## CORSETS

Do you realize how much your appearance depends on  
your figure and carriage, how much easier and more economi-  
cal it is to dress and look well if your frame is fitted with a  
Corset made to fit with comfort and style.

The term "Natural figure" which is so often heard now-  
a-days in connection with the new Corset, should not mislead  
a woman into thinking that it means an uncorseted figure.  
That would be a dangerous fallacy. Physicians and Sergeons  
agree that the body requires support of a good Corset.

In the new Corset the bust slightly higher, at the waist it  
is perfectly flat, at the front and back and shows the curve of  
the figure at the side. The hips is the normal size. Under the  
new full skirts there is no need to submit to discomfort to re-  
duce the hips and make them abnormally small, for the same  
reason the Corset is not cut as long as in former seasons.

We carry for your approval two widely advertised Cor-  
sets. The Gossard Corset which laces in front also The Madam  
Grace Corset in both styles, front and back lace. Our Spring  
shipment has just arrived which includes the new flesh shades.
