The origin of these deposits is not known. Whence the waters, lying so far beneath the surface, derive their salline property there is no apparent means of determining, ner is the boundary of the surface known beneath which these deposits of brine may be found. The Michigan salt group has a wide extent in the state, though thus far the greatest successes have come from the Saginary valley. Where the lowest horizon w valley. Where the lowest horizon is found in the salt group the brine is found to be the strongest, greatest in amount and best in quality. It is for this reason that salt wells in the Saginaw valley have proved to be more vale than elsewhere. It is the region hich the greatest depression occurs. surface of the lake. At what depth we the surface of the lake this brine nd the writer is unable to state. Of one thing there is an apparent cer-tainty, that the supply of the brine is

on of the water, either by the application of the water, either by the application of solar or artificial heat, the latter is the method mainly resorted to in the Saginzav valley. Solar evaporation is effected by exposing the brine in shallow wooden vata. Such vats as are used are about 18 feet square and 6 nobes deep. They are supported on costs above the ground and are provided with a roof, which is readily moved on he vata or off from them to cover the brine from the rain or to expose it to the ann, as required. The process is be-gun in March and the contents removed in July, the product of the second fill-ing is taken out the list of September, and the third and final removal occurs the last of October. The annual product of a simple sait vat of this size is 50

A kettle block contains 50 or 60 ket-et, set close together and in rows in-osed in stonework or brickwork. A er connects with a distern kept with brine and runs along be-the rows of kettles, and from this brine is drawn out into the files by opening a lateral spout.
Then 70 per cont of the water has been alled away, the salt is dipped out into basket or sieve to allow the water to use of steam to afford heat for on. For this purpose the ex-

rinaw region is used.

Pane are also made use of. A so callpan block, consisting of a "settler" as, and packing room are inclosed in the com the settler into the pan, to the botd and causing the evaporation very rap-

The salt business in Michigan has swollen from the manufacture in 1860 of 4,000 barrels to 3,967,286 in 1895.

The estimated capacity of the 113 firms now engaged in the manufacture of salt in this state is 5,980,000 barrels

A well known learned judge, who was a keen politician before his promotion to the bench, went down while yet a plain Q. C. to help the Liberal candidate for a Scotch borough. He began a speech with a Scotch story; but, ing in giving the "awcount" with emphasis, the story fell flat, and the ence began to murmur. The prac-t orator changed his key and re-ed in his natural and stentorian

venue on a fine afternoon and all surts and conditions of people were to begin call the police. They would be promptly arrested and properly punished. What for? They have not killed you or maimed you or drawn any blood, and you are apparently none the worse for these assaults. What they have done is of your five senses -viz., that of touch, or the tactile sense, and through the perves of this sense they have much you conscious of painful sensations. Tale i exactly the treatment you do recta from those same people by their at pecessary assaults on another seculoviz., that of bearing. But should you ask the authorities to interfere in this case, you would likely be arrested yourself and your saving required inth-North American Bertage.

Naval Experience.

Unbarriely for navel selected days !!? for all other heterests-experience dur. Henry L. Clapp in Pepular Stience ing the 40 years of the life of agedera warships has been rose and inconclusive. The effect is that the economic of naval architects and neval officers is bift halting between experiment and experimee. And the very infrequency of actual fighting at sea during a period in which "it is play rather than toll that is most the navies of the world have been compermane to our true nature and that plebdy transformed is liable to lead to a one sided or vastly exaggerated esticare needing to be exercised as to the quality of our immsements must never posal. There is a tendency to exalt the weapon which has proved its efficiency ampsements in themselves considered. | most later into the one prederable With most of us the play impulse stands | factor begins which all others may be

The school of experiment needs correction, but the solvel of experience often is true in form, but false in spirit. The lacks balance. It is upt to forget that always fragmentary and often irrele-"One reason why so many people are vant. Thus, after the American civil saking whether life is worth living is war, with its Merrimac and its Moniness war is likely to sow as confident a conviction that the navy which has quick firing artillery and high speed has every necessary element of force to secure an impregnable supremacy. -Blackwood's Magazine.

