How would YOU like a raise like this?

—and for 34 Years Work

THAT is the kind of increase in salary the minister has received. His living expenses have risen just as fast and as far as yours.

But he is paid on the average just 52 cents more per church member than he was paid 34 years ago.

#### The Minister Never Fails You

Every officer of the Government with a war message to deliver appealed to the ministers first of all.

But 80% of the ministers receive less income than government economists figure as a minimum for the support of an average family.

When hospitals need money they enlist the support of the ministers—and receive it.

But when sickness visits the minister or the members of his family they must be treated in a charity ward. His pay is less than a day laborer's.

8 out of every 10 ministers receive less than \$20 a week—about half the pay of a mechanic.

#### We Pay Him Half the Wages of a Mechanic

And of these pitifully inadequate salaries, how much do you contribute? Nothing if you are outside the church; an average of less than 3c a day if you are a church member.

All of us share in the benefits of Christian ministers to the community. They marry us; bury us; baptize our children; visit us when we are sick. In their hands is the spiritual training of the youth.

#### We Are All Profiteers at Their Expense

Part of the Interchurch World program is this—a living wage for every minister of Jesus Christ; an efficient plant, and a chance to do a big man's job.

If you want better preachers, help to pay the preachers better. It's the best investment for your community—and for your children—that you can ever make.

# “Properly Fitted”

There's a wider meaning in those two words than has occurred to you, perhaps. For instance, if the glasses you are now wearing fail to give complete relief, it is probably because their lenses do not put the nerves of the eyes, as well as the muscles of the eyes to rest.

The trained optometrist knows this condition and gives it full consideration. He not only provides lenses that balance the sight of each eye with the other, but he also makes sure that those same lenses put at rest the delicate nerve-and-muscle machinery that controls your sight. Then, and then only are your eyes “properly fitted.”

OUT-OF-TOWN PEOPLE MAY MAKE APPOINTMENT BY MAIL OR TELEPHONE.
