

DEVOID OF ANIMAL LIFE.

A Concoction Struggles Between Fire and Water. Anabastosis. The Antarctic is a continental land unique in the world.

ON OCEAN'S BED.

What becomes of ships which sink in the bottom of the sea. The ocean is a vast expanse of water.

Of course, if it is laden with pig iron or corresponding substances, or if it is an iron ship, it sinks rapidly and sometimes strikes the bottom with such force as to smash in pieces.

They return over and through the great past and make it their home. Besides this they cover every inch of the boat with a thick layer of lime.

The appearance of plague at Bombay and Calcutta has produced no good effect at all events. Before its advent those prosperous cities had come to believe that they had nothing to learn in regard to sanitation.

For sheer originality in matters of food I commend the following directions, which one of the Parisian papers gave to its subscribers.

A New Danger to Firemen. At a recent fire in the basement of a Chicago electric power house the firemen had great trouble in getting at the blaze.

The Wedding Ring. The associations called up by a wedding ring are very touching, and it is the last thing that even the poorest wife will part with.

The Scientific Mind. An old lady writes that she describes the ring: It is circular, because the natural love and hearty affection of matrimony should be forever.

The common cocklebur of the country is simply the seed case of a plant. Its theory books give it a hole upon the clothes of men, and thus cause it to be transported to considerable distances.

TOO MUCH IN A NAME.

"There it is again," groaned Clumpley. "This time he's arrested for blowing a safe. That fellow's making life a long and diabolical nightmare for me."

"But no one will suspect you." "They won't? I have a barrel of letters referring to the matter. Ministers labor with me, lawyers offer to defend me, women roam me to a turn and crooks want to enter into partnership with me."

"I tell you it's right. The thing's making me desperate. I've always led a respectable life, and to have this bugbear bobbing up continually is enough to drive a man crazy."

"I believe it's providential, Clumpley. I wouldn't accept that name of yours if a crown went with it. It's just as suggestive as Greenhorn would be. Every one who hears it thinks of a chump. Have it changed and thank your lucky stars that some cue else stole it."

Changing Silver Into Gold. Professor Emmons, one of the most skilled metallurgists in the country, claims that in the reduction of silver the molecules are so subdivided as to differ so materially from that metal that they can no longer be regarded as the same substance.

The jungles of Central America and Brazil are masses of vegetation so dense that it is practically impossible to penetrate them. Swain and his party, when crossing the isthmus of Darien, labored hard with their hatchets and machetes.

Exploiting the Upper Niger. After an absence of three years the expedition under Lieutenant Hours has safely returned in Europe from the Niger. The party carried the sections of an aluminum boat overland to the upper part of the Niger.

A Last Hint for Firemen. For sheer originality in matters of food I commend the following directions, which one of the Parisian papers gave to its subscribers.

A New Danger to Firemen. At a recent fire in the basement of a Chicago electric power house the firemen had great trouble in getting at the blaze.

The Wedding Ring. The associations called up by a wedding ring are very touching, and it is the last thing that even the poorest wife will part with.

The Scientific Mind. An old lady writes that she describes the ring: It is circular, because the natural love and hearty affection of matrimony should be forever.

The common cocklebur of the country is simply the seed case of a plant. Its theory books give it a hole upon the clothes of men, and thus cause it to be transported to considerable distances.

Twenty ordinary bricks equal a cubic foot of work when laid in position.

WHEN BABY LAUGHS.

"There's nothing but sweet in life," For eyes of her to laugh. When baby tries to laugh.

WHEN BABY LAUGHS OR CRIES. And nothing half so sweet or dear As when she laughs or cries. Or a precursor close from baby lips. Whether baby laughs or cries.

A TIGERISH TURKISH MOB. Murderous Hordesmen Meet in the Streets of Constantinople. Such men as the Hordesmen one does not often see in the streets of Constantinople.

These men were not armed, in the common sense of the word. Some of them had revolvers, but they seldom used them.

Mr. De Ruffo—If you ever did any good in this world, I'd like to know what it is.

Mr. De Ruffo—Well, for one thing, I saved you from dying an old maid—London Quiver.

Exploiting the Upper Niger. After an absence of three years the expedition under Lieutenant Hours has safely returned in Europe from the Niger.
