how to mix them.

For Sale by Binder & Starrett, Patton, Pa.

I remember, this young man wen on a visit to a relative in a neighbor ing city, and one afternoon, on the third or fourth day of his stay, he startled a lady member of the house hold by remarking that he had a feeling' that some misfortune had over taken a wealthy planter whom they new very well, and whom I will call Colonel Jones. The colonel was a prominent resident of the doctor's home town and had a large outlying estate, which he was in the habit of

"On the day of Smith's singular premouition he was on one of those tours of inspection, but failed to come back, and the following morning his corpse was found lying in a cornfield. He had evidenty been dead about 24 hours, and from the appearance of the body seemed to have been seized with

thorough investigation, but the only thing they found that merited any special attention was a small, round vial in the dead man's vest pocket. It was about the diameter of a lead peneil by four inches long, and had originally contained a couple of dozen medicinal tablets, which, lying one on top of the other, filled the little bottle the cork. A few still remained in the bottom.

'Upon inquiry it was learned without trouble that the tablets were a harmless preparation of soda, and that Jones himself had bought them at a local drug store. That ended saspicion in that quarter, and, for lack of anything better, the coroner returned a verdict of death from sunstroke.

There was no autopsy.
"Some time after Jones had been buried," continued the police commis-sioner, "I learned accidentally of Dr. Smith's curious prophecy, and it set me to thinking. Eventually I evolved a theory, but it was impossible at the time to sustain it with proof, and for five or six years I kept it pigeonholed in my brain, waiting for something to happen. Meanwhile, to everybody's surprise, Dr. Smith went to the dogs. He began by drinking heavily, gradually lost his practice, and finally skipped out to avoid prosecution for cashing a fake draft. After his flight I learned enough to absolutely confirm my theory as to Jones' death. What ad really happened was this:

"Dr. Smith owed the old man a considerable sum of money and had given note, upon which he had forged his father's name as indorser. The planter was pressing him for payment and had threatened suit, which meant inevitable exposure. One day, while they were conversing, Jones pulled out a little glass vial and swallowed one of the tablets it contained, remarking that he took one daily, after dinner,

for sour stomach. "That suggested a diabolical scheme of assassination, which the doctor proceeded to put into execution. Repairing to his office, he made up a duplicate tablet of strychnine, and, encountering the colonel next day, asked him to let him have the vial for a moment, so he could copy the address of the makers from the label.

"Jones handed it over unsuspectingly, and while his attention was briefly diverted elsewhere Smith put in the prepared tablet. He placed it under the top four, thus making it reasonably certain that his victim would take it on the fifth day from that date. Next morning he left town, so as to be far away when the tragedy was consummated, and some mysterious uncontrollable impulse evidently led him to make the prediction that first excited my suspicion.

"When I made certain of all this. I located Smith in Oklahoma and was on the point of applying for an extradition warrant when he anticipated me itrified brick.

Connections—At Williamsport with Philadelphia and Reading Railway; at Jersey Shore with the Fall Brook District; at Mill Hall I thereupon returned the case to its mental pigeonhole, where it has remained ever since."

"Pardon me for asking," said one of the listeners. "but is that really a true story, or are you entertaining us with

"It is absolutely true," replied the narrator. "But how did you learn the particu

ars?" "Well," said the police commissioner, smiling, "Smith was like most clever triminals-he had one weak spot,

was fool enough to tell a woman. She

blabbed."-New Orleans Times-Democrat. Ate Course Dinners A woman just arrived from Australia was recently negotiating with an agent in London for a house in one of the newer districts of Kensington. She asked if it was a nice neighbor-"It is thoroughly desirable,

madam," replied the house agent.

It is not correct to say that a girl a song. If she lives long enough to become of some use in the world, she may some day render lard, but she can't render a song.-Atchison

The voice is the most common and at the same time the most complex of human faculties. When we listen to it, we realize nothing of the many influences at work in its use. Yet it represents the character, the mood, the temperament and the health of the individnal when left to run in its own way. If uncontrolled, it will develop much as a flower garden will develop; the rank and weedy nature will come to the front, and the tones of exquisite beauty will be obscured. Bad daily habits in the use of the voice will give it many disagreeable qualities. If controlled, the voice will keep its weeds in the background and permit only its beauties to be known. If cultivated. the weeds will be taken out and the flowers developed .- Pittsburg Press.

ARMORED COFFINS.

They Were Once Used In a Church-yard In Scotland.

In the earlier half of the nineteenth century the practice of stealing bodies from the churchyards for the purpose of sale as subjects for dissection, which was known as "body snatching," was for a time very rife.

Various plans were made to defeat the nefarious and sacrilegious proceedings of the "body snatchers," or "resurrectionists," as they were sometimes called, a very common one being the erection of two or more small watchwitedows communicate which the mounted grame to remainder of nights after the f A navel raspet or the

some sort of fit or convulsion.

"Of course the affair created a great stir, and the police made a pretty thorough investigation, but the only maneuver that the two curious coffinlike relics now lying on either side of the door of the ruined church of Aberfoyle, in Perthshire, were constructed. They are solid masses of cast iron of enormous weight.

When an interment took place one of these massive slabs was lowered by suitable derricks, tackles and chains on to the top of the coffin, the grav was filled in, and there it was left for some considerable time. Later on th grave was opened and the iron armo was removed and laid aside ready for another funeral.

