O Musical at Baptist church Thursday | DEATH OF SOLOMON PHILLIPPI.

Well Known Old Settler Passed Away After Several Months Illness from Dropsy and Heart Trouble.

Solomon Philippi, one of Sykesville's oldest and most respected citizens, dled on Tuesday evening at 7 o'clock, after having been ill since last Thanksgiving, death being due to dropsy and heart trouble.

Deceased was the last of five children of Henry and Elizabeth Phillippi, and was born in Fayette county on June 12, 1831, making him in his 79th year at time of death. He came to this section when 15 years old and was married June 13, 1851, to Margaret B. Smith, of near Panic. To this union ten children were born, of whom five survive, as follows: Mrs. Minerva Strouse, of Reynoldsville; Mrs. J. B. Sykes, of Sykesville; A. S. Phillippi, of Homer City; Mrs. Alma Fulton, of Goldfield, Nev.; J. W. Phillippi, of Arcampo, Cal.

Mr. Phillippi's first wife died about fifteen years ago and he was again married on Feb. 14, 1901, to Mrs. Sylvia Crissey, who died on June 6, 1908.

He was drafted for service in the Civil War, but was later exempted on account of disabilities.

Funeral services were held Thursday afternoon at 1.30 o'clock in the Sykesville M. E. church by the pastor, Rev. W. E. Frampton, and interment was made in the Syphrit cemetery in Paradise.

Mr. Philippi was a Lutheran until after his second marriage when he and his wife became members of the Methodist Episcopal church.

Mr. Phillippi was a man of deep religious nature and of strong convictions on many subjects. He was well known and highly esteemed all over this section, in which he has figured prominently for many years, and his death brings sadness to a large circle of friends .- Post-Dispatch.

There were four ships, Friendship, Citizenship, Courtship and Worship. It was a splendid lecture, full of inspiration, humor and pathos. The audience enjoyed the lecture very much. Those who failed to hear it missed a treat.

2,000 Men Idle.

Between 1,500 and 2,000 men, who under favorable weather would have been at work on the new Brookville & Mahoning railroad from Knoxdale, this county, to the point below Kittanning, in Armstrong county, were idle during the past month because of the deep snow and rigorous weather. With more favorable weather the Brookville & Mahoning company, and the coal companies that are opening mines, the product of which will be shipped over it, will be employing 4,000 men on grade work, cement work, tunnel work, bridge building, etc.

When the Pittsburgh & Shawmut Railroad company gets the road completed and the companies that will ship coal over it have completed their plants, some 27 in all, there will have been expended in the neighborhood of \$20,000,000, with the people of Jefferson and Armstrong countles the chief beneficiaries.

A WORD TO ADVERTISE RS

And Store Keepers in General About One Way to Overcome the "Store Evil." 0000

Plow deeper, Mr. Ad'er. Texas has had a nard time with the boll weevil. that industrious little beetle that ests up the product of the cotton fields. A recent writer in "Success" has estimated fifty million dollars damages in one year. The farmers were at their wit's end. They began to plow the land deeper to urge the cotton to an early maturity and barvest it before the weevils multiplied enough to destroy it.

There is an advertiser in a little eastern city of about 4,000 population who has been troubled by a "store evil" almost as difficult to understand as the boll weevil and which begins its work trade destruction early in

the game like the little boll weevil. This merchant was annoyed greatly to find that only about 25 per cent of his best country trade (cash customers) were bringing in their products to sell or exchange in his town. He began to "piow deeper" and have some heart to heart talks with his friends throughout the county, and one by one he discovered they were selling their products from the farm to neighboring towns (going out of their way to reach a market) where they could procure the cash in payment, with which they were sending away to the great city for what they believed was "the identical goods." sold by the home merchant for at least one-fourth less.

This merchant made an offer to buy for cash everything his neighbors would bring to town at any time they might come, and always give them the "highest market price." By this means he turned the tide and soon found quite a number coming to him for the cash. To these he said: "Now friend, sit down here in my office, I want to tell you something. I have been doing as agreed. Now did you ever think that part of that cash ought to stay at lofts to the packing department, and home? Don't you think I am entitled to an even chance with the mail-order house which you are trading with.?"

Well, they "hadn't thought much about that side of the question". But now they receive a monthly price list by mall from the merchant convincing sideration. the neighbor that it is worth while to give the home merchant a chance first. Maybe you, Mr. Advertiser, can plow deeper, and beat the "store evil."

