

A LETTER FROM ORANGE HILL, TEXAS, WHERE MANY PEOPLE FROM THIS SECTION NOW RESIDE

Cost of Living About as High As in Pennsylvania; Settlers Arriving Rapidly.

Orange Hill, Texas, June 8, 1910
Mr. J. W. Dean:—
I should have written sooner but we just got settled a few days ago. We are all well now but were all sick for about a week after we arrived, by the change of climate and change of drinking water, but I believe it will agree with us as we are all feeling good now. We had a very nice trip, we passed through a little of West Virginia, Ohio, Indiana, Illinois, Missouri, Kansas, and Oklahoma. We traveled about 2000 miles. We came through some very nice farming country although we have not seen much of Texas yet. We do not see much but a wide expanse of prairie and thousands of head of cattle and some cow-boys. We decided to settle at Orange Hill instead of Eagle Lake where we first intended, as the land seems good here. Eagle Lake and Sealy are the nearest towns. They are each 9 miles from here they have a town site laid out here but we are among the very first settlers; we are pioneering now. There is very little improved land near us. There is a railroad going right past the land we bought. We are living in one of the company's houses for a few weeks until we can build. There are a good many people coming to settle on their land this fall. There are over a thousand acres sold in small farms here now. We have a store and postoffice. Rakestraws who moved here from Falls Creek are about one-half mile from our place. We burn wood, hauling it from the woods along the San Bernardo River. We live near the San Bernardo river and it is right along the Cane Belt railroad. Mr. Barrett, of Reynoldsville, and Mr. Eaves and Mr. Eye, from DuBois, arrived here last Friday morning, June 17th. They all have land close to ours. We have about four acres out in corn and sweet potatoes and a few peanuts. Jerry is plowing for a fall crop of cabbage. The cost of living here is about the same as in DuBois and the expense of getting started in farming is not much cheaper, if any, than in Pennsylvania. It is very hot here, the thermometer has reached as high as 105, but we do not mind the heat much for there is nearly always a good breeze and the

nights are grand. We have a good well drilled 40 feet; that is as deep as we had to go for plenty of water. There is no coal here only what is shipped I do not know anyone who uses it here but in the towns some burn oil but we can see carloads of coal passing once in a while. There is plenty of timber land near here and along the San Bernardo and Brazos rivers. The people do not pretend to do much here during August and August as it is the dry season, they work the rest of the year and sort of take it easy now. Spring and fall is when they have the best crops, but they say this is a very good year in Texas. They begin in September and plant for the fall crop and in January for the spring crops. We built a house 24 by 28 with four rooms; will send you a picture of place soon.

We receive the "Star" every week. We read it till we have it all in pieces. Thanking you for the paper I remain, your friend, Mrs. J. G. Buchanan, Orange Hill, Texas.

How Good News Spreads.

"I am 70 years old and travel most of the time," writes B. F. Tolson, of Elizabethtown, Ky. "Everywhere I go I recommend Electric Bitters, because I owe my excellent health and vitality to them. They effect a cure every time." They never fail to tone the stomach, regulate the kidneys and bowels, stimulate the liver, invigorate the nerves and purify the blood. They work wonders for weak, run-down men and women, restoring strength, vigor and health that's a daily joy. Try them. Only 50c. Satisfaction is positively guaranteed by Stoke & Felcht Drug Co.

Left for Texas.

Mrs. B. A. Barrett and children, who have been staying at Loop, Indiana county, since Mr. Barrett left Reynoldsville for Orange Hill, Texas, a few months ago, started on their journey to Texas Monday last. Mr. Barrett and son, Stephen, are well pleased with the new country after their short sojourn.

School Shoes.

EXPOSITION ATTRACTS TREMENDOUS CROWDS

Victor Herbert and Orchestra at Pittsburg's Big Show

The twenty-second annual season of the Pittsburg Exposition opened Wednesday night under circumstances that were gratifying not only to the management but the thousands in attendance. Everything seemed to be in a state of preparedness for the event passed off without a single hitch. The buildings and booths have been redecorated and there is a freshness and newness about everything. The number of exhibits this season is much larger than that of last and the show on the whole reflects no little credit on the enterprise of progressive Pittsburg.

Victor Herbert and his orchestra is the opening musical attraction and at the two concerts given on the opening night Music Hall was filled to its capacity by delighted audiences. Mr. Herbert, the author of a score of comic opera hits, received an enthusiastic welcome and he presented a program that pleased everybody. He not only introduced excerpts from his best known works and selections from the old masters, but he presented here for the first time some of his latest compositions. It was a program of charming melody and encores were in order throughout the evening.

Among the new features this season is a postoffice exhibit furnished by the United States government at Washington. It gives much information pertaining to Uncle Sam's mailing system. With the exhibit is an old stage coach used for carrying mail in Montana many years ago, long before the present advanced system was thought of.

