and how to cure them. Mrs. W. G. Davis, of Groesbe Texas, says: "Back aches hurt me so I could hardly stand. Spells of dizziness and sick headache were frequent and the action of the kid-

the action of the news was irregular. Soon after I began taking Doan's Kidney Pills I passed several gravel stones. I got well and the trouble has not returned. My back is good and trong and my general health better." Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Dict Kitchens.

There has been established in Washington a diet kitchen under the direction of a woman. The patrons of this unique shop are mostly phy-sicians, who send their patients for such dishes or foods as will best suit their needs, very much as they send prescriptions to be filled by the apothecary. It is a practical illustration of the belief that proper food is just as necessary as medicine.

The patient who has not the hospital diet cook to supervise his meals may thus be treated and avoid the ill judged kindness of family and

LIMB RAW AS PIECE OF BEEF.

uffered For Three Years With Itching Humor-Cruiser Newark, U. S. N., Man Cured by Cuticura.

"I suffered with humor for about three years off and on. I finally saw a doctor and he gave me remedies that did me no good, so Itried Cuticura when my limb below the knee to the ankle was as raw as a piece of lish. beef. All I used was the Cuticura Soap and the Ointment. I bathed with Cuticura Soap man. every day, and used about six or seven boxes of Cuticura Ointment, I was thoroughly French. cured of the humor in three weeks, and haven't been affected with it since. I use no other Soap than Cuticura now. H. J. Myers, U. S. N., U. S. S. Newark. New York, July 8, 1905."

Poison in Bees' Eggs.

M. C. Phisalix is well known for his researches on snake and other poisons. In the case of the toad and viper he has shown that the specific poison accumulates in the ova, and suggests that it plays an important n development and inhe His latest studies relate the poison of the bee's sting. Bee's eggs, he shows, contain minute quantities of the poison. 475 eggs being required to furnish enough to poison a sparrow. It is a remarkable fact that the unfertilized poison containing eggs give birth to drones which have no poison. - London

Blind Student's Work.

One of the most interesting figures in Harvard University is Edward Ray, a blind student who hails from a small country town in North Carolina. He has mastered the most difficult courses in higher mathematics, Flower; in geology, won a degree from the University of North Carolina and is now working for the degree of M. A. My fourth is in Envy, but not Power;

My fifth is in Nature, but not in Ma at Harvard. Here he is taking some of the hardest courses in the curriculum. Gothic and Anglo-Saxon.

Costly Process.

It is said that a lot of wine stored in San Francisco was greatly improved in quality by the earthquake and
fire. The incident is of interest to

My whole is the name of a favorite connoisseurs and also to scientists. But it is to be hoped it will not be found necessary to emulate the example of Charles Lamb's Chinamen This game is a little mystifying to with their roast pig, and have an earthquake and fire every year for the improvement of the vintage.—

This game is a little mystifying to those not in the secret. One of the improvement of the vintage.—

This game is a little mystifying to those not in the secret. One of the improvement of the vintage.—

An aged Scotch minister about to marry for the fourth time, was explaining his reason to an elder. "You see, I am an old man now and I was not appear, and the leaves (not the flower) back lawn. It could fly two or three leaves (not the flower) New York Tribune.

Coffee Knifed an Old Soldier.

An old soldier, released from coffee at 72, recovered his health and tells about it as follows:

"I stuck to coffee for years, although it knifed me again and again.

'About eight years ago (as a result of coffee drinking which congested my liver), I was taken with a very severe attack of malarial fever.

