

Mrs. Mittie Huffaker.

HAD GIVEN UP ALL HOPE. CONFINED TO HER BED WITH DYSPESIA.

"I Owe My Life to Peru-na," Says Mrs. Huffaker.

Mrs. Mittie Huffaker, R. R. No. 3, Columbia, Tenn., writes: "I was afflicted with dyspepsia for several years and at last was confined to my bed, unable to sit up. We tried several different doctors without relief."

"I had given up all hope of any relief and was almost dead when my husband bought me a bottle of Peru-na."

"At first I could not notice any benefit, but after taking several bottles I was cured sound and well. It is to Peru-na I owe my life today. I cheerfully recommend it to all sufferers."

Revised Formula.

"For a number of years requests have come to me from a multitude of grateful friends, asking that Peru-na be given a slight laxative quality. I have been experimenting with a laxative addition for quite a length of time, and now feel gratified to announce to the friends of Peru-na that I have incorporated such a quality in the medicine which, in my opinion, can only enhance its well-known beneficial character. S. B. HARTMAN, M. D."

Queen Alexandra's Attendants.

There are in all 15 ladies in personal attendance upon Queen Alexandra, the first being mistress of the robes, then the ladies of the bed chamber and maids of honor.

DON'T MISS THIS.

A Cure For Stomach Trouble—A New Method, by Absorption—No Drugs.

Do You Belch? It means a diseased stomach. Are you afflicted with Short Breath, Gas, Sour Eructations, Heart Pains, Indigestion, Dyspepsia, Burning Pains and Lead Weight in Pit of Stomach, Acid Stomach, Distended Abdomen, Bloating, Colic? Bad Breath or Any Other Stomach Trouble? Let us send you a box of Mull's Anti-Belch Waters free to convince you that it cures.

Nothing else like it known. It's sure and very pleasant. Cures by absorption. Harmless. No Drugs. Stomach Trouble can't be cured otherwise—says Medical Science. Drugs won't do—they eat up the stomach and make you worse. We know Mull's Anti-Belch Waters cure and we want you to know it, hence this offer. This offer may not appear again.

5266 GOOD FOR 25c. 144

Send this coupon with your name and address and your druggist's name and 10c. in stamps or silver, and we will supply you a sample free. If you have never used Mull's Anti-Belch Waters, and will also send you a certificate good for 25c. toward the purchase of more Belch Waters. You will find them invaluable for stomach trouble; cures by absorption. Address MULL'S GRAPE TOXIC CO., 328 3d Ave., Rock Island, Ill. Give Full Address and Write Plainly.

All druggists, 50c. per box, or by mail upon receipt of price. Stamps accepted. In Milan there are 38,000 families living in one room each.

W. L. DOUGLAS \$3.50 & \$3.00 SHOES FOR W. L. DOUGLAS \$4.00 Gilt Edge Line cannot be equalled at any price.

Advertisement for W. L. Douglas shoes, featuring illustrations of a man in a suit, a woman in a dress, and a shoe. Text includes 'W. L. DOUGLAS SHOES ALL PRICES' and 'THE WORLD'S GREATEST SHOE MANUFACTURER'.

W. L. DOUGLAS MAKES & SELLS MORE MEN'S \$3.50 SHOES THAN ANY OTHER MANUFACTURER IN THE WORLD. \$10,000 REWARD to anyone who can disprove this statement. I could take you into my three large factories at Brockton, Mass., and show you the infinite care with which every pair of shoes is made, you would realize why W. L. Douglas's \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$3.50 shoe.

W. L. DOUGLAS'S Boys' School & Dress Shoes, \$2.50, \$2.75, \$3.00, \$3.50. CAUTION—Don't buy cheap, inferior shoes. Take no substitute. Name guaranteed without his name and price stamped on bottom. Fast Color Quilts used—they will not wear drabby. Write for Illustrated Catalog.

The Farm

Knowledge is Power. Knowledge is power in agriculture as well as in other professions. The more a farmer knows about the facts of agriculture, and the more he practices what he knows, the more successful he becomes. The wide awake farmer is observant, and profits by his failures as well as his successes.

Results of Feeding. In the selection of cattle foods the farmer should keep in view the results to be expected. Some foods are more valuable, pound for pound, than others, because they differ in the relative proportion of dry substance and its composition. The digestive capacity of each animal should be known to the farmer, and he should endeavor to supply its wants.

Fill the Pork Barrel. The farmer who raises a few pigs for his pork barrel may count the cost and affirm that pigs do not pay, but where a few pigs are raised they will consume a large amount of material that would be of no value except for their use. When the pork barrel is full the farmer is at least fortified for the winter with meat and in many cases where no pigs are kept there is a waste of material that could be utilized with the aid of at least one or two young and thrifty pigs.

