GARDEN, FARM and CROPS

SUGGESTIONS FOR THE UP-TO-DATE AGRICULTURIST

Gypsum vs. Hardpan,

The problem of hardpan has been solved, it is said. V. Rambo has lands between Lerdo and Famossa on which for years he has been unsuccessfully trying to produce vines and trees. Owing to the hardpan lying close to the surface, no results were obtained. Someone told Mr. Rambo that someone else had read somewhere that if gypsum were spread over the surface of the ground the hardpan would dissolve. He tried it on a few acres and the scheme worked. He then scattered gypsum over 160 acres and now has a quartersection of land as good as can be found anywhere. The material contains the elements which, carried down to hardpan, causes that substance to disintegrate, much as gasolene "cuts" grease,-Eakersfield "Califernian."

Symmetrical Horses.

The veterinarian, Ramsay, lays down rules by which a symmetrical and perfect horse may be known. He says the head is taken as the standard of measurement. Three and a half geometrical lengths of the head give the entire height of the horse, counting from the top of the forelock to the ground upon which he stands, provided the head is well carried. Three lengths of the hend equal the height of the body from the ton of the withers to the ground; the length of the same body from point of shoulder to the point of buttock, inclusive. A whole head gives the length of the neck from the summit of the withers to the posterior part of the poll, measuring in a straight line; the height on the shoulders, from the top of the withers to the point of the elbow; the thickness of the body, from the middle of the abdomen to the middle of the back; the width of the body, from one side to the other.

Feeding Cows for Profit.

A practical dairy farmer of Canada referring to his own experience, in the Farm and Dairy, lays down the following rules for dairy feeding at the greatest profit:

First, build a summer sile and grow more corn, using ensilage to supple ment pastures in summer,

Second, take fifteen acres of land (on a 10-acre farm) near the buildings. Divide into three equal fields. Follow a three-year rotation thereon.

First year: Corn, an early variety,

Feed in August and September. Second year: Mixed grain, oats, peas and barley (four bushels per acre), seed down ten pounds red clover, four pounds timothy per acre. Cut quite green in July. Do not allow to lodge

Third year: Clover cut in late June and in early August.

Do not hesitate to feed this fifteen acres of crop in the summer, even should things look blue for the winter forage supply. Let no consideration prevent its utilization at the proper time, not even an abundance of grass. It will always pay to feed such forage

Poultry in Fruit Districts.

A friend of mine came to this coun try from England about twenty years ago, says Colorado Fruit Grower. He had heard that in America every man a fice-acre tract near Los Angeles. He came on to California. He bought a fiv-acre tract near Los Angeles. He took off his coat, rolled up his sleeves and went in to the chicken business in dead earnest. To-day he owns a beautiful home, equipped with every convenience. He owns a big poultry ranch. He raises strictly fancy fowls and sells at fancy prices. His income is such that he tours the country in a good six-cylinder. He is president of the table chicken crank-an enthusiast of the first water, a man who knows the chicken business

Does poultry pay? Yes, most as-suredly, yes! You must do all the work successfully. All parts of the work go to make the proper machine. Industry, perseverance, patience are the three graces that must be in every successful man's makeup. He must be willing to work out details as well as generalities. One must do it all well. You and I, we are the ones to look to for success in our own line of

Experience With Silos.

Experience has shown that an 80 acre farm would be overstocked with twenty cows without a silo, but that with a silo in which to save feed a farm of that size will take care of thirty cows, and where alfalfa and corn can both be grown an 80 acre farm will care for 5 to 50 cows. That

is a very strong point for the silo. Here is another strong point for the use of the silo by Mr. Bemer, a practical dairyman. He says: having the silo our grain ration for our herd of dairy cows cost \$3.50 per day and during the past winter it has averaged about \$1.40 per day with the use of silage. I have made no records of the hay that was fel as we fed the cows what they would clean up fairly well each day, though I am certain that from the appearance of our mow we have not fed more than half the amount we did before using stlage. We feed all the silage the cows will clean up which is no certain ount per cow as we see feeding all

sizes of cows from a large Holstein to a small Jersey. As we weigh and test the milk regularly I can say that, other conditions being equal, silage will increase the milk flow at an average of 10 pounds of milk per cow per week over dry feeding, and when it comes to figuring that amount on 10, 20, 30 or more cows, it proves silage to be of considerable financial benefit .- Indiana Farmer.

Sheep Stomach Worms.

