CORSETS

Do you realize how much your appearance depends on your figure and carriage, how much easier and more economical it is to dress and look well if your frame is fitted with a Corset made to fit with comfort and style.

The term "Natural figure" which is so often heard nowadays in connection with the new Corset, should not mislead a woman into thinking that it means an uncorseted figure. That would be a dangerous fallacy. Physicians and Sergeons agree that the body requires support of a good Corset.

In the new Corset the bust slightly higher, at the waist it is perfectly flat, at the front and back and shows the curve of the figure at the side. The hips is the normal size. Under the new full skirts there is no need to submit to discomfort to reduce the hips and make them abnormally small, for the same reason the Corset is not cut as long as in former seasons.

We carry for your approval two widely advertised Corsets. The Gossard Corset which laces in front also The Madam Grace Corset in both styles, front and back lace. Our Spring shipment has just arrived which includes the new flesh shades.
