Japan's Pensions.

According to a statement made by Baron Takahashi, before sailing from New York last week, the Japanese Government proposes to recognize the service of its soldiers and sailors in a most marked manner. Japan al-ready has a pension system which pro-vides for the disabled and for the widows and orphans, but it is proposed to go much farther. The proposition is to distribute a bonus in addition to the regular pensions of \$75,000,000 in bonds to the soldiers and sailors who took part in the war with Russia. Both officers and men are to share in the distribution, partly in accordance with rank and partly in accordance with the degree of meritorious service. In this way the men who fought the war through to a successful termination will become to some extent bondholders, and will have an additional interest in the general prosperity of the country. That the Government feels able to take this step is another indication of the confidence that is felt in the future of Japan.

Cost Exceeds Receipts.

A rural post wagon carries, on the average, 54 letters and postar cards, average, 54 letters and posta cards, 107 newspapers and circulars and three parcels. This amount of mail weighs less than 20 pounds and would about fill a bushel basket. Only 20 letters and postal cards and two pieces of other mail are collected, weighing about two pounds. The average route costs the Post Office nearly \$50 a month, and pays only a little more than \$10 for business originating on it. Between the cost of all inating on it. Between the cost of all the routes and the income from business originating on them is a discrepancy of \$9,500,000 a year.—World's Work.

Trade Relations With Spain.

Last year the United States sold to Spain goods worth \$17,000,000 and purchased \$8,500,000 worth, the largest total of trade we have ever had with that country. It is gratifying to find the business relations of the two nations moving peacefully and profitably.—St. Louis Globe-Demo-

Every one of these patients had plenty of warning in that bearing down feeling, pain at the left or right of the abdomen, nervous exhaustion, pain in the small of the back, pelvic catarrh, dizziness, flatulency, displacements or irregularities. All of these symptoms are indications of an unhealthy condition of the female organs, and if not heeded the trouble may make headway until the penalty has to be paid by a dangerous operation, and a lifetime of impaired usefulness at best, while in many cases the results are fatal.

Miss Luella Adams, of Seattle, Wash.,

Dear Mrs. Pinkham :-

Dear Mrs. Pinkham:—

"About two years ago I was a great sufferer from a severe female trouble, pains and headaches. The doctor prescribed for me and finally told me that I had a tumor and must undergo an operation if I wanted to get well. I felt that this was my death warrant, but I spent hundreds of dollars for medical help, but the tumor kept growing. Fortunately I corresponded with an aunt inthe New England States, and she advised me to take Lydia E. Pinkham's Vegetable Compound, as it was said to cure tumors. I did so and immediately began to improve in health, and I was entirely curred, the tumor disappearing entirely, without an operation. I wish every suffering woman would try this great preparation."

A FUNNY LITTLE CRAB.

How the "Fiddler" Folds Up for His

Long Winter Sleep. One of the most interesting mem-bers of the crab family is the queer and grotesque little "fiddler," which lives in burrows in the banks of creeks and estuaries back of the beach. Into these burrows the crab retires in autumn and composes itself for a long autumn and composes itself for a long winter sleep. The eye stalks are then folded down into sockets beneath the shell, and the large claw rests closed and inert against the body, while the legs are folded up until the entire animal is snugly closed upon itself, and it remains in this dormant condition until the spring. Fearly in April the until the spring. Early in April the "fiddlers" nwaken and immediately attend to clearing out their burrows. The large claw is useless for eating, only the small one being available for only the small one being available for this purpose. It is amusing to see the delicacy with which this-little claw feels about and picks up the particles of vegetable matter and places them in the mouth, while the eyes are all the time raised aloft on their stalks and apparently looking off into the distance. The female crabs have both claws small and of equal size, so they are both used in feeding, and she can satisfy her hunger just twice as easily and quickly as the male. These "fiddler" crabs also gather food and store dler" crabs also gather food and store it in the burrows for future use.

Antelopes Choose The Open.

The antelope lives always in open country, unlike members of the deer family, which invariably prefer a thick dense forest. They cannot be driven into timber cover or thickets of brush but will literally turn about brush, but will literally turn about and run over a pursuer, if necessary rather than be forced into cover. If they are ever obliged to pass by or through such places for food and water, they take a great deal of time to do so, as if they were determined to see everything that could be seen en route.—March Century.
