Somebody has started the idea that pins are capable of being the promoters of disease, as carriers of infectious germs, and sounds a warning against putting them in the mouth. Whatever be the capabilities of pins in this regard, it is certainly a bad and dangerous practice to put pins or other small metallic substances in the mouth. The month was never intended to be a pin cushion.

The fighting power of the newly formed republic, the United States of Central America, is not great. Salvador has an army of 4000 men, with a militia of 18,000. Its navy consists of a custom-house cruiser. Honduras has an army of i navy whatever. Nicaragua has an 500 men, with 20,000 militis, and no army of 2000 men, with 5000 in its reserve guards.

The Chattanooga News says: The sport, as it often does in the East. Oddly enough, several years after following bears away the palm for newspaper helps to build up and educate the people. It formulates and crystalizes public sentiment, upholds follows the right, suppresses the wrong, encourages enterprise, advocates economy, pleads for justice and stands for the public weal. It is certainly the tise our resources, build up trade, show us no end of tigers. quicken thrift, multiply prosperity and encourage the establishment of business man can afford to ignore the newspaper. It marches hand in hand with prosperity, side by side with enterprise and is to-day the greatest advocate the world has ever seen for the betterment, enlightment and upbuilding of the human race.

The railway system of the United States employs 36,000 locomotives, 26,000 passenger cars and 8000 mail and baggage cars. These figures seem large till the number of freight cars is stated, which is 1,250,000. A passenger train consisting of locomotive, tender, baggage and six passenger chaffed about it." cars, with their contents, is estimated to weigh about 184 tons. Freight trains sometimes reach a weight of 550 tons. An ordinary passenger car costs from \$4000 to \$5000, and a sleeping car anywhere from \$10,000 to \$20,000. The system, with its gigantic equipment, is practically the growth of a single generation. With the additions of another quarter or half a century posterity ought to stand and gaze at its stupendous proportions. But it will probably be gradually educated out of all its capacities for wonder, as we have been out of many of our own. A crusade against consumption has been inaugurated by physicians throughout the world, the object of which is to diminish the ravages of suberculosis by preaching and practising the doctrine of pure air. The "plan of campaign" varies somewhat in different places, but in general it concerns itself with the treatment of the disease in sanatoria chiefly by means of an abundance of fresh air. The leaders do not lose sight of the fact that prevention is to be prized above cure, and their crusade contemplates a propaganda in the press and by public lectures against dirt and foul air in the homes. As one writer says, "Any one when in a low state of health may become consumptive, but what keeps the malady alive among us is poverty and distress, dirt and overcrowding, darkness and lack of air. The cure of consumption may be attained by fresh air in the open, but its prevention is pure air in the house." An English naval officer expresses his admiration of one minor feature of Admiral Sampson's operations. This was the daily issue on the flagship of bulletins for the information of the squadron. The system was originated by Captain Chadwick, it seems. On a small hand press the bulletins were printed, and distribution made as far as possible through. vessels, the whereabouts of the enemy, the general plan of operations, etc., appeal to the intelligence of the men as well as to rely upon their unquestioning obedience to others. This is only a recognition of the fact that such clemency?" the men at the guns and in the enginerooms think and reason as truly as the men on the bridge, and can be counted upon for greater alacrity and more effective co-operation if the officers do not make a mystery and a monopoly given them to execute; but there can be no doubt that they will appreciate svery tributs to their intelligence and will fight the better for knowing what
