## AN AMERICAN PEACE

There can be no peace with honor or safety to ourselves or to posterity, except a just peace, and there can and will be no other peace. Work for peace accomplishes nothing but the hampering of our effort, the delay of the real peace, and a greater toll of death of America's fighting men. Our duty is to war for a just and righteous peace; to work or speak for any other peace is aid and comfort to Germany—injury and disloyalty to our boys in France.

## GERMANY FURNISHES THE PROOF

Every development since our entry into the war has justified and proved the wisdom, the imperative necessity of America's participation. Every German success and every German failure have shown how necessary to our own welfare and peace, how necessary to the safety and peace of the world the defeat of Germany is. Every foot of ground Germany has been forced to give up, every foot of land she has seized, have demonstrated the absolute necessity of defeating that sinister, intolerable thing called Germanism.

## LEND—NOT SPEND—YOUR MONEY

If you lend your money to the Government, you may be quite sure that it is going to be used for some national purpose—to prosecute the war successfully, to care for, equip, arm, and supply our soldiers in France, to be used by our Navy in ridding the seas of the murderous U boats.

But if you spend your money even with the belief that by putting it into the channels of trade others into whose hands it comes will lend it to the Government, you will have done something the patriotism of which may be very questionable.

First you have withdrawn from the supply of material of the Nation something to replace which in the market will require labor and material which should be devoted to war purposes.

Second, the person to whom you pay your money may also use it to purchase things requiring material and labor which should be devoted to war purposes. And the person to whom he pays it may repeat the operation.

But when you lend your money to the Government instead of spending it, you will at once lessen the drain to a certain extent on our country's resources, its material, its labor, and its transportation facilities, and in addition you supply your Government with money to be used in winning the war.

Every purchase of a Liberty Loan Bond is an individual act toward bringing victory to America and her allies.

## HE SOUGHT CURE WITHOUT AVAIL

Suffered Severely From Indigestion But Master Medicine Restored Him to Health

"I owe my restoration to health to Tanlac," says William Dunstan, of 1536 Allen St., Allentown, Pa. "I urge anyone suffering from any form of indigestion to take this Master Medicine."

"I was in very bad shape—not sick, but utterly miserable all the time. My appetite was gone and whatever I ate gave me much severe indigestion that a burning would rise in my chest and seem to choke me."

"I tried all kinds of medicine but nothing gave me any relief and I kept getting weaker all the time from lack of nourishment and nervous strain. Since taking Tanlac, my appetite has come back, the pains over my kidneys have disappeared and I now go to the table and eat like a wood-chopper without suffering the slightest discomfort or distress afterward. Tanlac is certainly a wonder-worker." Tanlac, the famous reconstructive vegetable tonic is now sold here by G. A. GUNN, druggist.

## TREATMENT OF OATS AND BARLEY FOR SMUT AND POTATOES FOR SCAB

It is very essential that we do everything possible to increase the production of farm crops this year. Unquestionably one of the easiest and simplest ways of increasing this production is by eliminating the losses due to insects, fungus and bacterial diseases that attack the various farm crops. We should not omit this year to give all of our seed oats and seed barley the formalin treatment for the control of smut. The treatment is to take one pint of forty (40) per cent formalin and dilute this with forty gallons of water. Place the seed oats or seed barley in a round head on a tight floor. Sprinkle the seed thoroughly with the diluted solution of formalin, turning the seed until it has been thoroughly saturated with the solution, from top to bottom. Cover the seed with old sacks or blankets

over night, whichever may be most convenient. Then spread the seed out thinly on the floor stirring a few times while drying. After the seed has been thoroughly dried it can be returned to the bin or put in sacks and held until time to plant. If the seed is returned to the bin or to sacks the bin should be disinfected by the use of formalin. With the weather conditions such as they are at the present time every farmer should have sufficient time to get his seed oats and barley thoroughly disinfected and ready for seeding time when it arrives.

The potato scab is controlled by the use of 40 per cent commercial formalin also, diluted in thirty gallons of water. The potatoes are allowed to soak in this formalin solution for two hours when they should be taken out and dried. They can then be held until planting time comes. This disinfectant should be put on the potatoes before the sprouts start on the young sprouts if it is delayed until later.
