"Why do women always ring the bell on the street car for their corner, even if six others have just rung it for the same stop?" asked a man of his

wife the other day.
"They don't always," she retorted. "I'll admit that I always do it if I'm next to the window and someone is seated beside me on the aisle. an easier way to indicate that they'll have to let you out for the next stop than to turn around and tell 'em in so many words."

Constipation causes and aggravates many serious diseases. It is thoroughly cured by Dr. Pierce's Pleasant Pellets. The favorite family laxative.

Automobiles and Life Insurance.

The suggestion of Governor Marshall of indiana, that people are giving up their life insurance in order to buy and keep automobiles ought not to interfere seriously with the life in surance business, and especially with the accident style of insurance. The more automobiles, the more danger to life and limb, and consequently the more need of insurance. But it is not working that way, according to the governor. Probably, if this is true, it is owing to a sort of recklessness that has taken possession of the heart, and which easily infects a whole community. However, it is likely, if there is a reduction of the life in ance business, it is a coincidence rather than a result of automobile suprem. er than a result of automobile supremacy.-Ohio State Journal,

The portion of the city street which in subjected to the greatest wear is that immediately beside the car tracks.

PINKHAM

Added to the Long List due to This Famous Remedy.

Oronogo, Mo.—"I was simply a nervous wreck. I could not walk across the floor without my heart fluttering and I could not even

receive a letter. Every month I had such a bearing down such a bearing down sensation, as if the lower parts would fall out. Lydia E. Pinkham's Vegetable Compound has done my nerves a great deal of good and has also relieved the bearing down. I recommended it to some friends and two of them have been greatly benefited by it."—Mrs. MAE MCKNIGHT, Oronogo, Mo.

Another Grateful Woman.

St. Louis, Mo.—"I was bothered

Another Grateful Woman.
St. Louis, Mo.—"I was bothered terribly with a female weakness and had backache, bearing down pains and pains in lower parts. I began taking Lydia E. Pinkham's Vegetable Compound regularly and used the Sanative Wash and now I have no more troubles that way."—Mrs. Al. Herzog, 5722 Prescott Ave., St. Louis, Mo.

Because your case is a difficult one, doetors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic

fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling indigestion, dizziness, and ner-vous prestration. It costs but a trifle to try it, and the result is worth milliens to many suffering women.

DROPSY NEW DISCOVERY;

BROWN'S Bronchial Troches

ROWN & SON, Beston, Man

Simple wind puffs may be made to disappear by persistent pressure with bandage and pads, applied at first two hours twice a day, and two hours more each day thereafter until they can be kept on all the time. This may require five or six weeks and should be stopped if it causes inflammation in the sac.—Farmers' Home Journal.

Roughness For Brood Sows.

I have seen and read with interest many suggestions in the Indiana Farmer on management and feeding of brood sows. But there is one thing but few seem to consider in that connection. That is, brood sows need a good deal of roughness as part of their feed, such as clover hay, alfalfa hay, or when these can't be had give them corn fodder. This rough food is needed to distend the digestive organs, and to help digestion. Corn fed alone is too concentrated for brood sows. The alfalfa and clover have the protein elements to supply that need, and if we feed corn to sows too much the pigs will show it when they come and will not be as vigorous and strong as when the sows are fed during the winter the roughness. Of course a litthe corn is all right, but we must not forget to feed the roughness if we want good strong pigs.-E. W. James, in the Indiana Farmer.

Model Daily Farm.

There is a wenderful toning up in the dairy industry. This is true especially in the middle west. Recently ex-Governor Hoard, of Wisconsin, a noted dairyman, himself, said;

"I know a man who lives in Wisconsin who owns fifty acres of land and it is possibly worth \$50 an acre. He is now carrying twenty-five cows on this land, and they are cows. A year ago I addressed the farmers at a fair in La Crosse, the county in which he resides. His entire herd was brought onto the race track and I talked for an hour, taking these cows as my text. They were only grades, yet they earned for him last year \$100 apiece in the sale of their cream alone. His cows earned him in cream and skimmilk \$120 a year per cow. He is a constant reader and student of what other men are doing. He uses four times as much dairy thinking, reads four times as much on diary subjects, consequently he will do just as much business on six times loss capital in land and onehalf as many cows as the average dairyman.

