PATTON, CAMBRIA CO., PA., FRIDAY, JUNE 2, 1916

\$1.00 PER YEAR IN ADVANCE

## FIRST AID MEET AT SUNSET PARK

A great furor was caused some years ago by the introduction of legislative measures to effect the conservation of natural resources, since then a step further has been made and people have awakened to the realization that the conservation of natural life and human resources should be kept a paramount aim.

Then followed a series of measures to raise the quality level of remedial legislation and one can trace the introduction of labor and its protection to through various phases. The people of Cambria county may truly commend themselves on the grand display of work and skill demonstrated at the afternoon of Monday May 29, at Sunset Park. Mr. Rembrandt Peale of the Peale, Peacock and Keer Coal company, personally financed the most elaborate First Aid Meet that has ever been held in the state of Pennsylvania. All participants and other officials of the meet were invited to be present at eleven o'clock, at which time dinner would be served, a crowd of about three hundred and fifty were expected, instead, when the dining room doors opened, and all were seated, it was a most gratifying sight to see four hundred and fifty eight men, men in all walks of life, men of all ages, the intermingling of all the men and the general spirit of good-fellowship which permeated the entire affair, was the keynote of its success. At one o'clock after a few selections of splendid music were rendered by the Sunset Park orchestra, the meet was called.

A portion of the park was roped off and arranged in the order of their teams fled into place. Each team consisted of a captain and five men. The problems were given in sealed envelopes to each captain, a signal from the timekeeper, Mr. Robert Lander, was given to the starter, Mr. William Grove, safety inspector for the P. P. & C. Company. At this signal the captains were permitted to open the envelopes and in each case two minutes were given for consideration of the problem, after which the work began. The problems were based on one hundred per cent with the following penalties:

Not doing the most important thing first, 6 points deducted; failure of captain to command properly, 1; slowness in work and lack of attention, 2; failure to entirely cover the wound, or ignorance of location of injury, 4; ineffective artificial respiration, 11; splints improperly padded and applied, 6; tight or loose or improperly applied bandage, 5; insecure, or "Granny" knot, 4; unclean first-aid material, 3; failure to have on hand sufficient and proper material to complete a dressing, 3; lack of neatness, 2; awkward handling of patient, 4; assistance lent by patient, 3; tourniquet improperly applied, 7; failure to stop bleeding, 8; not treating shock, 5; failure to be aseptic, 7; improper treatment, 12; failure to temporarily control hemorrhage previous to application of tourniquet, 7.

Absolute fairness and justice was attempted through all possible means, even to the extent that the doctor showed tears after each problem, that each doctor had an opportunity of judging each team.

One man problem—Time 10 minutes. Man is caught by fall of rock, receive small cut on palm of left hand, (arterial bleeding) cut on head three inches above right ear and has big toe mashed on left foot. Treat and assist to walk.

Two men problem—Time ten minutes. Man jumps from moving trip, trips and falls, has following injuries: cut on left eye lid and brow, deep cut on inside of upper arm, right, (bleeding in spurts) and simple fracture of left knee cap. Treat and use two men carry.

Three men problem—Time ten minutes. Man is found lying on electric wire (unconscious) rescue, perform artificial respiration. Treat burns on palms and fingers of both hands and bottom of left foot. Use three men carry for transporting.

Team problem—Time 15 minutes. Man is caught by fall of coal, has compound fracture (arterial bleeding) three inches above right knee and simple fracture of left collar

bone. Treat and carry on stretcher. Team problem—Time 15 minutes. Man is thrown from running trip, receive, the following injuries: Compound fracture of right upper arm (bleeding in spurts) four inches below shoulder, compound fracture of left ankle and simple fracture of jaw on left side. Treat and carry on stretcher.

For the teams that up to this point were tied for first place with a percentage of ninety-nine and one fifth, the following problem was dictated.

Two men problem—Time fifteen minutes. Man is caught by falling timber, receives simple fracture of both lower legs, three inches below the knees and compound fracture of left lower arm 2 inches above wrist showing bright red blood in spurts. Treat and carry on stretcher.

In the last three problems the particular test was made on the ability to apply splints. To protect the injured member. The scores were as follows.

Team	Total Score	Average
Windbourne	494	98.8
