TRADE OUTLOOK.

Excess of Demand Over Supply and Prices at Exceptionally High Level.

R. G. Dun & Co.'s weekly review of

trade as a: When consumptive demand equals or exceeds supply, and prices are firmly held at an exceptionally high level, it is generally considered that there is little to be desired in the business situation. These factors are now in evidence to an unusual extent, yet many industrials are halting. The principal disturbing element is the lack of cars to handle the phenomenal shipments that are urgently needed. In the same connection there have appeared num ona controversies with switchmer freight handlers, river pllots, miners and other allied workmen, which combine to make the problem of transportation most intricate. Although the movement of grain to interior cit-les is at the rate of 3,000,000 bushels daily the westward traffic of merchandise is so unprecedented as to neces-sitate the return of empty cars. Any loss of general trade due to the holiday was more than made up by the phe-nomenal preparations of the preced ing days and the dealings in specu lations. A general advance in pig iron indicates that record breaking activity at furnaces fails to produce accumulation of supplies. Steel mills are seeking material urgently and Besseiner pig for prompt delivery at Pittsburg is not available below \$16.50. Large sales of forge and foundry from are reported at further advances and Southern from in the Chicago market is also higher. Buying of railway supplies is the most urgent future; rails, cars, engines, structural material for bridges and shop equipments all being wanted much earlier than they can be delly ered. In general lines the movement is scarcely less active, and at present the business in 1902 appears implied by facilities, but it is probable that producing capacity will be greatly enlarged. The feature among the minor metals was the sharp advance in tin to much the highest point of he year because of delayed arrivals. In marked contrast to the rise in tin was a sharp decline in silver to the lowest price since early in 1898. Leather sells freely at full figures and dry hides are another fraction higher, but slaughter hides at Chicago are easy. Conditions are even more favorable at woolen mills, one

and jobbers.