"I would apparently recover and start about my usual work only to sufpeated several times during the year I fore it. Tas again taken violently ill.
"The doctor said he had carefully

studied my case and it was either 'quit coffee or die,' advising me to take Postum in its place. I had always thought coffee one of my dearest friends, and especially when sick, and I was very much taken back by the doctor's decision for I hadn't suspected the coffee I drank could possibly cause

my troubles.
"I thought it over for a few minutes and finally told the doctor I would make the change. Postum was procured for me the same day and made according to directions; well, I liked it been a new man. The change in health began in a few days and surprised me, and now, although I am seventy-two years of age, I do lots of hard work and for the past month have been teaming, driving sixteen miles a day. besides loading and unloading the wagon. That's what Postum in the place of coffee has done for me. I now

like the Postum as well as I did coffee. "I have known people who did not care for Postum at first, but after having learned to make it properly according to directions, they have come to like Postum Co., Battle Creek, Mich.

This Cat Came Back.

A cat story going the rounds is to

Not even a flood, in which several lives were lost, and property to the value of many thousands of dollars was carried away, can destroy the ing back.

This was illustrated by the adven ture of a cat belonging to the famliy of John Barkley, a resident of Fort Pierre, situated at the junction of the One fateful day it insisted on sitting Bad and Missouri rivers in Central South Dakota. The greater part of the resident district of the town was the cage, closing the cage door as I swept away by a flood last July, the thought. I passed through the diningflood being caused by a cloudburst up the Bad River.

Among the buildings carried away was the home of Barkley. In the house at the time was the family cat, a big tiger-striped animal known as Tabby Nothing was seen or heard of the ca until a day or two ago, when it calmly It as well as coffee. I never miss a walked into the new home which chance to praise it." Name given by Barkley had erected and took its place by one of the stoves.

Barkley expresses the opinion that

the cat at the time of the flood was

carried by the swift current directly across the island opposite the mouth of Bad River, where it lived on small game until it discovered that crossing the Missouri River on the ice was mainland and found its way to the Barkley home.

Blind Illustration.

A game for pencil and paper. The players may "match for partners," drawing from two bowls filled with bits of paper or cards, inscribed with the names of ladies and gentlemen.

Or the hostess may pair her guests with a view to their congeniality by giving to each man upon arrival a card bearing a lady's name and a num-

Chairs are set about the room in couples, back to back or side by side, facing in opposite directions, and upon one of each pair is a pad, pencil and India-rubber.

The players take their seats, and it is then explained to them that one of the partners must think of some simple object which he or she shall describe in such a way that the other one will be able to draw it. No hint or help is to be given, except the bald but accurate description of its out-

On no account must the sketch be seen by the assistant until, upon its able effect on consumptives. Dr. completion, the name of the the paper and the number added which shall identify the artist. The question as to which one shall make linen, white velvet, cotton or cloth, the drawing and which describe the but not white silk, may be used. object to be represented, must be a Next to white the best colors are blue matter for the partners themselves to and violet.

At the end of 15 minutes the hostess rings a bell as a signal for all to hand in their sketches. They are of energy set free is 1,000,000,000 then placed on exhibition, and cards with numbered lines are distributed upon which each person writes his or her vote as to which drawing best portrays the object, the name of this explains the hopelessness of their which is written beneath it. When the synthesis, as no such amount of energy votes are counted, the first prize is action of the game with the Chinese awarded to the most successful armothers is just the same as with tist, the second to his or her partner, in recognition of that person's powers of description.

The Story of Little Peep.

For many years I have made a prac tice of feeding the wild birds both in summer and winter, and it has been an unfailing source of pleasure to watch them eagerly picking up the tid-bits, and of wonder to note how quickly they lose their fear of mankind as soon as they are assured no harm is intended. One of my most interesting experi-

ences, writes a correspondent of the Indianapolis News, in this line oc-curred last summer. A member of my family, who also loves birds, came the basement of one of our big hotels. He picked it up and carefully placed it in his capacious pocket, carrying it with him until he reached home at night When he heard a little peep in his pocket he came laughingly, and laid in my hand a tiny brown and white sparrow.

It was very much alive, although so young, as well as hungry. After feeding it carefully we placed it in a cage for the night, thinking if it lived to keep it until strong enough to fly, feet only, but in a very few days increased the distance amazingly.