A sheep grower who has tried tobacco dust for this trouble writes to the American Sheep Breeder as fol-

Five years ago thirty percent of my lambs and ten percent of the breeding flock died, and on examination found hosts of stomach and intestinal worms, besides some tape worms. Losses had gradually increased in the years preceding. Of the lambs that did not die none were fat, and many were worthless. I began to drench with gasolene and used one gill of turpentine to ten pounds of salt kept before the flock. The gasoline and turpentine used persistently lessened the mortality, and improved the tone of the flock each year. From my own and the experience of others, I doubt if any remedy can clean up a flock badly affected with stomach worms. I know that gasoline is sure death to tape worms. Last April I procured 100 pounds of tobacco dust and mixed one part tobacco to two parts salt and kept before the fock all the time, having the box low so the two weeks' old lambs could reach it. Results: I have not lost a sheep or lamb since, and the lambs at six months average 100 pounds. Since using tobacco have drenched the lambs once at weaning time with gasoline. Shall continue to feed tobacco. A year ago many of my sheep coughed badly and discharged much from the nose; the trouble increased so that seventy-five percent were affected. 1 drenched every sheep twice in three days with a tablespoonful of turpentipe in one gill of milk. In a week's time the cough stopped and their noses were clean.

Cows and Cows.

Here is a report of a condition in illinois which applies in many other states. We take it from Hoard's Diaryman, and is as follows:

A friend in northern Illinois, who is a creamery man, gives us the following facts which we would say were very strange except for the fact that they can be found in almost every creamery.

He has sixty patrons, four of the number have herds varying from 10 to 40 cows. These four men get an average return of \$93 per cow. The balance of the patrons, 56, average only \$50 per cow. Here are some of the differences between the four and the 56. The four have Holstein grade cows that they bred themselves. Of the balance six have Holstein scrubs that they bought and the rest have grade Shorthorns.

Our friend says this state of affairs has been going on for six years, and yet the fifty-six farmers with poor cows have not waked up to it yet. Now that is what constitutes the strangeness of this affair.

It is difficult to imagine fifty-six farmers so dull and unresponsive to plain, ordinary, business sense as to have four men living in their midst whose cows average \$43 more each than their own, and have such a state of facts make no impression on them. Such men are not real dairy farmers; they are just fooling with the business of keeping cows,

The following incident will serve to illustrate what we mean by the term, "dairy farmer." At an auction held in a neighboring town the other day, a well to do farmer with an abundance of money would not bid on a most exregistered Guernsey bull though he wanted one. He finally bought a grade bull for \$30.

If that man ever raises good cows it will be an accident, for a man with such a low standard of breeding in his mind is sure to be lacking in the other essential judgments of wise care and development. He saw nothing in the comparison between the two bulls but the price.

Farm Notes.

Eggs with thin shells are not the best for hatching purposes.

In feeding your chicks grain feed don't make the mistake of feeding cracked corn alone. Use a variety. Broilers must have full plump breasts and soft tender flesh. If you want to grow broilers use a broiler

Nearly all poultry diseases are caused by cold, wet, lack of cleanliness or bad feeding. In other words, neglect somewhere.

Don't hatch more chicks than you have brooding accommodations for, and under no circumstances over crowd your brooders.

Buffalo, N. Y., is the banner poultry show town of the country. Thirty thousand paid admissions were recorded at the recent show.

Do not give horses water immed ately after eating. An hour after they have finished their meal is your enough to water them.

PEANW OF THOUGHT.

Blessed are the innocent, for they have a lot to learn. Kindness makes us more friends than money.

The key to success doesn't look anything like a night key.

It's generally easy to be good when you are getting pay for it.

A man with a black eye is up against the dark side of life.

The woman with the shortest foot may possess the longest tongue.

Once in a great while a man's selfrespect keeps him from enjoying life. No, Alonzo, a helping hand and the glad hand are not necessarily the same.

The worst thing about wisdom is that it can only be had on the installment plan.

Sometimes it's difficult to draw the line between a kleptomaniac and a souvenir collector. As time rolls on, the still small

voice of conscience is apt to become stiller and smaller. The eagle is a noble bird, but the old hen contributes more to the wel-

fare of the human race. Happiness may be relative, but the relatives of a man's wife are not nec-

essary to his happiness. After a widow makes up her mind to marry again she makes up her

face and then gets busy. A man ought to be thankful if his wife declines to accept an excuse when he has none to offer.

The reason men don't understand women is because no woman ever tries to make herself plain.

One kind of harmless crank revolves a grindstone with the assistance of a small boy. It isn't subject to violent turns.

