will tell you some time." "Oh, please do!" she pleaded. He was obdurate, and she was persistent, and soon the other girls were attracted to where the couple stood. "I think it is real mean of you, Mc Blank, to arouse my curlosity. And what do you think, girls?" she said, turning to the crowd. "He heard something nice about me and won't tall wise

"Yes, I did hear that she was the most charming debutant of the sea son," spoke up Mr. Blank. "Who told you, please?" spoke up the

her admirer. "Your mother," answered the young man. And now, they never speak as they pass. Memphis Scimitar.

girl in a last effort to get the name of

The Most Ancient Machine Tool. There can be very little doubt that the potter's wheel, or potter's lathe, as Terms \$1.00 per day. it is also termed, represents today the most ancient form of machine tool known. Among the many sculptured 12-tf records of the trades and occupations which so vividly represent the ensteans and babits of the ancient Expetions The Delineator the potter and his wheel have been found frequently depicted, and it is cerious to note that through the almost countless generations since that time this crude type of lathe has undergone no material modification.

The primitive form was evidently a small, round table set on a pivot and free to revolve, being turned by hand at intervals, and to this device there ing arrangement, displaced in recent markably low rate of years in possibly a few isolated cases pottery utresting unsurpassable taste and utility. and still Cassier's Magazine.

Cost of a Lonf of Brend. The average "pound loaf" of fresh bread sold by bakers, says a college professor, weighed on an average about one pound one ounce. A pound leaf of bread can be made from about three quarters of a pound of flour, about 25 per cent of water being added to the flour during the process of breadma's ing. With some flours 5 to 10 per comore water can be absorbed, make a greater weight of bread from a given weight of flour. This additional weight

is water and not nutrients. At 2 cents a pound for flour it is At 2 cents a pound for flour it is greatest effects this wask could timated by the professor that a pound management for beathan \$2.36. loaf of bread can be made, not count. The fixed created a divided equally between ing fuel and labor, for about 2 cents, a fixed for the hulbling of a constituent to the half cent being allowed for shortening memory of the beloved post of childhood. and yeast. The loss of dry matter in Address breadmaking is usually considered as amounting to about 2 per cent of the flour used. In exceptional cases, as in Cures Drug prolonged fermentation, under favora ble conditions the losses may amount to 8 per cent or more.