The Russian Translator of Dickens. Irinarch Ivanerich Vredensky was the son of a poor but intelligent village two. The other day the merchant con- daughters and this only son, to whom cinded to try a new course with him. he still found time to impart the rudiments of education. Irinarch was a sickly and lonesome boy, out off from ne a small bill and has owed it for a all playfellows by his ascetic though well meaning father, and he grew up to manheed in bitter poverty, having sometimes literally nowhere to lay his head. Yet, in spite of all obstacles, he became a distinguished scholar, a versatile linguist and a beloved pedagogue in the military schools at St. Petersburg. He was growing in fame and favor with the authorities and had been called upon to undertake educational work of the highest importance, when his blindness and premature death out short his brave career. His translations of Dickens, Thackeray, Penimore Cooper, etc., are classical and laid the foundation of the wonderful popularity which their works still enjoy in Russia. -Notes and

Queries. Had Never Beard of Rim Before. "A new slang phrase is picked up and worn out in a day in the great citbefore they are ever heard in rural dising camp in southern Oregon a few days some of the natives. In the course of " Well, I'll have to call you, I said.

'My name is mud.' "He raised up from his chair, seized my hand in his big paw and shaking it enthusinstically said in all seriousness: "Giad to know you, Mr. Mud. My name is Jenkins." —San Francisco

Cartyle to Thackeray. Thackeray had asked Carlyle to send in something for The Cornhill Maganine, and this is Carlyle's reply:

believe a tiger or some other wild beast has clawed the man to death.

In 1861 Mendous suffered from an earthquake, which shattered many houses, and fire broke out among the ruins, cocasioning the most terrible configgration the city had ever known.

Over 10,000 lives were lost on this occasion.

Wheat, in 100 parts, contains 14.4 of water; mineral elements, 2; albuminoids, 13; carbohydrates, 67.6; crude fiber, 3; fats, 1.5. -Combill Magazine.

CHILDREN'S QUESTIONS.

They Suggest the Construct Activity of the Many of his questions cannot be do pected with his reading, but appear to remain from to accoming or a recognized analogy. "Loss do plants make themselves bigger when they grow?" he ask-

ed when we were talking about plant-

ing his garden. I heard him saring to himself, "Wildless, wildless," I asked him what he was talking about, and he replied: "About plants that are not wild. What are they called?" "Garden or entirested plants," I answered. "What made you say wildless?"
"Why," said he, "I knew that harmless means something that wouldn't do the church people to the organ grinder any harm, and so wildless means plants and the street peddler. Any me who that are not wild." He mentioned the fall, and I asked him what he meant by fall. He replied: "The winter at first; the first of it. Do they call it full be-

cause everything is falling?" There was some talk about dressing him or putting on his dress, seid, reasoning from analogy, he asked, "When to assault you with switches, you would God puts the skin on people, is that skinning them?" I once read of the people in the moon being like grasshoppers and told him about it. When I had finished the story, he said: "When we look up in the sky, we see the moon rolling on above us, and when the peoto irritate the nerve terminations of one | pie in the moon look up in the sky they see the earth rolling along above them. What is the strange puzzle about that?" I told him that his specimen of mica was silicate of potasti, and he asked: "Why is mich stilicate of posish-because they put ashes in a pet?"

These questions have been recorded lers. recorded and to show the wide surge of this as my acquaintance sat down, "but to represent an innumerable names r unthought and the variety of reasonings she'll come back again. She's a regular that a child neder 6 years of age may have. They show his natural nethed of acquiring knowledge, but they can coly suggest the ceaseless solivity of his maind during all his waking better --Monthly.

The organ of the schoolmasters, Too Allgemeine Deutsche Lehrermitung, relates an episode of Kniser Wilhelm's visit to Wieshaden. When he was ridmoon for perhaps millions of years) it ing along the Taumus strasse at the nesse is a physical impossibility that the face of his sait on Monday, a small boy renafter him and cried out as he frame. ally waved his cap, "Herr Kaiser, Herr Kaiser, get us a holiday tomerrow?" The emperor langued, and, with a friendly wink to the lad, called out, "We shall manage it." Accordingly on the next day all the lads and lasses of the town were informed that the day was "schulfrei," and wherever the the moon should undergo change or dis- kaiser appeared he was naturally greated as a liberator, with the full power of youthful lungs.

Hops are alwars more restless then nsual on the approach of had weather, and when these animals run to and frowith mouthfuls of straw, leaves or branches the indication is for very foul weather. In their native state pigs probably made their own bods, and when bad weather was coming perhaps gathered a larger supply of straw or leaves than usual to serve us a prote against the rain.

He—Did you ever observe what a difference clothes make on one's mind? Now, when I am to my riding togs, I'm all horse; when I have on my businew suit my mind's full of bus

The Toronto Mail asks, "Did the pro-historic man out pie?" If he did, he did not est it all. You can find prehis pie al almost any railroad restaura