BUSINESS MEN'S TOUR

Continued from First Page.

THE STAR GLASS CO. PLANT. Emerging from the tile plant the caders of the delegation saw a door of the Star glass plant open and promptly disappeared within it, followed by the balance of the gentlemen. They saw the famous machine on which the interest of glass workers the world over is now centered. This machine was very fully described in THE STAR some time ago and for that reason little comment is made on its relation to the industrial future of Reynoldsville. leter.

THE SILK MILL.

DP. F. Bolger, the sole representative of the American Silk Company in Reynoldsville, very kindly consented to admit the visitors and allowed them to inspect the mill and its equipment. As has been frequently been stated before, the mill is in superb condition, ready to start at a day's notice. The interior, with its unsolled white and gray paint and long rows of green looms is almost beautiful in appearance, but-

It's awfully quiet.

Possibly no event could cause more general rejoicing in Reynoldsville than an announcement of resumption of work in this mill, and there is genuine ground for hope given by letters received by the Association, that such an announcement may come sooner than has been anticipated.

THE JEFFERSON MACARONI FACTORY. To many in the party the operations witnessed in the Jefferson Macaroni factory were as as much of a novelty as anything witnessed during the excursion. The company has a finely equipped mill and the visitors were shown every detail in the process of manufacture by Harry K. Pifer, from the mixing of the flour and water, the powerful machines which pressit into the various forms of macaroni, through the drying lastly the box making department, which is not the least of the wonders there. The factory has an established trade and the best possible proof of the company's success is the fact that a large addition to the plant is under con-

The trip was a success from every point of view. It gave the business men a new and firmer conviction of the broad and sound foundation upon which the prosperity of Reynoldsville rests. And these six industries grouped on one hill are but part of those contributing to the town's permanence.

By Way of Advice.

The following little item, clipped rom the Franklin News, we respectfully commend to the attention of our numerous fellow citizens who have political aspirations:

"Br'er White, of the Tidioute News, with an eye for our comfort and well being, under the heading. "Don't Monkey With It," has the following to say in this week's issue: "An Emlenton paper suggests Jim Borland, of the Franklin Evening News as a candidate for Assembly. Turn 'er down, Jim. You're a first-class fellow, all right; but the devil only knows how this scheme would put it up to you." There is nothing doing in that direction, Br'er White. This bait has been held out before and never looked good to us. Having listened to pleadings of friends to enter the political game once, and having gotten an insight into the lowdown manner in which it is played. we promise never to transgress again."

ADVANCE FARM SCHEDULE

Farmers to be Furnished Copies Before the Census Begins.

A great increase in the accuracy of the census returns from the farmerss, a considerable saving of the working time of the farm enumerators, sid the removal of much; of whatever misapprehensions and prejudices may exist among farmers with regard to the census are the important results expected by the United States Census Bureau to follow the use of the Advance Farm Schedule, which has been adopted and will be circulated, through the rural postmasters, among the farmers a short time before the actual census taking.

The employment of this advance schedule is a distinct innovation in census methods. It is the logical and practical outcome of the Census Bureau's persistent effort for some time past to give the farmers a clear and comprehensive! knowledge of the farm census questions and to induce them to keep written records of their farm operations and equipment in readiness for the call of the enumerators, beginning April 15th next.

Postmaster-General Hitchcock has promised the assistance of his department in the effective distribution of the schedules, and he will issue instructions relative thereto to the rural postmasters. They will be required to address and forward to the farmers receiving mail at their offices the advance farm schedules supplied them by the enumer-

In a note to farmers on the front page of the schedule, Census Director

Durand states: "In accordance with the act of Congress, the census of the population and farms of the United States will begin on April 15, 1910. On or soon after that date an enumerator will call at your house for the purpose of obtaining the required information concerning your farm.

"Many of the questions which will be asked you concerning the equipment and operations of your farm cannot be accurately answered by you without considerable thought and the making of careful calculations or estimates. Therefore, this form has been sent to you in advance, so that you may study the questions at your convenience and have the answers written down before the enumerator comes.

"You are earnestly requested to read this form and instructions carefully, to write down the answers to all questions that apply to your farm, and to keep it until the enumerator comes. By doing this you save yourself much time and contribute greatly to the success of the agricultural census.

"Besides the information concerning your farm, the enumerator will also ask you the names, ages, and other facts concerning the members of your household."
