To add to the deception a few apple seeds are scattered through the so called fruit jams, or timothy or other seeds are added to the mixture to represent raspberry, strawberry, etc. The produc tion of artificial colors is particularly common in confections. Indigo, tumeric, annotto, logwood and cochineal are used in great quantities, and are probahly not harmful; arsenic, copper and leads are very deleterious, but are not now used as much as in former times, before sanitary officials made such persistent attacks on them. Milk and milk products are often colored. Annotto is very commonly used by dairymen to give a rich yellow color.
