### "An up-to-date fallacy."

To paint, or not to paint? That is the question. Whether 'tis better on one's cheek to suffer the marks inflicted by a wearing season, or to take steps against increasing paleness, and, with the rouge pot, end 'er to paint-to-rouge. That's all, and by a simple smear to mask Time's onset, and to change the pasty hue (our flesh is fair to 'tis a consumption) devoutly to be wished. To paint-to-rouge. To rouge! Perchance, to dash—aye, there's the rub. For of that simple smudge, the most expert make-up give us pause, and bid us hesitate. Ere we supply ourselves with new complexion. For who would wear the marks of dining out; Of crowded balls, of the visits to the opera; Of smart reunions and sleep curtailed; When she herself might bring youth's roses back With a soft hare's foot? Who would still be pale. But that dread of rouging badly done—Of paint put on with ineffectual touch. And clumsily withal—puzzles the will. And makes us rather wear the hue we have Than rouge a new one we scarce know how! Thus does self-consciousness and fear of ridicule. Make onwards of some of us, though not of all; And keep us in the midst of painted blushes, Still seeking o'er with a pale cast of cheek. —Ex.
