THE SILVER SKIRT. MORE DURABLE, MORE ELASTIC, MORE GRACEFUL! And will keep its shape and retain its place better than any other Skirt. Its new and beautiful style of Skirt (Patented March 7, 1865,) was awarded by the Great American Institute Fair, held in New York, October, 1865.

SILVER MEDAL, being the Highest Premium ever given for a Hoop Skirt. The Steel Springs are wound with fine plated wire—in place of a cotton covering—which will not wear off or become soiled, and the whole skirt may be washed without injury or fear of rusting, and will be as good as new. The Combination Silver Skirt This invention combines with the ordinary Skirt the advantages of our Silver Skirt. The bottom hoops are the same as those used in the Silver Skirt, the covering of which cannot wear off, while the upper ones are covered with cotton. No lady having once worn one of our Skirts, will be willing to wear any other, as the lower hoops of all other kinds are soon injured and soiled. The best materials are used in their construction, and, from their durability and neatness, they are destined to become a Favorite Skirt. Manufactured solely by the Silver Skirt and Wire Manufacturing Company, 30 and 32, BARCLAY ST. NEW YORK. T. S. SPERRY, Sup't. Aug 9th-1y

Hubbard Patent Spring Wagon Seat, of which I will soon have a good supply on hand, or will make to order, any desired style or size. I would further notify the people of Elk County that any person or persons infringing on my right in the manufacture or sale of said seat will be prosecuted to the extreme limits of the law. [6-9-5m] LEONARD WITTMANN.

EMBROCATION! FOR ALL DISEASES INCIDENT TO Horses, Cattle and the Human Flesh, requiring the use of an external application. This new Compound, prepared by a practical Chemist having a full knowledge of all the medical virtues of each ingredient that enters into its composition; is warranted to exceed anything of the kind yet offered to the public as an external application for the diseases for which it is recommended. We are satisfied that it will work its own road into the confidence of all who use it, and those who try it once will never be without it, and therefore we rely on our experience as the best test of its usefulness. It is pronounced by Farriers, and all who have tried it to be the best application ever used. This Embrocation has been put up for over eight years, and it is only through the increasing demand and urgent request of my friends and the Public that I send it forth as the grand remedial agent for the various diseases to which that noble and useful animal, the HORSE, is subject. Many remedies have been offered to the Public under different forms, some of these are injurious, others at best of little use, and many wholly improper to answer the purposes for which they are recommended. A judicious and really useful composition free from those objections, has therefore long been desired by many gentlemen who have valuable horses, and are unwilling to trust them to the care of designing and pretending Farriers. Their wishes are at length fully gratified, by Dr. Beale being prevailed upon to allow this valuable Embrocation (which has proved so efficacious to the various diseases) to be prepared and brought out to the public. This Embrocation was extensively used by the Government during the war. Address all orders to DR. EDMOND BEALE, 602, South Second St., Phil'a. [For Sale by Bordwell & Messenger, Ridgway, Pa. ap301y]

NONPAREIL WASHING MACHINE.

It is a squeezing machine constructed on strictly mechanical principles, and the experience derived from five years extensive use in families, hotels and public institutions proves it to be of lasting value to the purchaser. The manner of operating the Nonpareil, by rotary motion acting on a crank shaft (with balance wheel,) which moves the plungers alternately, is the simplest, least laborious and most powerful that can be devised for the purpose, and accomplishes the work with the greatest rapidity and the least possible labor. The great speed with which this machine performs work will be understood from the statement that it is geared to give six strokes of the plungers for one turn of the handle, or when worked leisurely, about four hundred strokes a minute—Safety to the fabric washed is insured by the entire absence of rubbing. A girl or boy of fifteen can work the machine, and do a week's washing for a family of six or eight persons in two to three hours' time; and it may be relied on to cleanse the clothing thoroughly, without assistance from hand rubbing. Send for free Descriptive Circular and terms to dealers, to whom exclusive right of sale is secured. OAKLEY & KEATING, 184, Water St., N. Y. July 26, '66-1y
