AGRICULTURAL

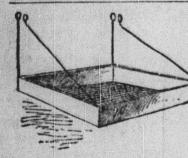

Farming From Experience.

Every farmer learns much each year about his business by the experience he gains. It is the most ens and winter eggs than in any other valuable knowledge, provided the farmer has learned to discriminate as stick to the beaten tracks are the ones to the true cause of success or failure. who never make a great deal out of It will at least teach twice the capacity their enterprise. But every one will of his own soil and location. While not succeed in raising spring chickfarmers read with interest what other ens, and it is well that this is so, for farmers have done in other localities, it does not affect them as does de cided success or failure in their own neighborhood. What one man in work profitable. any locality has done others may also do if they have like soil and conditions. Almost all the special crops that are grown in certain neighborhoods are the result of experiments warm, well ventilated and even in i made at first with much doubt, but when proved a success, inciting others to imitate the example. In such case

so that it will receive the sun through the pioneer who introduces such crops the glass most of the day. The sitbenefits the entire neighborhood quite as much as himself. He is not injured by the competition of his an inclination to neglect the eggs neighbors, for whatever the farmer grows there is sure to be so large a be fed separately when off the nest so market for it that the production of a they will not be bothered and worried large amount calls purchasers from a distance, so that the farmer can sell by the others.

price of success.

at his own doors instead of marketing his special crop at a distance. An individual success, no matter on how extended a scale, cannot create such