Two railroads are represented this year, the Great Northern, which makes its first appearance here, and the Norfolk and Western. The former shows what irrigation has done for crops in the northwest and the latter illustrates what scientific farming is doing for Virginia. The commercial growth of the country through which each line passes is an interesting feature and the fruit exhibit of each line is well worth seeing.

There are two educational exhibits that attracted a great deal of attention on the opening night. The public schools of Pittsburg have a very large and attractive display of painting, drawing, fancy and needle work, manual training and, in fact, everything connected with the local educational system. All the schools of the city have contributed and the exhibit is a thorough and comprehensive one. The Allegheny Playgrounds Association has an exhibit of what was done by the summer vacation schools on the Northside. The benefit derived by the children who took advantage of the playground schools is shown in their admirable work and reflects no little credit on the association.

Mechanical Hall has a great deal to offer this season and the exhibits are in the main new. Labor saving devices of every description are to be seen and the electrical display is finer than ever. The leading stores have beautifully artistic exhibits and the Italian pergola in the foyer is magnificent and looks as if the scene had been taken bodily from Italy and transplanted in the Exposition. There is something new and instructive to be seen at every hand.

The wireless telegraph which has attracted attention all over the world by its wonderful achievements is an exhibit in the main building which drew large crowds. Demonstrations of the wonders of the wireless were given in the most convincing manner.

"The Universe," a new scenic electrical spectacle, makes its initial bow in the Exposition this season. The scene is supposed to take place in 1950. An aviator makes a tour of the world in his airship. Dawns, sunsets, meteor flights, volcanic eruptions, tropical and polar landscapes and every conceivable aspect of land, sea and sky are revealed to the highest degree of realism.

The Monitor and Merrimac in their historical battle at Hampton Roads is again in the Hippodrome Building and it is greater, grander and more beautiful than ever. Real boats and real guns are used and the tremendous roar of battle is awe-inspiring. The sky and cloud effects are beautiful and the White Squadron majestically passing in review affords a fitting close to this great spectacle, the original cost of which was \$120,000.

There were amusements of all kinds from the toboggan slide to the merry-go-round and the scenes of life and gaiety that prevailed everywhere; and the interest that the exhibit created indicated that everybody was delighted and that the inauguration of the Exposition season was a glorious success.

The Advantage.

Tenant—Look here, that house I took from you is extremely damp. House Agent (bluntly)—Well, don't you see the great advantage of that? If it gets on fire it won't burn.

Right and Wrong.

Things should not be done by halves. If it is right, do it boldly; if it is wrong, leave it undone. Every day is a little life, and our whole life is but a day passed.

PROF. C. V. SMITH NOW WITH ELDERSRIDGE ACADEMY

Former Reynoldsville Principal Chosen to Head Noted Institution of Learning.

Prof. C. V. Smith, a former principal of the Reynoldsville public schools, has been elected principal of the Eldersridge Academy. The Academy has been completely re-organized, the buildings refurbished and renovated, and the whole put on a new plane of efficiency. It is hoped that the new management will be able to restore the famous institution to the plane it occupied for many years previous to the trouble of a few years ago.

Stubborn As Mules

are liver and bowels sometimes seem to balk without cause. Then there's trouble—Loss of Appetite—Indigestion. Nervousness, Despondency, Headache. But such troubles fly before Dr. King's New Life Pills, the world's best Stomach and Liver remedy. So easy. 25c at Stoke & Felcht Drug Co.

Every Accommodation Consistent with Careful Banking

THE MAN who has saved nothing has yet to make a beginning. Each day's delay makes the start more difficult. Tasks that are easy for us when we are young, become burdensome when we are old, and as we are younger to-day than we will ever be again, it will be easier to start to save to-day than to-morrow.

We invite your account, even it is only one dollar to start with.

Saves Time and Steps

Last year the Bell Telephone System handled Six Billion calls—or one hundred and ninety for every second.

If each message meant a saving of only ten minutes time—a most conservative estimate—it means that in 1909 the Bell System saved to the American people, time equivalent to 114,155 years.

In other words the Bell System rendered a service which would take an individual messenger 114,155 years to accomplish.

A saving of ten minutes per call does not begin to represent the saving of time and steps even in the message

across the street—much less the saving in the long distance message across the country.

Nor does the mere saving in time begin to represent the comfort, the convenience, the dispatch afforded by these six billion messages sent from the five million Bell stations all over the country.

The Bell System gets things done. It vitalizes affairs by instilling into them the spirit of NOW. Makes the business of tomorrow the transaction of the minute. Makes thoughts facts. Economizes a Nation's time. Conserves a Nation's energy.

The Bell Long Distance Service has broadened the scope of a Nation's interests. Has given the minute a value of many. Has given the people a hold on time. Has brought Opportunity within grasping distance. Has accelerated the growth of the NATION.