It takes a charming young widow to generate an expression of indignation and surprise when she receives an expected kiss.

There is a tradition to the effect that once upon a time a woman in a crowded car got up and offered her seat to a man with a baby in his arms.-From "Pointed Paragraphs" in the Chicago News.

UNIVERSITY CLUB IN MEXICO.

Graduates of American Colleges Have

American university men in the city of Mexico have the privileges of one of the best clubs in the place. It was organized February 20, 1906, with a roll of sixty resident and twenty nonresident members

At that time the new organization was lucky in having a chance to acquire the lease of a house that had been occupied by another club, one which had just been disbanded. The building was larger than was needed at that time but the club has grown to it.

A few months ago it numbered 117 resident, 89 non-resident and 3 honorary members, and it is still growing. The initiation fee for resident members is \$100 and their dues are \$60 per an num; for non-residents just half those amounts. The membership represents universities in the United States. Mexico and Europe. The honary mem bers are the President of the Mexican republic, the American ambassador to the country and Elihu Root.

The clubhouse, which is located on one of the most prominent avenues of the city of Mexico, covers a surface of 1000 square meters, with a front-age of 100 meters on two streets. The interior of the house in comfort and appointments ranks with the best clubs and its beautiful and extensive garden, characteristic of Mexican life. makes this edifice one of the landmarks of the city. The value of the house now occupied according to the board of assessors, is \$250,000. According to the Bulletin of American Republics sixteen members are at present living in the clubhouse and arrangements are now being made to provide accomodations for thirty.

Running a Town as a Business.

How the town of Staunton, Virginia, appointed a general manager to take control of its administration is told by Robert G. Hiden in Harper's Weekly. "Unable to rid themselves of the aldermanic system and adopt the more modern plan," says this writer, "the people went as far as they could. They abolished the old system under which the city council appointed committees to attend to the various departments of city government and created the office of general manager. The general manager was given entire charge and control of all the executive work of the city in its various departments and full control of the heads of departments and employees of the city." "The whole system is a vasimprovement over the old plan," said John Crosby, the author of the new arrangement. "We believe that when it has been thoroughly worked out it will prove to be the ideal system. About th only people who object to our plan of government are the con

The New Art.

A fashionable painter, noted for his prolific output, was discussing, at a studio tea in New York, a recent scandal in the picture trade.

"Look here, old man," cald G. In nis Kerr, the etcher, "do you paint all your own pictures?"

"I do,' the other answered, hotly and with my own hands, too."

"And what do you pay your hands?" Mr. Kerr inquired. "I'm thinking of tarting an art factory myself."-Washington Star.

Stomach Blood and Liver Troubles

Much sickness starts with weak stomach, and consequent poor, impoverished blood. Nervous and pale-people lack good, rich, red blood. Their stomachs need invigorating for, after all, a man can be no stronger than his stomach. A remedy that makes the stomach strong and the liver active, makes rich red blood and overcomes and drives

out disease-producing bacteria and cures a whole multi-Get rid of your Stomach Weakness and

could neither sit still nor lie quietly in Queen Victoria had made at her own bed, for the itching was dreadful. He would irritate spots by scratching her will she devised it as an heirloom with his nails and that only made to belong to the queen consort for the them worse. A doctor treated him and we tried almost everything, but the eczema seemed to spread. It started in a small place on the lower extremities and spread for two years until it very nearly covered the back part of his leg to the knee.

"Finally I got Cuticura Soap, Cutieura Ointment and Cuticura Pills and gave them according to directions. I used them in the morning and that evening, before I put my boy to bed, I used them again and the improvement even in those few hour, was surprising, the inflammation seemed to be so much less. I used two boxes of Cuticura Ointment, the same of the Pills and the Soap and my boy was cured. My son is now in his seventeenth year and he has never had a return of the eezema.

'I took care of a friend's child that had eczema on its face and 'imbs and I used the Cuticura Soap and Ointment. They acted on the child just as they did on my sen and it has never returned. I would recommend the Cuticura Remedies to anyone. Mrs. A. J. Cochran, 1823 Columbia Ave., Philadelphia, Pa., Oct. 20, 1909."

Piscating and Prevaricating. "What have you been doing in the country?"

"Oh, just lying around and fishing."
"You mean fishing and lying around."—Boston Transcript.

Constipation causes and seriously aggra-vates many diseases. It is thoroughly cured by Dr. Pierce's Pellets. Tiny sugarcoated granules. A great electric power generating station in Germany will make use of
