Miss Colletta M. Cooper of this place attended the graduating exercises, as well as Mr. and Mrs. Henry Leiden of St. Lawrence.

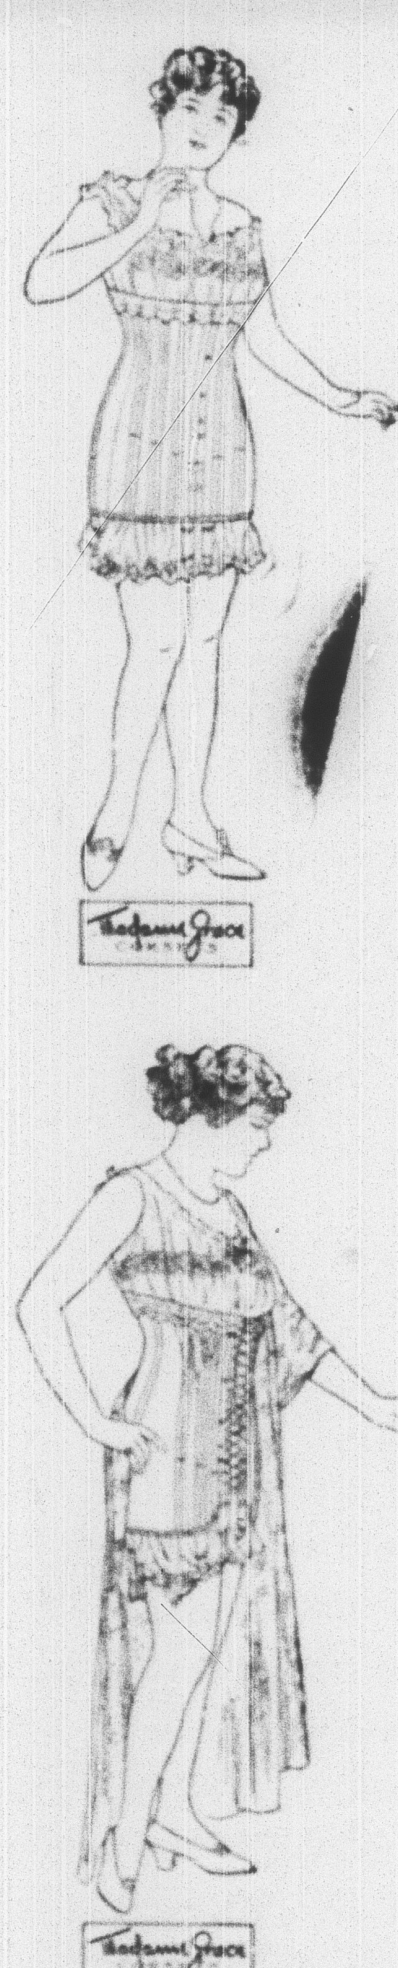

ENORMOUS SAVINGS BY USE OF HOG CHOLERA SERUM

Hog cholera serum, furnished free to the farmers of the State by the Livestock Sanitary Board of the Pennsylvania Department of Agriculture and has been the means of saving thousands of hogs each year and in reducing the mortality from the disease in the past five years from 95 per cent to 29 per cent. It is estimated that the value of the serum furnished each year, by the Livestock saved by its use is close to \$140,000.

The agents of the Livestock Sanitary Board acting in conjunction with the owners and licensed veterinarians of the State keep a close watch for all diseases of livestock and the hog cholera work is one of the big features. During the past year there were 16,650 hogs examined by the agents of the Board and 4,472 of these were found to show symptoms of cholera and beyond hope of saving by vaccination. During the year there were 12,450 animals vaccinated with the hog cholera serum and the number to die following the vaccination was 2,602. This death total shows the number of animals that died from all causes after vaccination, and in many cases death was not due to cholera.

In 1919 when the State began to make hog cholera serum on the State farm in Delaware county the percentage of deaths occurring among infected hogs was between 95 and 100 per cent, but with the serum treatment and attention to sanitary conditions the percentage has been gradually reduced, until today only about 29 per cent of the animals in infected herds are lost.

