when they hit us."

the office as follows:

The Inquisitive Tongue

The curlosity of the tongue does not cause the human being so much trouhie as the curiosity of the eye. But the tongue, within its limits, is the most In the subirus of all

Let the dentist make a change in the mouth, let him remove a tooth or he place with his admirable artifice one that has long been absent, he bin. change the form of a tooth by round ing off a corner or building up a cuv." and see what the tongue will do. will search out that place, taking ca. ful and minute account of the change Then it will linger near the place. I it is called to other duties, it cource back as soon as they are discharged and feels the changed place all over again, as if it had not explored and rummaged there already. It makes no difference that these re-

peated investigations presently cause scientific paper, ducks fed on acoroannoyance to its supposed master, the man. The tongue in nothing more than in this matter proves that it is an unruly member and will not be controlled.

It seems to have an original will and consciousness of its own, and nothing states that if fowls are fed on bolked will serve it except the fullest satisfact lobster shells they will lay bright retion of its curlosity. It will wear itself out, perhaps, but it will find out all about the strange change. - Boston Transcript.

The Moon's Atmosphere.

The recent conclusions of the French scientists, MM. Loewy and Pulseux, sy Highness" should the prince speak to to the possible presence of some gate them, and when the heir apparent active presence of some gate them, and when the heir apparent active presence of some gate them, and when the heir apparent active presence of some gate them. ACCIDENT INSURANCE, cous envelope on the moon's surface costed a bright eyed ind, and, pointing are of very general interest. After to a prismatic compass, asked, "What giving reasons for concluding that the is this?" the youngster, all in a flutter, formidable volcanic eruptions of which replied. "It's a royal compass, your the moon has been the theater belong prismatic highness," to a recent time in the history of our satellite, they point out that these eruptions must have set at liberty great quantities of gas or vapors, while the diffusion of rinders on the lunar suface to great distances infers a gaseous envelope of a certain density. Has the time, they ask, which has empsed since the great erupthous suifierd to bring about the total disappearance of this gaseous enveloper Considering that the already solidified lunar surface could only have absorted the gases slowly and with difficulty. they conclude that from their examaution of the lunar surface there are erious grounds for believing that one of the kind in the country. there exists at the present time a residue of atmosphere of which the detection, surrounded as it is with great

difficulties, may yet be realized. When Jay Gould Wreatled.

John Burroughs, the writer, was in his boybood days a schoolmate of day Gould. To Theodore Dreiser, who tells the story in The New Voice, Mr. Burroughs gave this anecdote of Gould He was shrewd, but not a bad fellow at all. I remember that once we had a wrestling match. As we seen about even in strength, we agreed to abide by certain rules, taking what we called "holts" in the beginning and not breaking them until out or the
