Eight New Vegetables,

Eight vegetables new to this sountry are being cultivated in the government experiment stations with reference to introducing them to the truck gardeners. They are described as follows: A European okra of giant proportions; is a valuable starch prolucer. From Mexico is a pepper largely used in that country and a of any breed, no matter "husk tomato," which makes delicious sweet pickles. A decorative and medicinal vine is a cucumber, also Mexican, which distributes its seeds broadly when ripe by violently exploding. Chevril, a sedgelike plant from Europe, produces a tuber of hazelnut size which, eaten raw, tastes A cow like a cocoanut. The Indian "basella," and fruit like a blackberry bush.

Valuable If Practicable.

device has been patented by Robert B. Peters, of Knox, O., which is designed to prevent rallway collisions and other accidents. It consists of a system of electric signals by which a moving train sets a danger signal two miles behind the train. If a bridge is burned or there is a washout, a broken rall, a turned switch or anything placed on the rails, or even the running of a handcar on the track, will set the signals. In addition there is a register in the train dispatcher's office by which the position of every train on each mile of its track is registered. By this indicator the dispatcher can know within a mile of anywhere a train may be its character.

The Strait of Magellan.

Mark around it one-half after first placing the door in the an inch from the rim and cut out as proper position, adding new hinges if

Millet and Bungarian Grass. Millet is entirely a summer crop, and the seed should not go in the ground until warm weather has been assured. It is especially adapted to light sandy soils, upon which large crops can be grown, but thrives well also on soils that are heavier. The richer the soil the better, but it is very important to first get the seed bed in a fine, pulverized condition. Plow deep and harrow several times before seeding, using a location is in a good, rich and suitable portion of the field, the seed should be sown thickly, for the r the stalks Server and more palatable the hay, but where it is sown for the purpose of obtaining seed for the succeeding season it should be done in drills, using less seed, though it may be broadcasted if necessary. The appearlevel, put the cage over it after filling ance of millet while growing is similar to that of thickly sown dwarf corn, the leaves being broad, covering the ground completely. It grows very rapidly, especially during warm weather. if there has been a plentiful supply of moisture, and it also stands the drouth admirably. The tall German giant mil-Hungarian grass is very similar to milof plants, but while the millet can be cropped only once Hungarian grass furnishes successive cuttings lantil fall, which is an advantage when the soiling system is practiced with stock; but it does not grow as tall as millet, nor give such heavy yields at the times of cutting. As a hay crop for winter use millet should be preferred. Millet and Hungarian grass are highly relished by all kinds of stock, especially if cut and cured before seeding. The heads may shoot the seed, but the cutting must not be delayed long enough to allow the seeds to fill out. Cured the same as ordinary hay and stored in the barn, the leaves do not crumble to pieces easily, like clover, and when run through a cutter and seasoned with meal, bran and a little salt, the mass makes almost a complete food. These crops are indispensable in places that are not adapted to clover and other grasses, as they are not only certain but grow and mature in a very short time. As renovating crops they are xcellent, for a large crop of millet or Hungarian grass turned under furdshes a mass of green manure, that ever falls to restore the still to Its riginal fertility where it has not been cropped for grain too largely. Whenever the crep is intended for green manure it should be seeded down thickly and cut before the sieds mature, first giving the standing crop a good dusting of lime on a damp day, Wante area, was Thompson's Eye Water following with a plow and chain. As both crops grow on very sandy soil to a certain extent they afford a means of enriching the sell until it is fitted

### DOCTOR ADVOCATED OPERATION ---PE-RU-NA MADE KNIFE UNNECESSARY.

C ATARRH is a very frequent cause of that class of diseases popularly known as female weakness.

known as female weakness.

Catarrh of the polivic organs produces such a variety of disagreeable and irritating symptoms that many people—in fact, the majority of people—have no iden that they are caused by catarrh.

If all the women who are suffering with any form of female weakness would write to Dr. Hartman, Columbus, Ohio, and give him a complete description of their symptoms and the peculiarities of their troubles he will immediately reply with complete directions for treatment, free of charge.

Mrs. Eva Bartho, 133 East 12th street, N. Y. City, N. Y.

'I suffered for three years with leverrhea and wheerution of the womb. The doctor advocated an operation which I dreaded very much, and strongly objected to go under it. Now I am a changed woman. Peruna cured me; it took nine bottles, but I felt so much improved I kept taking it, as I dreaded an operation so much. I am to-day in perfect health and have not felt so well for fifteen years."-Mrs. Eva Bartho. Miss Mand Steinbach, 1309 12th St., Mil-

wankee, Wis., writes:

"Last winter I felt sick most of the time, was irregular and suffered from nervous exhaustion and severe bearing down pains. I had so frequently heard of Peruna and what wonderful cures it performed, so I sent for a bottle, and in four formed, so I sent for a bottle, and in four weeks my health and strength were entirely restored to me "—Mass Mand Steinhach. Everywhere the women are using Feruna and praising it. Peruna is not a pullintive simply, it cures by removing the cause of female disease.

Dr. Hartman has probably cured more women of female aliments than any other living physician. He makes these cures simply by using and recommending Feruna.

If you do not derive prompt and natisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratia Address Dr. Hartman, Procident of The Hartman Santtarium Columbus, Ohio.
