 The death rate of the world is 67 and the birth rate 70 a minute, and this seeming light percentage of gain is sufficient to give a net increase in population each year of 1,200,000.

**Put Dynamite in Oven.**  
 About 7:30 o'clock Sunday morning July 1, the town of Glasgow, this county, was suddenly startled by an explosion at the home of Michael Rollo, near there. Mr. Rollo purchased some dynamite on Saturday to blast some stumps near his house, and after taking it home instructed his son, a youth of about 10 years, to put it in a safe place. The boy put the stuff in the oven of the kitchen stove by instructions from his grandmother. Sunday morning Mr. Rollo unaware of where the dynamite had been stored, made a fire in the stove. A short time afterwards, while the family were eating breakfast in another kitchen, some distance from the house, the explosion occurred, completely destroying the building. No one was injured except by the shock, which was felt for some distance around.