To Keep Meat in Summer. My way of keeping pork through the summer season, says Louis Campbell, of Pennsylvania, Ohio: I smoke it well as early in spring as I can and usually market all side meat as early as possible. After I have it nicely smoked I take it from the smoke house and hang it on stout nails around the sides of a garmer in my wheat granary. I just hang it up without anything over it, being careful to let one piece hang so as not to touch another. I keep the granary dark so as to keep out all flies. I have tried this plan for several years and have never yet had any trouble from flies or other causes.

Fertility and Fruit Growing. At a meeting of horticulturists Professor John Craig, of Cornell University, said: "Every modern system of cultivating fruits recognizes as a first principle the right of the fruit tree to be considered a specific and sufficient crop under the soil, or at least to be regarded as a crop quite as exhausting in character as any grown by the farmer. Unless the fruit grower realizes and puts into practice the essential part of this principle he will fall as a cultivator of fruits. Experiments in orcharding conducted some years ago at the Cornell Experiment Station proved conclusively that it cost the soil more to produce twenty average crops of apples than twenty average crops of wheat. In other words, more fertility was extracted from the land in growing an acre of bearing apples for twenty years than in growing twenty consecutive crops of wheat. As a rule, the farmer recognizes the food needs of the wheat plant, but too often does he look upon the apple or fruit tree as a mere tenant of the soil, and one which is not to be regarded as a specific crop. Having recognized the principles, the particular method of orcharding much be worked out by the fruit grower himself. This method will depend upon soil conditions and climate. Nevertheless, it is safe to say that in eight cases out of ten that method which employs clean tillage for at least part of the season will be most successful. It is also safe to say that all secondary crops in orchards are injurious."

Hogs in Orchards. As scavengers, or for consuming refuse that cannot be marketed, hogs are almost indispensable in an orchard. The fattening of hogs on apples may be considered a successful method, it being certain that this fruit possesses a value for that purpose that has been overlooked, and the destruction of insects by hogs in consuming the fallen apples has given a new value to orchards and will probably check their destruction, which in some sections of the country has already progressed to a considerable extent. The animal should be allowed in the orchard from the time the fruit begins to fall until it is time to gather apples for the winter, and they will, in most cases, be found in good condition for hardening with grain and slaughter, and the meat will be tender and of an excellent flavor. When it is necessary to put them into the pen, boiled apples mixed with a small quantity of corn, oats, peas or buckwheat meal will make them fat in a short time and fill the farmer's pork barrel with sound, sweet pork of the first quality.

The Hen and Her Brood. When it comes to safety and comfort for both the hen and her keeper, the pen system of managing the hen and her brood is the best and in the long run it is much the cheapest. We have written on this subject before, but it is so timely now and it is such a good thing—a great help to the management of the hen mothers and their little ones during the growing season, that we are writing on it once more.

The chief idea is individuality and comparative isolation of each hen and her chickens and in this alone much is attained, for the more we divide the growing stock the more of it we will raise. In carrying out this plan, observes H. B. Geer, a good, stout, weather and varmint proof coop is the first essential, for the chickens must have protection at night. The next necessity is a pen made of slats or wire netting, this to enclose the coop, say a space about ten by twelve feet all around it, and the fencing should be six feet high and then the flight feathers of one wing of the hen should be cut so that she can not fly out, should she be of a flighty turn. A gate at the front is, of course, necessary.

Within a small yard of this kind one hen and her brood should be placed, but the fencing should not be so close that the little chicks cannot pass in and out, for it is not intended to confine them, but their mother. This makes a security reserve for them—a place of refuge for them from any danger, and yet they may enjoy free range at the same time. It also makes it possible to feed each hen and her brood separately, which is a most desirable condition, as it prevents mobbing up and overcrowding.

Another thought—when the showers come up, and we are busy, we need not chase all over the place, dropping everything else, to get the hens and their chickens in out of the wet, for the hen is stationed where there is refuge all the time, and the chickens can quickly scot in through the cracks to her.

In fact, this system minimizes work, worry and the percentage of loss, and it really makes the raising of chickens with hens a pleasure, as well as profitable.

Rape For Sheep. It has been well attested that rape makes the quickest and one of the best sheep and hog pastures that can be grown. One of our correspondents, Mr. L. C. Reynolds, says of rape: Rape has won for itself great popularity as a food for sheep in recent years. It is grown to-day more or less upon every farm where sheep or hogs are raised. I have grown rape for sheep pasture for more than twelve years, and the more I grow of it the more thoroughly I am convinced it is one of the best sheep feeds the farmer can grow. While it does not come on as early as rye in the spring, its hardy nature makes it one of the best of forage crops. When sown under favorable conditions it will supply a large amount of palatable pasture at six weeks of growth, and the fact that it can be sown at any season of the year makes it one of the best general forage crops for the farmer. No sheep owner can afford not to grow rape. It can be sown during every growing season of the year and produce excellent pasture. I prefer to sow rape in drills instead of broadcast, as many do. A better stand of plants can be secured by this method, and the stock does not tramp the forage down nearly so much. I sow my rape with a hand or grain drill in rows twenty inches apart. Sow about four pounds of seed per acre. Care should be exercised not to sow the seed too deep.—Indiana Farmer.