A Time to Found Herds.

At the current range of prices pedigree beef outlie are befor investments than they have been for years. It is an opportune time to buy and plant good borine seed. Under practical dere it will germiesto into substantial profits. Judicious investments now are the foundation of future increased values. Students of the trade in registered beef cattle stocks confidently expect a stendy upward trend. It has already set it, as ample evidence proves. Last week, for instance, 122 Merefords sold in West Virginia at an average of about \$140, says Breed-

er's Gasette. According to trustworthy statistics the United States is markedly short of beef cattle. Our consumptive capacity, which is growing rapidly, is far ahead of production, so far as beef is concerned. A strong, stable demand calls for an improved quality and a great increased quantity of beef.

All signs discoverable by farsighted men identified with the productive industries indicate that a period of conservative, deep-rooted prosperity has begun. Every factor having a bearing on stock husbandry in America favors the founding and upgrading of beef herds while the iron of opportunity is sustably hot. Farmers who buy purebred bulls or femals now will show as sound business acumen as can be applied to most human affairs.

Method of Corn Culture.

Several years ago a farmer named E. M. Williamson of Darlington county, South Carolina, developed a system of corn culture which has already worked an agricultural revolution in the Peedee River region of that state, and which is destined to bring about in the South an increased yield an pere of corn which would go far toward reducing the cost of living.

Williamson reasoned that the application of fertilizer at time of planting stimulated growth of stalk rather than that of grain. He therefore reserved the fertilization until the plant was about to fruit, when the stimulant became a direct aid to this process of

grain production. Since smaller stalks occupied less ground space he seeded more thickly, and the combined treatment increased the yield enormously, to as much in some cases at 120 bushels an acre. and with a quite common result of 50 to 60 bushels an acre.

Williamson's system has now been so generally adopted in his immedilocality that I found Darlington county abundantly supplied with corn for home consumption, whereas it formerly spent large of its cotton money

for Western corn. The upland Southern lands are thus proved capable of rivaling the great corn producing states of the West. All honor to Farmer Williamson, who

deserves a niche in the national hall of fame as a benefactor of his race .-Frank R. Chambers, in the New York

Get Winter Eggs. Following up our recent article in these columns headed: "The Pullets in the Straw,"—and thinking about the old stable at home on the farm, where we used to pitch the manure from the stable out of a convenient back window; and how the hens used to go back there and work in that dung-heap on the sunny-side of the stable, we are led to the suggestion that in just such situations, with a little betterment in the way of protection from the rain and the snow, it is possible for every farmer who is alive to the situation, to convert his manure-pile during the winter, into an egg-plant or egg-mine.

Our idea is this: Suppose we go to work and put a shed about twelve or fifteen feet long, and eight or ten feet wide over and above the back window to the stable, so as to protect the manure and the fowls working in it, from the bad weather,-planking it up some three or four feet all around at the base. This would give us an ideal 'scratch pile,"—one rich in things that chickens love to scratch for; and, as for that, we could be liberal in what we pitched out there in addition to the manure, adding some grain daily, and some clover hulls, or millet hay, and so make it the feeding place for the fowls. Then, down under the horsetroughs at the rear of the stable next to the shed we could box up a space a couple of feet wide, and several feet long, and in there we could put nest boxes, and nests, with an opening in the back end leading out under the shed. This would make an ideal place for the hens to scratch, and retreat into the stable under the troughs to lay. And they would do it, with an increase of 25 to 50 percent in eggs over their usual winter laying without any

such congental quarters. One end of the shed might be boarded up, and part of one side, from the top down four of five feet, and the roosts for the heas put up in there; thus virtually making the dung-heap from the stable the basis of a success ful chicken plant, and roosting house

We wonder how many farmers who read this suggestion will act on it. We wish several would, and then re port results in these columns.

