One of the Revest Books.

Among the books of a comparatively recent date, if the seventeenth century can be described as such, is, as the Elzevir collector well knows, the famous "Parissier Francois," a suc Candecime printed by Lonys and Daniel Elsevir at Amsterdam in 1655. A faulty and poor breeze has died quite away, and there reimpression of a work of little value this book has become the most sought like the roar of a distant train steals after of all he Elzevir works, just he upon the air. It comes again, and there cause it is wrongly thought to be the is no mistaking it-it is timuder. A fourried hen runs scress the line and disappears behind a loard just as three course that, instead of being placed on its first appearance on the shelves of the curious or the studious, the little volnme was thumbed to pieces by the greasy hands of cooks and kitchen maids Genuine enthusiasts in the printer's art have hoped to see the price diminished in presence of the revelations lately farnished concerning it. Its market value, however, shows no signs of diminution, and that one copy, sold in

483% cents; five-eighths of 50 is \$60; add three times 621% cents, which is \$1.873%; total, \$61.873%. Say you kuy 167 yards res goods at 23 % cents; 88 % cents rd of 100; one-third of 167 is 55.66%. Say you sell \$10 pounds of ool at 161; cents; 161; is one-sixth of 100 : one-sixth of \$50 is \$18.3816. Say buy 100 bushels of potatoes at 50 99 bushels at 49 cents you couldn't do it silent. No one was there. The dust lyso easily, and yet it is no harder, if you ing about showed no signs of footprints. b cashiy, and yet it is no harder, if you may knew it. Bay 99 times 50 is \$49.10, on once 99, which is \$48.51, and it is o more difficult than 100 times 50. only knew it. Say 99 times 50 is \$49.50,

tion up to 12, but how many older p to 12, but how many older and, rushing down stairs, was found an go higher than 13 easily? fainting at the drawing room door. At Yet it is easy to go to 500 if he is a muck adder. I think my rale for squar-Speers' way of doing it. For example, start at 12. Twelve times 12 is 144. To get the square of 13, add 13 and 13 to set the square of 13, add 13 and 12 to square of 12; 13 and 12 make 25; 25 to 144 is 169. Square of 14-14 and 13 squals 37; add to 169, makes 196. To square 15 mil and 14 couple 90 miles 10 two old latter states have belonged are 15-15 and 14 equals 29, added at 196 is 225. The square of 50 is 2,50%. To get square of 51-51 and 50 are 101, added to 2,500 equals 2,601. To square 49-49 and 50 are 99; subtract from 5,500 is 5,401. The square of 100 is 10,000. To got square of 99-99 and 100 are 199; subtract from 10,000, equals -Realm