Can a man always be spruce without looking more or less wooden?—Puck. Many a man who knows his place has his eye on a better one.—Chicago Daily News. Of the five senses, common-sense and a sense of humor are the rarest.—Saturday Evening Post. Some people lose sight of the fact that of two evils it isn't always necessary to choose either. Love is responsible for two-thirds of the happiness in the world—also for nine-tenths of the misery.—Chicago Daily News. "What makes you think Bikins is in love?" "I was in the room next to him and his girl, and overheard one of their silences."—Life. The doctors gave him up, but he retained them; He gave the doctors up, you see, And now he's well again.—Philadelphia Ledger. She—"He writes that he had just finished making his will." He—"Did he remember us?" She—"Yes, indeed. He has left all his money to an asylum for hopeless idiots."—Chicago Daily News. Story of a Sevres Vase. A wealthy manufacturer in the potteries is at present the subject of a good joke. While on a continental tour he purchased a Sevres vase for some hundreds of pounds and brought it home most carefully. Thinking that the foreman of his works might gather a hint from the design, he called that gentleman in and showed him his treasure. "How do you like it?" he asked. The foreman took the vase in his hand, turned it over and returned it with the brief reply: "I don't think that I can learn much from it." "Why not?" asked the manufacturer. "I don't like telling you, sir." "Come—out with it." "Well, I designed that vase myself. It is a foreign imitation of our own work and is worth £5 at the outside."—Liverpool Post. Sent Seven-Ton Pump to Patent Office. Sometimes the rigors of Patent Office procedure are not without their humorous side. A New York attorney filed an application for improvements in a centrifugal pump. The Patent Office declared the invention inoperative and demanded a working model. The Patent Office was requested to send an examiner to Trenton to inspect the machine in actual operation. This the Patent Office refused to do. The attorney, therefore, politely sent a seven-ton pump to the Patent Office—sent it, moreover, from Trenton to satisfy a sceptical examiner. Twenty-one men were required to get it into the examiner's office.—Scientific American.

His Little Bluff. She was such a pretty girl That I wondered why the churl Didn't pay More attention to the maid— There he sat and nothing said While the crowded Pullman sped On its way. I pronounced him king of chumps To sit silent in the dumps With a queen, Dainty, winsome, natty, neat, Dancing-eyed, attractive, sweet, There beside him on the seat All serene. But when they arose to go Then I understood, you know, In a trice Why he had been such a bore. For I saw upon the floor 'What I hadn't seen before— Grains of rice! —Louisville Courier-Journal.

