according to directions on pkg., then it has a rich flavour and with cream is fine."

Read "The Road to Wellville," found in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Women Who Suffer

From woman's ailments are invited to write to the names and addresses here given, for positive proof that Lydia E. Pinkham's Vegetable Compound does cure female ills.