The way to learn what a thing, or a timely thought is worth, is to try ft.-H. B. Geer, in the Farmers' Home Journal.

Notes.

If the branches of trees afflicted with blight are cut and promptly burned the trees may assume a healthy and vigcrous growth.

If everyone realized the health pro moting value of apples there would be more trees planted in the private gardens for home consumption.

Unless the fowls have plenty of opportunty to exercise during the winter, they will become weak and sluggish and more liable to disease,

The best medicine for poultry is good care. Cleanliness, light, warmth, dry houses, sound feet and pure waare better than the who remedies. These are the "ounces of prevention" that save the "pounds of

Many town people do not really know how much better nice fresh vegetables right from the garden are Educate them up to it. Get them to try a little of your stuff. Once induce them to do this and they never will want to go back to the stale stuff of the grocery.

Damp quarters and a lack of heatpromoting foods, frequently cause rheumatism in fowls. Birds so afflicted will cramp and the legs draw up. They will often eat heartily. Dry quarters, good food, and liniment briskly rubbed into the limbs will usually effect a cure.

Sightseeing with Reesrvations.

Out of the Grand Central Station the other day came a couple the sight of whom caused citizens who saw them to admit to themselves that there might be, after all, some basis of truth in the "Uncle Josh" jokes of the allegedly funny papers. The old man grasped his carpet bag and bulging green umbrella firmly, and looked up and down the street, his mouth agape

"There's a heap o' sights in New York, I guess. Maria," he said. "I misdoubt if we see them all." The old ladys mouth set grimly.

"Well, Silas," she replied, and her manner was more than significant, bein' as I'm with you, there's some I expect, that you aint goin' to see!' -Lippincott's.

Old Oil Fields Active.

Oil oozing from dry holes in abandoned sections of the Sour Lake, Saratoga and Spindle Top oil fields, in Texas, are attracting attention, new wells have been sunk and four gushers brought in thus far. Test wells are now being sunk in all sections of the abandoned fields in hopes of renewing them.

Scientists and expert oil men say the disturbance in the bed of the Gulf some weeks ago is responsible for the resurrection of the oil fields.—New

MANY CHRISTENED THERE

Famous Old Baptismal Font in Church at Florence.

In the old baptistry at Florencethe baptisry with the wonderful bronze doors which Michael Angelo called "so beautiful that they were worthy to be the gates of Paradise"—most of the bables of Florence have been baptised for many hundred years.

At almost any hour of any day one will find baptismal parties walting be fore the font, with babies of every rank in life from the princely a great house nearly smothered in costly laces and attended by a small army of friends and relatives, to the little creature decked out in gaudy cotton and held in the arms of a soli tary old peasant woman.

No register of baptism was kept in the very early days, says Youth's Companion. The first record was made in this wise: A certain priest took it into his head to keep account of the number of children he baptised Accordingly he put a white bean inte a box for every boy and a black bear for every girl.

Later on records were carefully kept, and if one could look them over it would be a fascinating study for probably the greater part of the painters, scholars, poets and soldiers who have made Florence famous received their names at the font of "my dear little Saint John"—as Dante call

Epidemic of Itch in Weish Village.

"In Dowlais, South Wales, about fifteen years ago, families were stricken wholesale by a disease known as the itch. Believe me, it is the most terrible disease of its kind that I know of, as it itches all through your body and makes your life an inferno. Sleep is out of the question and you feel as if a million mosquitoes were attacking you at the same time. I knew a dozen families that were so

affected. The doctors did their best, but their remedies were of no avail whatever. Then the families tried a druggist who was noted far and wide for his remarkable cures. People came to him from all parts of the country for treatment, but his medicine made matters still worse; as a last resort they were advised by a friend to use the Cuticura Remedies. I am glad to tell you that after a few days' treatment with Cuticura Soap, Ointment and Resolvent, the effect was wonderful and the result was a perfect cure in all cases.