Veterans Emigrating. San Marino, the smallest republic in the world, will soon be without voters if its rate of emigration keeps up. It has only 1,700, including widows, but it is still a good republic. Recently its assembly decided to abolish the executive council, the members of which have been elected for life. Hereafter members will be elected by the people for three years only. Rarest Senator. Senator Clark, of Montana, the richest man in the Senate, and one of the richest men in the country, is the most solitary man in public life in Washington. He has no close friends. FITS, St. Vitus' Dance, Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. H. R. KLINE, Ltd., 331 Arch St., Phila., Pa. Between 5,000 and 6,000 alcohol engines are now in operation in Germany. Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle. The premium on gold in Haiti now varies between 400 and 500 per cent. Good Field for Surgery. The surgical operations on the skulls of boys in Philadelphia and Toledo, by which they were converted from incorrigibly bad boys to models of good behavior, suggest that the scientists might find a field of work in the Senate. There is a possibility that they might discover some pressure on the brains of Senators at times. There's more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly falling to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation. Superstitions of Farmers. Farmers "stick to the moon" in regard to planting corn and other crops. Some of them will not put under any circumstances plant corn in moonlight nights, claiming that corn stalks will produce a tall stalk with a short ear. Others just as successful plant when they are ready, when nights are dark or moonlight, as the case may be. Other notions are indulged in, such as throwing the cobs in running water to keep corn from fring. Some farmers would under no consideration burn pinder hulls, the seed of which is to be used for planting; they must be scattered along a path or highway, to be trodden upon in order to secure a good crop. Green butter bean hulls must be thrown in a road after being shelled for table use from day to day to insure a good crop the following season.—Charleston News and Courier. The New Postal Notes. Postmaster General Cortelyou's new postal note of small denominations, designed to obviate the business necessity of transmitting stamps through the mails in lieu of coins, includes special forms for 1, 2, 3, 4, 5, 6, 7, 8 and 9 cents, to be sold at their face value without a fee. The regular postal notes would represent sums from 10, 20 and 25 cents, graded by fives and tens up to \$1, besides notes of \$1.50, \$2 and \$2.50. Mr. Cortelyou has asked Congress to appropriate \$150,000 to establish the change, commencing with the new fiscal year, July 1. BREAD DYSPESIA. The Digesting Element Left Out. Bread dyspepsia is common. It affects the bowels because white bread is nearly all starch, and starch is digested in the intestines, not in the stomach proper. Up under the shell of the wheat berry Nature has provided a curious deposit which is turned into diastase when it is subjected to the saliva and to the pancreatic juices in the human intestines. This diastase is absolutely necessary to digest starch and turn it into grape-sugar, which is the next form; but that part of the wheat berry makes dark flour, and the modern miller cannot readily sell dark flour, so Nature's valuable digester is thrown out and the human system must handle the starch as best it can, without the help that Nature intended. Small wonder that appendicitis, peritonitis, constipation, and all sorts of trouble exist when we go so contrary to Nature's law. The food experts that perfected Grape-Nuts Food, knowing these facts, made use in their experiments of the entire wheat and barley, including all the parts, and subjected them to moisture and long continued warmth, which allows time and the proper conditions for developing the diastase, outside of the human body. In this way the starchy part is transformed into grape-sugar in a perfectly natural manner, without the use of chemicals or any outside ingredients. The little sparkling crystals of grape-sugar can be seen on the pieces of Grape-Nuts. This food therefore is naturally pre-digested and its use in place of bread will quickly correct the troubles that have been brought about by the too free use of starch in the human race to-day. The effect of eating Grape-Nuts ten days or two weeks and the discontinuance of ordinary white bread, is very marked. The user will gain rapidly in strength and physical and mental health. "There's a reason."

CORDIAL INVITATION

ADDRESSED TO WORKING GIRLS

Miss Barrows Tells How Mrs. Pinkham's Advice Helps Working Girls.

Girls who work are particularly susceptible to female disorders, especially those who are obliged to stand on their feet from morning until night in stores or factories.

Day in and day out the girl toils, and she is often the bread-winner of the family. Whether she is sick or well, whether it rains or shines, she must get to her place of employment, perform the duties exacted of her—smile and be agreeable.

Among this class the symptoms of female diseases are early manifest by weak and aching backs, pain in the lower limbs and lower part of the stomach. In consequence of frequent wetting of the feet, periods become painful and irregular, and frequently there are faint and dizzy spells, with loss of appetite, until life is a burden. All these symptoms point to a derangement of the female organism which can be easily and promptly cured by Lydia E. Pinkham's Vegetable Compound.

Miss Abby F. Barrows, Nelsonville, Athens Co., Ohio, tells what this great medicine did for her. She writes: "Dear Mrs. Pinkham—I feel it my duty to tell you the good Lydia E. Pinkham's Vegetable Compound and Blood Purifier have done for me. Before I took them I was very nervous, had dull headaches, pains in back, and periods were irregular, I had been to several doctors, and they did me no good. "Your medicine has made me well and strong. I can do most any kind of work without complaint, and my periods are all right."

"I am in better health than I ever was, and I know it is all due to your remedies. I recommend your advice and medicine to all who suffer."

It is to such girls that Mrs. Pinkham holds out a helping hand and extends a cordial invitation to correspond with her. She is daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women free of charge. Her long record of success in treating women's ills makes her letters of advice of untold value to every ailing working girl. Address, Mrs. Pinkham, Lynn, Mass.

PHOENIX WALKING CHAIR

From the cradle to the baby chair! HAVE YOU A BABY? If so, you ought to have a PHOENIX WALKING CHAIR.

AN IDEAL SELF-INSTRUCTOR. OUR PHOENIX Walking Chair holds the child securely, preventing those painful falls and bumps which are so frequent when baby learns to walk.

BETTER THAN A NURSE. The chair is provided with a removable, sanitary cloth seat, which supports the weight of the child and prevents bow-legs and spinal troubles; it also has a table attachment which enables baby to find amusement in his toys, etc., without any attention.

As indispensable as a cradle. It is so constructed that it prevents soiled clothes, sickness from drafts and floor germs, and is recommended by physicians and endorsed by both mother and baby. Combines pleasure and utility. No baby should be without one. Call at your furniture dealer and ask to see one.

MANUFACTURED ONLY BY PHOENIX CHAIR CO. SHEBOYGAN, WIS. Can only be had of your furniture dealer.