The Livestock Sanitary Board makes the serum on the State farm and produced during the past year 606,300 cubic centimeters of about 15,172 doses of the serum. There was in stock from the previous year 177,450 cubic centimeters and there was, used during the year 652,950 cubic centimeters. While the market price of hog cholera serum is somewhat higher, a fair average is two cents a cubic centimeter, and the value of the serum furnished the farmers of the State during the year was \$13,041.00. In addition there were almost 10,000 hogs saved by the use of the serum in vaccinations.

CORSETS

Do you realize how much your appearance depends on your figure and carriage, how much easier and more economical it is to dress and look well if your frame is fitted with a Corset made to fit with comfort and style.

The term "Natural figure" which is so often heard nowadays in connection with the new Corset, should not mislead a woman into thinking that it means an uncorseted figure. That would be a dangerous fallacy. Physicians and Sergeons agree that the body requires support of a good Corset.

In the new Corset the bust slightly higher, at the waist it is perfectly flat, at the front and back and shows the curve of the figure at the side. The hips are the normal size. Under the new full skirts there is no need to submit to discomfort to reduce the hips and make them abnormally small, for the same reason the Corset is not cut as long as in former seasons.

We carry for your approval two widely advertised Corsets. The Gossard Corset which laces in front also The Madam Grace Corset in both styles front and back lace. Our Spring shipment has just arrived which includes the new flesh shades.

Chas. F. Pitt Co.

Patton, Pa.

YOUTH KILLED BY BEING THROWN HEADLONG FROM MOTORCYCLE WHILE TRAVELING AT HIGH SPEED

Skull Apparently Fractured and Neck Dislocated By Impact

Meyersdale, July 2.—Fred Bittner, aged 21, a miner residing at Boynton, died at 9:30 o'clock this morning while in an unconscious condition, the result of injuries sustained last evening in being hurled from his motorcycle on the roadway near Shaw Mines, about half way between Meyersdale and Baynton. The young man was picked up unconscious and never rallied from that condition. He is survived by his parents, Mr. and Mrs. William Bittner of Boynton; three brothers and three sisters. His funeral will probably be held Tuesday, with interment at Salisbury.

Mr. Bittner was driving his motorcycle at between 50 and 60 miles an hour when the accident occurred. A car on the Pennsylvania & Maryland Street Railway Company line was near when the motorcycle threw its rider. The car was stopped and the crew and several passengers hopped off and carried the unconscious man aboard. The victim of the accident was taken to his home in Boynton and medical aid summoned. Dr. W. T. McMillen of Meyersdale and Dr. P. L. Swank of Salisbury responded and did everything possible for Mr. Bittner.

The accident happened at a point where the state road ended. The grade of the state road is a bit different from that of the township highway and near where one ends and the other begins is a small sand dune, it was said. It was when the motorcycle hit this sand that Mr. Bittner lost control of his machine. The young man was hurled 25 or 30 feet and landed on the back of his neck.

The physicians found an abrasion on the side of the head and indications of skull fracture. There were reports that a piece of the fractured skull had pierced the youth's brain, but this was not verified. The physicians found Bittner's condition such that they decided it inadvisable to attempt too much exploration to determine the exact nature of the injury. There were indications also of dorsal dislocation, his vertebra being completely paralyzed. When Bittner was first examined his pulse

SIX COUNTIES PRODUCE OVER ONE-THIRD OF WHEAT CROP

Over one-third of the wheat grown annually in Pennsylvania comes from the six great agricultural counties, Lancaster, York, Franklin, Berks, Cumberland and Chester. From present indications wheat in these counties is reported in splendid condition and splendid crops are expected.

Lancaster is the largest wheat producing county and the average condition of wheat there is said to be 100 per cent. In York county the condition is reported at 102 per cent compared with an average while in other counties the reports show Franklin, 96 per cent; Berks, 104 per cent; Cumberland, 98 per cent; and Chester, 98 per cent. These six counties produce over 9,000,000 bushels of wheat annually and the

SUMMERHILL MAN'S JAW FRACTURED BY A HORSE

Gallitzin, July 1.—Harry Watts, a well-known citizen of Tunnelhill, is in the Altoona Hospital recovering from injuries sustained when he was kicked by a horse. Mr. Watts is employed at the mine of the Tunnel Coaling Company and noticing a stray horse about the works, he attempted to chase it away, but the animal kicked and struck Watts in the mouth fracturing the jaw bone and lacerating his face. He was given first-aid treatment and rushed to the hospital and at the present is getting along as well as could be expected.