"I may add that my three brothers, three sisters, myself and all our familles have been users of the Cutleura Remedies for fifteen years. Thomas Hugh, 1650 West Huron St., Chicago, Ill., June 29, 1909."

Ferry Business Declining.

After 272 years of growing ferry facilities in New York City the decline has started, owing to the increasing number of bridges and subaqueous railways. The great system of ferries grew from the solltary skiff that Cornelius Dirksen had in 1637, where Peck Slip now is, and ferried passen gers, who called him by blowing a horn that hung on a tree nearby,

Distemper

In all its forms, among all ages of horses and dogs, cured and others in the same stable prevented from having the disease with Spohn's Distemper Cure. Every hottle guaranteed. Over 500,000 hottles sold last year. 50c. and \$1.00. Good druggists, or send to manufacturers. Agents wanted. Write for free book. Spohn Med. Co., Spec. Contagious Diseases, Goshen, Ind.

The practice of cutting the claws of the more ferocious animals of the London Zoological Garden has recently been greatly facilitated by chloroform ing the animals.

Dr. Detchon's Relief for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action is remarkable. Removes the cause and disease quickly disappears. First dose greatly benefits. 75c. and \$1. All druggists.

Despair and Despondency No one but a woman can tell the story of the suffering, the despair, and the despondency endured by women who carry a daily burden of ill-health and pain because of disorders and

derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued.

Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.

IT MAKES WEAK WOMEN STRONG,

SICK WOMEN WELL.

It allays inflammation, heals ulceration and soothes pain.
It tones and builds up the nerves. It fits for wifehood and motherhood. Honest medicine dealers sell it, and have nothing to urge upon you as "just as good."

It is non-secret, non-alcoholic and has a record of forty years of cures.

Ask Your Neighbors. They probably know of some of its many cures.

If you want a book that tells all about woman's diseases, and how to cure

them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing esly, and he will send you a free copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to date edition, in paper covers. In handsome cloth-binding, 31 stamps. Address Dr. R.V. Pierce, Buffalo, N.Y.

PIGS AS CHILDREN'S PETS

Destined to Replace Kittens and Youngs Dogs, a Philadelphia Professor Says.

Pigs as pets for children are destined to replace kittens and young dogs, according to Prof. E. A. Barnes, of Philadelphia, who delivered a course of lectures at Passalc, N. J.
"The best companion for a child of

five or six years is a six-week-old pig, said Dr. Barnes in the first lecture 'A pig is more intelligent than a kit ten or a dog; it is good-natured and will follow a child; it is easily kept; it is tough and rotund, and its rotund-ity prevents the child from harming for when the child picks it up and squeezes it the little plg slips to the floor every time. Pigs make fine playmates and I urge every mother here to secure one for her little boy

Indians Swearing Off.

Uncle Sam's campaign for "moral uplift" among his vast army of In wards has been chiefly cant because of the almost total sup-pression of the sale and use of "firewater" among the braves and the con-sequent diminution of warlike outbreaks on the reservations. Wash-ington officials evinced much interest in the report to Assistant Indian Commissioner Abbott that 700 Navajo Infather" superintendent and, surrendering an enormous stock of gambling paraphernalie enrolled their names alongside those of the "simple life" ex-These gambling devices of varied sorts and descriptions were shipped here and have been placed on exhibition with the immense collection of relics and trophles of the Indian bureau.-Washington Star.

These candy tablets do just as much as salts or calomel. But Cascarets never callous the bowels. They never create a continuous need, as harsh cathartics do. Take one just as soon as the trouble appears, and in an hour its over.