These contrivances still lie on the grass of the lonely little churchyard. objects of curiosity to the passing cyefist and tourist .- Scientific American

The Explanation.

One morning the readers of a certain newspaper were perplexed to see in type the announcement that "the Sco tus handed down an important decision yesterday." The afternoon paper of the town, with which the morning paper for years had held a bitter controversy, interesting none but them-selves, laughed that day, as the poets "in ghoulish glee," and it was up to the morning paper the next day to explain that "the types" made them say that the Scotus did so and so when the telegraph editor should have known that that word was merely the abbreviation of the telegrapher for supreme

Locusts Good to Eat. All native African races eat locusts. With many it takes, and has to take,

the place of the British workman's beef and mutton. In a good many villages sun dried locusts are an article of commerce. The Sudanese are particularly fond of them.

Before they are eaten they are toast ed. The wings and legs having first been torn off, the long, soft body and the crisp head form the delicacy. I determined not to let my European

prejudices influence me, but to give the dish of grilled locusts a fair trial. I thought how John the Baptist had enjoyed them plus wild honey.

The one I was eating was rather

nice. I agreed with my Arab servant that, should the meat supply fall short, a dish of locusts would be a very good substitute. By the time I was eating the sec-

ond locust it seemed to me absurd why one should have a sort of lurking for John the Baptist's daily menu unless it be for its monotony, and I felt convinced that I should get tired of honey sooner than I should of locusts.-Current Literature.

An eccentric clergyman in Cornwas had been much annoyed by the way the members of the congregation had of looking around to see late comers. After enduring it for some time he said on entering the reading desk one day: "Brethren, I regret to see that your attention is called away from your religious duties by your very natural desire to see who comes in behind you. I propose henceforth to save you the trouble by naming each person who may come late.

He then began, "Dearly beloved," but paused half way to interpolate "Mr. S., with his wife and daughter." Mr. S. looked rather surprised, but the minister, with perfect gravity, resumed. Presently he again paused.
"Mr. C. and William D."

The abashed congregation kept their eyes studiously bent on their books. The service proceeded in the most or derly manner, the parson interrupting himself every now and then to name some newcomer. At last he said, still with the same perfect gravity: "Mrs. S. in a new bonnet."

In a moment every feminine head in the congregation had turned around .-Millinery Trade Review.

A Mystery of the Sea

One of the most curious finds ever made from the sea was that which came to the Azores in 1858. The island of Corvo was then in the possession of two runaway British sailors. One morning there drifted ashore a craft which had evidently been frozen in the ice for a long time. It was an ancient and battered brig, without masts, bulwark or name, but the hatches were on, the cabin doors fast, and the hulk was buoyant. She had little cargo, and that consisted of skins

and furs in prime condition. No papers were found in the cabin but it was figured that she was sealer or trader, carrying a crew of 10 or 12, and that she had been pro visioned for a year. The flour was spoiled, but the beef was perfectly preserved. She had been abandoned when frozen in an iceberg and drifted for years. The date of the letter found in the forecastle showed that the brig had been abandoned nearly half a century before. The two sailors got out the furs, which eventually brough them \$4.000, and two barrels of beef and then set fire to the wreck. No trace was ever found of its name or owners

Letter to S. J. Wirtner. Patton, Pa.

Dear Sir: A pound of meat and no one is worth more than a half pound of meat and a half pound of bone, but there are, as you say, a great many people who won't pay more than a cer tain price by the pound. Give 'em bone; that's right; give 'em plenty of bone!

There are people who won't pay more than \$1.50 a gallon for paint; give

There's no better school than experience; cost is high; but the lesson is never forgotten.

Let a man paint two houses alike, same size; one Devoe, the other that \$1.50 paint. He buys 10 gallons of each, and pays \$3 a day for labor-\$3 a day is \$3 a gallon, easier reckoning. He has to buy two gallons more of

the \$1.50 paint; and has two gallons left of Devoe: 12 gallons \$1.50, \$18; 8 gallons \$1.75, \$14; \$4 more for "cheap"

He pays \$3 a gallon for painting; 8 gallons \$24; 12 gallons \$36; \$12 more for painting "cheap" paint.

He'll buy the less gallons paint after that. If people are slow to learn, it's because they keep on buying bone meat. Give 'em plenty of bone.

Yours truly, F. W. DEVOE & Co. P. S. Binder & Starrett sell our paint.

A BOON TO WOMEN.

The Bane of the Average Female Promply Eliminated by a Simple Remedy

Backache, whether due to natural causes or the result of disease, can be promptly alleviated and ultimately cured by the use of Dr. Wood's Kidney and Backache pills. Thousands of suffering women can testify to the truth of this.

It is a purely vegetable compound and does not contain any poisons or deleterious substances. It acts promptly, and in addition to relieving the pain tones up the system and makes life worth living. A trial will convince and a trial will costs you nothing. If they do not do all that is claimed for them your money will be cheerfully refunded.

Dr. Wood is a reputable physician who has had over 40 years of experence in kidney troubles, having made it a specialty, and these pills are made from his own perscription.

Don't suffer any longer, but buy a box now. Price 50 cents at Wolf's Pharmacy.