In order to get it used to outdoor life preparatory to its flight to its native element, I would take it daily, place it upon the lawn or graveled walk, where it would busily pick at the gravel, insects and seeds, while I sat on guard upon the porch, lest some stray cat might have an eye upon my tiny birdling. What was my surprise and delight as well, the very first time I placed it so upon the lawn, to see our usual flock of birds come one by one and settle upon the ground around it, eying it curiously. My heart was in a flutter, for I had become attached to little Peep, and looked for nothing but that when the birds flew away it would go with them. Almost unconsciously I called softly, "Peep, Peep," and to my astonishment the little thing flew up and across the lawn straight to my outstretched hands, while all the other birds flew away. And so, each pleasant day for week I carried Peep out upon the lawn. sometimes calling a neighbor to see it fly from among the flock of wild birds to me at the sound of my voice.

I am sorry my bird story must end in tragedy. Little Peep was especially fond of helping itself to choice morsels from the dinner table if it chanced to be out of the cage at meal time. upon my shoulder at dinner, so I carried it from the room, placed it in room door and shut it behind me. I thought I heard a little cry, and found that I had bruised it in the It talked to me and ate same had helped to brighten my summer, soon lay in its last sleep in my hand. Since we know that our Father notes "even the sparrow's fall," it is not to our discredit that we give tender thought to all His dumb creatures. Indianapolis. L. J. B. S.

nitz that two German mechanics have invented a clever electric device for changing hymn numbers in churches.

After a thorough test, the use of crude oil on country roads at Fresno, Cal., is declared to be a failure by local experts, and it is proposed to replace it with macadam.

Seven out of ten people have stronger sight in one eye than the other. In two cases out of five one eye is out of line. Nearly one-half of the people are color-blind to some extent, and only one pair of eyes out of every fifteen is right in all respects.

A plant, native to Japan, which furnishes a sort of vegetable leather, is being introduced into the United States. The inner bark of this plant, after being subjected to a certain process, becomes as tough as French kid, so transparent that one can see through it, and as pliable and soft as

In the disintegration of radium, by the giving off of helium, the amount great calories for one gram of radium. Now to reconstruct the dissipated elements would require as much energy as was lost in their dissipation, and can be employed. How were these elements first constructed? That is a question for the students. A German physicist, W. Meigen, suggests that the tion of wheat.

CANDIED FRAGRANT FLOWERS.

Demand in England for Sugared Rose Petals.

One of the latest developments of luxury is said to be the candying of fragrant flowers. The notion is not altogether new, for violets have been made into confections for the palate, as well as into bouquets for the olfactory organs, from time to time for

a long period. At any rate, says the London Globe, upon a tiny specimen lying at his feet, while doing some electric work new impetus of late, and a candied violet is coming to be regarded as an acceptable "bonne bouche" to be presented to a lady. There is also, we are told, a demand for sugared rose petals, which is being catered for by some enterprising artists in sugar. It can hardly be pretended that flowers made into "sweets" are of any medicinal efficacy, though damask rose leaves have long recognized place in the materia med-

back lawn. It could fly two or three have just now some reputation—outside the medical faculty-as a cure for cancer. The best that can be hoped for, if flowers are to be eaten The elder nodded and said: as well as to be seen and smelled, is meenister, I have had twa wives, and that they may in all cases prove to be innocuous. It is a nice question whether the perfume is always a safe

Perhaps the modern craze is, after all, only a form of luxury. A candied violet or a dish of rose leaves cunningly prepared for the tea table could not possibly enter into the cate gory of cheap sweets for the mil-

What Makes the Sky Blue? The sky has long been a puzzle to

physicists. There are two mysteries to explain about it-its reflection of light and its color. The old view was that the blue of the sky was due simply to atmospheric oxygen. gen has a faint blue tint, and the idea was that several miles of the gas, even when diluted as it is in the air would have a bright blue color. But this did not account for the intense illumination of the sky, and of recent years Tyndall's "dust theory," some modification of it, has been generally accepted. This regards the blue color as an optical effect, like the color of very thin smoke, due to ex cessively fine particles floating in the air, which would also account for the large proportion of reflected light from the sky. Recent calculations by Professor Spring, of Liege, Belgium however, indicate that the dust in the air is not sufficient in amount, nor finely enough divided, to support this explanation, and he rejects it for this crumbs, but from that, Peep, that and other reasons. He has gone back to the old oxygen theory, and accounts for the general illumination of the sky on the hypothesis, first advanced by Hagenbach, that intermingled layers of different density, in the atmosphere give it the power of reflecting light .-Success Magazine.

It is popularly believed that the French who live in Paris and who speak what is usually described as "Parisian French" represent the genuine, simon-pure type of French blood and tradition. The famous Lo Petit Journal, however, draws attentition to the fact that Paris has the smallchanging hymn numbers in churches.

Scientists say every stream—the entire water supply of the country—is now infested with typhoid germs, a result of great carelessness and a large population.

to the fact that Paris has the smallest indigenous population of any European capital, and that according to the last census only about 36 per cent of the total population of the Frnch capital are Parisians, aboriginals, or people born in Paris. Several European capitals can show a repulsion of the population. far higher rate of indigenous population. St. Petersburg, for example can show 40 per cent, Berlin 41 per cent, Vienna 45 per cent and London 65 per cent.—Boston Globe.

Franklin's Kite Experiment Commenting on Benjamin Frank-lin's kite experiment, which proved that lightning and electricity are the same, a scientist says: "It was one of the most brilliant examples of luck yet recorded. To attempt the ex-traction of lightning flashes from a lowering sky was almost suicidal. Even at this late day timid persons occasionally fly to feather beds, sit on glass-legged chairs or find refuge in rubber boots during thunderstorms.

A repetion of Franklin's experiment cost his immediate imitator his life." Costly Boarders.

id, so transparent that one can see hrough it, and as pliable and soft as alfskin.

It cost \$17,000 to feed the animals in the London Zoo last year. The principal items of food were 207 horses, 270 goats, 34,921 pounds of fish, 25,196 eggs, 6,855 quarts of milk and 137 loads of hav.

BOX OF WAFERS FREE-NO DRUCS

Cures Belching of Gas-Bad Breath and Bad Stomach-Short Breath-Bloating-Sour Eractations-Irregular Heart, Etc.

Irregular Heart, Etc.

Take a Mull's Wafer any time of the day or night, and note the immediate good effect on your stomach. It absorbs the gas, disinfects the stomach, kills the poison germs and cures the disease. Catarrh of the head and throat, unwholesome food and overeating make bad stomachs. Scarcely any stomach is entirely free from taint of some kind. Mull's Anti-Belch Wafers will make your stomach healthy by absorbing foul gases which arise from the undigested food and by re-enforcing the lining of the stomach, enabling it to thoroug day mix the food with the gastric juices. This cures stomach trouble, promotes digestion, sweetens the breath, stops belching and fermentation. Heart action becomes strong and regular through this process.

Discard drugs, as you know from experience they do not cure stomach trouble. Try a common-sense (Nature's) method that does cure. A soothing, healing sensation results instantly.

We know Mull's Anti-Belch Wafers will do this, and we want you to know it. This offer may not appear again.

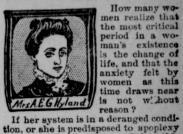

GOOD FOR 25c.

Send this coupon with your name and address and your druggist's name and 10c. in stamps or silver, and we will supply you a sample free if you have never used Mull's Anti-Beich Wafers, and will also send you a certificate good for 25c. toward the purchase of more Belch Wafers. You will find them invaluable for stomach trouble; curve by absorption. Address MULL'S GRAPE TONIC Co., 328 3d Ave., Rock Island, Jl.
